TO MY
KURDISH FRIENDS

PREFACE

THE study of Kurdish has a longer history than that of most modern Iranian languages. Yet, although it early became clear that the dialects of Kurdish differed considerably from one another, no attempt has previously been made to classify them. These studies are accordingly intended to point both the feasibility and the necessity of some classification. To this end, a descriptive sketch is given of the grammar of a series of dialects from central Kurdistan, some of them treated for the first time here, and an attempt is then made to group the dialects systematically.

My introduction to Kurdish, in 1951, I owe to Mr. C. J. Edmonds and it is a pleasure to record my gratitude to him for his help and encouragement at all times. The award of a most generous Studentship, 1953-5, by the Committee for Studentships in Foreign Languages and Cultures of H.M. Treasury made it possible for me to visit Iraq and to record new linguistic material. In Iraq my work was lightened by the liberal help and interest of so many Kurds, of all stations in life, that to mention all here would be impossible. I must, however, express my special thanks to Messrs. Fuad Reshid Bekr and Hasan Husein of Suleimaniye and Hashim Haji Hasan of Akre for their continued interest and co-operation.

Beside published works, and my own notes, I have occasionally made reference to the manuscript material collected by Oskar Mann. I am particularly grateful to the Directors of the Akademie der Wissenschaften und der Literatur, Mainz, and the Institut für Orientforschung of the Deutsche Akademie der Wissenschaften zu Berlin for so generously placing this material at my disposal.

The basis of this work was approved by the University of London for the degree of Ph.D. in 1957. Professor W. B. Henning acted as supervisor of my research, and I am profoundly grateful to him for his munificent advice, criticism, and help both then and since.

It remains only for me to acknowledge my great debt to the School of Oriental and African Studies for accepting this work for the London Oriental Series and for meeting the cost of publication.

The texts which complement these studies are to be published shortly in the same Series under the title *Kurdish Dialect Studies II*.

INTRODUCTION

Brevis esse laboro . . .

THE survey of Kurdish dialects which follows is based primarily on material gathered during a visit to Iraqi Kurdistan in 1954-5. Only in the case of the Suleimani dialect has it been possible to supplement this material where necessary with examples from printed sources.

It was originally intended to spend an equal period of time in the Kurdish-speaking areas of Turkey and Iraq. In the event, permission not being forthcoming from the Turkish authorities, some ten months were spent in northern Iraq, between Halebjé and Zakho (Map B). From the towns of Suleimaniyé and Akre as bases visits were made to the centres of as many dialect areas as could profitably be covered in the time available.

Where possible the linguistic notes made were supported by connected texts, either taken down directly from dictation or recorded on magnetized tape and then transcribed. Inevitably these texts are of unequal value, according both to the nature of their authors and to the possibility of checking them. However, of the texts transcribed without the assistance of the authors those from *Barwāri-šōr* are the only ones presented about which any serious doubt remains.

Throughout the history of Kurdish dialect studies it has been notoriously difficult to find trustworthy informants, even *in situ*. Thus Chodzko's informant in Paris was an aristocrat better acquainted with Turkish and Persian than with his mother tongue; Prym and Socin were obliged to obtain most of their Kurdish texts from an Aramaic-speaking Christian and an itinerant Jewish story-teller; Makas's Mardini Kurd, who had travelled for years in Eastern Europe, was telling stories he had heard twenty years before; even in recent years the authors of the Kurdoev-Cukerman texts were refugees who had arrived in the Caucasus by stages from various parts of Turkey.

The same difficulty was encountered in Iraq in certain cases. Thus the author of the main *Bingirdî* text (Bin. 314-79), a man of about twenty-five years of age, had lived for about one year in

Piṣḍar; the *Xōlnāw* speaker, some forty years old, had worked for a dozen years in cosmopolitan Arbil; the *Sūrṭi* speaker, well past his fiftieth year, had lived for the past two years on the outskirts of Akre; the forty-year-old *Gullī* informant had lived for about ten years in Zakho.

A new factor disturbing dialectal purity is the spread of the 'official' Suleimani dialect throughout its home province and neighbouring Arbil. Thus the *Wārmāwa* (War. 188-207), *Bingird* (Bin. 299-313) and Arbil speakers had all either attended school or done their military service, and adopted certain Suleimani forms as a result. In the main, however, the pure dialect forms are clearly discernible in all the texts.

As the majority of the dialects treated here have not been recorded or described hitherto, the material is presented in the form of a descriptive grammatical sketch. On the basis of this description the features distinguishing the different dialects are then summarized. In the description the dialects are divided into two *ad hoc* groups purely for convenience. Not unnaturally, however, this division will be found to coincide in general with the grouping into Northern and Central dialects adopted in the summary. In the two groups the two dialects best represented, viz. Suleimani and Akre, are taken as the basis of the description, the other dialects being described only in so far as they differ from these. Where possible the dialects have been quoted in the following, approximately geographical, order:

Group I. Suleimani	Group II. (<i>Sūrṭi</i>)
<i>Wārmāwa</i>	Akre
<i>Bingird</i>	Amadiye
<i>Piṣḍar</i>	<i>Barwārt-Ṭḥr</i>
<i>Mukri</i>	<i>Gullī</i>
Arbil	Zakho
Rewandiz	(Sheikhan)
<i>Xōlnāw</i>	

Throughout, the words 'the . . . dialect(s) alone', or the like, naturally imply 'alone of those here studied'.

Of previous descriptions of these and neighbouring dialects the following, which have appeared within the last hundred years, alone merit attention.

INTRODUCTION

For the Suleimani dialect the first sketch is that of Chodzko. It is inaccurate in a number of details, some of them hard to explain (e.g. رن *reni* 'fox', for *fēwī*), but suffers most from the deficiencies of the informant. His frequent, but not constant, pronunciation of *r* for *l* might be explained as an aristocratic peculiarity (cf. § 14), or as a non-Suleimani form, hardly as an older dialect form.

Both the grammars of Soane give a highly subjective description of the language. Many forms given are divorced from reality (e.g. the paradigms of intransitive verba in the past tenses, conjugated here as if transitive) and there would be little point in making reference to these details merely to correct them. Even the vocabulary is suspect, in that a great deal of it has been taken uncritically from disparate sources.¹

Edmonds's description, unfortunately not yet in print, was made available to me by the author as an invaluable introduction to the study of Kurdish. My description of Suleimani, although it may differ in the manner of presentation, is essentially the same as that of Mr. Edmonds. Only where he intentionally errs, from the point of view of dialect purity, in favour of normalization has it been necessary to note the divergence.

The most recent description of a single Kurdish dialect is that of Dr. McCarus. His *Descriptive Analysis of the Kurdish of Sulaimaniya* is an interesting exercise in modern linguistic description. It is regrettable, therefore, that the writer soon parts company with fact and never fully regains touch.² As an analysis of the dialect its value is thus somewhat impaired.

The grammars written by Kurdish scholars are of another stamp, being primarily prescriptive in character. An early attempt is that of Sa'id Sidqi. Although his analysis is somewhat naïve, and leans towards the Arabic grammatical system, the result is an honest and useful description of the Suleimani dialect at a time shortly after its rise to the dignity of an official written language.

Ta'isfiq Wahbi's first grammar, published in the following year, is more scientific in character. The writer is, however, concerned to purge the language of its non-Kurdish elements and is accordingly prone to theorize. For this reason he must be followed with caution.

The most recent work is that of Nūrī 'Alī Amin. Although more

¹ e.g. the ghost-word *purs* 'pig', cf. Benveniste, *BSL*, XLV. 88.

² See my detailed review in *BSOAS*, XXII. 591.

ambitious, and showing an acquaintance with English grammatical terminology, it could be described *mutatis mutandis* in almost the same terms as *Sidqi's* earlier work. A comparison of the two books gives a valuable idea of the neologisms which have been introduced into the dialect in the course of the last thirty years of development.

Mann's grammatical sketch of the *Mukri* dialect is quoted throughout for the sake of comparison with the neighbouring *Sörani* dialects. Any disagreement with Mann's description is specifically noted. Fossum's grammar of the same dialect, with its attachment to the written form, adds nothing to Mann's analysis.

Of the *Badrân* dialects Jardine's short grammar gives a quite accurate basic description. Covering as it does, however, some half-dozen dialects it is not a suitable source for our purposes. Beidar's grammar of the *Zakho* and neighbouring dialects is entertaining but useless. Indeed, without a good knowledge of the dialect it is almost impossible to interpret the texts given in 'transliteration'.

Rhea's sketch of the *Hakari* dialect is accurate but, although this is nowhere stated, it bears unmistakable signs of representing two or more dialects, presumably those of the *Gewer* and *Urmiye* areas in the first place.¹

There remain the more derivative descriptions of Kurdish in *Justi's* grammar and *Socin's* sketch in the *Grundriß der Iranischen Philologie*. Both scholars were severely limited by the information at their disposal. For the dialects covered here only *Chodzko's* material, discussed above, was available.

Apart from grammatical descriptions there are two sets of texts which can be quoted. The texts from *Nehri*, southern *Hakari*, published by *M. Nikitine*, being in the Persian script, give a good idea of indigenous 'phonemic theory'. At the same time they suffer from the limitations of the script and to some extent require interpretation. They can, therefore, only be quoted here in cases of certainty. It is hoped to publish other material from this source, with a full commentary, at a later date.

The 'Kurdish Songs' of *Dr. Mokri* are mainly important for the information they provide concerning the lesser-known dialects of southern, Persian, Kurdistan. Nevertheless, the few *Suleimani* and *Mukri* songs given provide useful corroborative evidence.

¹ e.g. 'Ayautin or Aeutin or kaftin, v. fall', 'khin or Ahon [i.e. *xûn : xûn], n. blood'.

INTRODUCTION

As it was found impossible to visit eastern Turkey no new material could be obtained concerning the Kurdish dialects of that area. While there is quite a large number of published Kurdish texts from the area—those of Dufresne (*Jl. As.*, 1910), Egiazarov (Tiflis, 1891), Hadank, Jaba, Kurdoev-Cukerman, Le Coq, Lerch, Lescot, Makas, Prym-Socin, &c.—they are extremely unequal in a number of particulars and, above all, lack uniformity. To have included a description of them, with the necessary *apparatus criticus*, would have enlarged this survey disproportionately.

Fortunately valuable evidence relating to these dialects has recently come to light. The material collected by Oskar Mann in the course of his 1906-7 journey from Aleppo to Moaul, via Urfa, Siverek, Diyarbakir, Bitlis, Jezire, and Dohuk, has mostly survived the upheavals of the Second World War and is now divided between the Akademie der Wissenschaften und der Literatur, Mainz, and the Institut für Orientforschung of the Deutsche Akademie der Wissenschaften zu Berlin. This material provides a valuable unifying link between these Kurdish texts from Turkey and, moreover, records the dialects as they were before the displacement of Kurdish tribes which followed the First World War. The publication of Mann's material will provide the opportunity to reassess the texts mentioned above.

Apart from the dialect texts quoted there have recently appeared two indigenous grammars of northern Kurdish, those of Bedir-Xan and Kurdoev. Both are normalized and as such do not provide an ideal source of information for a dialect study. However, they are cited parenthetically in the description of the *Bādīnānī* dialects when they give features common to the Kurdish dialects of Turkey and the Caucasus, but contrasting with *Bādīnānī*.

The studies of Cukerman, Miller, and Sokolova are highly specialized and largely deal with dialects beyond the scope of this survey. The same can be said of Barr's description of Andreas's southern Kurdish texts. These latter have been expressly excluded from this survey because of the lack of sufficient new evidence. This is now provided, however, by Mann's manuscript material and will also be the subject of later work.

PART I

PHONOLOGY

A. DIALECTS OF GROUP I

SULEIMANIYE DIALECT (Kd. *Silaymāni*)

Phonemic System

§ 1. The Sul. dialect has the following phonemic system of twenty-nine consonants (including two semi-vowels, and with one important additional allophone)¹ and nine vowels:²

	<i>Labial</i>	<i>Dental, Alveolar</i>	<i>Palato- alveolar</i>	<i>Velar</i>	<i>Uvular</i>	<i>Pharyngeal</i>	<i>Glottal</i>
Stop and Affricate	<i>p</i> <i>b</i>	<i>t</i> <i>d</i>	<i>tʃ</i> <i>ʃ</i>	<i>k</i> <i>g</i>	<i>q</i>		<i>h</i>
Fricative	<i>f</i> <i>v</i>	<i>s</i> <i>x</i>	<i>ʃ</i> <i>ʒ</i>	<i>x</i> <i>ɣ</i>		<i>ħ</i>	<i>ʕ</i> ³
Nasal	<i>m</i>	<i>n</i>		<i>ŋ</i>			
Lateral Vibrant		<i>l</i> <i>r</i>	<i>l</i> <i>ɾ</i>				
Semi-vowel	<i>w</i>	<i>(ɔ)</i> ¹	<i>y</i>				

¹ See § 37.

² Although this dialect has for some years been the vehicle of Kd. publications in Iraq the modified Arabic script now generally used represents not this, but an 'ideal' Sul. dialect with the phonemic system of the Piḏ., Muk. dialects (q.v. § 78).

³ See § 33.

Consonants

Labial

§ 2. *p* is normally a voiceless, aspirated, bilabial plosive [pʰ].

§ 3. *b* is a voiced, unaspirated, bilabial plosive [b]. In secondary contact with a following voiceless consonant it may be devoiced [b̥], e.g.

biḥam [tʰi: b̥k'am]

§ 4. *f* is a voiceless, labio-dental fricative [f].

§ 5. *v* is a voiced, labio-dental fricative [v]. It is extremely rare, occurring mainly in such sound-imitative words as *gic(v)a* 'whirr' and by assimilation, as in

ḥavda [ḥav'va] < **ḥafda* *iḍga* [tʰ:v'ga] < **iḍfga*

§ 6. *m* is a voiced, bilabial nasal [m].

Dental and alveolar

§ 7. (a) *t* is normally a voiceless, aspirated, dental plosive [tʰ]. It has two other allophones of restricted occurrence.

(b) The 'euphonic' final consonant of the 2nd and 3rd Sg. verbal endings (v. § 208 (c)) is unaspirated [t]. When in pause, or followed by an initial consonant, the plosive is not released.

(c) The *t* of the 2nd Sg. pronominal suffix *-(i)t* (v. § 197) may be realized as the unaspirated stop [t] or, more commonly, as a continuant [ɖ] (v. § 37). In view of this unpredictable alternation the continuant allophone may, where necessary, be written *f*, e.g.

biḡirim [biḡi:grim] ~ *biḡirim* [biḡi:grim]

ḥiḡird [tʰi:ɖk'ird] ~ *ḥiḡird* [tʰi:ɖk'ird]

Following *i*, *u* in final position this *t* is frequently not realized, e.g.

sēwēki(t) adamē [se:we:k'i(t) a'qarnē]

mirdū(t) mirē [mīr'du: mīrē]

It is assimilated by a following nasal or lateral, e.g.

nānārīm [na:n,na:sīm] *ḥiḡird* [tʰi:lil: k'ird]

§ 8. *d* has two regular allophones.

(a) In initial and postconsonantal position it is normally preserved as a voiced, unaspirated, dental plosive [d], e.g.

dast [dast'] *dāyk* [dā:ik']
nāzda [nā:z'da] '19' *kird* [k'ird]

Note, however,

bayd 'Baghdad' *yāzra* '11', &c.

(b) In inter- and postvocalic position it is normally realized as the continuant [ɖ] (v. § 37), e.g.

āmāda [ā:mā:ɖa] *nāwōdār* [nā:u'wā:r]
libād [li'bā:ɖ] *bad* [bāɖ]

It may, however, be lost entirely, e.g.

bādam, *bām* [bā:'dam, bā:'am] *mawla* [mau'lu:] Ar.
matolād

(c) Following *m*, *n*, *l*, *v*, *y*, it is assimilated, e.g.

zāmdār [zā:m'mā:r] *birindār* [bri:n'nā:r]
dildār [di'l'dā:r] *havda* [hav'va] *maydān* [mej'dā:n]

§ 9. The *d* of the verb *dān* 'to give' is exceptional in that it behaves in almost all positions as medial *d* (v. § 8 (b, c)).

(a) Normally it is realized as the continuant [ɖ], as a semivowel, e.g.

dāya [dā:ɖe] *adāte* [adā:'te:]

or as a vowel, e.g.

hal dirāwa [halā'rā:wa]

Between two vowels it may, however, be lost, e.g.

a(d)āte [adā:'te:] *b(id)arāwa* [b'arawa] *n(ad)āte* [nā:ɖe]

(b) In proximity to *y*, *i*, *ē*, *ay*, it may be realized as [j],¹ e.g.

dāya [dā:jɛ] *nādayn* [nā:ɖejn] *firē dayt* [firē'ejt]

(c) It is assimilated by preceding *m*, *n*, *l*, *y*, e.g.

bimdarē [bimmare:] *amāndāte* [amā:nā:'te:]
tēy hal dan [tē:j hal'dan] *aydam* [ej'dəm]

¹ Cf. the realization of the initial *d* (with, however, medial position) in the following fixed, obscene, phrase: *la qaz dāyk(i) bīm* [la q'azi: jā:ik'i bīm].

Only following *t* is the plosive realization [d] preserved, e.g.
atdātē [atdā:tē:]

§ 10. (a) *s* is normally a voiceless, alveolar fricative [s].

(b) In three words only this normal realization alternates with an 'emphatic' alveolar fricative [ʂ], the Ar. *ص*, viz.

sad [sə, sʂə] '100', cf. NP. spelling صد

fast [fəst, fəstʂ] '60', cf. NP. spelling شصت

sag [səg, sʂəg] 'dog', cf. Ak. *sa* (v. § 118).

This need not be considered as more than a phonetic variant.

§ 11. *x* is a voiced, alveolar fricative [z].

§ 12. (a) *n* is normally a voiced, dental nasal [n]. In *injā* alone it may be vocalic ['ndʒa:] (v. § 41 (a) fn.).

(b) [n] does not, apparently, occur before a velar plosive, the only nasal in this position being [ŋ], e.g.

[guliŋ'k'a, milwə:ŋ'k'a, fiŋ'gax]

A separate phoneme *ŋ* exists (v. § 24) and [ŋk, ŋg] might accordingly be taken simply as phoneme groups **ŋk*, *ŋg*. They are often, however, demonstrably realizations of *n+k*, *g*, e.g.

a-+yān+kird [ejə:ŋ'k'ird] *bōn ka* [bɔ:ŋk's]

bān+guš [bɔ:ŋ'guš]

and there is no objection to considering them as *nk*, *ng* respectively in all contexts. No ambiguity is caused thereby. The velar nasal [ŋ] before a homorganic plosive is, therefore, an allophone of *n*, the examples above representing:

gulinka, milwānka, Šingār

The group *ng* is, however, often reduced to [ŋ] *ŋ*, e.g.

**āsingar* > *āsinar*

§ 13. *l* is a voiced, dental, lateral non-fricative [l].

§ 14. *l* is a voiced, velarized, dental lateral [ɭ]. It does not occur in initial position.

With some, rare, speakers it appears to be realized as a retroflex lateral [ɭ]. Some women speakers (perhaps affectedly) replace *l* by *r* (cf. § 98).

§ 15. *r* is a voiced, alveolar single flap [ɾ]. It does not occur in initial position. It may be assimilated by a following lateral, e.g.

har la ['halla]

§ 16. *ɾ* is a voiced, alveolar roll or trill [r].

Palatal

§ 17. *ɕ* is a voiceless, palato-alveolar affricate [tʃ].

§ 18. *ʃ* is a voiced, palato-alveolar affricate [dʒ].

§ 19. Apart from the symmetry introduced thereby into the phonemic system (v. § 1) the consideration of *ɕ*, *ʃ* as unit phonemes rests on the nature of their relation to other consonant groups. Thus (v. § 56):

(i) Other possible affricate groups, such as *pf*, *kx*, do not occur at all. *kɕ*, *pɕ*, *bɕ*, and *ʃt* occur in initial position only as a result of secondary contact.

(ii) No groups of three consonants occur in initial position except [tʃk', tʃq, tʃl, tʃw, dʒg, dʒw, dʒj]. In medial position no three-consonant groups beginning with a stop occur beside [tʃk', tʃq, tʃm, tʃr, dʒg]. In final position no three-consonant groups occur apart from [ndʒ, ɾtʃ, rdʒ].

In each case the interpretation of [tʃ, dʒ] as *ɕ*, *ʃ* respectively obviates the exception.

§ 20. *f* is a voiceless, palato-alveolar fricative [f].

§ 21. *ʒ* is a voiced, palato-alveolar fricative [ʒ].

Velar

§ 22. *k* is normally a voiceless, aspirated, velar plosive [kʰ].

§ 23. *g* is a voiced, unaspirated, velar plosive [g].

§ 24. (a) *ŋ* is a voiced, velar nasal [ŋ]. It never occurs in initial position.

(b) In *qŋ* alone is it vocalic [qŋ]. In certain numerals only, in the context *ɳŋx* (v. § 193), the tongue dorsum does not touch the velum, the result being a nasalized frictionless continuant [ŋ̃] (and not a simple nasalization of the preceding vowel), e.g.

yɳŋxa [jɳ̃ːŋ̃ːxa]

(c) When [ŋ] is followed, as occasionally happens in medial position, by a velar plosive it may be considered as an allophone of *n* (v. § 12 (b)), e.g.

[bā:ŋ] *bāŋ*, but [bā:ŋ'gu] *bāngu*

§ 25. *k*, *g*, and *ŋ* are all strongly palatalized by a following front vowel or the semi-vowel *y*, thus:

kē ['c'e:] *goz* [jœz] *ʔaŋē* ['raŋ'e:] (not ['raŋe:])

In the case of *k*, *g* this leads, but very rarely, to a vulgar pronunciation of *k(y)*, *g(y)* as affricates approaching [tʃ, dʒ].

§ 26. *x* is a voiceless, velar fricative [x].

§ 27. *ɣ* is the corresponding voiced, velar fricative [ɣ]. It occurs comparatively rarely.

Post-velar

§ 28. *q* is a voiceless, uvular plosive [q]. It is not normally aspirated except before *u*.

§ 29. *ħ* is a voiceless, pharyngeal fricative [ħ].

§ 30. ' is a voiced, pharyngeal fricative [ʕ], less tense than the corresponding Ar. ع.

§ 31. Both *ħ* and ' appear in Kd. words in place of etymological *h* and [ʔ] (v. § 33). The incidence of *ħ* is regular, e.g.

ħawē 'seven' *ħix* 'lecher'

but ' alternates almost freely with [ʔ], especially in initial position, e.g.

āsmān ~ 'āsmān 'heaven' *am(m)ār* ~ 'amār 'granary'

and in words of Ar. origin,

amr ~ 'amr 'order; age' *qur'ān* ~ *qur'ān* 'Coran'

§ 32. *h* is a voiceless, glottal fricative, a full aspirate [h].

§ 33. (a) [ʔ], the glottal stop, occurs only in initial position before vowels, under the following conditions:

(i) Following a pause, or a final vowel, an initial vowel other than *ē* (v. § 43) is normally preceded by [ʔ]. The modal prefix

a- (v. § 206 (a)), however, is generally only so preceded after a pause. Thus:

bō aw [bq: 'ʔau], but *bō aykay* ['bq: ɟk'ej]

(ii) Following a final consonant, the conjunction *and*, the *Izafē* *i* (v. § 183), and the prepositions *baraw*, *la*, an initial vowel is generally not preceded by [ʔ]. The appearance of the glottal stop in these contexts indicates 'careful' or 'emphatic' speech.

The glottal stop does not occur intervocalically, even at a morpheme juncture, thus:

ahāt [ʔa'hq:t'], but *naahāt* ['naa,hq:t']¹

(b) The glottal stop is thus not a distinguishing feature of any utterance and cannot be considered as a consonant phoneme of Kurdish. It does occur, however, in a few unassimilated loan-words from Arabic, and is then written as ' , e.g.

sū'āl 'question', beside *naāl* 'begging'

Semi-vowels

§ 34. *w* is a bilabial (back) frictionless continuant [w]. When it is followed by a front vowel there is a slight fronting of the tongue, giving [w > ɥ].

§ 35. (a) *y* is a palatal (front) frictionless continuant [j].

(b) Between vowels the realization of *y* is sometimes almost imperceptible, e.g. *-āya-* [-a:'j-], particularly in the contexts *i*, *ē*, *o-y-a*, *ā*, e.g.

kursiyak [k'ur'si:ɟk'] *dīyān* ['di:ɟ:n] (v. § 60)

dēyak ['de:ɟk'] *lēyān* ['le:ɟ:n]

goyak [gɔ:ɟk'] *goyān* [gɔ:ɟ:n]

§ 36. Many speakers regularly substitute the group *wē* for *yō* in initial or medial position, e.g.

yōnān > *wēnān* 'Greece' *bālyōz* > *bālwēz* 'ambassador'

milyōn > *mīlwēn* 'million' *qarawēla* < Tk. *karyola* 'bed'

tanturwēt < Fr. 'teinture (d')iode'

¹ The Sul. Kd. orthography has *j* before all vowels in initial position, and even medially, thus *نه هات، نه هات، نه هات*, rather than *ناهات، ناهات، ناهات*. This seems to be an unnecessarily misleading adaptation of the Ar. script.

The group $\alpha\bar{e}$, of *other origin*, may alternate with \bar{o} in certain contexts (v. § 44 (b)).

§ 37. [ɔ], an allophone of t and d (v. §§ 7, 8), is a half-close, central continuant, accompanied by a raising of the tip of the tongue towards the position of realization of a dental stop.

Vowels

§ 38. (a) Of the nine vowel phonemes three, a , i , u , are 'short'. i (v. § 41 (c)) is particularly unstable.

(b) The phoneme \bar{o} is exceptional, being realized as a diphthong (v. § 44). The remaining 'long' vowels, \bar{i} , \bar{e} , \bar{a} , \bar{o} , \bar{u} , are normally stable, but may be shortened in final, unstressed position. Only in the case of \bar{a} is there any possibility of confusion with another phoneme, viz. a .

§ 39.

§ 40. \bar{i} is a very close, front vowel [i:], or shorter [i·] in final, unstressed position. In unstressed position preceding another vowel it may be reduced to [j], e.g.

xistîa baxalî [xist'jɛ bɔ:'xali·]

§ 41. *i* has two normal allophones, and may also alternate with zero.

(a) In initial position in a word¹ or syllable, or in contact with the semi-vowel *y*, it is a half-close, front vowel [ɪ] (v. § 60), e.g.

ist [ɪst'] *dsāist* [a:sa:ɪst']

(b) In medial² or final position in the syllable it is a half-close, front-central [i], varying somewhat in position according to the following consonant, e.g.

pist [p'ist'] *nāwi* [ˈnɑ:wɪ]

(c) In unstressed position between two consonants *i* is generally not realized, provided that no impermissible consonant group is thereby caused (v. § 56). Thus, compare

<i>bikam</i> [ˈbik'am]	:	<i>či bikam</i> [ˈtʃi: ɸk'am]
<i>birdin</i> [bɪr'din]	:	<i>birdinawa</i> [bɪrɒnə'wa]
<i>dasim</i> [ˈdasim]	:	<i>dasima</i> [ˈdasma]
<i>dteim</i> [ˈdi:wim]	:	<i>dteimi</i> [ˈdi:umi]
<i>nārdi(t)</i> [ˈnɑ:ɪdi(t)]	:	<i>nārditi</i> [ˈnɑ:ɪdti]

§ 42. The instability of the phoneme *i* raises an important problem of orthography. A large number of words appear to have initial groups of two consonants (v. § 56 (a)). When these words are subject to a change of stress, however, they are frequently seen to contain a phoneme *i*, not normally realized, e.g.

birā [brɑ:], but [ˈbɪrɑ:] 'O brother' (v. § 181 (a))
šitīn [ʃt'in] 'to wash', but *dan(t) šit* [ˈdasi ʃit] 'have you washed your hands?';
 from *bišīn* [brɪ:n] 'to cut', *aybišim* [ɛjɒ'rim] 'I cut it', but
qalambir [qalam'bir] 'penknife' (v. § 253 (a) (ii)).

To most sophisticated Kurds the theoretically polysyllabic nature of such words as **dirēž*, *kirān*, *pilāw*, *sipī*, &c., is evident, despite the regular realization as {dɪrɛ:ʒ, kɪrɑ:n, plɑ:w, sp'ɪ:}, &c.³ This

¹ The sole recorded exception is the word *infa* [ˈlɪndʒɑ:], more commonly [ˈpɒdʒɑ:].

² The only exception recorded is the word *linj* [lɪndʒ].

³ An application of this is to be found in the prosodic value of such

analysis has, accordingly, been accepted in this work wherever appropriate.

§ 43. *ē* is a half-open, front vowel [ɛ:] (or shorter [ɛ̃] in final unstressed position) except in the diphthong [ɛi], where it approaches a half-close [e:]. In initial or postvocalic position it is preceded by a fleeting anticipatory raising of the tongue, giving [ʲɛ:], e.g.

ēm [ʲɛ:m] *aēlā* [aʲɛ:lʲā:]

The same occurs following *p*, e.g. *pē* [pʲɛ:], while a preceding velar stop or nasal is palatalized (v. § 25).

§ 44. (a) *ə* is a diphthong [æ̃], i.e. formed by the progressive unrounding of the lips while the tongue remains in the half-open, front position. Sometimes it is a falling [ʷæ̃], sometimes a rising [æ̃ʷ] diphthong. Usually a speaker will realize the diphthong in one way only, but occasionally both forms may be heard from the one person.

(b) [æ̃] is here considered as a single vowel phoneme, since [æ̃] never occurs independently of [ɛ] and the diphthong always appears in a single syllable. In Kd. orthography the vowel is, inevitably, generally written *Û*, and has at times been transliterated as *œ*. *ə*, unlike *œ*, never appears in initial position, while both may appear in medial position (v. § 36), e.g.

wērān, *bālwēx*, *bīlər*

Final *ə* is distinguished from *ē* by the suffixes *-aka*, *-awa* (v. § 171 (c)), e.g.

dē+ -akā > *dēkā*

gə+ -akā > *goyakā*

donē+ -awa > *donēwa*

ka+ -awa > *koyawa*

words. In both metrical and syllabic verse the *i*-syllable seems more often to be counted present than absent. For example:

— — — | — — — | — — — | — — —
Zer karat hūnim add dāxi darūni piŕ-gitim,
bōl hal fēdim sihādī nāsihl garm ū guŕim;
dāxaham, hātē ha ēma bardamit wēql wēŕim
wēm alŕwēnē ba jōrē nāyālē hič dor biŕim.

Hardi.

Decasyllabic,

La šir mēzard maldy nūstāwa
qiyāfat paŕpūt wah hiŕbōt kōn

tifi bū rar siŕ paŕl ū bīdāwa
zimānē lirin, simdy naxiŕ mēn

Gōrān.

Corresponding to $-(i)wē-$ [wɛ:] the realization [wɛ] is normally heard in Sul., e.g.

$n(i)wēz$ [nwɛ:z] > $nəz$ [nɛz]

cf. $finēw$ [dʒinɛ:u] > $*finēn$ > $fən$ [dʒɛn]

The converse is not, however, true. Thus

$gəz$ [ɟɛz] nowhere appears as [ɟwɛ:z] $*g(i)wēz$

$ə$ has, therefore, an identity distinct from $wē$.

§ 45. a has two allophones. Normally it is an open, front-central vowel [a]. In contact with i or y it is a half-open, front vowel [ɛ], more close preceding¹ and more open following i , y , e.g.

$yaʔ$ [jɛkʰ] $gain$ [gɛ'i:n]

§ 46. (a) \bar{a} is an open, front-central vowel [a:], slightly more open and back than the corresponding short a . Preceding i , y , it is even more open and back. In final, unstressed position, as [a], it may be confused with a .

(b) \bar{a} has the effect of appreciably deaspirating a preceding voiceless stop, p , t , or k , e.g.

[p'ɛ:] : [pɛ:]

§ 47. (a) δ is normally a medium, back vowel [ɔ:] (or [o:] in final unstressed position) with two other allophones.

(b) It appears before r , ℓ , as a half-open, back vowel [ɔ:].

(c) Followed in the same syllable by w it is closer, and preceded by a fleeting anticipatory lip-rounding, giving [ʷɔ:], e.g.

$\ell\bar{o}w$ [tʷʷɔ:]

§ 48. u is invariably a half-close, back-central vowel [u].

§ 49. \bar{u} is a close, back vowel [u:]. In unstressed position preceding another vowel it may be realized as [w], e.g.

$kirdim$ \bar{u} $aykamawa$ [k'irdimwɛjk'ama'wa]

¹ The realization [ɛ] is somewhat more close even than the normal realization of \bar{e} , but in the same context \bar{e} is much closer [ɛ:(j)] (v. § 43).

Diphthongs

§ 50. There are three classes of diphthongs in the Sul. dialect, namely those ending in:

- (i) a close, front vowel [ɛ:ɪ, ʌɪ, ɛj, ʌ:ɪ, ɔ:ɪ, u:ɪ]
- (ii) a close, back vowel [i:u, ɛ:u, ʌɛu, əu, ʌ:u, ɔ:u]
- (iii) a half-close, central [a], [i:ə, ɪə, ɛ:ə, əə, ʌə, ɔə, u:ə]

§ 51. Class (i). When these diphthongs are followed by another vowel their syllabic character is destroyed, e.g.

[la:ɪ 'maɪə], but [ʔla:ɪ'ek']

Thus they cannot be regarded as single phonemes.

[ɛj, ʌ:ɪ], &c., are to be clearly distinguished from [ɛ:ɪ:, ʌ:ɪ:], &c., e.g.

[mɛj] 'wine'	[mɛ:ɪ:] 'it congealed'
[mʌ:ɪn] 'we stayed'	[mʌ:ɪ:n] 'mare'

Thus the second element of the diphthong cannot conveniently be regarded as a realization of *i*. It must rather be considered as representing the semi-vowel *y*. Class (i) is then reducible to the groups *ɛy* (v. § 43), *əy*, *ay* (v. § 45), *ɔy* (v. § 46), *ɔy*, and *ay*.

§ 52. Class (ii). As with class (i) a following vowel destroys the syllabic character of these diphthongs, e.g.

[a:u], but [ʔa:we:k']

On the analogy of class (i) it is convenient to consider these diphthongs as phoneme groups with *w* as the second member, thus *ɛw*, *əw*, *aw*, *ɔw*, and *ɔw* (v. § 47 (c)).

§ 53. [ə] occurring only as an allophone of *i* or *d* (v. §§ 7, 8) the diphthongs of class (iii) represent *it*, *it*, *ɛt*, *at* or *ad*, *at* or *ad*, *ɔt*, and *ut*.

Distribution of Phonemes

Consonants

§ 54. (a) The following oppositions show that all consonants, except *l*, *ŋ*, *r*, *v*, appear and preserve their identity in initial position in the word.

All consonants occur individually in medial and final position, with the exception of ' , though stops, particularly voiced stops, are far less common than continuants in final, postvocalic position.

p : b : f : v : m : w

pē 'foot' : *bē* 'without' : *bā* 'wind' : *fē* 'paroxysm, fit' : *mē* 'ewe', *mā* 'remained' : *wā* 'thus'. *pildw* 'pilaff' : *bildw* 'spread' : *filān* 'such-and-such' : *wildt* 'country'.

hapd 'peg' : *abd* 'Abdullah' : *xafd* 'grief' : *giv(v)d* 'whirring' : *ama* 'this' : *awa* 'that'. *kapr* 'bower' : *xabr* 'power' : *bafr* 'snow' : *amr* 'life; order' : *hawr* 'cloud'.

qāp 'plate' : *fwāb* 'answer' : *qāf* 'Q, "call-up"' : *wām* 'debt' : *āw* 'water'. *kif* 'bag' : *giv* 'crouching position'. *gap* 'bite' : *kaf* 'palm of the hand' : *ām* 'stream' : *haw* 'partridge'.

t : d : s : z : n

tāw 'power' : *dāw* 'snare' : *zāw* 'having borne, milch' : *nāw* 'name'. *dēw* 'demon', *dūw* 'side' : *sēw* 'apple' : *zīw* 'silver' : *nīw* 'half'. *tirē* 'grapes' : *dirēš* 'long' : *sirēš* 'glue' : *zirē* 'chain armour, zip-fastener' : *dā nirē* 'be put down'.

pōtalādk 'crest' : *hōdā* 'room' : *hōsā* 'beardless; swindler' : *gōzā* 'pitcher' : *sōnā* 'duck'. *fāw* 'student's pension' : *fūdā* 'magic' : *parāšā* 'ribs' : *tarāzā* 'balance' : *fuwānā* 'foal'.

lat 'fragment' : *bad* 'bad' : *bas* 'enough' : *baz* 'suet' : *tan* 'body'. *part* 'scattered' : *bard* 'stone' : *tars* 'dung' : *barz* 'high' : *qarn* 'century'.

s : z : š : ž

sē '3' : *zē* 'river, Zab' : *šē* 'dampness' : *žē* 'bowstring'. *sīn* 'S' : *zīn* 'saddle' : *šīn* 'blue; lament' : *žīn* 'life'. *syānzā* '13' : *šyānzā* '16' : *šyākā* 'dung'. *zyān* 'loss' : *žān* 'pain' : *žyān* 'to live'.

hasār 'wall' : *hazār* '1,000' : *hašār* 'camouflaged hide' : *hažār* 'wretched'. *tāsā* 'pang' : *tāzā* 'fresh' : *lāšā* 'corpse', *wāšā* 'hawk' : *wāžā* 'buzzing'.

tirs 'fear' : *dirz* 'split' : *tirš* 'sour' : *girž* 'sullen'.

š : ž : č : ʃ (: ʎ)

šān 'shoulder' : *žān* 'pain', *žīn* 'life' : *čīn* 'fold' : *čān* 'they went' : *ʃān* 'to chew' : *yān* 'or'. *šwān* 'shepherd' : *žwān* 'tryst' : *čwār* '4' : *ʃwān* 'beautiful'.

pāšā 'hind', *pēšā* 'former' : *qāžā* 'jackdaw' : *bēčā* 'young of animal' : *bāšī* 'elder sister'. *xānčī* 'innkeeper' : *tānʃī* 'greyhound'. *čašn* 'sort' : *ʃažn* 'celebration'.

gaš 'shining' : *gač* 'lime' : *xaj* 'Khadije'. *bāš* 'good', *bōš* 'empty' : *fōš* 'day; sun' : *pāč* 'pickaxe' : *bāj* 'tax'. *farš* 'carpet' : *wurč* 'bear' : *marj* 'bet'.

č : f : k : g : q

čō 'go!' : *jō* 'barley' : *kō* 'mass', *kōč* 'march' : *gō* 'ball' : *qōč* 'horn'. *jīr* 'elastic, tough' : *gīr* 'tenacious' : *qīr* 'pitch'. *čwār* '4' : *jwān* 'beautiful' : *kwā* 'where is?' : *gwān* 'udder'. *Jyā* 'separate' : *gyān* 'soul'.

qōčaqānī 'sling' : *kilōjā* 'manner' : *lōkd* 'cotton' : *kōgā* 'store' : *lōqā* 'trot'.

pāč 'pickaxe' : *bāj* 'tax' : *pāk* 'clean' : *lōq* 'leg'. *parč* 'curve' : *marj* 'bet' : *ark* 'work' : *farg* 'liver' : *farq* 'difference'.

k : g : x : γ : ŋ

kā 'straw', *kō* 'mass' : *gā* 'ox', *gō* 'ball' : *xō* 'self' : *γār* 'gallop'. *kaš* 'deaf', *kaw* 'partridge' : *gaš* 'mangy' : *xaw* 'sleep'. *kwā* 'where is?' : *gwārā* 'earring' : *xwā* 'God'.

akā 'does' : *agā* 'reaches' : *axā* 'throws'. *bēkār* 'bachelor' : *bēgār* 'corvée' : *xūxaw* 'pus' : *liyāw* 'bridle' : *haqāw* 'pace'.

bāk 'fear' : *bāx* 'garden' : *sāy* 'well' : *bāŋ* 'call'. *tūk* 'hair' : *dūg* 'sheep's fat tail' : *dūx* 'spindle'.

x : γ : h : ' : k

xāl 'mole' : *γār* 'gallop' : *hāl* 'condition'. *xafāt* 'grief' : *hapā* 'barking' : *abā* 'Abdullah' : *hapā* 'peg'.

axām 'I throw' : *layām* 'tunnel' : *faḥatī* 'funnel' : *baḥātī* 'heaven'.

fōx 'pretty' : *fōh* 'spirit', *lawh* 'tablet' : *naw* 'sort'. *nirx* 'price' : *bīh* 'lazy'.

m : n : ŋ (but see §§ 12 (b), 24 (c))

māl 'house' : *nāl* 'horseshoe'. *mālē* 'do not say!' : *nālē* 'he should not say'.

māmd 'the uncle' : *mānd* 'meaning' : *māḡd* 'cow'. *dāmd* 'draughts' : *dānd* 'grain'.

tam 'mist' : *tan* 'body' : *taŋ* 'tight'. *mām* 'uncle' : *mān* 'resentment' : *māŋ* 'moon'.

l : l' : r : f

lē 'from it' : *lē* 'road'. *lūt* 'nose' : *fūt* 'naked'.

palā 'haste' : *palā* 'stain' : *parā* 'increase' : *paṛā* 'page'. *kōlān* 'street' : *gōrdān* 'peasant' : *gōṛdān* 'to change'.

gil 'pain' : gîl 'clay', dîl 'heart' : dîr 'fierce'. kal 'chipped' : kal 'ox' : kar 'donkey' : kaŕ 'deaf'.

(b) There is some occasional alternation of similar consonants, e.g.

s : *z*. zig ~ zik ~ sik 'stomach' (v. § 172 (d)). zij ~ siċ 'tick'.
wariz ~ waris 'angry'.

h : *q*. kîn ~ qîn 'hate'. lîk ~ liq 'branch'. fik ~ fiq 'anger'.

x : *y*. xam ~ yam 'sorrow'. lûxd ~ lûyd 'homespun jacket'.
ĕlx ~ ĕiy 'reed screen'.

' : '. ('amr 'life; order'. (')āsmān 'heaven'. (')amār 'granary' (v. § 31).

n : *ŋ*. mindl ~ miŋdl 'child'. ban ~ baŋ 'tied' (v. § 57 (a)).

Vowels

§ 55. (a) *ə* alone of the vowel phonemes does not appear in initial position (v. § 44 (b)). *i* and *u* are rare in this position and appear in final position in only one instance (v. § 197 (a), note 2). Otherwise the vowels preserve their identity in most positions, as the following oppositions indicate:

ī : *ē* : *o* : *ā* : *ō* : *ū*

īf 'work' : ēf 'pain' : āf 'mill' : ūċ 'nib'. ĕstā 'now' : ōstā 'master'.

pīr 'old', xīr 'clever' : xēr 'under' : zor 'sad' : pūr 'last year', xūr 'a die' : xōr 'much, very' : pūr 'aunt', xūr 'rough'.

bī 'willow' : bē 'without', kē 'who?' : kō 'where?' : bā 'wind', kā 'straw' : bō 'for', kō 'mass' : bū 'was'.

i : *a* : *u*

piŕ 'full' : paŕ 'feather', kaŕ 'deaf' : kuŕ 'boy'. kird 'did' : kart 'piece' : kurd 'Kurd', kurt 'short' (v. (b) below).

Long vowel : short (*i* : *i*, &c.)

pīr 'old' : piŕ 'full'. dīl 'prisoner' : diŕ 'heart'. nāwl 'his name' : ndwi 'thy name'.

kērd 'knife' : kird 'did'.

āw 'water' : aw 'he'. bāf 'good' : baŕ 'portion'. malā 'mullah' : malā 'swimming'.

qōz 'dandy' : quz 'vulva'.

dūr 'far' : duŕ 'pearl'. kūŕ 'declivity' : kuŕ 'boy'.

¹ A few words have alternative forms, ending in stressed *d* or *a*, e.g. ĕstā = ĕstā 'now', fēgā = fēgā 'road'.

Long vowel : diphthong (ē : ay, ô : aw)

tēr 'satiated' : tayr 'bird'. mē 'ewe' : may 'wine'.

hōr 'sack' : hawr 'cloud'. kō 'mass' : kaw 'partridge'.

(b) The distinction between *i* : *u* is neutralized in contact with *w*, or in proximity to a back vowel, e.g.

wirē = wurē 'bear', āwān = āwūn 'dew', biw = ['buro·

'go', biwērē = *buwērē ['bu:ɛ:ɛ:] (v. § 60)

That between *i* : *ɛ* is to some extent lost in initial position, e.g.

irāhat [i:ɛɜ:hat] = urāhat [i:ɛɜ:hat] 'rest'

Regarding the distinction between *i* : *ɛ*, *u* : *ɔ* see also § 60.

Consonant groups

§ 56. (a) Initial groups of two consonants are common in Sul., some eighty being recorded. Those having *w* or *y* as the second element are stable, e.g.

čwār, gyān, jyā, pwāz, pyāw, šwān, xwā

The remainder are mostly to be considered as the result of secondary contact, caused by the non-realization of an unstressed *i* (v. § 42). They fall into two groups, viz. those having *l*, *ɛ*, *r*, or *f* as the second element, e.g.

gilān [gɛɜ:n] pilāw [pɛɜ:u] girān [gɛɜ:n] fiṣē [fɛ:ɛ]

and those with an initial sibilant or affricate, e.g.

šilāw [ʃɛɜ:u] simēl [sɛɛ:l] litin [lɛ'ɛn] zimān [zɛɜ:n]

Possible exceptions in this class are the groups *st*-, *šk*-, which seem more stable.

No group of three or more consonants is permissible in initial position (cf. § 19).

(b) In medial position practically any two-consonant group containing a continuant or affricate (v. § 19) is tolerated. The only groups of two plosives recorded are *bd*, *gb*, *kt*, *pk*, *pq*, *tk*, *tq*. The only primary geminate groups in Kd. words are *ll*, *nn*, and rarely *cv*.

Groups of three consonants are rare, even in secondary contact. They are all of the pattern *l*, *r*, *s* + C + C, where rarely more than one of the consonants C is a plosive.

(c) Groups of no more than two consonants may occur in final position. Some forty are recorded, the commonest being

$l+h, k, m, q; \quad l+b, f, k, m, p; \quad nf; \quad r+l, d, g, f, k,$
 $m, s, \dot{s}, t, x, z, \dot{z}; \quad r+k, t; \quad s+k, m, p, q, t; \quad l+k,$
 $m, n, t; \quad xt; \quad xm; \quad \dot{z}+d, m, n.$

Some speakers, however, appear to be less able than others to realize even these groups in final position. Thus both [ʔaspʔ] and [ʔaspʔ] *asp* are heard. This mainly affects loanwords from Ar., ending in a consonant group tolerated in medial but not generally in final position. In the latter case an *unstressed, non-phonemic* [i] is realized between the consonants of the group, e.g.

xalq [ʔxalʔq]

xalq bāḡi akā [ʔxalʔq ʔbā:ḡi:ka], but

xalqi key [ʔxalqi:kʔe]

This vowel is not expressed as a phoneme, in contrast to a phonemic *i*, realized in final but not necessarily in unstressed medial position (v. § 41 (c)), e.g.

ba ḡsik [ba ʔa:ʔsikʔ]

am āsikāna [ʔam a:ska:ʔna]

hamū jit [haʔmu:ʔjitʔ]

hamū fitēk [haʔmu:ʔfite:kʔ]

§ 57. (a) The group *nd*, formed by morpheme juncture, is normally realized as [nn] (v. § 8 (c)). Otherwise the normal correspondence to the group *nd* of other dialects is Sul. *n* or *ŋ*, less frequently *nn*, e.g.

ban, baŋ : *band, diŋa* : *diŋda, faŋ* : *fand*

māŋa : *mānda, mināl, miŋāl* : *mindāl, ikānim* : *ikāndin*,

but *bannaxon* : *bandaxon*.

(b) The group *st* is normally stable in Sul.,¹ e.g.

bist, bista, dōst, dāristān, &c.

and may even be introduced by analogy, e.g.

qastam < Ar. *qasam* 'oath', *maqast* < Ar. *miqaṣṣ* 'scissors'

Certain words, however, with the group *st* in final position, have alternative forms in *s*, e.g.

bīs(t), das(t), kōs(t), &c.

¹ But note the reduction of the heavy secondary group in *hal stān* > *hal sūn* or *hastān*.

The group normally loses the *t* when it is followed by another consonant and if this be voiced then the *s* is also voiced,¹ e.g.

das(t) nāhawē [daz 'nā:k'awē:]

cf. *dasgā* [daz'gā:] *dasgīrān* [dazgi:'rā:n]

In one case the vowel is lengthened in compensation, viz.

dirust (*kird*, &c) [dru:s ('k'ird)]

Vowel groups

§ 58. A feature of the Sul. dialect is the frequency of uninterrupted vowel groups, usually of a secondary nature, e.g.

dsāif [ā:sā:'if] (v. § 41 (a))

min ū aw [minu·'ay] (v. § 33 (a))

wā akay ['wā:ak'ej]

law daltāš [lay daf't'ā:]

With the presence of a semi-vowel longer groups of frictionless continuants may arise, e.g.

lēy adā ['lē:ja:ā:, 'lē:ja:ā:]

nērinat adāif [ne:n:nā: ā:ā:'te:]

Such groups may, however, be contracted, e.g.

ba nāw am lārā > ... *am lārā*

§ 59. (a) In unstressed position the distinction between [jē] -*ya*-, -*ia*- and [i:] -*ē*- appears to be lost. The former is generally perceived as the latter, e.g.

kursiākā [k'ursjē'k'a] > *kursēkā* [k'urse:'k'a]

axnōyawā [ax'nō:jēwa] > *axnōcwa* [ax'nō:c:wa]

intixdrī akān [int'i:'zā:re:k'an]

Note, *yawāf* [jē'wā:f] > *hētawāf* [hē:'wā:f].

But following *ā* the reverse is the case, e.g.

nāēm ['nā:'ē:m] > *nāyam* ['nā:jəm]

nadāē ['nā:ā:'ē:] > *n(ad)āya* ['nā:jē]

(b) The distinction between [wa] -*wa*-, [u:a] -*ūa*-, -*uwa*-, and [o:] -*ō*- is frequently lost, even in stressed position. They are generally perceived as -*ō*-, e.g.

ōrdūākā [o:rdwā'k'a] > *ōrdōkā* [o:rdō:'k'a]

hātūwata ... [hā:t'u:ata] > *hātōta* ... [hā:t'ō:ta]

¹ Note the phrase, *šāst akay* ['q:zak'ci] 'You are right'.

Note, Ar. *muwaffāq* > *mōfāq*.

Conversely,

xōyān ['xq:jā:n] > *xwayān* ['xwɛjā:n]

Note, *ostā* ~ *wastā* 'master craftsman'.

§ 60. When a close vowel is followed by a related semi-vowel any distinction of length is lost in the realization. Thus *-iy-*, *-iy-*, (*-iyy-*) are realized as [i:], e.g.

biygira ['bi:gra] *biyāngira* ['bi:q:ng¹ra]

ēlyt [tʃi:t] *dlyān* ['di:q:n]

pirsiy [p'ir'si:] *kursiyak* [k'ur'si:çk']

Ar. *niyyat* > *nlyat* (*nfat*) [ni:'et']

Similarly [u:] may represent, beside *u*, the groups *-uw-* and *-ūw-* (*-uwu-*), e.g.

biwēre > **buwēre* ['bu:ɛ:re:] (v. § 55 (b))

būwim ['bu:u'm] *ēūwit-* ['tʃu:i:t]

Ar. *quwwat* > *qūwat* (*qūat*) [qu:'at']

WĀRMĀWA DIALECT

Phonemic System

§ 61. The Wsr. dialect has the same phonemic system as the Sul. dialect (v. § 1). The realizations of a number of phonemes are, however, different. For comparison, therefore, following each paragraph number that of the corresponding paragraph of the Sul. section is given in parentheses.

Consonants

b, d, g

§ 62 (§ 3). In postvocalic position *b* coincides with *w* (v. § 67), e.g.

**ʃwāb* [dʒwā:u], **qabrisān* [qawɾsā:n], **aybam* [ejwam]

**aybānim* [ejqi:nim], **āfrāsyāb* [ʔ:frā:sjā:u]

**laybāt* [t'ejwā:t'] < Ar. *tabī'at*, **qubūlī* [qu:li:]

§ 63 (§ 8). *d* has the same realizations in medial and final positions

as Sul. *d*, viz. [ɖ], &c., with the exception that it does not appear to be assimilated regularly by preceding *i*, *y*, *m*, &c., e.g.

sad [səɖ], *badan* [baɖan], *hōda* [hɔ:ɖa]

aydam [ejɖam], *bimdarē* [bimɖareː]

but [mɛjɭɖa:n] *mayyān*

§ 64 (§ 23). *g*. In intervocalic position and following *n*, *r*, *y*, *z*, the phoneme *g* appears as a voiced, frictionless continuant. The blade of the tongue approaches, but does not touch, the velum in the position of [g], producing IPA [ɱ] with the lips in neutral position. This will be written [ḡ]. Following a vowel in a closed syllable the same sound forms a series of diphthongs [aḡ], &c., analogous to class (iii) (§ 50), e.g.

**āgir* [a:ḡir], **diḡān* [diḡa:n], **sag* [saḡ]

**ayḡirim* [ejḡrim], **bagḡāda* [baḡza:ɖa]

**āsingar* [a:sinḡar], **dargā* [darḡa:]

**mērg* [mɛ:ɖḡ], **nizgara* [nizḡara]

In the same contexts *g* occasionally disappears, e.g.:

**lagal* [laḡal] > *lēl* [lɛ:l], *a(g)inā* [ɛina]

miz(g)awt [mizawt]

§ 65. These developments do not in themselves alter the phonemic system, i.e. from the phonemic writing *b*, *d*, *g*, the medial, continuant realizations [w, ɖ, ḡ] would still be predictable. The case is altered, however, by the irregular occurrence of loanwords, be it from spoken Arabic or the dominant Sul. dialect, with intervocalic voiced plosives. The resulting confusion is well exemplified in the following sentences:

[aɣɛ: baɣali bɔ: bidam. qabu:lim ni:ɖ]

**abē badali bō bidam. qabūlim nīa*

In certain verbal stems, moreover, the intervocalic continuant occurring in certain forms has been introduced into initial position, e.g.

wastī (Sul. *bastī*) after *aywast* (Sul. *aybast*)

Clearly, to preserve the predictability of the actual realization it is necessary to indicate in phonemic writing the incidence of either plosive or continuant allophones of *b*, *d*, *g*. Since a phoneme

w already exists it is only necessary to mark the variant realizations [ə, ʔ] as *ʔ* and [g̊] as *g̊*, e.g.

juwāw, *aywīnim*, *taywāt*, *qawrisān*, but *qūlī* (cf. § 62)

baḡan, *ayḡam*, *bimḡarē* (cf. § 63)

āḡir, *baḡzāḡa*, *mērḡ*, but *aynā*, *mizawt* (cf. § 64)

t

§ 66 (§ 7). (a) When *t* occurs in final position, i.e. in pause or followed by another consonant, and is preceded by *a*, *ā*, it is realized as [ə], forming the diphthongs [aə, ʔə], e.g.

hātīm [hā:t'īm] but *hāt* [hā:ə], *kaḡat* [kaḡə] Ar. *karrat*

(b) When *t* is preceded by the diphthong *aw* it is not realized in final position, e.g.

kawtīm [k'awt'īm] but *kawt* [k'aw], *hawt* [haw]

(c) As in § 65, these developments do not in themselves alter the phonemic system, since the spellings *hāt*, *kawt*, &c., would still indicate the realizations [hā:ə, k'aw], &c., but the irregular occurrence of Sul. dialect forms, such as [hā:t', k'awt'], requires that the proper War. forms be distinguished by writing *hāt*, *kaw(t)*, &c.

Semi-vowels

§ 67 (§ 34). *w* is palatalized by a following *y* or front vowel, giving [ɥ], e.g.

amawē biywīnim [amaɥ: bi:ɥi:nim]

Vowels

§ 68 (§ 39)

§ 69 (§ 41). *i*. Before *g*, *g* (v. § 65) and *t* (§ 7 (c)), *i* is more close than otherwise, i.e. it is a close, central vowel [i], e.g.

hātīgim [hā:t'īgim], *biḡkē* [biḡkē:]

§ 70 (§ 43). *e* is a half-close, front vowel [e:], coinciding with the position of *e* in the Sul. diphthong *ēy*, in all positions. The War. diphthong *ēy* normally has a slight anticipatory raising of the tongue, e.g.

pēy [p'e:ɪ].

§ 71 (§ 45). *a*. Both before and after *i*, *y* the phoneme *a* is realized as a medium, front vowel [ɛ], coinciding with the position of *a* in the Sul. diphthong *ay*, e.g.

haya [hɛjɛ], *emaya* [ɛ:mɛjɛ]

§ 72 (§ 47). *o*. The medium, back vowel [o:] is often preceded by an anticipatory lip-rounding, particularly following another vowel, e.g.

lōrdigma [(w)ɔ:rdigma], *pōō* [p'ɔ:ʔɔ:]

§ 73 (§ 49). *u* is sometimes palatalized by a following *y* or front vowel. The diphthong *uy* is then realized as [y:i], or simply [y:], e.g.

aparmūytō [ap'army:itɔ:].

Modifications

Consonant groups

§ 74 (§ 57). (a) The group *nd* of other dialects (Sul. *n* or *ŋ*) appears regularly as *n*, e.g.

[mā:nig]	<i>mānig</i>	:	Sul. <i>māŋg</i>
[zi:nā:n]	<i>zīnān</i>	:	<i>zīŋān</i>
[ʃan]	<i>ʃan</i>	:	<i>ʃan</i> , <i>ʃan</i>

(b) Corresponding to the medial and final *st* of other dialects the realization *s* is normal in War., e.g.

[dasak']	<i>dasak</i>	:	Sul. <i>dastak</i>
[zu:sa:n]	<i>zūsān</i>	:	<i>zistān</i>
[misafa:]	<i>Misafā</i>	:	<i>Mistafā</i>

Note the analogical back-formation in

rōstgār < NP. *rōzgār*

Vowel groups

§ 75. The group *-iɔ(i)-* is sometimes contracted to [u:], e.g.

<i>awim</i> [a'wum]	but	<i>biwim</i> [bu:m]
<i>awiɪ</i> [a'u:ri:]	but	<i>biwiɪ</i> [ʔbu:ri:]

This [u:] is also palatalized by a following front vowel (c. § 73), e.g.

<i>awēt</i> [a'ʔe:t]	but	<i>biwēt</i> [ʔby:e:t]
<i>awēt</i> [a'ʔi:t]	but	<i>biwēt</i> [bu:jt, by:it, by:t]

§ 76. The group *iğ*, when followed by *ɪ*, *y*, is realized as [i:], e.g.

hātīgɪ [hɑ:t'i:ɪ:], *wutīgɪyɑ* [wʊt'i:(j)ɛ]

This is the only recorded occurrence of [i:i:] or [i:j] (cf. § 60).

Treatment of loanwords

§ 77. Loanwords from Arabic suffer a variety of changes, e.g.

laqam ? < Ar. *laqab* 'by-name' *da'b* < Ar. *daf* 'repulsion'
talfi < Ar. *ṭift* 'child' + -i

There is considerable confusion between *h* and ' , e.g.

tamāh < Ar. *ṭama'*, *ṭamā'* at 'desire'
matwqib < Ar. *matwqi* 'place' *ma'b* < Ar. *maḥw* 'erasure'
 even *furbat* < Ar. *fur'at* 'courage'

Assimilation is common, particularly in the Ar. form *maṣ'āl*, which yields a measure *maṣmāl*, e.g.

maṣmāl < Ar. *maṣbūr* 'obliged'
mazmāl < Ar. *maḍbūṭ* 'strong'
manmūn < Ar. *mannūn* 'thankful'

BINGIRD AND PIȚDAR DIALECTS

Phonemic System

§ 78. The Bin., PiȚ. dialects have the following phonemic system of twenty-eight consonants (including two semi-vowels) and nine vowels:

<i>p</i>	<i>t</i>	<i>tʰ(tʰ)</i>	<i>k</i>	<i>q</i>	
<i>b</i>	<i>d</i>	<i>dʰ(j)</i>	<i>g</i>		
<i>f</i>	<i>s</i>	<i>ʃ</i>	<i>x</i>	<i>h</i>	<i>h</i>
<i>v</i>	<i>z</i>	<i>ʒ</i>	<i>ɣ</i>	<i>ʕ</i>	<i>(ʕ)</i>
<i>m</i>	<i>n</i>				
	<i>l</i>	<i>l</i>			
	<i>r</i>	<i>r</i>			
<i>w</i>		<i>y</i>			

<i>i</i>	<i>i</i>	<i>u</i>	<i>u</i>
<i>ē</i>	<i>o</i>	<i>ō</i>	
<i>a</i>	<i>ā</i>		

The only systemic difference from the Sul. dialect lies in the absence of a phoneme *ŋ* (v. § 81). There are, however, a number of differences in the phonetic realizations of certain phonemes.

Consonants

Dental

§ 79 (§ 7). *t* is a voiceless, aspirated dental plosive [tʰ] with the same unaspirated allophone [t] as in Sul. In no context is it either assimilated or lost, nor has it the allophone [ɔ].

§ 80 (§ 8). *d* is invariably realized as a voiced, unaspirated dental plosive [d].

§ 81 (§ 12). *n* has three allophones.

(a) Normally it is a voiced, dental nasal [n].

(b) Before a velar plosive it is realized as a voiced, velar nasal [ŋ]. This occurs only before a homorganic plosive and cannot be considered as a separate phoneme, e.g.

xinkāndī [xiŋ'ka:ndi-], *dang* [daŋg]

Before a palatalized velar plosive (v. § 83) a voiced, palatal nasal [ɲ] occurs, e.g.

datxinkēnim [datxɪɲc'ɛ:nim], *dangī* ['daɲji]

Palatal

§ 82 (§ 17). With some speakers *ɕ*, *ʃ* are alveolo-palatal affricates [tɕ, dʒ]. For the same speakers the affricates [tʃ, dʒ] are palatalized allophones of *k*, *g* (v. § 83), there being no confusion between the two types.

The peculiarity is marked, as a mnemonic, by writing the phonemes *ɕ*, *ʃ*.

Velar

§ 83 (§ 25). *k*, *g* are strongly palatalized by a following front vowel or the semi-vowel *y*. With some speakers this is carried to the extent of realizing, not [c, ɟ], but the affricates [tʃ, dʒ]. There is, however, no confusion with the phonemes *ɕ*, *ʃ* (v. § 82).

Vowels

§ 84 (§ 43). *ɛ* is normally a half-close, front vowel [ɛ:], as in the War. dialect (v. § 70).

In final position following *ɪ*, *y* it is realized as a shorter and more open [ɛ], i.e. approaching *a*, e.g.

stə̌rɪɛ [stwɜ:ɪɛ]

§ 85 (§ 44). *ə* is commonly the rising diphthong [ə'e]. With some speakers it is so close [ʊe] as to suggest an analysis as *ɔw̌*.

Diphthongs

§ 86. The diphthongs of class (iii), ending in [ɔ], do not occur (v. §§ 50, 53).

Modifications

§ 87. There appears to be some neutralization of the opposition *ay* : *ɛ* in final position (the former being perceived as the latter), despite the morphological confusion which may result (cf. Muk. § 7 (b) 1), e.g.

aw̌ɛ < **awa-y* *aw bařɛ* < **bara-y* *baw ɪ̌ɛ* < **ɪ̌a-y*

§ 88. With certain Piḏ. speakers the *w* of class (ii) diphthongs is sufficiently consonantal in character to form an unpronounceable group with a following consonant group or final consonant. Accordingly an unstressed, non-phonemic [i] is realized after the semi-vowel (v. § 56 (c)), e.g.

kawt-bū [k'aw't'bu:]

Consonant groups

§ 89 (§ 57). (a) The groups *nd* and *st* are normally preserved in all positions.

(b) There is a tendency to form inter- and postvocalic groups of 'voiced plosive preceded by a homorganic nasal' to replace either single consonant, especially in loanwords, e.g.

bandan < Ar. *badan* 'body' *mumbārak* < Ar. *mubārak* 'blessed'
hambāl < Ar. *ḥammāl* 'porter' *fimb* < Ar. *rimḥ* 'lance' *mazanda* < Ar. *maẓannat* 'conjecture'
dōndim < Tk. *dōnim* 'acre'

Treatment of loanwords

§ 90 (§ 77). In addition to the changes described in § 89, loanwords from Arabic suffer such arbitrary treatment as

salam < Ar. *ṣanam* 'idol'
yayānatī < Ar. *xiyānat* 'treachery' + -i

when they are not completely disguised by such malapropisms as

ta'fīl for both Ar. *taṣfīl* 'recording' and *tāfir* 'merchant'
tarbīat for Ar. *tartīb* 'arrangement'

The phonemes *ḥ* and ' are often confused, e.g.

ḥātā < Ar. 'aṣā 'gift' *ḥāyla* < Ar. 'ā'ilat 'family'
ḥazīz, *naḥmān* < Ar. 'Azīz, Nu'mān
'arb < Ar. ḥarb 'war'

MUKRI DIALECT

Phonemic System

§ 91. The phonetic description of the Muk. dialect in Mann, Muk. §§ 1-7, suggests a phonemic system identical with that of the neighbouring Piḏ. dialect (v. § 78). This is supported by the transcription of the few Muk. songs in Mokri, op. cit., pp. 106-31.

Consonants

§ 92. Mann states (Muk. § 2, end) that *l* and *l* are interchangeable in most, but not all, words. These exceptions alone suffice to justify the separate phonemic status of the two consonants. For the rest it can only be noted that in neighbouring dialects there is extremely little, if any, alternation between these sounds.

§ 93. Neither Mann nor Mokri differentiate between *r* and *ʀ* in Mukri. As the same is true of both writers' transcriptions of the Sul. dialect (Mann's in manuscript), where the opposition undoubtedly exists, the possibility of its existence in Muk. also is not thereby precluded. Moreover, Mann occasionally noted [rr], e.g. [kurr] 'boy', but normalized *kur* for publication.

Vowels

§ 94. Mann's transcription *ūē* must be for (ye, œ). His manuscripts often show [ūā] before normalization. Since either vowel may be stressed the group appears still to be comparable with the single phoneme Sul. *ø*, albeit alternating with *uē* (v. §§ 44, 85), e.g.

Muk.		cf. Mokri
7 ¹⁰ <i>nūēzh-</i>	= <i>nwēž</i>	: 410 <i>nwēzh</i>
3 ⁶ <i>khūēn</i>	= <i>xon</i>	: 428 <i>khwēn</i> (Sul., <i>tic</i>)
13 ²¹ <i>khūēn</i>	= <i>xwēn</i>	
7 ¹⁷ <i>gūē</i>	= <i>go</i>	: (354 <i>kwē</i>)

Diphthongs

§ 95. The transcriptions [ēi] (in manuscript) and *ōū* are but minor distortions of *āi*, *au*, which correspond exactly to Sul. *ay*, *aw* (v. § 50).

It must be assumed (despite Mann, Muk. § 6) that the long notation of the second vowel in the diphthongs *āi*, *āū*, &c., is a result of distortion of the sounds in slow dictation.

ARBIL DIALECT (Kd. *Hawlēr*)

Phonemic System

§ 96. The dialect of Arbil, together with those of Koi Sanjaq (Kd. *Kōya*), the *Xōšnāw* and Rewandiz (Kd. *Rawāndiz*) areas, and probably the *Birādōst* area north of Rdz., has the following

phonemic system of twenty-seven consonants (including two semi-vowels) and eight vowels:

<i>p</i>	<i>t</i>	<i>ʈ</i>	<i>k</i>	<i>q</i>		
<i>b</i>	<i>d</i>	<i>ɟ</i>	<i>g</i>			
<i>f</i>	<i>s</i>	<i>ʃ</i>	<i>x</i>		<i>h</i>	<i>h</i>
<i>v</i>	<i>z</i>	<i>ʒ</i>	<i>ɣ</i>		<i>ʔ</i>	(<i>ʔ</i>)
<i>m</i>	<i>n</i>					
	<i>l</i>					
	<i>r</i>	<i>ʀ</i>				
<i>w</i>		<i>y</i>				
<hr/>						
	<i>i</i>	<i>i</i>		<i>u</i>	<i>u</i>	
	<i>ē</i>			<i>ō</i>		
	<i>a</i>	<i>ā</i>				

The system is differentiated from that of the neighbouring Piž. and Muk. dialects by its lacking the phonemes *l* and *o*, and by the form of the affricates *ʈ*, *ɟ*.

Consonants

§ 97. *ʈ*, *ɟ* are regularly realized as the alveolo-palatal affricates [tʃ, dʒ], i.e. *ʈ*, *ɟ* (v. § 82).

§ 98. *l* of other dialects is regularly replaced by *r* (cf. § 14), e.g.
dir 'heart' Sul. *dil* *darēm* 'I say' Sul. *alēm*

[l] is only heard as a recent borrowing, possibly due to radio broadcasts in the Sul. dialect.

Vowels

§ 99. The diphthongal phoneme *o* does not occur. It is replaced by various other phonemes, e.g.

<i>n(i)roē</i> 'prayer' Sul. <i>noē</i>	<i>sūr</i> 'salty' Sul. <i>sor</i>
<i>xundin</i> 'to study' Sul. <i>xenin</i>	<i>gē</i> 'ear' Sul. <i>ge</i>
<i>gix</i> 'walnut' Sul. <i>gox</i>	

Modifications

§ 100. As in Piž., Muk. (v. § 87) there is some neutralization of the opposition -ay : -ē, e.g.

<i>harbī aw lawē</i> < * <i>laway</i>
<i>bīrō nāw bīray</i> : <i>aminyān hāwilla nāw bīrē</i>

§ 101. The phonemes *h* and ' are almost regularly interchanged by unlettered speakers, e.g.

ḥaft > 'aft 'seven' *ḥājī 'alī* > 'ājī *ḥallī* 'Haji Ali' (not an isolated spoonerism)

SŪRĠI DIALECT

Phonemic System

§ 102. The Sur. dialect has the same phonemic system as the Arb. dialect (v. § 96) but the realizations of certain phonemes are appreciably different.

Consonants

§ 103. *k*, *g* are palatalized by a following front vowel or *y*, being realized as [c, j]. Before *ā* a fleeting [j] is heard, which does not, however, palatalize the consonant, e.g.

kē [c'e:] but *kā* [k^ha:], *gā* [g^ha:]

§ 104. *š*, *ẓ* are replaced by the alveolo-palatal fricatives [ç, ʒ], which for mnemonic purposes are represented phonemically as *š*, *ẓ* (cf. § 82).

Semi-vowels

§ 105. *w* is palatalized by a following front vowel or *y*, giving [w]. Following another consonant in the same syllable it is realized before *i* as a very close [ɥ], e.g.

bin'wīsim [bin^hwi:sim], but *dwinē* [dɥi:ne-] (cf. Sul. *donē*)

Vowels

§ 106. *ā* is an open, front vowel of an exceptional length [a:], causing most Sur. speakers to give an unmistakable impression of 'bleating'.

Modifications

§ 107. *ā*, *ē*, and *i* are sometimes reduced in final position, to coincide with short vowel phonemes,

ā > *a* *ē* > [e] > *a* *i* > *i*

e.g. *dē ḥāra dam* < *ḥārā*

dē fōta kayn < *fōtē*

awī bird < *awī*

B. DIALECTS OF GROUP II

AKRE DIALECT (Kd. *Ākrē*, Ar. 'Aqra)

Phonemic System

§ 108. The Ak. dialect, and that of the surrounding *Zēbārī* tribe, has the following phonemic system of thirty consonants (including two semi-vowels) and eight vowels:

	Labial	Dental, Alveolar	Palato- alveolar	Velar	Uvular	Pharyngeal	Glottal
Stop and Affricate	p b	t d	tʃ dʒ	k g	q		
Fricative	f v	s z	ʃ ʒ	x ɣ		ħ	h (¹)
Nasal	m	n					
Lateral Vibrant		l					
Semi-vowel	w	r ʕ	y				

Front

Mid

Back

Close

Mid

Open

Consonants

Labial

§ 109. *p* is a voiceless bilabial plosive, aspirated [*pʰ*] in all positions except in contact with a following consonant.

§ 110. *b* is a voiced, unaspirated bilabial plosive [*b*]. In secondary contact with a following voiceless consonant it is devoiced, e.g.

bu xō [b̥xu:] (v. § 148).

¹ See § 137.

The secondary group [bh] is further reduced to [p'], e.g.

bihāwēša [b'ha:ve:ʒa > 'p'a:ve:ʒa]

§ 111. *f* is a voiceless labio-dental fricative [f].

§ 112. *v* is a voiced labio-dental fricative [v]. It occurs frequently, corresponding generally to Sul., &c., *w*.

Note. In the south the *Zēbārī* territory meets that of the *Sūrēī*, and in the west that of an isolated group of *Gōrān* tribes, still speaking a Kd. dialect akin to *Sinaī*. In some Zeb. villages, therefore, the phonemes *v* and *w* coincide in *w*.

§ 113. *m* is a voiced bilabial nasal [m].

Dental and alveolar

§ 114. *t* is a voiceless dental plosive, aspirated [t'] in all positions except in contact with a following consonant.

§ 115. *ʔ* is a voiceless, unaspirated, alveolar emphatic plosive [ʔ] produced by the blade of the tongue touching the upper tooth ridge, the rest of the tongue being depressed and rising at the back, thus forming a central hollow (as in Ar. ʔ).

§ 116. *d* is a voiced, unaspirated dental plosive [d] in all positions.

§ 117. *s* is a voiceless alveolar fricative [s].

§ 118. *ʃ* is a voiceless, alveolar emphatic fricative [ʃ] with the same tongue position as *t* (v. § 115). It is identical with Ar. ص.

§ 119. *z* is a voiced alveolar fricative [z].

§ 120. *ʒ* is a voiced, alveolar emphatic fricative [ʒ], the voiced counterpart of *ʃ* (§ 118). It is not identical with Ar. ʒ [ʒ], though this letter, with ض, is often used to write the phoneme *ʒ*.

§ 121. *n* represents a voiced and non-bilabial nasal. Normally, that is, it is dental [n], but it may have labio-dental [m] or velar [ŋ] allophones in contact with a following *v* or *k, g* respectively, e.g.

<i>nivist</i> [ni'vist']	<i>biniṣa</i> [biṣva]
<i>bān</i> [ba:n]	<i>bāng</i> [ba:ŋg]

In certain numerals only, in the context *ānz*, it is realized as a simple nasalization of the vowel, e.g.

yānxa [jā:ʔa] '11'

§ 122. *l* is a voiced, dental lateral non-fricative [l]. The velar [ɫ] is heard extremely rarely. In [tɪlpʰ] it may be caused by the preceding emphatic *ṭ*. [baʃalla:] is a loan from Sul., &c., *barallā*. But [fala] 'Christian', Ar. *fallāḥ*, is extraordinary.

§ 123. *r* is a voiced dental single flap [ɾ]. It never occurs in initial position. It is sometimes assimilated or lost before *l*, e.g.

har l min [hal min]

§ 124. *ṛ* is a voiced dental roll (trill) [r].

Palato-alveolar

§ 125. *ʃ* is a voiceless, palato-alveolar affricate [tʃ]. In secondary contact with *l* it is reduced to [ʃ], e.g.

nāʃita [ˈna:ʃtʰa]

§ 126. *j* is a voiced, palato-alveolar affricate [dʒ].

There appears to be no reason for considering these two affricates as other than single phonemes (cf. § 19).

§ 127. *ʃ* is a voiceless, palato-alveolar fricative [ʃ].

§ 128. *ʒ* is a voiced, palato-alveolar fricative [ʒ].

Velar

§ 129. *k* is a voiceless, aspirated velar plosive [kʰ]. It is palatalized by a following front vowel (including *i*, § 149) or *y*.

§ 130. *g* is a voiced velar plosive [g]. It is palatalized by a following front vowel or *y*.

§ 131. *x* is a voiceless velar fricative [x].

§ 132. *ɣ* is a voiced velar fricative [ɣ]. It is very uncommon and even in loanwords is commonly replaced by *x*.

Post-velar

§ 133. *q* is a voiceless uvular plosive [q].

§ 134. *ħ* is a voiceless pharyngeal fricative [ħ].

§ 135. *ʕ* is a voiced pharyngeal fricative [ʕ], identical with Ar. ع.

§ 136. *h* is a voiceless glottal fricative [h].

§ 137. The glottal stop [ʔ] is not a distinguishing feature of any utterance and is thus not a consonant phoneme in Ak. Kd.

All initial vowels are realized with a preceding glottal stop but this is normally lost in morpheme juncture, e.g.

āxiviŋ [ʔa:xivi:tʰ], but *bāxiviŋ* [ʰba:xivi:tʰ]

There is occasional variation between normal juncture of this sort and a rarer, more 'open' juncture, represented by a byphen, e.g.

tāxiviŋ [tʰa:xivi:tʰ] ~ *t-āxiviŋ* [tʰʰa:xivi:tʰ]

tōf-āvā [ru:fʔa:vɑ:] (cf. Sul. [rɔ:ʒa:ʰwɑ:])

Semi-vowels

§ 138. *w* is a bilabial (back) frictionless continuant [w]. It is not noticeably palatalized by a following front vowel.

§ 139. *y* is a palatal (front) frictionless continuant [j].

§ 140

Vowels

§ 141. *i* is invariably a very close, front vowel [i:].

§ 142. (a) *i* is normally a half-close, front-central vowel [i]. In proximity to [y:] (v. § 140) it is also realized with lip-rounding as [ɣ], e.g.

dīrān [dɣʰrɣ:n].

(b) In unstressed position between two consonants *i* may not be realized. Compare:

bikam ['bik'am] : *çi bikam* [tʃibk'am]
kirin [k'i'rin] : *kirinava* [k'irna'va]

and *i* < *î* (v. § 283 (a)) in

dā dît [da: tʃi:t'] : *dā dîta* ... [da:ʃt'a ¹. . .]

(c) As the number of consonant groups tolerated in initial position in Ak. is limited (v. § 153 (a)) the syncope of *i* in initial unstressed syllables is much less common than in Sul. (cf. § 42), though it does occur, e.g.

birā [bra:] 'brother', but ['bira:] 'O brother!'

The general intolerance of consonant groups often leads to the realization of a short, unstressed *i*-like vowel, not here considered as phonemic (v. § 153 (c)).

§ 143. *ê* is a medium, front vowel [ɛ:], except in the diphthong *êy*, where it approaches a half-close, front [e:].

§ 144. *a* is normally a half-open, front-central vowel [a]. In the diphthong *ay* it approaches a half-open, front [ɛ]. Following an emphatic *z*, *t*, *z*, it is slightly more back [a̠].

§ 145. *â* [ɑ:] is an open, back vowel, varying with different speakers between cardinals [ɑ and ɔ]. Following an emphatic *z*, *t*, *z*, it is slightly more back [ɑ̠].

§ 146. *u* is a half-close, back-central vowel [u].

§ 147. No medium back vowel occurs in Ak. Corresponding generally to the vowels *ô*, *u* of other Kd. dialects, Ak. has [u:, y:] respectively. It is convenient, and within the Ak. system unambiguous, to represent these phonemically as *ô*, *u*, or, as here for mnemonic purposes, as *ô*, *u*.

§ 148. *o* is a close, back vowel [u:]. In contact with the emphatic consonants *z*, *t*, *z*, it is somewhat more open [ɔ:], e.g.

dōst [du:st'] *bōst* [bɔ:st]

In the common phrase *bō xō* there is frequently a reduction, thus [bu:- > bu- > ɸ-xu:], written *bu xō*, and so coincidence with *p xō*.

§ 149. *û* is a close, front vowel with lip-rounding [y:]. Some speakers (it is said, the natives of one only of the three Kd. quarters of Akre, and certainly the non-Kurdish, Christian population) replace this vowel regularly by [i:], thus *mû* > *mî*. As a result of this, *û* occasionally replaces etymological *i* in common Ak., e.g.

'ûd < Ar. 'id *îanga*]bû < *bî 'weeping willow'

Diphthongs

§ 150. There are two classes of diphthongs in the Ak. dialect, namely those ending in:

- (i) a close, front vowel, [e:i, ʊ:i, ɔ:i, u:i, y:i],
- (ii) a close, back vowel, [e:u, ɔu].

They are phonemically identical with the corresponding Sul. diphthongs of the same classes (v. §§ 50-52) and for the same reasons may be written *êy*, *ay*, *ây*, *ôy*, *ûy*, and *êw*, *aw*.

Distribution of Phonemes

Consonants

§ 151. The recorded Kd. vocabulary of the Ak. dialect does not lend itself to the provision of a complete series of oppositions, as in Sul. (v. § 54).

From the following it is clear that all consonants except *r* appear and preserve their identity in initial position in the word. All consonants (with the possible exception of *ʃ*, *ʒ*, *ʒ*) occur individually in roedial position. The question of final consonants requires further investigation (v. § 172).

p : *b* : *f* : *v* : *m* : *w*

pân 'broad' : *bân* 'roof' : *vân* 'these' : *mân* 'to remain' : *wân* 'those'. *pîr* 'old' : *bîr* 'memory' : *fil* 'elephant' : *vî* 'this' : *mîr* 'Emir' : *wî* 'that'.

dapâ 'plank', *dabâf* 'glue', *qafâs* 'cage', *avâ* 'this', *kamâr* 'arch', *pâwân* 'grazing'.

lêp 'ball' : *tôb* 'roll of cloth' : *tôv* 'seed'. *sêv* 'apple' : *dêlm* 'unirrigated land' : *dêw* 'demon'.

t : *ʃ* : *d* : *s* : *x* : *n*

tâ 'fever' : *îâ* 'branch' : *dâ* 'in order to' : *zâ* 'well'. *tû* 'mulberry' : *dû* 'after' : *sû* 'breeze' : *zû* 'early' : *nû* 'new'.

katî 'sand-grouse' : *kudî* 'cub' : *kasî* 'person' : *hazî* 'plait' : *hanî* 'laughter'.

mat 'aunt', *îad* '100', *kas* 'person', *gaz* 'yard', *îân* 'fence'. *dôst* 'friend' : *bôjî* 'hand span'.

s : *x* : *ş* : *ş* : *î* : *ş*

sûr 'salty' : *zûr* 'hillock' : *şûr* 'rampart'. *zâr* 'a die' : *şâr* 'cold', *şevândâ* 'caves' : *şevân* 'shepherd' : *şivânî* 'tryst'.

xast 'mother-in-law' : *îazî* 'cold, numb' : *taşî* 'spindle' : *taşt* 'full'.

bas 'enough' : *baz* 'suet' : *paz* 'sheep'. *bôş* 'abundant' : *îôz* 'day'.

î : *ş* : *î* : *ş* : *î* : *ş*

îîn 'blue' : *îîn* 'life' : *îân* 'to chew'. *îîv* 'gully' : *îîv* 'stick'. *îâr* '4' : *îâr* 'time' : *yâr* 'friend'.

pîşî 'mosquito', *bîşî* 'bastard', *kûçîk* 'puppy', *hajî* 'pilgrim'.

îîş 'mad', *îîz* 'day', *xâç* 'cross', *îî(n)* 'crown'.

î : *ş* : *k* : *g* : *q*

îâr '4' : *îâr* 'time' : *kâr* 'work; ornament', *kêr* 'knife' : *qêr* 'pitch'. *îâ* 'tea' : *kâ* 'where is?' : *gâ* 'ox'.

mâçî 'Club (cards)', *bâjî* 'aubergine', *nêkâ* 'now', *lagân* 'basin', *'âqâr* 'plain'.

pûç 'withered' : *gôj* 'club-footed' : *bûk* 'bride'.

k : *g* : *x* : *y*

kîf 'silent' : *gîf* 'rough' : *xîf* 'spherical', *kaw* 'partridge' : *xaw* 'sleep'. *gaş* 'bright' : *yaş* 'trick'.

îîkêb 'stirrup', *îîgârâ* 'cigarette', *îîxûr* 'porcupine', *qîyaqîy* 'croaking'.

îîk 'crack', *îîg* 'stomach', *xôx* 'peach', *îîy* 'fringe'.

x : *y* : *h* : *'* : *h*

xurf 'wool', *îîrî* 'glue', *hafî* 'mud'. *îîfîk* 'throat' : *'afî* 'pardon'. *îîîîr* 'camel' : *îîîîr* 'mule'.

buxûr 'incense', *îîyâ* 'Agha', *îîîî* 'basil', *îîîîî* 'yonder'.

îîx 'reed-mat', *fuh* 'soul', *fah* 'root'.

m : *n*

mû 'hair' : *nû* 'new'. *mîîî* 'to sweep' : *nîîîk* 'mattress'.

qaymîy 'cream' : *qûmîy* 'stage'.

îîm 'I come' : *îîn* 'you, they come'. *îîm* 'unlucky' : *îîn* 'place, trace'.

l : r : ʃ

lā 'side' : *ʔā* 'up'. *lās* 'smooth' : *ʔās* 'naked'.

pālā 'workman' : *pārā* 'money'. *gōʔ* 'turn' : *guʔ* 'mangy'.

pīl 'turn' : *pīr* 'bridge' : *pīʔ* 'full'. *čil* '40' : *čilʔ* 'tough'.

Vowels

§ 152. The short vowels *i*, *u* rarely occur in initial or final position. *ā* occurs initially only in *āšdān* < *wāšdān* 'conscience'. Otherwise the vowel phonemes preserve their identity in most positions.

i : ē : ā : o : ū

īʃ 'work' : *ēʃ* 'pain' : *āʃ* 'mill'. *ōda* 'room'.

pīr 'old' : *pēr* 'day before yesterday' : *pār* 'last year' : *pōr* 'hair' : *pūʔ* 'withered'. *šār* 'cold' : *sōr* 'red' : *sūr* 'salty'.

kī 'who?' : *kē* 'whom?' : *kā* 'where is?' : *gā* 'ox' : *kō* 'that' : *gū* 'faeces'.

i : a : u

kīʃ 'silent' : *kaʃ* 'deaf' : *kuʃ* 'boy'. *gah* 'joint' : *guh* 'ear'. *či* 'what?' : *ču* . . . *na* 'nothing'.

Long vowel : short (*i : i*, &c.)

pīr 'old' : *pīr* 'bridge'. *kīr* 'penis' : *kīr* 'did'.

kēr 'knife' : *kīr* 'did'.

āv 'water' : *av* 'this'. *māst* 'curds' : *mast* 'drunk'. *tā* 'fever' : *ta* 'thee'.

xōʃʃ 'rascal' : *xurʃ* 'wool'.

kūr 'deep' : *kuʃ* 'boy'.

Long vowel : diphthong (*ē : ay*)

tēr 'satiated' : *ʔayr* 'bird'. *vē mālē* 'this house' : *vī mālay* 'this property'.

Consonant groups

§ 153. (a) Consonant groups are comparatively rare in the Ak. dialect, particularly in initial position. The following groups alone are attested initially, and then mainly in secondary contact:

br, *dr*, *fr*, *kr*; *by*, *dy*, *gy*, *ʃy*; *sm*, *sp*, *st*; *ʃʔ*¹ *lk*; *xw*²

¹ Cf. *Xāhidī*'s writing *ʃʔ* for *Bīlīdī*.

² Not normal (e.g. *xārīn*, *xāʃa*: Sul. *xwōrdīn*, *xwōʃa*), but only in *xwō*, *xwō* < **xō* 'salt' + -ō, -ō.

(b) The commonest medial consonant groups may be summarized as follows:

lC, mC, nC, rC, sC, šC, vC, xC, x̣C, ʒC

The only groups of two plosives are individual occurrences of *bd, kb, tq*. The only true geminate is *ll*, and that rare.

There are no primary three-consonant groups apart from *CCy*, e.g. *fty, ngy, rsy, xty, xdy*.

(c) 22 final groups of two consonants are tolerated, viz.

n+g, f, k; r+ʒ, f, k, m, š, x, x̣; s+k, t; št

and individual occurrences of *fs, ft, hm, hn, hr, hf, lg, lt, sl*

When a consonant group which is permissible in medial, but not in final, position occurs in pause, or followed by a third consonant, a short, unstressed *i*-like vowel is realized between the consonants of the group. This is not written in the phonemic transcription (cf. § 56 (c)).

bira bar ʃalbē [bira bar 'ʃalbē:] *ʃalb kay* ['ʃalb̩ k'ai]

§ 154. The occurrence of heavy secondary consonant groups is quite common, owing to the frequency of the prepositions *l, p, t, v* and the modal affix *-* (v. §§ 301, 281 (a)).

Groups of three consonants are commonly realized with no intervening vowel, thus *CCC*, e.g.

ʃayr p xurti [ʃajr p'xurt'i:]

kilim p pēnf [k'irimp'p'ɛ:ndʒ]

saḥ tkatē ['saḥtk'at'ɛ:]

A short, unstressed vowel [i] may, however, be realized, either before the final consonant of the group, thus *(C)CC̣C*, e.g.

az ʔēm [as t'ʔɛ:m]

saḥ l āgiri [saḥ l'ʔa:ɡiri:]

kaft l xāni [k'aft l'xɑ:ni:]

or, less commonly, before the penultimate consonant, thus *(C)C̣CC*, e.g.

dat p nān [dat'ʔbna:n]

saḥ tkatē ['saḥ'ʔtk'at'ɛ:]

hal stā ['hal'ʔst'o:]

Owing to this variation *CCC : CC̣C : C̣CC* the vowel cannot be regarded as phonemic.

Larger secondary groups may be occasioned by the non-realization of unstressed, but phonemic, *i* (v. § 142). The pattern of realization is then *C'CC'CC*, i.e. by groups of two consonants from the last, a non-phonemic [i] being realized where necessary, e.g.

yē t-fikiri [ijɛ:tʃik'ri:t'] but *tē t-fikiri-t* [t'ɛ: t'ʃik'ri:t'e:]
galak t-giri [ga'lakt'giri:t']

SHEIKHAN AND DOHUK DIALECTS (Kd. *Šexān, Dahūk*)

§ 155. The Shn. and Dhk. dialects have a phonemic system identical with that of Akre (v. § 108). The only phonetic difference is in the realization of *ō*, *ū* as the simple vowels [o:, u:], rather than [u:, y:], respectively.

AMADIYE AND ZAKHO DIALECTS (Kd. *Amādī*(š), *Zaxō*; Ar. *ʿAmādīya*)

Phonemic System

§ 156. The dialects of Amadiye and Zakho, together with those of the intermediate *Barwārī-šōr*, *Sindī*, and *Gullī* areas, have the following phonemic system of thirty-three consonants (including two semi-vowels) and eight consonants:

<i>ṣ</i>	<i>ṭ</i>		<i>ṣ̣</i>	<i>ḳ</i>			
<i>p</i>	<i>t</i>	<i>l</i>	<i>f</i>	<i>k</i>	<i>q</i>		
<i>b</i>	<i>d</i>		<i>ʃ</i>	<i>g</i>			
<i>ʃ</i>	<i>s</i>	<i>z</i>	<i>ʒ</i>	<i>x</i>		<i>ḥ</i>	<i>h</i>
<i>v</i>	<i>z</i>	<i>ʒ</i>	<i>ʒ̣</i>	<i>γ</i>			(ʻ)
<i>m</i>	<i>n</i>						
	<i>l</i>						
	<i>r</i>	<i>ʀ</i>					
<i>w</i>			<i>y</i>				
	<i>ī</i>	<i>ū</i>	<i>i</i>		<i>u</i>	<i>ō</i>	
		<i>ē</i>					
		<i>a</i>	<i>ā</i>				

The system differs from that of Ak. (v. § 108) in having two series of voiceless plosives, namely *ṣ*, *ṭ*, *ḳ* aspirated and *p*, *t*, *k* unaspirated.

Consonants

§ 157. The aspirated voiceless plosives *p̣*, *ṭ*, *ḳ* correspond phonetically in every particular to the Ak. phonemes *p*, *t*, *k* [*p'*, *t'*, *k'*]. The Am., Zx. series *p*, *t*, *k* are unaspirated in all contexts. The significant factor in the oppositions [*p'* : *p*, *t'* : *t*, *k'* : *k*] being the aspiration it is convenient to mark this positively in the phonemic notation *p̣*, *ṭ*, *ḳ*. Examples:

<i>p̣ēlā</i> 'mosquito'	:	<i>pē</i> 'foot'
<i>p̣ahni</i> 'heel'	:	<i>pahlin</i> 'to cook'
<i>laxḷ</i> 'bench'	:	<i>tahli</i> 'felt rug'
<i>ḳar</i> 'donkey'	:	<i>kar</i> 'piece'
<i>ḳurk</i> 'fur coat'	:	<i>kurk</i> 'broody (hen)'

Vowels

§ 158. *ū* [y:] is confused by some speakers with unrounded *i* [i:], e.g.

dūng [dy:ŋg] > *dīng* [di:ŋg]

Consonant Groups

§ 159. (a) In Am. secondary consonant groups are realized as in Ak. (v. § 154), i.e. either without an intrusive vowel, as *CCC*, e.g.

lē ṭkan ž hirē [ṭʃe:tkanʃ'hiri:ɛ:]

or as *CC^vC*, e.g.

rafid l baydā [raʃi:d l'bay'da:]

or as *C^vCC*, e.g.

lōn p lēva [tʃu:n'pɾɛ:va]

(b) In the remaining dialects of the group there is less flexibility. Whenever three consonants come into secondary contact a short, unstressed [i] is realized before the penultimate consonant of the group, thus *always* *C^vCC*. Similarly when two consonants in secondary contact follow a pause they are preceded by a short, unstressed [i], thus *^vCC*. Examples:

Bar. *kat ž darva* [k'at'ʒ'darva]

Zx. *dast p lōli* [dast'p'ʃu:li:]

Gul. *ž zamān* [ʒza'ma:n]

HAKARI AND BOHTAN DIALECTS (Kd. *Hakārī*, *Bōtān*)

§ 160. No satisfactory phonetic description of either of these dialects exists. The most recent description, that of Hadank (op. cit., pp. 20-25), is based on the speech of the cosmopolitan Emīr Kamuran Alī Bedir-Xan (KABX), of Bohtani family, and is of little value. It is possible, however, to cull the following facts from the description in *L'Alphabet Kurde*, a series of articles in the Kd. periodical *Hawar* (Damascus, 1932-43) by Emīr Celadet Alī Bedir-Xan (CABX).

(a) *Hawar*, No. 11, p. 7. 'Les Kurdes de la région constituée par le (Botan) au centre, le (Heqarī) au Nord et le (Behdīnan) au Sud prononcent . . . le (û) comme le (u) français, ainsi que la majorité des kurdes comme le (u) allemand. Comme conséquence naturelle de cette prononciation, les mêmes kurdes prononcent le (o) comme le (ou) français, . . .'

(b) CABX states (*Hawar*, No. 6, p. 10) that there is a 'manque de (û) bref dans la langue Kurde'. Accordingly he uses the letter *u* for 'presque un nouveau son'. His description of this sound is somewhat obscure, but Lescot (op. cit. (ii), p. vi, n. 2) summarizes thus, 'u—correspond au son *uw*', i.e. [wi]. But Hadank gives no special description of this sound, cf. op. cit., p. 29, *gundeht Kurdistānē*, transcribed phonetically [gúndākt kurdistānē].

(c) *Hawar*, No. 10, p. 5. 'De même certains Kurdes . . . prétend(ent) que dans la langue Kurde aussi existe(nt) deux (ك), comme en arabe le (س) et le (ص), le (ت) et le (ط) et ainsi de suite.' CABX, however, does not consider that the opposition $k_1:k_2$ exists and makes no distinction in his alphabet. But the following note, *Hawar*, No. 25, p. 2 n., is revealing: 'Me "kher" yan mirovê ko nabihlze, bi vî awayî nivîsand, da ko ji "kerê" heywan bîte veqetan(d)in. Ji xwe ev "kh" ji ya din stêrtir e.' 'We have written *kher*, i.e. a man who cannot hear, in this manner to differentiate it from *ker*, the animal. This *kh* is by nature thicker than the other.' The choice of letters is unfortunate as *kar* 'donkey' has the aspirate and *kaŕ* 'deaf' the unaspirated ('thick' = emphatic?) *k*. Nevertheless the opposition appears to exist in (?) Bohtani.

(d) *Hawar*, No. 4, p. 9. 'On pourrait noter ce son au moyen du (ê), comme dans les mots (pêz پێز) et (sêd سێد) . . . ; avec la dictée arabe, on pourrait peut-être rendre ces sons en durcissant les

consonnes et en écrivant (بنا، صد). 'Nous avons constaté, d'autre part, la même variante de prononciation dans des mots empruntés à l'arabe. Ésqer, éreb, éll.' (I.e. 'askar, 'arab, 'alī.) CABX is speaking of his own pronunciation 'en tant qu'originaire de Botan'. He attributes the difference in pronunciation of these and like words to an insignificant variation in the vowel alone and, accordingly, no distinction of the consonant values *s* : *ʃ*, *t* : *ʒ*, *z* : *ʒ*, or indication of ' , is made in his alphabet.

It is reasonable to assume from these notes concerning the debatable phonemes *o*, *u*; *u*; *k*, *k*, &c.; *ʃ*, &c., that the Hakari and Bohtani dialects have a phonemic system identical with that of the Am., Zx. dialects (v. § 156).

BITLIS DIALECT (Kd. *Bitlîs*)

§ 161. *Xalîdî*, writing in *Mûşîkî*, a few miles west of Bitlis, comes as near as the Arabic alphabet permits to giving a complete picture of the phonemic system of this *Bitlîsî* dialect.

A distinction between aspirated and unaspirated voiceless plosives is not made, nor is *f* specially marked. On this subject, however, see the note (op. cit., p. 208) s.v. *ك*, 'kar, "donkey" and "deaf" and "loan" and "piece", and the Kurds have slight differences in their pronunciations of these words, according to the meanings given, which none but they can arrive at, and it is not possible to describe them here.' Cf. Zx. *k̄ar* 'donkey', *kaṭ* 'deaf', *kar* 'piece', but *qar* 'loan'.

The emphatics *ʃ*, *ʒ*, *ʒ* and ' all appear, described exactly as in the Ak., Am., &c., dialects.

It is justifiable to assume then that the *Bitlîsî* dialect has a phonetic system identical with the Am., Zx. dialects (v. § 156) with the reservation that *o*, *u* are pronounced simply as [o:, u:] respectively.

EREVAN DIALECT (Kd. *Ravânî*)

§ 162. For the last three decades Erevan, capital of the Armenian S.S. Republic, has been the centre for an increasing output of Kd. books and periodicals. These have appeared first in a Latin script, from 1929 to 1945, and since then in a modified Cyrillic. The language of these publications is, presumably, the dialect of

the Erevan area, albeit normalized. This, with the Kd. dialects spoken in the neighbouring Georgian and Azerbaijan Republics, has been the subject of the researches of a number of Soviet scholars. The fullest recent description of the Rwn. dialect is that of Kurdoev (op. cit. (ii)).

Phonemic System

§ 163. Kurdoev (ibid., pp. 15 ff.) gives the following system for the Rwn. dialect of thirty-one consonants (including two semi-vowels) and eight vowels:

<i>p</i>	<i>t</i>	<i>ʈ</i>	<i>k</i>			
<i>p</i>	<i>t</i>	<i>ʈ</i>	<i>k</i>	<i>q</i>		
<i>b</i>	<i>d</i>	<i>ɟ</i>	<i>g</i>			
<i>f</i>	<i>s</i>	<i>ʃ</i>		<i>x</i>	<i>h</i>	<i>h</i>
<i>v</i>	<i>z</i>	<i>ʒ</i>		<i>ɣ</i>	(<i>ʕ</i>)	
<i>m</i>	<i>n</i>					
	<i>l</i>					
	<i>r</i>	<i>ʀ</i>				
<i>w</i>		<i>y</i>				
<hr/>						
	<i>i</i>		<i>i</i>	<i>u</i>		
		<i>ɛ</i>	<i>ɛ</i>	<i>ɔ</i>		
			<i>a</i>	<i>ɑ</i>		

This system shares with that of the Am., Zx. dialects the two series of voiceless plosives, aspirated and unaspirated, but differs from it in the following particulars:

- (i) absence of the emphatic consonants *t*, *ʈ*, *ʒ* (v. § 164);
- (ii) presence of a third affricate *ʈ* (v. § 165).
- (iii) classification of *x*, *ɣ* as uvular, rather than velar,
- (iv) realization of *ʕ* (v. § 166),
- (v) replacement of *u* by *ɔ* (v. § 167),
- (vi) realization of *ɔ*, *ɑ*, [o:, u:] rather than [u:, y:].

Consonants

§ 164. The emphatic consonants *t*, *ʈ*, *ʒ* are not marked in any way. In some words the emphasis of an initial *t*- in the Zx.

dialect appears to be reflected by the 'aynation' of the following vowel in Rwn. (v. § 166), e.g.

Lx. *šārī, šāv, šāzi* : Rwn. *tāri, tāt, tāzi*

§ 165. The affricate phoneme written *č*, then *č'*, in Rwn., and here as *č*, is variously described. Sokolova (op. cit. (ii), p. 79) quotes Cukerman simply, '*č* - pharyngalized'. Bakaev (op. cit., p. 513) is inconsistent. Misled apparently by the diacritic, he describes *č'* first as an aspirate (with *π'*, *τ'*, *κ'*) and then as having 'a certain pharyngalization'. Adjarian¹ transcribed the sound *č* (unaspirated) in opposition to *č'* (aspirated). This is borne out by Miller's (op. cit. (i), p. 72), Bakaev's, and Kurdoev's comparison with Armenian *č*, i.e. a voiceless, ejective affricate [tʃ'].²

§ 166. In place of a consonantal phoneme 'there appear various modifications of the vowel *a* by means of a diacritic (*š*, *ə*). Miller (op. cit. (i), pp. 68-69) describes the sign both as indicating 'aynation (*ajnacija*) of a vowel, or an *ayn*, or its voiceless equivalent *h*, following it' and as 'simply an initial vowel, but pronounced with *Pressstimme*'. He further observes that the Kurds of Azerbaijan replace *š* by *h*, e.g. *šrd* > *hərd* 'earth'.

Sokolova (op. cit. (i), p. 14) refers to the 'upper-pharyngeal articulation which is a characteristic of Armenian Kurdish and there apparently forms a pharyngalized *a* (*a_a*) in place of an etymological *ع*'. Bakaev (op. cit., p. 512) defines *ə* as 'pharyngalized *a* . . . pronounced with tension of the walls of the pharynx'. Kurdoev (op. cit. (ii), p. 17) describes it as a 'tense, aynized sound of the type of Arabic *ع*', approaching long *ā* in medial position.

Thus the sign appears to be ambiguous, representing initially '+V and medially V+', with certain exceptions. The ' may be written over the vowel in transliteration also, thus

ānī, ārab, jīmādt, tāri, tāt, tāzi, &c.

Vowels

§ 167. For *u* there appears a vowel, written in Latin script as *y* (cf. *u* for *ū*), but in Cyrillic as *ю*. This Kurdoev describes as a 'palatalized labial front' vowel, with two variants, viz. pronounced

¹ 'Recueil de mots kurdes en dialecte de Novo-Bayazet', *M.S.L.* xvi of 1910.

² See W. S. Allen, 'Phonetics of an Eastern Armenian speaker', *T.P.S.* of 1950, pp. 188, 194.

as Turkish *ö* following *t*, *ʈ*, *d*, and *x*, and acquiring a *ω*-colouring following *k*, *k*, *g*, *γ*, and *q*. Bakaev defines it as a 'central (nearer to back) labialized vowel'. It may be transcribed as *ø* (contrast Sul. *o*, § 44).

OTHER NORTHERN KURDISH DIALECTS

§ 168. It is impossible to give a sufficient phonetic, still less phonemic, description of any of the remaining northern Kd. dialects from the published material available. The Latin alphabet designed for these dialects by Celadet Ali Bedir-Xan (v. § 160), far from representing any one dialect, is intended to give only the 'highest common factor' of all northern Kd. dialects. The letters employed give a basic system of twenty-five consonants (including two semi-vowels) and eight vowels, as follows:

a (= *ā*), b, c (= *f*), ç (= *ç*), d, e (= *a*), ê, f, g, h, ħ (= *h*),
i, î, j (= *ǰ*), k, l, m, n, o (= *o*), p, q, r, (rr = *r*), s, ş (= *š*), t,
u, û, v, w, x, x̣ (= *γ*), y, z.

Index of phonemes

§ 169. [See overleaf]

Unless otherwise stated, = signifies 'the description given in the paragraph noted to the left applies'.

C. GENERAL

STRESS, INTONATION, AND JUNCTURE

§ 170. The Kd. dialect material available, both that presented here and published previously, does not provide a suitable basis for a full description of the features of stress and intonation.¹ Stress has been mentioned above, particularly as a criterion in the choice of a phonemic orthography for the various dialects. It will also be treated incidentally below when it appears relevant to the morphological description.

¹ McCarus, *op. cit.*, gives a first and, notwithstanding a certain inaccuracy in his data, a useful analysis of the 'Non-Linear Phonemes' of the Sul. dialect.

KURDISH DIALECT STUDIES

Phonemic system	1	61	78	96	108	156	163

Although the spacing and punctuation employed in the texts implies some statement of different juncture and intonation patterns it is, in part at least, conventional.

VOWEL COMBINATION

§ 171. With certain minor variations from one dialect to another vowels in internal and external combination undergo the following changes. Examples, unless otherwise stated, are from Sul.

(a) *i*, *u*, following any other vowel are reduced to the corresponding semi-vowel, e.g.

ē-, *ka-*, *dā-*, *xō-*, *nū-* + **-i* > *ēy*, *kay*, *dāy*, *xōy*, *nūy*

dī-, *dā-* + **-u* > *dīw*, *dāw*

pē, *gō*, *māma*, *gā*, *gō*, *gū* + **-i* > *pēy*, *goy*, *māmay*, *gāy*, *gōy*,
gūy

The special cases of *-i/i* + **-i* > *-i/iy* > *-i*, *-u* + **-u* > *-ūw* > *-ū*, are described in § 60.

(b) *ē* normally retains its identity, sometimes coalescing with preceding *ē*, *a*, e.g.

ē-, *nū-* + **-ē(t)* > *ē(t)*, *nwē(t)*

War. *gaya-* + **-ē(t)* > *gayē(t)*

Bin. *tē*, *qisa* + **-ē* > *tēē*, *qisē*

Unstressed *-ē* may appear as *-ya* following any other vowel (cf. § 59 (a)), e.g.

bida, *nadā* + **-ē* > Bin. *bīdaya*, Sul. *n(ad)āya*

kursi, *dē*, *gō*, *ēwāra*, *kābrā*, *jō*, *xānū* + **-ēh* > *kurstyak*,¹ *dēyak*,¹
goyak,¹ *ēwārdyak*, *kābrdyak*, *jōyak*, *xāndyak*

(c) *a* is generally linked to a preceding vowel, other than *i*, *u*, by the semi-vowel *y*, e.g.

dē, *gō*, *ēwāra*, *kābrā*, *jō* + **-a* > *dēya*, *goya*, *ēwāraya*,
kābrāya, *jōya*

Bin. *dē*, *sa*, *āyā*, *ḷaqō* + **-aka* > *dēyaka*, *sayaka*, *āyāyaka*,
ḷaqōyaka

¹ See § 35 (b).

Alternatively, unstressed *-a* may be elided following *ē, a, ō, ô*, but not normally *o*, in internal combination, e.g.

*dē, ēwāra, kābrā, jō, (go) + *-akā > dēkā, ēwārakā, kābrākā, jōkā, (goyakā)*

*donē, ēwāra, ēstā, nīwatō, (ke) + *-awā > donēwa, ēwārāwa, ēstāwa, nīwatōwa, (kōyawa)*

The vowel *a* follows *i, u* directly, but the resulting group may be reduced in unstressed position, *ia, ua > ē, ō* respectively (v. § 59), e.g.

*kursī, ōrdū + *-akā > kursīakā, ōrdūakā > kursēkā, ōrdōkā*

(d) *ā* is joined to preceding *ē, o, ō, ô* by the semi-vowel *y*, e.g.

*dē, go, ēirā, halō + *-ān > dēyān,¹ goyān,¹ ēirōyān, halōyān*

It coalesces with preceding *a*, e.g.

*ēwāra + *-ān > ēwārān*

It follows immediately on *i, u*, e.g.

*kursī, xānū + *-ōn > kursīān, xānūān*

(e) Summary.

	i-	ē-	o-	a-	ā-	ō-	ū-
-i	iy > i	ēy	oy	ay	āy	ōy	ūy
-ē	ū, yē	ū, ē		ē	dē		ūē, wē
-ē	īya	ēya	oya	aya	āya	ōya	ūya
-a	ia (> ē)	ēya, ē	oya	aya, a	āya, ā	ōya, ō	ūa (> ō)
-ā	lā	ēyā	eyā	ā	āyā	ōyā	ūā
-ū	tu				ātu		ūtu > ū

SECONDARY CONTACT OF CONSONANTS

§ 172. (a) In all Kd. dialects final consonants are particularly unstable. There is a strong tendency for a final voiced plosive, affricate or fricative to be devoiced in pause or in secondary contact with a voiceless consonant, e.g.

¹ See § 35 (b).

Sul. <i>la bar kird</i> [k'irt]	<i>gur</i> hamām [gurtʃ h . . .]
<i>sari barz kird</i> [bars k' . . .]	<i>sad pōlls</i> [sat p' . . .]
<i>wakū sag sar</i> [sak sar]	
Ak. <i>az xulām</i> [ʔas x . . .]	<i>xō hižānd</i> . [hiʒa:nt]
<i>tō ʕituv hākimi</i> [ʃt'uf h . . .]	<i>ō waturv</i> . [wat'uf]

In one borderline case, that of Ak., &c., -av (v. § 300 (a)), so written in the light of the general form -(a)va, a voiced consonant is also regularly devoiced in contact with a following nasal or lateral, e.g.

Ak. <i>bidav min</i> [bidaʃ min]	<i>ʕōv lālī</i> [ʃu:f l . . .]
----------------------------------	--------------------------------

(b) To a lesser extent a final voiceless plosive or fricative may be voiced in contact with a voiced consonant or vowel, e.g.

Sul. <i>pālāyak abē</i> [pa:ʃa:jeg a'be:]	<i>amanay hōš bū</i> [hə:ʒ 'bu:]
<i>agar lēt nīt</i> [ʃe:d 'ni:t]	
Bin. <i>awīš dē</i> [awi:ʒ de:]	<i>baz maliklā</i> [baz m . . .]
<i>bē-kayf nīm</i> [be:k'ejv ni:m]	
Ak. <i>dast dā</i> [daz da:]	<i>ammā p tōi</i> [amma: bwi:] ¹
Am. <i>gōšē ʕē</i> [gu:ʒ ^d ʒe:]	

(c) In secondary contact occasioned by the loss of an unstressed *i* (v. §§ 42, 142) a voiced consonant is generally assimilated to a voiceless consonant, whether it precedes or follows, e.g.

Sul., &c.	<i>kāsibī</i> [ka:s'p'i:] (cf. <i>aspāb</i> < Ar. <i>asbāb</i>)
War.	<i>tōskē</i> < * <i>tōsikē</i>
Ak., &c.	<i>ʕi bihayn</i> [ʔipk'aj̄n] <i>bēʕitav xō</i> [be:ʔt'af xu:]

There are, however, exceptions, e.g.

Sul. <i>fāw n fāwʕār</i> < * <i>fāw-ā-šihār</i>

(d) There are certain, very rare, examples of the assimilation of a consonant to another with which it is not in direct contact, e.g.

Sul. <i>sik</i> < <i>xik</i> < <i>xig</i>
Bin. <i>ʕabar</i> < <i>xabar</i>
Bin., Muk. <i>kutī</i> < <i>gutī</i>

¹ This example is exceptional. The Ak., &c., prepositions *p*, *t* and the modal prefix *t*- (v. §§ 301, 281 (a)) are so normalized, rather than *b*, *d*, *d*-, because of the regular appearance of the voiceless consonant in contexts where a voiced consonant would normally be preserved, e.g.

Ak. <i>p lax</i> [p' lax]	<i>ax tniʕsim</i> [as'tniʕ:si:m]
<i>t dilē xōdā</i> [t' dil]	<i>axē tniʕsim</i> [aze:tniʕ:si:m]
<i>tēnī tbim</i> [t'e:'ni:tbim]	

PART II

SULEIMANIYE, WARMĀWA, BINGIRD, PIŽDAR, MUKRI, ARBIL, REWANDIZ, AND XŌSNAW DIALECTS

A. MORPHOLOGY

NOUNS

Definition and Number

§ 173. (a) In Sul., War. the simple noun, formally singular, may have a generic or indefinite plural sense, e.g.

- Sul. 1 *fūy kirda lāx ō kēw*: he set out for the mountains
10 *kuḥ . . . fūḥtin*: the lads went
48 *sarī biniādam*: men's heads
War. 118 *lagal fafiqim*: with my friends

(b) In the Sor. dialects and Muk. the same is true of a formally singular noun, be it in the direct or oblique case (v. § 180), e.g.

- Bin. 312 *talayān bō dirust dahāt*: he makes traps for them
Piž. — *dastitān biḥm*: wash your hands
Muk. 83¹⁷ *lēx nārdyān*: the sheikhs sent . . .
§ 12 *lēri dabē bikūzin*: you must kill lions

More frequently, however, the morpheme *-ān* is present to indicate indefinite plurality (v. § 177 (a)).

§ 174. (a) In Sul., War., all Sor., and Muk. the suffix *-akd* serves to define a noun, e.g.

- Sul. 11 *xalqaka tutyān*: the people said
26 *kitaka abē ba 'ayba*: the matter will become a shame

(b) Following a consonant or a semi-vowel (i.e. a diphthong) the suffix *-akd* is added directly to the noun, e.g.

- Sul. — *pyāwaka, lawaka*: the man, night

It combines regularly with a preceding vowel (v. § 171 (c)), thus: following *e*, it appears as *-yaka* in all dialects, e.g.

Sul. — *goyaka*: the ear

following *ē*, *a*, *ā*, *ō*, it appears as *-ka* in Sul., War., Muk., e.g.

Sul. — *ēwāraka*, *kābrāka*: the evening, fellow

War. — *dēka*, *jōka*: the village, barley

Muk. § 9 *angustilaka*, *āyāka*: the ring, Agha

but as *-yaka* in Bin., Piž., Arb., e.g.

Bin. — *dēyaka*, *sayaka*, *dyāyaka*: the village, dog, Agha

With preceding *i*, *u* the suffix commonly coalesces, e.g.

Sul. — *xānūaka* > *xānwaka* > *xānōka*: the house

12 *qāpīaka* > *qāpēka*: the gate

Muk. § 9 *jūānūaka*, *jūānwaka*: the foal

§ 175. (a) In Sul., War., all Sor., and Muk. the suffix *-d*¹ also defines a noun.

In Sul. it is used in narrative with known characters or things, e.g.

Sul. 30 *gurzēki dā ba xānūa*: he struck the (said) house a blow
with his mace

59 *dāpīra*: the old woman (in question)

This usage is less common in the other dialects, but does occur, e.g.

Muk. 10⁶ *jūa*: the Jew

(b) The main function of the suffix *-d* is to appear in conjunction with the demonstrative adjectives (v. § 192).

In Sul. a noun or nominal phrase (v. § 185 (b)) qualified by a demonstrative adjective always takes the suffix *-d*, e.g.

Sul. 9 *ato dašta*: that plain

32 *am kiča*: this girl

37 *am qūwat ū harakata*: this power and vigour

In War. *-d* occasionally does not appear after a noun so qualified, e.g.

War. 218 *am lōrat ū nāw-i bist*: he heard of this fame

See also § 199.

¹ The suffix *-d*, taken by Wahbi and Edmonds (quoted by me, *BSOAS*, xvi. 541) as a feminine form of 'definite article', is exclusively a vocative and hypocoristic ending (v. § 181 (b)).

In Bin., Piž., Muk. a noun takes the suffix *-d* when qualified by the simple demonstrative adjective, but not when the adjective has either the plural or feminine oblique endings (cf. § 192 (b)).

In Arb., Rdz., Xoš. a noun qualified by the demonstrative adjective *aw* only takes the suffix *-d* when the sense is 'proximate' (v. § 192 (b)), e.g.

Arb. 417 *aw kārwanā*: this caravan

Rdz. 475 *aw sê birâyāna*: these three brothers

The examples in the texts of *-akd* appearing in this context, e.g.

Arb. 437 *aw birâyaka*: this brother

appear to be vulgar, if not 'wrong'.

(c) The suffix combines regularly with a preceding vowel (v. § 171 (c)), i.e. following *ê*, *e*, *a*, *î*, *ô* it generally appears as *-yd*, e.g.

Sul. — *aw amustilaya*: that ring

1 *am pâldāya*: this king

Bin. 300 *am qisaya*: this talk

Muk. § 10 *aw xulāya*: that God

Arb. 421 *aw cākaya*: this good deed

In Muk. (and possibly Xoš.) it may, irregularly, coalesce with preceding *a*, e.g.

Muk. 9^o *aw angustila*: that ring

Xoš. 443 *aw bîfa*: this thicket

§ 176. (a) The suffixes Sul., War., Bin., Piž., *‘ê(h)*, Muk. *‘êk*, Rdz. *‘êk*, *‘ak*, Arb., Xoš. *‘ak*, give a noun indefinite sense, or one of unity, e.g.

Sul. 1 *mamlakâtêk*: a country

2 *lartêk akayn*: we shall make a bond

5 *yakêk*: someone

Muk. 5¹¹ *wîrêk*: a bear

Arb. 414 *‘bêzak . . . xâwnakî dît*: one day (he) saw a dream

The forms *-ê*, *-êk* alternate freely except (with E.) when followed immediately by a personal pronoun suffix, the *Izafê*, the conjunc-

tion *u* 'and' or the enclitic present tense of the substantive verb, when *-ek* normally occurs. Exceptions to this rule, such as

Sul. 82 *İartē-ı lagal*: a bond with thee

(-ı personal pronoun suffix, v. § 197), are very rare.

(b) In Sul., Bin., Piž. the suffix appears regularly as *-yak*¹ following a vowel (v. § 171 (b)), e.g.

Sul. 30 *xānāyak*: a house

49 *qarawēlayak*: a bedstead

98 *malāyak u faqēyak*: a mullah and a student

Bin. 300 *sayak*: a dog

307 *dēyak*: a village

In the shorter form, which rarely occurs in Sul. after another vowel, the vowel length is preserved, e.g.

Sul. 28 *pārčayē kāyaz*: a piece of paper

In War. the postvocalic forms *-ya*, *-yē* ([-je, -jeː], v. §§ 70, 71) appear to alternate freely, e.g.

War. 195 *haftayē*: a week

213 *yakānaya*: a boar

224 *dav'ayē*: one time

233 *tōya*: someone like thee

Mann quotes the following combinations of *-ek* with preceding vowels,

Muk. § 11 *yalabāyēk*, *pādīdēk*: a victory, king

mēlā+-ek > *mēlēk*: a thicket

The latter may be a mistaken hearing of *-dyak* (cf. Muk. 11¹ *hēndnawa* 'they brought back', for *hēnāyānawa*), but Mokrī, Song 383, also has Muk. *fōgēk* 'a stream' < *fōga*. Mann has tacitly normalized for publication in some places, e.g.

Muk. 2¹⁵ *lā dē'ek*, for MS. *lā dēāk*: in a village, cf. Bin. 307 *dēyak*.

¹ E., and some Kd. writers, normalize by writing *-ek* كَکْ, and *-yēk* يَکْ following a vowel, e.g.

E. *brayēk*, *kundeyēk*: a brother, water-skin

The Arb., Rdz., Xoš. form *ak* may either be linked to a preceding vowel by *y*, e.g.

- Arb. 414 *pātāyak*: a king
419 *hōdayak*: a room

or the *a* may be elided following an *a*, e.g.

- Arb. 441 *kundak*: a water-skin
Xoš. 443 *bīšak*: a thicket

The suffix may coalesce with a preceding *t*, giving *-ēk* (v. § 59 (a)), e.g.

- Arb. 427 *grāniak* > *grānēk*: a famine

(c) A noun qualified by an indefinite or interrogative adjective (v. § 191) commonly takes the suffix *-ē(k)*, *-ak* and may, nevertheless, have a plural sense, e.g.

- Sul. 8 *či kičēk* . . . *či kičē*: whichever girl
18 *čay wazirēk*: some viziers
Muk. § 11 *čand dēwēk*: some demons
hamā kārēk: all affairs

- Arb. 421 *či xawnak*: what (sort of) dream

In conjunction with the numeral *yak* (v. § 193) a number of irregular contractions occur, thus:

- Sul. — *yakēkyān*, but War. 252 *yēkyān*: one of them
Sul. — *har yakē*, but Bin. 308, Arb. 436 *har yaka*: each one

§ 177. (a) The morpheme *-ān* indicates plurality.¹ In its absence a noun may still have an indefinite plural sense (v. §§ 173, 176 (c), 185 (b)). Conversely an indefinite plural noun may take the ending *-ān*,² and in all Sor. and Muk. normally does so, e.g.

¹ A few nouns have plurals in *-di*, *-hdi*, *-jdi*, derived ultimately from the Ar. fem. pl. in *-di*, but here calques from NP., e.g.

bāx, *bāydi* 'garden(s)', NP. *bāy*, *-di*

bakdrāz 'spices', NP. *do*.

dī, *-hdi* 'village(s)', NP. *diā*, *-di*

mīwa, *-hdi*, *-jdi* 'fruit(s)', NP. *mīwe*, *-jdi*

The morpheme *-gal*, which (with its derivatives *-al*, *-ayl*) is the regular plural ending of the dialects of Sina, Kirmānšāh, &c. (v. Barr, Mokri, *opp. cit.*), appears in Sul. with the names of animals as a 'collective' morpheme only, e.g.

gā 'ox', *gāgal* 'herd of cattle'

mā 'sheep', *māgal* 'flock of sheep'

² Cf. § 239 (a).

Sul. — *pašmānān lāryān lē biwāya*: if horns were to grow on those with regrets

Bin. 367 *astērān muwāfiqin*: the stars are favourable

Piž. 409 *la binyādāmān*: from men

Muk. § 25 *birāyān*: brothers

A noun qualified by an indefinite or interrogative adjective (v. § 191) may take the ending *-ān*, which then precedes the suffix *-ē(k)* (v. § 176 (c)), e.g.

Sul. 4 *laḡ karānēk*: some persons

War. 209 *bāzē xalqān*: some people

In general, however, the ending *-ān* appears in conjunction with the defining suffix *-akā* (§ 174), forming *-akān*, e.g.

Sul. 107 *culāxakāntān*: your steeds

Muk. § 25 *aspakān*: the horses

Xoš. 446 *dyākānī tīr*: the other Aghas

(b) The ending *-ān* combines regularly with a preceding vowel (v. § 171 (d)), thus:

it is joined to preceding *ē, o, ā, ō* by *y*, e.g.

Sul. — *am birāyāna*: these brothers

Piž. — *la hartik lāyāndā*: on both sides

but coalesces with preceding *a*, e.g.

Sul. — *am fōgāna*: these streams (*fōga*)

Piž. 399 *law qisāna*: in these matters (*qisa*)

and, in all dialects, *-akān* (v. (a) above).

In Sor. and Muk., however, *-ān* may coalesce, irregularly, with preceding *ā*, e.g.

Muk. § 25, fn. 1 *malāyān, malān*: mullahs

Arb 415 *aw birāna*: those brothers (*birā*)

(c) In Sul., War. a noun qualified by a cardinal number (v. § 194) does not normally take the ending *-ān*, e.g.

Sul. 16 *dā fōž āya sē fōž*: two or three days

21 *lam ḥawt kuḡay sē kuḡyān*: three of these seven sons of his

44 *sē ḡwār šaw*: three or four nights

War. 194 *dā sē ḡaywān*: two or three animals

In all Sor. and Muk., however, a noun so qualified commonly does take the plural ending, e.g.

- Bin. 340 *bîst û êwâr sa'âtân*: twenty-four hours
 352 *aw sê darkāna*: those three doors (*darka*)
 Piž. 385 *sê fōzān*: three days
 402 *dagal da nasarān*: with ten men
 Muk. § 48 *êwâr kufān*: four boys

In Rdz. in this context the plural ending appears as *-ā* (cf. Ak., &c., *-ā(n)*, § 261 (b)), e.g.

- Rdz. 491 *sê fōzā*: three days
 493 *sê saḥāzā*: three hours

§ 178. Of the nominal suffixes:

- A. *-akd* (§ 174) B. *-dn* (§ 177)
 C. *ʿēk, ʿak* (§ 176) D. *-ā* (§ 175)

the order of possible affixation to a noun is, for all dialects,

A B C D,

though A, C, and D are mutually exclusive. Thus the possibilities of combination are as follows:

- A Sul. 36 *araka*: the ground
 AB Piž. 382 *ḥitākān*: the plants
 Xoš. 451 *law wasirakān*: of those viziers (v. § 175 (b))
 B War. 209 *bāzē xalqān*: some people
 Rdz. 504 *la wurāyān*: on horsea
 BC Sul. 4 *čay kasānēk*: some persons
 BD Sul. 78 *am kičāna*: these girls
 Piž. 382 *aw ḥitāna*: these plants
 C Sul. 2 *sēwēk*: an apple
 Xoš. 445 *dākhak*: a mother
 D Sul. 59 *dāpīra*: the old woman
 Piž. 390 *aw āsina*: this iron

For combinations with other suffixes see §§ 187, 199.

Gender and Case

§ 179. (a) In Sul., War. there are no inflective morphemes,¹ and hence no distinction, of *grammatical* gender or case. In the system

¹ The ending *-ā* with certain noun forms is not a case ending but an enclitic postposition (v. § 236 (b)).

of Vocative endings, however, a distinction of *natural* gender is observed (v. § 181 (b)). Otherwise the uninflected noun appears in all contexts.

(b) In all Sor. and Muk. a distinction of two grammatical genders is observed, viz. Masculine and Feminine. This distinction is manifest in the inflective Oblique case morphemes (v. § 180 (b))¹ and, in Bin., Piž. only, in the forms of the Izafe (v. § 183 (a)).

As in Sul., War. a distinction of natural gender is observed in the vocative endings.

Where a noun has natural gender the grammatical gender coincides with this. Otherwise it is largely unpredictable.

§ 180. (a) All Sor. dialects and Muk. present a declensional system of two cases, Direct and Oblique, in addition to the partial system of Vocative forms (q.v., § 181 (b)).

A noun in the Direct case may function as:

- (i) Subject of a sentence or clause, or a Predicative noun,
- (ii) Direct Affectee of a sentence or clause in the Agential construction (v. § 223).

Moreover, there is a general tendency, though varying in effect from one function to the next, for the Direct case form of a noun to replace the Oblique.

A noun in the Oblique case may be:

- (i) Direct Object of a sentence or clause,
- (ii) (in Sor. only) Agent of a sentence or clause in the Agential construction (v. § 224),
- (iii) governed by a preposition,
- (iv) following another noun with the Izafe (v. § 184), or following the Demonstrative Izafe (v. § 188),
- (v) used adverbially.²

A noun in the Oblique case, when followed by the Izafe (v. § 182), does not take Oblique case endings. The Izafe is enclitic to the uninflected noun.

(b) A noun in its simplest form is in the Direct case. The Oblique case is marked by the addition to the singular noun of

¹ The distinction was demonstrated for Muk. in *BSOAS*, xvi. 539 ff.

² The examples at Muk. § 18 fall rather under category (iii). But cf. § 240 (a).

the morphemes, Masculine -*i*, Feminine -*ê*. Plural nouns in -*ân* have no separate Oblique form. Thus:

	Sg. M.	F.	Pl. M. & F.
Dir.	- <i>û</i>	- <i>û</i>	- <i>ân</i>
Obl.	- <i>i</i>	- <i>ê</i>	

Following a vowel the M. Sg. Obl. ending appears regularly as -*y*, e.g.

Bin. 315 *lafay bikâ*: (who) might do battle

Very rarely -*ay* appears to be reduced to -*ê* (cf. § 87).

The F. Sg. Obl. ending -*ê* coalesces with preceding *a*, yielding -*ê*, e.g.

Bin. — *bô qalûdizê*: for Qala Diza

308 *ba qisêtân*: according to what you say (*qûa*)

but not with preceding *ê*, thus

Bin. 300 *la fêê*: on the road

Following *d* the ending -*ê* may appear as -*ya* (cf. § 59 (a)), e.g.

Piž. 398 *wâlîy baydâya*: the governor of Bagdad

Muk. 1²³ *bô qal' dya*, 2¹⁴ *la qal' dyê*, in MS. both *qaldyâ*

When a noun is followed by any of the suffixes of definition -*akd* (§ 174), -*d* (§ 175), *êk*, *ak* (§ 176) the Oblique case ending is -*i/-y* for both genders. Thus:

	Sg. M. & F.		
Dir.	- <i>akd</i>	- <i>d</i>	<i>êk/ak</i>
Obl.	- <i>akdy</i>	- <i>dy</i>	<i>êki/aki</i>

(c) Examples of the Oblique case:

(i) as Direct Object,

Bin. — *fîti* (M.) *dakayn*: we plough

— *ntwêêê* (F.) *dakan*: they pray

— *hakâyatêki* (? F.) *dagêrinawa*: I shall tell a story

316 *mamlakati* (M.) *têk bidâ*: (he may) destroy the country

Muk. 4³ *awê* (F.) *nafrêlê*: should not sell water

(ii) as Agent (v. § 224),

Bin. 319 *şinakay* (F.) *pêy gut*: the woman asid to him

320 *pêy gut*, *patrûsydy* (M.): Petrusya said to them

327 *xwēdy* (M.) . . . *hātā kird*: God gave . . .

341 *arsalāni* (M.) *širēki gayāndē*: Arselan struck him with a sword

348 -y *qisa kird* . . . *naḥmāni* (M.): Naaman said

(iii) governed by a preposition,

Bin. 319 *ba dim āwē* (F.): at the water's edge

349 *ba sūfānawē*: (began) to drive (all infinitives F.)

353 *la ci fōžēkidā* (F.): on whatever day

Piž. 398 *bō xdtiri šinakay* (F.): for the woman

Muk. 59⁷ *ba kaka mamī* (M.): to brother Mem

62¹ *ba arxēdā*: to the earth } ('arx M./F.)

Bin. 312 *la 'arxi*: from the earth }

Muk. 7¹⁸ *la rēā* } on the road (rē F.)

Bin. 300 *la rēē* }

(iv) following the Izafe or Demonstrative Izafe,

Bin. — *lapt dasti* (M.): palm of the hand

— *xiñi aspi* (M.): saddle of the horse

— *xiñi māñē* (F.): saddle of the mare

304 *i bāxawdnakay* (M.): the gardener's

346 *'ašqi aw kičay* (F.): in love with that girl

357 *bargi qāwacēlīē*: clothes of the coffee-sellers' calling (all abstract nouns in -i (v. § 255 (a)) F.)

Muk. 1¹⁴ *mīwāni darwēfēki* (M.): guest of a dervish

147¹⁴ *āwi daznožē* (F.): ablution water

Arb. 425 *la panāy dāraki* (F.): under a tree

(v) with adverbial sense,

Muk. 3⁴ *nīwālawē* (F.): at midnight

3¹⁹ *qadirēki* (? F.): for a while

Vocative

§ 181. (a) A noun in its uninflected form may serve as a vocative. All such vocatives are stressed on the first syllable, e.g.

Sul. — *bīrā*: brother!

16 *āmōzā*: cousin!

35 *māl'ūn*: accursed one!

120 *dfat*: wife!

120 *pydwaka*: husband!

Muk. 151¹¹ *xdtūn asti*: Lady Asti!

A vocative preceded by a particle, such as *ay*, *yā*, is generally uninflected, e.g.

Sul. 3 *ay dfrat*: O wife!

21 *ay kuş*: O lad!

53 *yā xidrî xîna*: O immortal Khidr!

Similarly a noun qualified by any determinant, or by a personal pronoun suffix (v. § 197), is otherwise uninflected in the vocative,¹ e.g.

Sul. — *kîçim, lagal tōma*: daughter, my (business) is with thee

4 *birākānim*: my brothers!

21 *kuřim*: my lads!

89 *kulf xōm*: my son!

In Muk. an uninflected plural vocative is formed with the word *gālî* (**gal* 'group' + Izafe -*î*?, cf. § 262 (b)), e.g.

Muk. 24¹ (MS.) *gālî fūān mērdn*: O (group of) youths!

(b) Nouns denoting animate beings may take the following endings in the vocative:

Sg. M. & F. *-a* F. *-ê*² Pl. M. & F. *-îna*³

Examples:

Masculine

Sul. — *kûfa, matirsa*: don't be afraid, lad!

— *kēra, êt awê*: blind man, what dost thou want?

52 *ay xwāya*: O God!

Muk. 20⁰ *abdāl бага*: Abdal Beg!

Feminine

Sul. — *pāra šukrî*: 'Auntie' Shukri!

12 *dāya gyān*: mother dear!

— *kîçê, malarza*: don't tremble, lass!

— *bākê, got lê bē*: daughter-in-law, pay thou heed!

Piž. 409, Muk. 100²¹ *xalkê*: sister!

¹ The -y in War. 230 *kulf lālay* 'cousin!' (literally, 'maternal uncle's son', but addressed to a girl, perhaps for politeness) is unexplained.

² These Sg. endings also appear forming hypocoristic names (cf. § 262 (a)), e.g. Masc. *mîca* 'Mustafa', *qāla* 'Qadir', *xula* 'Mahmud', *şafa* 'Rashid', Fern. *fāta*, *fātê* 'Fatima', *pîza* 'Pîroz', *xofê* 'Khadija'.

³ Muk. generally -*îna*.

Plural

- Sul. — *štnīna*: women!
 — *kūfīna* (Muk. 188²⁸ *kurīna*): lads!
 Bin. 326 *dy wazīrayna* [*sic*]: O viziers!
 Muk. 97²⁸ *xismīna*: kinsmen!
 150²⁹ *faqēnā* [*sic*]: students! (*faqī*)

Izafe

§ 182. All Kd. dialects possess particles the functions of which are mainly analogous to those of the NP. *izāfa*. These particles will be called generally Izafe.

The Izafe has three main functions:

- (i) to connect a noun with a determinant immediately following it, be it an attributive adjective, a noun or pronoun in genitive relation to it or in apposition (v. §§ 184, 185),
- (ii) to connect certain adjectives and nouns to their complements (v. § 186),
- (iii) to act as a relative pronoun with a definite antecedent (v. § 243 (b)).

§ 183. (a) The Izafe has the following forms:

Sul., War., Arb., Xoš. -*i*;¹

Bin., Piž., Muk.²

general (following M. & F., Sg. & Pl. nouns) -*i*;
 Sg. F. only -*ē*, e.g.

Muk. 30⁴ *xātnē nawfōdāna*: fair young lady!

31¹ (MS.) *xulkē mīr xēndīm*: I am Mīr Zēndīn's sister

There is a tendency for the general form -*i* to supplant the F. -*ē*, e.g.

Bin. — *bō mālē mā*: to our house (*māl* F.)

— *la māli āfnāy mā*: in our friend's house

Very rarely the form -*ē* appears with a masculine noun, e.g.

Bin. 363 *nēwē xāfī*: thine own name (*nēw* M.)

Rdz. -*i*/*-ē* without distinction of gender, e.g.

Rdz. — *bābi/ē min*: my father (*bāb* M.)

473 *nēčīrē xō*: (my) own prey (*nēčīr* F.)

474 *nēčīrī tū*: thy prey

¹ There is a trace of a former wider distribution of the F. Izafe form -*ē* in the following isolated, but regular, form:

Sul. 56 *pīrēfīn*: old woman (but *pīramērd*: old man)

² Despite Muk. § 20, fn. 1.

(b) The general form *-î* appears as *-y* following a vowel, e.g.

Sul. 2 *kābrāy rîlspî*: the grey-bearded fellow

Bin. 327 *la xōfîy awa*: for joy of that (v. § 60)

The form *-î* coalesces with preceding *a*, e.g.

Bin. 337 *tōlê bābî xōm*: revenge for my father (*tōla* F.)

In Muk. (Muk. § 20, end), Rdz. the Izafe may appear as *-(y)a* following a vowel, e.g.

Rdz. 478 *birāya xō*: (my) own brother

484 *kursî(y)a min*: my seat

(c) In Bin., Piž., Muk., with an antecedent formally singular but with plural sense, or with two or more singular nouns joined by the conjunction *u*, *we* 'and', the Izafe form *-î* may be followed by a particle *da*, thus *-î da*,¹ e.g.

Bin. 314 *waxrî da min*: my viziers

319 *pyāwî da pāšê . . . cūn*: the king's men went

349 *dāk u bābî da tō*: thy mother and father

Piž. 404 *la tirî da S.*: from fear of S. (cf. § 239 (a))

411 *farg u siy dawê kuşaya*: that boy's liver and lights
(v. § 236 (c) fn.)

Muk. 50¹² *ama yarîbîn, lawānî da bēgāna*: we are strangers,
of those who are foreign

63¹⁵ *dan'ki da hanārê*: pomegranate seeds

63¹⁵ *gullî da serinê*: lily flowers

107⁸ *gōşay da maydānê*: corners [*sic*] of the field

136²² *la hartik cūwî da tû*: from both thy eyes

§ 184. (a) When a noun, defined or otherwise, is qualified by an attribute or by another noun (cf. § 182 (i)) these follow the noun qualified and are normally joined to it by the Izafe,² e.g.

¹ Cf. Ak., &c., *-î(t) < -î dî*, § 264 (a).

² In War. the Izafe is occasionally omitted, even before an attribute, e.g.

War. 237 *dargay mālî* () *bēfîn*: the door of the widow's house

This is perhaps influenced by the compound prepositions with *mālî*, e.g.

War. 246 *cūyna mālî jafîr bag*: we went to the house of J.

246 *la mālî hāfî . . . bāyn*: we were in the house of Hājī

The majority of such cases are marked by the presence of the suffix *-î(h)*, e.g.

War. 200 *la tēntî* () *tir*: in another place

206 *hōtê baynê* () *da . . . law*: for a period of some ten days

(i) Attribute,

- Sul. 5 *kābrāyaki fīlspī*: a grey-bearded fellow
 7 *māmay fīlspī*: the grey-bearded 'uncle'
 69 *tūtikhī pīkhōla*: a little dog

(ii) Genitive noun or pronoun (v. § 180 (a)),

- Sul. 43 *xānūy ēma*: our house
 49 *sarī biniādam*: men's heads
 55 *xizmakārī wulāxakat*: thy horse's servant
 69 *mālī kičī islāmīdy pariān*: the bouse of the daughter
 of Islam Shah of the Peris
 War. 188 *kānibly mālī xōmān*: the work of our own house
 Bin. 318 *šinē maliklāy*: Malikshah's wife
 Piž. 384 *čaqāndinē titilakān*: the planting of the seedlings
 394 *kafillē ahmadi*: bail for Ahmed

(iii) Appositional noun,

- Sul. 9 *tawqēki āltūn*: a collar of gold
 86 *hayāsī birāt*: thy brother Heyas
 War. 188 *minālī fašqim*: the children, my friends
 199 *zalāmī sālēwī jūtakān*: men (who are) owners of a
 pair (of plough-oxen)

(b) A noun may be qualified by more than one attribute. In such a case each attribute may be connected to the foregoing by the Izafe or by the conjunction *u*, to 'and', e.g.

- Sul. — *kičēki jwānī čwārda-sāl*: a beautiful, fourteen-year-old girl (i.e. 'sweet sixteen')
 — *minālēki pīs ū pōxil*: a filthy, dirty child
 Bin. 306 *jēžki kay wā*: such another place
 354 *arsalānī je-gatoray xānadān*: the noble, highborn
 Arselan

(c) A noun in partitive relation to another is not normally followed by the Izafe, e.g.

- Sul. — *handē jār*: sometimes (a few times)
 P *naxtē/kamē pāqla*: some, a few beans
 29 *yak hagba pāra*: a bag of money
 35 *tōžek binēšt*: a little mastic
 57 *yak mist āltūn*: a handful of gold

- War. 230 *čil tanaka nawot*: forty (4-gallon) cans of paraffin
 265 *čwār faxf 'askar*: four battalions of soldiers
 Bin. 303 *sē kūpa dltān*: three crocks of gold
 Muk. 97¹³ *pārwek nān ū čōrēk āw*: a morsel of bread and a
 sip of water

but, exceptionally,

- Bin. 326 *čand 'adadēkī haskar*: some soldiers

§ 185. (a) In Sul., War., all Sor., and Muk. an alternative construction to that described in § 184 exists. A noun qualified by an attributive adjective or another noun may form an 'open' compound with the qualifier, which follows the qualified noun and is joined to it by a compound vowel *a*. After *ē*, *e*, *a*, *ā*, *ō*, however, no compound vowel is realized (v. § 171 (c)).

Examples:

- Sul. 25 *kufā pālā*: the king's son
 42 *birā gawra*: eldest brother
 56 *fāta swār*: a pair of riders
 War. 190 *kufā muxtār*: the beadman's son
 204 *birā gawraka*: the elder brother
 Muk. 24 *kāka mam*: Brother Mem
 66 *nīwa lafī*: half of his body

(b) It is not possible to specify accurately all the conditions in which each construction may appear. In many cases either construction seems to be possible, e.g.

- Sul. 2 *bāla gardānī sari* } the wing circling about thy head
 13 *bālī gardānī sari* } (i.e. 'thy protector')

The open compound construction is essential when the *qualified noun phrase* is defined by either of the suffixes *-akā*, *-ā*, e.g.

- Sul. 13 *am naw'a litānā*: these sorts of thing
 25 *am hamū itūmaka fūwānā*: all this fine stuff
 39 *aw xēwata sawzā*: that green tent
 40 *xēwata sawzaka*: the green tent
 181 *dāyk ū bāwks pīra faqīrakay*: his poor old mother
 and father
 Piž. 390 *sara astūraka*: the thick end

- Muk. 6¹⁵ *bēčūa wurčaka*: the wolf cub
 25¹³ *aw dinyā xōlā*: this pleasant world
 Xoš. 461 *pišta tourāyaka*: the horse's back

The compound may also take the suffix *-ēk*, *-ak*, e.g.

- Sul. E *šaina āwēnayak*: a kind of mirror
 E *kilka harēk*: a donkey's tail
 Muk. 174²⁴ *gaza jāwēk*: an ell of cotton cloth

Without a suffix it may have an indefinite plural sense, e.g.

- Sul. 44 *birā pičūk . . . bān*: the younger brothers became . . .

§186. Certain adjectives and nouns, particularly those forming part of compound verbs (v. § 234), are joined to their complement by the Izafe, e.g.

- Sul. 7 *pišānī šmat dā*¹: you showed (*pišān dān*) us
 23 *pēlkašī kušay bikay*: you present (*pēlkaš kirdin*) it to his son
 66 *swārī faxī bā*: he mounted (*swār bān*) his steed
 67 *tāšī am darda*: afflicted (*tāš*) by this trouble
 Piž. 396 *tašlīmī . . . mahmūdī kird*¹: he surrendered (*tašlīm kirdin*) him to Mahmud
 Muk. 3¹⁵ *xarīkī baxmī dabūn*: they would be engaged (*xarīk bān*) in feasting

§ 187. In conjunction with the series of suffixes

- A. *-akā*, B. *-ān*, C. *-ēk*, *-ak*, D. *-ā* (v. § 178),

the order of possible suffixation of

E. the case endings *-ī*, *-ē* (§ 180 (b)),

and F. the Izafe *-ī*, *-ē* (§ 183),

is, for all dialects, A B C D (E) F,

though B and E, and E and F, are mutually exclusive. Thus the possibilities of combination are

- | | | | |
|-----|------|-----|---|
| AE | Bin. | 303 | <i>la bāxakaydā</i> : in the garden |
| AF | Sul. | E | <i>bāxakay tā dīt</i> : the garden you saw |
| ABF | Sul. | E | <i>šarakānī xōyān</i> : their own towns |
| BF | Sul. | — | <i>pālawānānī kurd</i> : Kurdish champions |
| BDF | Sul. | — | <i>aw šitānay tō dīt</i> : those things you saw |

¹ Agential construction, v. § 223.

CE	Muk.	3 ²⁰	<i>qadirêki</i> : for a while
CF	Sul.	2	<i>kābrāyaki fīlspī</i> : a white-bearded fellow
DE	Piž.	384	<i>aw laway</i> : that night
DF	Arb.	414	<i>aw xatēnay . . . gēlālawā</i> : that dream which you related
E	Bin.	349	<i>la pāpōrē</i> : in a steamboat
F	Bin.	356	<i>nēwī xēm</i> : my name

Demonstrative Izafe

§ 188. In all Kd. dialects an independent Demonstrative Izafe occurs, related in form to the enclitic Izafe but with different functions.

The Demonstrative Izafe has the following forms (cf. § 183 (a)):

Sul.	<i>hi</i>
War.	<i>hi(n)</i>
Muk., Arb., Xoš.	<i>i</i>
Bin., Piž.	<i>i, (? ē), i da</i> (cf. § 183 (c))
Rdz.	<i>i/ē</i>

It may appear before:

- (i) a noun or pronoun, to which it gives a possessive meaning, or
- (ii) an adjective, giving it a definite, 'substantive' sense.

Examples: (i)

Sul.	—	<i>hi birāy min</i> : that of my brother, my brother's
	—	<i>hi kē</i> : whose?
	—	<i>hi ēma</i> : ours
War.	—	<i>hīn māyā</i> : the cow's
	199	<i>hi bāwāpīra gawramāna</i> : it is our ancestors'
	200	<i>hi kasēki wakh F.</i> : that of someone like F.
Bin.	333	* <i>tarbiati swārīē w i pālāwāniē</i> : the learning of horsemanship and that of wrestling
	379	<i>dastī pā takānd, i amīrlangī</i> : he jerked his hand, that of Amirsheng
Muk.	242 ²⁰	<i>i xēm la i tū pitira</i> : mine is bigger than thine
Rdz.	501	<i>mārē minīš . . . ē birāē minīš</i> : my house . . . my brother's too

(ii)

Sul.	—	<i>hi gawra</i> : the big one
	—	<i>hi hīn</i> : the blue one

- Piž. — *i da dišin han*¹: we have other ones too
 Muk. 212¹⁵ *i gawra . . . i dikōla*: the elder . . . the younger
 Rdz. — *i dī bina, i nū*: bring another, a new one

ADJECTIVES

§ 189. Attributive adjectives, which like adjectives employed predicatively are uninflected in all dialects, normally follow the noun they qualify, either with the Izafe (§ 184) or in the open compound construction (§ 185).

Adjectives may be used, in their uninflected form, as adverbs, e.g.

- Sul. — *bāyakī tun*: a fierce wind
 36 *tun mačakī girt*: he seized his wrist firmly

With the appropriate inflexional endings, adjectives may act as substantives, e.g.

- Sul. — *nāwēl gawra, dē wērān*: a great name (but) a ruinous village
 — *gawram*: my master!
 — *gawray 'il*: the leader of the tribe

Conversely, a small number of nouns may be employed much as attributive adjectives, e.g.

- Sul. — *kar*: donkey
 — *pyāwēkī kar*: a stupid fellow

Comparison

§ 190. (a) The morpheme *-tir* added to the simple adjective form yields the comparative adjective. This behaves exactly as a positive adjective, e.g.

- attributively: Sul. — *lāxēkī barztir*: a higher mountain
 predicatively: 30 *ama . . . fawāntira*: this one is more beautiful
 adverbially: 47 *xūtir ačē*: goes quicker
 substantively: 45 *la min fawāntir*: one more beautiful than me

The only irregularity in the formation of a comparative adjective attested is in Sor., Muk. § 32 *čātir* 'better', from *čāk* 'good'.

¹ A shibboleth phrase containing three particularly Pił. forms. See also §§ 197 (-in), 218 (han).

(b) The morpheme *-în* added to the comparative adjective forms the superlative adjective (cf. § 195 (b)). This, unlike the positive and comparative adjectives, immediately precedes the noun it qualifies, e.g.

Sul. P *bô âxâtîrîn sarbâx*: for the bravest soldier

(c) *har*, combined with another adjective and the qualified noun in the open compound construction (§ 185), gives the adjective a superlative sense, e.g.

Sul. E *qisna hara feânaka*: the finest tomb (*qisn*: 'dry stone wall')

Certain adjectives

§ 191. (a) Adjectives of the following categories immediately precede the noun they qualify:

- (i) the demonstrative adjectives (v. § 192),
- (ii) cardinal numbers (v. § 194),
- (iii) superlative (§ 190 (b)) and ordinal (v. § 195 (b)) adjectives in *-în*,
- (iv) the following interrogative and indefinite adjectives (cf. §§ 176 (c), 177 (a)),

War. *bâxê* 'some' (Ar. *ba'ḍ*)

çi 'what(ever), whichever'

War. *ḥan*, Sul. *ḥan/η*, Sor. & Muk. *ḥand* 'how(ever) much, some' (as an adverb 'how . . .')

filân(a), Arb., &c., *firân* 'such and such'

gîft 'all'

Sul., War. *hîl*, Sor. & Muk. also *çi*: 'any'

hamî, Arb. also *hamî* 'all, each, every'

har, *harēl*, *harē*, *haē* 'any, whatever'

kâm 'which(ever)'

but not

ka, *tir*, *dî(ka)*, *dika* 'other'

wâ, *wahd*, *awhâ*, *wa*, *awa* 'such'

xôr, War. *fira* 'many, much' may either precede or follow the noun qualified.

* Muk. *çi* 'any' is probably a mishearing of *çi*, e.g.

Muk. 4¹⁴ *çi jēm nîa*, but 3²⁶ *çi jēm nîa*: 'I have no place'.

(b) Examples of interrogative and indefinite adjectives.

- War. 209 *bāzē xalqān*: some people
 Sul. 2 *ba ēi dardē giriftāri*: with what ill art thou troubled?
 17 *la ēi lonēkā*: in whichever place
 War. 208 *čan filspīyak*: some elders
 Sul. 4 *čarj . . .*, 8 *čan muddatēk*: some time
 Bin. 326 *čand 'adadēki hāskar*: some soldiers (cf. § 184 (c))
 Sul. P *čan faš bā*: how black it was!
 Sul. 16 *la filāna mawqi'ā* } in such and such place
 Bin. 303 *la filān londā* }
 Sul. P *gišt mindālakān*: all the children
 Sul. 58 *hič kasēk nāwērē*: nobody dares
 Bin. 362 *či yadrim . . . nakirdunā*: I have not done any harm
 Sul. 13 *hamū fičēk*: everything
 Bin. 322 *hamū sālēk*: each year
 War. 200 *har kasēk* } whoever
 Sul. 11 *hač kasēk* }
 Bin. 318 *hač mawqihēk*: wherever
 Sul. P *kām astēray gaš*: which bright star

but,

- Sul. — *fiči wā nla*: there is no such thing
 — *yakēki ka* } another one
 Arb. 426 *yakaki dika* }
 Sul. — *zōr fār* } many times, often
 War. — *fira fār* }

but,

- Sul. P *pāray zōr, kalki čla*: what is the use of much money?

Demonstrative adjectives

§ 192. (a) Sul., War. have two inflexible demonstrative adjectives, *am* 'this', *aw* 'that'. A noun, singular or plural, qualified by either of these is normally followed by the defining suffix *-d* (§ 175).

All Sor. and Muk. have only one demonstrative adjective *aw* 'this, that'. The form *am* 'this' appears in Bin. as a loan from Sul., e.g.

- Bin. 299 *lam ifānay*: from these works

(b) In Bin., Piž. the general demonstrative adjective *aw*, qualifying an oblique plural noun, may also take the ending *-ān*, in which case the noun does not take the suffix *-d*, e.g.

Piž. 399, Muk. 4¹ *law qisānā*: from these words (*qisa*)

but,

Bin. 378 *lawān qisāndā*: in these words

330 *bō awān suwārān*: for those horsemen

In Piž., Muk. the general demonstrative adjective *aw*, when qualifying a feminine singular oblique noun, may take an oblique ending *-ē*,¹ in which case the noun also takes the oblique ending *-ē* (§ 180 (b)) and not the suffix *-d*, e.g.

Bin. 346 *'aŋqī aw kičay*: in love with that girl

but,

Piž. — *awē kičē wāy kird²*: that girl did thus

— *čū bō aw mālay* }
— *čū bō awē mālē* } went to that house

Muk. 99¹⁸ *bawē birinē*: from this wound
passim, *awē lawē*: (on) that night

In Arb., Rdz., Xoš. a noun qualified by *aw*,

(i) takes the suffix *-d* only when it is 'proximate', i.e. indicates something physically near or which has already been referred to in narrative, e.g.

Arb. — *aw kuŋa*: this boy

Rdz. 475 *sē birā lagarim haya*, *aw sē birāyāna*: there are three brothers with me, these three brothers . . .

(ii) takes the suffix *-žē*¹ when it indicates something physically remote, e.g.

Arb. — *aw kuŋebē*: that boy yonder

(iii) takes no suffix when it refers to something absent, e.g.

Arb. — *aw kuŋ*: that boy

435 *aw birāyānē min*: those brothers of mine

¹ The resulting *awē* is not, therefore, with Mann, Muk. § 38, the general oblique case form of the adjective but a specifically Feminine oblique.

² Cf. § 180 (c) (ii).

³ Cf. Sur. *awēhē* § 277, there alone analysable as **awa + -d + hē*.

Numerals

Cardinal

§ 193

	Sul., War.	Bin., Pil.	Muk. § 48	Rdz., Xoḏ.	Arb.

900	nōśād	—	—		—
1,000	ḥawṣr	—	—		—
1 m.	milyān (§ 36)	—	—		—

¹ — signifies 'the same form as that noted to the left'.

§ 194. (a) Cardinals immediately precede the noun they qualify. In Sul., War. a noun so qualified normally does not take the ending -ān (§ 177 (c)), while in all Sor. and Muk. it normally does.

A cardinal, other than 'one', appearing independently may take the plural ending *-ān*, e.g.

War. 227 *syān bā, čwār bā*: (whether) it was three or four
237 *sālē, dūān*: a year or two

Muk. § 48 *čūārān, dūāzādān*: 4, 12

(b) With certain numbers (generally round numbers—tens, hundreds, &c.) the qualified noun may take an ending *-ī*, giving the sense of 'about . . .',¹ e.g.

Bin. 311 *tamanī hawt halt sālī*: the age of about seven or eight years

Xoš. 459 *ba qadar bist wurdāyī*: to the extent of some twenty horses

(c) The repetition of the cardinal numbers, with or without the plural ending *-ān*, gives a distributive sense, e.g.

War. 197 *hamū yaka yaka w dwān dwān ā čwār čwār acin*:
they all go by ones and twos and fours

Ordinal

§ 195. (a) Ordinal numbers are formed directly from the cardinals by the addition of the ending *-am*, e.g.

Sul. — *yakam* 'first', *pēnjam* 'fifth', *bistam* 'twentieth'

Following *z*, *a*, *ā*, *ō* an *h* is realized before the ending *-am*, e.g.

Sul. — *sēham* (also *sēyam*) 'third'
naham (also *nayam*), *nōham* 'ninth'
daham (also *dayam*) 'tenth', *yānzaham* 'eleventh'
panfāham 'fiftieth'

These ordinals follow the qualified noun with the *Izafe*, e.g.

Sul. 47 *fēgāy sēham*: the third road

(b) The ordinal adjective in *-am* may further take the ending *-in* (cf. § 190 (b)), e.g.

Sul. — *yakamīn* 'first', *pēnjamīn* 'fifth'
also *awwalamīn* 'first' (Ar. *awwal*)

With cardinals ending in *a*, *ā* this ending normally takes the form *-mīn*, not **-hamīn*, e.g.

Sul. — *lānzaham*: *lānzamīn* 'sixteenth'
haftāham: *haftāmīn* 'seventieth'

¹ Contrast the adverbial *-ī*, § 240 (b).

The ordinal adjective in *-(a)min* immediately precedes the noun it qualifies (v. § 191 (a) (iii)), e.g.

Sul. — *yakamīn fār*: the first time

In Rdz., corresponding to general *-amīn*, the form *-amē* occurs. This follows the noun qualified (cf. Ak., &c., -ē, § 274), e.g.

Rdz. 474 *fārī šēyamē*: the third time

PRONOUNS

Personal

Independent

§ 196. (a) Sul., War., all Sor., and Muk. present systems of six personal pronouns, each with an independent and a suffix form (q.v. § 197). All Sor. and Muk. have further independent oblique forms for all persons and, in Bin., Piž., one additional person. Thus:

	Sul., War.	Bin., Piž.	Muk., Arb., Rdz., Xoš.
Direct			
Sg. 1	<i>min</i>	<i>amīn</i>	<i>amīn</i>
2	<i>tō</i>	<i>atō/a</i>	<i>atō/a</i> , ⁽¹⁾ Arb. <i>atā</i>
3	<i>aw^(s)</i>	<i>(h)aw</i>	<i>aw^(s)</i>
Pl. 1	<i>(h)ēma</i>	<i>ama</i>	<i>ama</i>
2	<i>ēwa</i>	<i>awa</i>	<i>angō</i>
3	<i>awōn</i>	<i>awān</i>	<i>awān</i>
Oblique			
Sg. 1		<i>(a)min</i>	<i>(a)min^(s)</i>
2		<i>(a)tō/a</i>	<i>(a)tō/a</i> , Arb. <i>(a)tā</i>
3 M.		<i>(a)wī</i>	<i>(a)wī</i>
3 F.		<i>(a)wē^(s)</i>	
Pl. 1		<i>(a)ma</i>	<i>(a)ma</i>
2		<i>(a)wa</i>	<i>(a)ngō^(s)</i>
3		<i>(a)wān</i>	<i>(a)wān</i>

NOTES:

(1) Mann consistently writes 2nd Sg. *(a)tu*. There is evidence within his texts, however, that this represents, in conformity with the Sor. dialects, *(a)tā*, e.g. the rhyme at Muk. 136¹⁰ ff. *dūa* : *atua* : *fūa* : *tua*.

In all Sor., except Arb., and in Muk. (a)to and (a)ti alternate freely, regardless of case, e.g.

- Bin. 315 *laſay laſal tō bikā*: (who) might fight with thee
 321 *tō lēy dagafēy*: (whom) thou art seeking
 325 *atū bō . . . hātīawā*: why hast thou returned?
 325 *yabarim bō tū hēnāwatawā*: I have brought news for thee

- Muk. 123 *atu xalqī hey*: of where art thou a native?
 69 *atōf . . . dabam*: I shall take thee
 72 *atōf wara*: come thou too!
 307 *lāwē tū [nīc]*: thine eyes

(2) The 3rd Sg. independent pronoun is identical in form with the remote demonstrative adjective *aw* (v. § 192 (a)). In Sul., War. the proximate demonstrative adjective form *am* may also appear as a 3rd Sg. personal pronoun. Both forms may also function as 3rd Pl. personal pronouns with the ending *-ān*, thus:

- Sg. 3 *aw*, (*am*) 'he, she, it', Pl. 3 *awān*, (*amān*) 'they', e.g.
 Sul. 31 *aw gāwira*: he is an infidel
 9 *awānīf*, 76 *amānīf*: they too

(3) Mann, Muk. § 37. 'Für den Nominativ [3rd Sg. pers. pron.] tritt meist das Demonstrativum *aw* ein.' But *aw* is an adjectival form of the demonstrative, requiring the noun qualified to take a suffix *-d* (v. § 192 (a)), while, as Mann rightly states Muk. § 38: 'Alleinstehend, substantivisch gebraucht, lautet das Pronomen [demonstr.] ursprünglich stets *awd*.' Thus *aw* here should be recognized as the direct case of an independent personal pronoun.

Muk. § 37, 3rd Sg. direct *awē* is perhaps best explained as an encroachment of the oblique form. Alternatively *-f* may be an Izafe.

(4) The 3rd Sg. masculine oblique form (a)wē may replace the feminine oblique (a)wē even in Bin., Piž., e.g.

- Bin. 344 *nīlānī wī biday wakū amin bō wī sūtāwim*: show her that I am burning for her

(5) The doubly oblique forms *aminī*, *atōf*, &c., quoted by Mann, Muk. §§ 33-35, appear unresl. All the examples quoted Muk. § 36 contain, as Mann's footnote admits, the 3rd Sg. personal pronoun suffix *-f* (q.v. § 197). But note

- Xoš. 448 *aminī dakužin*: they will kill me

(6) *-ngō* may only occur enclitically.

(b) The independent personal pronoun forms have the same functions as the corresponding nominal case forms (v. §§ 179 (a), 180 (a)).

In the oblique case the full forms, *amin*, &c., appear mainly in the functions of the Direct Object and (in Bin., Piž. only) of the Agent in the Agential construction. The short forms, *min*, &c., with the exception of *-ngō*, appear in all the functions of the oblique case.

Examples:

- Bin. — *awē wāy kird*: she (Agent) did thus
 325 *nawakū fa sar tōf bidā, atōf bikāzē*: lest he fall on
 thee too, kill thee too
 Muk. 6¹ *darxwārdī wī dadā*: he would feed her
 58²⁰ *dagal awī*: with her
 Xoš. 465 *daspīrānī wī dētīn*: her fiancé comes

(c) When an independent personal pronoun of the 1st or 2nd person appears as the Direct Affectee of the Agential construction (v. § 223), or as the complement of the substantive verb, then the verb does not agree with it in person but appears in the 3rd person singular, i.e. as if the pronoun were a noun,¹ e.g.

- Sul. — *minī dīwa = dīwitīn²*: thou hast seen me
 — *ēmat dīwa = dīwitīn²*: thou hast seen us
 20 *minī bō ēia*: what am I to him?
 35 *tōyān nārdutwa*: they have sent thee
 68 *ka mintān māra kird*: when you married me (off)

Similarly with the verb *wistīn* (v. § 220),

- Sul. P *azānī min tōm čand xōf awēt*: thou knowest how much
 I love thee

The agreement of the verb is exceptional in

- War. 214 *ēma haštā to atwāna pālawānī kuštīn*: he has killed
 us seventy or so champions

¹ See also § 242 (d) and Muk. § 92.

² See § 228.

Suffix

§ 197. (a) The personal pronoun suffixes have the following forms:

	General	Additional
Sg. 1	-im (-m) ⁽¹⁾	
2	-it (-t) ⁽²⁾	Sul., War. -u (-w)
3	-i (-y)	
Pl. 1	-mān	Piž., Muk., and -in (-n) ⁽³⁾
2	-tān	remaining Sor. -a (-w)
3	-yān	

NOTES:

(1) The forms in parenthesis appear after a vowel. When the suffix is followed by another enclitic the unstressed vowel of -im, -it is not normally realized (v. § 41 (c)). Regarding the realization of -y after *i*, see § 60.

(2) See § 7 (c). In Sul., War. the 2nd Sg. form frequently appears as -*i* in postvocalic, and reduced to -*i* in postconsonantal position.

Also in Sul., War. a 2nd Sg. form -u (-w) is occasionally heard (to be distinguished from the Piž., &c., 2nd Pl. form -a, -w).¹ This may be no more than a phonetic variant of -i conditioned by the proximity of a back vowel or a bilabial consonant (v. § 55 (b)). The frequency of its occurrence with *kultim* is noteworthy.

Examples:

- Sul. — *daru bišō*: wash thy hands!
 13 *lāwu pē bikawē*: that thy eye may behold
 51 *nāwkušim, alqayak akama got, aḥkam ba 'abdi xōm*:
 I shall not kill thee, I shall put a ring in thy ear,
 make thee my slave
 War. 218 *pēḫ bixānē palpalit akā*: if he finds out about thee
 he will chop thee up
 273 *bō nāwkušt*: why hast thou not killed it?
 284 *awwā*: will take thee
 290 *ḥakdyati xōmu bō aḥkam*: I shall tell thee my
 story

¹ The similar form -u, given for the Sinef dialect in Mokri,

Songs 232 *haft peshto*: seven generations of thy forebears

247 *dino namāga*: thy faith has gone

may only be a representation of [i, iʔ]. Cf. 323 *bowhār* for *[bəkka:t] *baḡhār*.

(3) The Piž., Muk., and, less commonly, Sor. forms Pl. 1 -*in*, Pl. 2 -*a* alternate freely with the general forms -*mān*, -*tān*.

(b) The suffix personal pronouns may fulfil the functions of a pronoun:

- (i) in genitive relation to a noun (v. § 200),
- (ii) Direct Object of a transitive verb in the present tenses,
- (iii) Agent of a transitive verb in the past tenses (v. § 225),
- (iv) governed by a preposition (v. § 237),
- (v) with dative sense (v. §§ 218 (a), 220 (a), 239 (b)).

Examples:

(i) Genitive relation,

- Sul. P *la bariawa dā nistutwin*: they are seated in front of him
 1 *waḡāxī kor abē*: he has no offspring (lit. 'his hearth is blind')
 9 *aw āsikayān*: that gazelle of them
 69 *la fyāli dāyktān*: instead of your mother
 Piž. 393 *kayfi xōwa*: it is your own pleasure
 Muk. 103²¹ *sabrū bibē*: let patience be yours

(ii) Direct Object,

- Sul. 10 *hayfa biykušīn*: it is a pity, that we should kill it
 10 *wīstī . . . biygirē*: he wanted to catch it
 20 *ḡax akā ka bībīnē*: he would like to see thee
 Piž. 402 *datbam*: I shall take thee

(iii) Agent,

- Sul. 2 *dastī birda bāxalī, sēwēkī dar hēnā, dāya das pāfā*:
 he put his hand into his bosom, took out an
 apple, put it in the king's hand
 Piž. 380 *mālin bār kirdin*: we loaded up (our) homes

(iv) Governed by a preposition,

- Sul. 17 *bōy bēna*: bring . . . for him
 Bin. 351 *lēt mumbārak bē*: may it be fortunate for thee
 Muk. 1¹⁶ *xōrit lāka dagaḡ dakam*: I shall do much good
 for thee
 63²² *nanbē nēwān*: let there not be between us . . .
 167²³ *lēn*: against us

(v) Dative,

- Sul. E *am pārayat lōn cīn kawtūwa*: how has this money fallen into thy hands?
 P *wēnay lāw pē kawt*¹: he caught sight of the picture
 P *malāyān plān adā*: he points the mullah out to them
 10 *hatā munkinmān abē* (cf. 10 *hatā bōmān mumkin bibē*): as far as it may be possible for us
 101 *haqī jill akawē*: the price of the clothes is due (falls) to him

§ 198. The personal pronoun suffixes are affixed directly to a noun to which they stand in genitive relation (v. § 200). This is also true when the noun forms part of a compound preposition (v. § 238).

When fulfilling any of the other functions listed in § 197 (b) above, a pronominal suffix is affixed to whichever word of the following categories appears earliest in the clause:²

- (i) an independent noun, pronoun or adjective which is either
 - (α) the Direct Object, or Affectee (§ 223), or its complement, of a transitive verb,
 - or, in certain circumstances, is
 - (β) the Subject, or its complement, of an intransitive verb;
- (ii) a noun or pronoun governed by a preposition, i.e. the Indirect Object, or Affectee, of a transitive verb;
- (iii) an absolute prepositional form (v. § 237);
- (iv) the verb, with the limitation that this can support only one such pronominal suffix. It is then suffixed to the first of whichever of the following possible components of a verbal form is present:
 - (α) a preverb (v. § 235) or other word forming a compound verb (v. § 234),
 - (β) a negative or modal affix (v. § 206),
 - (γ) the verbal stem or participle, or an auxiliary (v. § 227).

¹ This construction often appears, deceptively, to have *lōn* 'eye' qualified by a possessive (genitive) suffix, e.g.

Sul 27 *lāwim pē akawē*: I shall see her

34 *he . . . lōwān bām nāwfidāna kawt*: when they beheld this youth

but 20 *mīn bāy akā, lāwim pē bikawē*: he summons me that he may see me

² E. has a different exposition at BSOAS, xvii. 490 ff.

Examples:

(i. β) Sul. E *am pārayat cōn cīy kawtutaa*: how has this money fallen into thy hands?

(i. β) Bin. 343 *kiklēhi zōr jwānī lē cāsp kirābū*: a very beautiful picture was stuck to it

[but, despite the presence of (i. β),

(iii) Sul. — *aw kuṣa zōr lēm nālē*: that boy does not look much like me]

(i. α) — *ēwa ba pēy qānūn am xawlatān la ēma war nagirt*: you did not obtain this land from us legally

(ii) — *ba pēy qānūn la ēmatān war nagirt* } you did not

(iii) *lēmāntān war nagirt* } obtain it

(iii) *lētān war nagirtīn* } from us legally

(iv. α) — *ba pēy qānūn wartān nagirt*: you did not obtain it legally

(iv. α) — *wartān nagirt (lēmān)*: you did not obtain it (from us)

(iv. α) — *fām naakird*: I used not to run away

(iv. β) — *namakird*: I used not to do (so)

(iv. β) — *amkird*: I used to do (so)

(iv. γ) — *kirdim*: I did (so)

(iv. γ) — *kirdutoma*: I have done (so) (v. § 227)

A pronoun suffix may also be attached to certain adverbs, e.g. *xōr* 'much' in

Sul. P *zōri hax la qumār akird*: he was greatly addicted to gambling

Muk. 1²⁶ *xōrit lāka dagal dakam*: I shall do thee much good
§ 199. In conjunction with the affixes already listed (§§ 178, 187)

A. -akā, B. -ān, C. -ēk, -ak, D. -ā, E. -ī, -ē Obl.

the order of possible suffixation to a noun of

G. -im, -it, -ī, -mān, -tān, -yān in genitive relation to it,

and H. the same in any other function,

is, for Sul., all Sor. and Muk. A B C D (E) G H,

for War. also, A B C G H D.

E and H are mutually exclusive.

Examples: Sul., &c.

AG	Sul.	3	<i>mānakay</i> : his mare
AGH	Sul.	25	<i>xulhakatānim dāwa</i> : I have given your sister
ABG	ul.	4	<i>birākānim</i> : my brothers!
ABH	ul.	12	<i>rafīqakānim ba jē hēttuwa</i> : I have left my friends behind
CGH	Sul.	74	<i>čawēkitim bidarē</i> : give me one of your eyes
CH	Sul.	155	<i>hičēkyān nadāynē</i> : they did not give us a girl
DE	Bin.	—	<i>aw barday bēna</i> : bring that stone
DH	Bin.	—	<i>aw bardam bidaya</i> : give me that stone
DG	Sul.	25	<i>am čwār kufay</i> : these four sons of his
EG	Bin.	—	<i>xulki dākēm</i> : my mother's sister
G	Sul.	27	<i>čawim</i> : my eye
H	Sul.	74	<i>pyālay čwim bidarē</i> : give me a glass of water

Wārmāwa

AH	War.	—	<i>kalatcarakam kirdō</i> : I opened the door
BGD		249	<i>am gerčānima</i> : these donkeys of mine
GD		224	<i>am kušima</i> : this son of mine
[DH		214	<i>am harakatay kird</i> : he exerted this power]
HD		274	<i>am palpita lē nagirtāyam</i> : would you had not got this pretext from me
GH		189	<i>fatl mālī xōmānim akird</i> : I used to do the ploughing for our own home

Cf. *Sinaf*, in Mokri, Songs,

GD	232, 286	<i>law dam'ta</i> : from that mouth of thine
HD Mann, MS.		<i>am xawarā xinaft</i> : he heard this news

This displacement of the suffix *-d*, partial only in War., is characteristic of the more southerly dialects. See further §§ 202 (a) fn. 1, 209 (a) fn.

§ 200. A noun qualified by a personal pronoun suffix in genitive relation to it may or may not be further defined by the suffix *-akd*, less commonly *-d* (§§ 174, 175).

(a) The defining suffix is generally present when a sense of actual possession or personal connexion is intended, e.g.

Sul.	3	<i>mānakay</i> : his mare
	14	<i>qisakay</i> : his words
	42	<i>kirārakaṭ</i> : thy shirt

45 *gyānakam*: my soul, beloved

55 *wulāxakat*: thy horse

War. 219 *bārgīrakam*: my packhorse

Bin. — *nāsinakam*: my writing

Muk. § 9 *jēgākan*: our home

dyākatān: your agha

Note the fixed phrase

Sul. 2 *ay pālāhām*: O my king

but

War. 209 *ay lāhim*: O my king

This category includes the following nouns of relationship: wife, son, daughter, brother and sister (particularly younger), e.g.

Sul. 4 *birākānim*: my brothers

19 *šinakay*: his wife

21 *kufakānī*: his sons

25 *xuskakatān*: your sister

War. 204 *birā gatorakam*: my elder brother

Muk. § 9 *kičakam*: my daughter

(b) The defining suffix is absent when no actual possession is intended, with parts of the body, with the remaining nouns of relationship and with all nouns of relationship used conventionally, e.g.

Sul. — *xulkim*: sister! (to any young woman)

12 *fāwim*: my quarry

16 *āmōxām*: my cousin!

21 *kufim*: my lads!

27 *dasgīrānim*: my fiancée

27 *čāwim*: my eye

28 *fōhī lirinim*: my sweet soul, beloved

80 *qākim*: my leg

Note *bāwchim* 'my father', but *bāwchim*, *bāwchakam* 'old fellow'

Reflexive

§ 201. The reflexive pronoun has the general form *xō* 'self'. Very rarely, with the suffix *-yān*, the form *xwā* appears (v. § 59 (b)).

Primarily the pronoun refers to the Subject of a sentence or clause, or to the Agent in the Agential construction. The pronoun

is generally further defined by a personal suffix, thus *xō-m* 'myself', *xō-t* 'thy-self', &c., e.g.

Sul. 8 *kurī xōm*: my (own) son

69 *lagal xōy*: with him(self)

Arb. 446 *ba xōyān cūnawā*: they themselves went back

It may then refer to any person in the sentence, e.g.

Sul. 11 *ba sar sarī xōtā bāzī dā*: it jumped over thy (own) head

Demonstrative

§ 202. (a) The demonstrative pronouns combine the forms of the demonstrative adjectives (§ 192) and the defining suffix *-d* (§ 175),¹ which may here lose its stress. The plural forms incorporate the morpheme *-dān* (§ 177).

Sul., War. have then a system of two, remote and proximate, pronouns, while Bin., Piž., Muk. have one general demonstrative pronoun. In Arb., Rdz., Xoš. the same distinction is made as with the demonstrative adjective (§ 192 (b)), viz. *awa* 'this', *awêhê*² 'that yonder', *aw* 'that (absent)'. Only *awa* is considered here, *awêhê* being inflexible and *aw* identical with the 3rd personal pronoun of the same dialects (§ 196).

In Sor., Muk. the demonstrative *awa* may take the oblique ending *-l* (*-y*) and is then frequently reduced to *way*, &c. Thus:

Sul., War. Bin., Piž. Muk., Arb., Rdz., Xoš.

Direct

this	<i>ama</i> }	<i>awa</i> (<i>awha</i> ,	
that	<i>awa</i> }	<i>ahwa</i> , <i>ahô</i>)	<i>awa</i>
these	<i>amāna</i> }	<i>awāna</i>	
those	<i>awāna</i> }	(<i>awhāna</i> , &c.)	<i>awāna</i>

¹ In War. the demonstrative pronoun may be disrupted by a personal pronoun suffix (§ 197), or the adverbial suffix *-l* (v. § 240 (e)), appearing before the defining suffix *-d* (cf. § 199), e.g.

War. 190 *amaw ahîd*: I used to do this

but 267 *awîf*: that too

268 *awîm awêl*: that (is what) I want

280 *awîta kîd*: thou didst this

² Cf. Sur. *awêhê*, § 277.

Oblique

Sg.	<i>away</i> (<i>achay</i> , &c.)	<i>atca</i> , (<i>a</i>) <i>way</i>
Pl.	<i>awānay</i> (<i>achānay</i> , &c.)	<i>awāna</i> , (<i>a</i>) <i>wānay</i>

Examples:

- Sul. 9 *awayān*: that one of them
 9 *awānay ka*: those others
 62 *amāna hamāy*: all these
 Bin. 347 *awham lāzima*: I need that
 367 *lahway cātir*: better than that
 Muk. 830 *hāta way bimirē*: (he) came to this, that he would die

(b) There is some confusion in usage between the demonstrative pronouns and the 3rd personal pronouns (§ 196 (a)), e.g.

- War. 194 *awīl*: that (not he) too (but cf. § 175 (b))
 Arb. 414 *tikrār lō way kirdawa*: he repeated it for him
 426 *'umrī wāna*: their ages

Interrogative

§ 203. (a) The following inflexible interrogative pronouns, and related adverbs, occur:

- Sul., War. *lī*, Sor., Muk. *lī* (*lī* only in pause and in *bō lī*, Arb., &c., *lō lī* 'why?'¹) 'what?'
 Sul., War., Bin., Piž. *lōn*, Muk. *lilōn*,² Arb. *kā* 'how?'
 War. *lan*, Sul. *lan/ŋ*, Sor. & Muk. *land* 'how much, many?'
kē? (Muk. § 43 *k'ē(hā)*) 'who?'
 Sul., War. *kay*, Piž., Muk. *kangē*, Arb. *kangī* 'when?'
kām(a) 'which?'

¹ Often reduced to *bōl*, *lōl*, and even *bō*, *lō* 'why?'

² The form *lū* appears in an isolated phrase with *xānīn*, e.g.

Sul. 131: *lū xānīn*: how should we know?

Muk. § 43 *lū xānīn*: how should I know?

³ Once in Bin. *kē* appears as a relative pronoun with an antecedent (cf. § 243),

Bin. 355 *atū kēt pē dalēn* . . . : thou whom they call . . .

Examples:

- Bin. 321 *awa ba ċi ċün*: what did you go for?
 368 *atū dalēy ċi*: what dost thou say?
 Muk. 4^s *ċi dahay*: what art thou doing?
 24²⁵ **ċiya (ċia)*: what is it?
 Sul. — *ama ba ċaṇa*: how much is this?
 — *kē awa*: who (is) that (at the door)?
 P *fēgāy xālid kāmaya*: which is Khalid's place?

(b) The following forms contain the sense of a verb:

Sul. *kwā, kāmātā*, Muk. *kwānē*, Arb. *kānī* 'where is, are?'

For example:

- Sul. 117 *kāmātā hanārakāntān*: where are your pomegranates?
 Muk. 21^r *kwānē swārī da nāxanīn*: where are the splendid riders?
 Arb. 43^r *kānī birātān*: where is your brother?

Sul. *kə* 'where?' requires a limiting preposition, thus:

- Sul. *la kə* 'where?', cf. Arb., &c., *kēdarē* (v. § 278 (b))
bə kə 'whither?', cf. Arb., &c., *kēwa*

For example:

Sul. — *wāy la kə? wām lēra*: where art thou? Here I am

VERBS

§ 204. The verb has two simple tenses, namely Present and Past, formed regularly from the present and past stems (v. § 205) respectively. The present tense rarely appears in its simple form and then with subjunctive force (cf. compound verbs, § 234).

The two simple tenses are modified by modal affixes (v. § 206) to give a system in which distinctions of both tense and mood are made.

The past stem and past Participle (v. § 213) combine with tense forms of the substantive verb, the sole auxiliary in this function, to form further, compound, tenses.

The full system is summarized at § 217.

Stems

§ 205. (a) The simple tenses are formed from the present and past stems of the verb.

Verbs are normally quoted in the form of the infinitive verbal noun, which invariably ends in *-n*. The removal of the final consonant *-n*, and when it is preceded by the vowel *-i-* of this also, yields the past stem, which is thus regularly predictable from the form of the infinitive, e.g.

<i>ġan</i> 'go'	: <i>ġn-</i>
<i>hātin</i> 'come'	: <i>hāt-</i>
<i>kirdin</i> 'do'	: <i>kird-</i> , &c.

The infinitive is, therefore, marked by a morpheme *-(i)n*.

The present stem is not always predictable from the form of the past stem or infinitive, or vice versa. The following empirical rules may be stated, but exceptions and irregularities are numerous and vary according to the dialect.

(i) When the past stem ends in *-i*, or, if the verb is transitive and polysyllabic, in *-ā*, then the form of the present stem is that of the past stem less this vowel, e.g.

Intransitive	<i>fīl-i</i> ¹	: <i>fī-</i>	'fly'
	<i>larā-</i>	: <i>lar-</i>	'tremble'
	<i>piām-</i>	: <i>piām-</i>	'sneeze'
Transitive	<i>bī-i</i>	: <i>bī-</i>	'cut'
	<i>kī-i</i>	: <i>kī-</i>	'buy'
	<i>māl-</i>	: <i>māl-</i>	'sweep'
	<i>pī-i</i>	: <i>pī-</i>	'ask'
	<i>hēnā-</i>	: <i>(h)ēn-</i>	'bring'
	<i>kēlā-</i>	: <i>kēl-</i>	'plough'
	<i>pēlā-</i>	: <i>pēl-</i>	'fold'

(ii) When the past stem ends in *-ā* and the verb is either intransitive, or transitive and monosyllabic, then the present stem normally ends in *-ē*, e.g.

Intransitive	<i>āwsā-</i>	: <i>āwsē-</i>	'swell'
	<i>birzā-</i>	: <i>birzē-</i>	'roast'
	<i>dīzā-</i>	: <i>dīzē-</i>	'tear'
	<i>tikā-</i>	: <i>tikē-</i>	'drip'

¹ All forms are Sul. unless otherwise stated.

(but note,	<i>s(t)ā-</i>	: <i>s(t)-</i>	'rise'
	<i>tīrsā-</i>	: <i>tīrs-</i> , Muk. <i>tīrsē-</i>	'be afraid'
	<i>xiā-</i>	: <i>xi-</i>	'live'
Transitive	<i>gā-</i>	: <i>gē-</i>	'copulate with'
	<i>nā-</i>	: <i>nē-</i>	'put'

(iii) When the past stem ends in *-ā* the present stem is normally identical with it, e.g.

Transitive	<i>dirā-</i>	: <i>dirā-</i>	'sew'
	<i>farmā-</i>	: <i>farmā-</i>	'order'
	<i>gurā-</i>	: <i>gurā-</i>	'flay'
	<i>ja-</i>	: <i>ja-</i>	'chew'

(but note,			
Intransitive	<i>bā-</i>	: <i>b-</i>	'be'
	<i>çā-</i>	: <i>ç-</i>	'go'

(iv) When the past stem ends in *-t*, *-d* then the form of the present stem is normally that of the past stem less this, e.g.

Intransitive	<i>bārd-</i>	: <i>būr-</i>	'pass'
	<i>bixūt-</i>	: <i>bixū-</i>	'move'
	<i>gilōft-</i>	: <i>gilōf-</i>	'rub'
	<i>hawt-</i>	: <i>haw-</i>	'fall'
	<i>mird-</i>	: <i>mīr-</i>	'die'
Transitive	<i>girt-</i>	: <i>gir-</i>	'hold'
	<i>xənd-</i>	: <i>xən-</i>	'study'
(but note,	<i>bast-</i>	: <i>bast-</i>	'tie'
	<i>bist-</i>	: <i>bīst-</i> , Muk. <i>byē-</i>	'hear'
	<i>past-</i>	: <i>past-</i>	'tread'

(v) When the vowel preceding the final consonant, or consonant group, of the past stem is *-ā-* then the corresponding vowel of the present stem is normally *-ē-*, e.g.

Transitive	<i>bwārd-</i>	: <i>bwēr-</i> > <i>ber-</i>	'pass'
	<i>bižārd-</i>	: <i>bižēr-</i>	'pick'
	<i>(ha)nārd-</i>	: <i>nēr-</i>	'send'
	<i>pālāwt-</i>	: <i>pālēw-</i>	'strain'
	<i>sūtān(d)-</i>	: <i>sūtēn-</i>	'burn'

(vi) When the past stem ends in *-st*, *-št*, the present stem frequently ends in *-x*, *-š* respectively, e.g.

Transitive	<i>gast-</i>	: <i>gaz-</i>	'bite'
	<i>gwāst-</i>	: <i>gəz-</i>	'remove'
	<i>pārāst-</i>	: <i>pārēz-</i>	'protect'
	<i>xwāst-</i>	: <i>xwāz-</i>	'demand'
	<i>čēst-</i>	: <i>čēz-</i>	'taste'
	<i>kūst-</i>	: <i>kuž-</i>	'kill'
	<i>nāst-</i>	: <i>nēz-</i>	'bury'
(but note,	<i>firō(i)t-</i>	: <i>firōš-</i>	'sell', and
Intransitive	<i>nīst-</i>	: <i>nīš-</i>	'sit')

A comprehensive list of verbs, with their present stems, is given in Appendix I. The more common 'irregular' verbs, i.e. those with unpredictable present stems, are marked with an asterisk.

(b) Certain verbs are compounded with preverbs (v. § 235), which then occur with every form of the verb. In one case the 'preverb' is in fact an enclitic, *-awa*. This does not, however, affect either verbal stem as it is invariably added after the personal ending of the verb (v. §§ 207 ff.).

Affixes

§ 206. (a) Modal affixes

Sul., War. *a-*,¹ Sor., Muk. *da-*, Rdz. *a-[da-*, prefixed to:
the simple present give the Present Indicative,
the simple past give the (Past) Imperfect.

¹ In War. a modal affix *t-* occurs with two verbal stems only, forming the Present Indicative, viz.

War. — *tēm/tēm*, &c.: I, &c., come
— *tērim*, &c.: I, &c., bring

Cf. <i>Kirmānšāhi</i>	(Mokri, Songs, 33)	<i>tīyam</i>	
	(Mann, MS.)	<i>tīʔam</i>	
<i>Sinai</i>	(Mokri, Songs, 231)	<i>tēm</i>	<i>tērim</i>
	(Mann, MS.)	<i>tēm</i>	<i>tērim</i>

The form at War. 196 *adērim* 'we bring', appears to be a compromise between *tērim* and an artificial **a-ērim*.

The present forms of this verb *hāwirdin* are exceptional in that a personal pronoun suffix is attached not to either affix *t-* or *b(i)-* (o. § 198 (iv. β)) but after the personal ending, e.g.

War. — *tērimī*: I am bringing it
— *bērimī*: bring ye it!
294 *aw bērtēti*: the water should bring him

Cf. *Sinai* (Mann, MS.) *tērtēlāw*: he brings it back.

But note, influenced by Sul. *ay(h)ērim*,

War. — *ayērim*: I am bringing it

b(i)-, in all dialects (but v. § 234), prefixed to:

the simple present gives the Present Subjunctive,
the past, with the suffix *-āya*, gives the Past Conditional.

b(i)- may also be prefixed to the Imperative, and (in Bin., Piž., Muk.) to the Perfect Conditional and its derivatives (v. § 216).

The vowel of the prefixes *a-*, *da-* is not realized before *present* stems with an initial vowel *ē-*, except where this occurs through the loss of an *h-*, e.g.

Sul. — *ēm*, Bin. — *dēm*: I come (*ē-*)

— *ēē*, Bin. — *dēē*: it hurts (*ēē-*)

but, 187 *aēnē*: he brings ((*h*)*ēn-*)

War. — *ēxīm*: I say (*ēē-*)

Muk. § 53 *dēlim*: I leave (*ēl-*)

but, *da²ēnim*: I bring ((*h*)*ēn-*)

It is realized before the initial stem vowel *ā-*, e.g.

Sul. — *xarika a²wsē*: it is swelling (*āwsē-*)

Arb. — *tēk da²rēn*: they will become embroiled (*ārē-*)

and before *past* stems with initial *ē-*, e.g.

Sul. 180 *tarim aēlā*: my head was aching

When a personal pronoun suffix is present the vowel of *a-*, *da-* is always realized, whatever the stem, e.g.

Sul. — *a-γ-ēlim*: I shall leave it (*ēl-*)

The vowel of *b(i)-* is not realized before any initial stem vowel, thus

Sul. — *bēm*: should I come? (*ē-*)

War. — *bēxīm*: should I say? (*ēē-*)

(b) Negative affixes

nā-, prefixed to the simple present,¹ gives the negative of the Present Indicative.

nā-, prefixed to all other tense forms (replacing the positive

¹ When, as rarely, the negative is separated from the verb then this takes the positive affix *a-*, e.g.

Sul. P *agirim bāt bō ētā na*: I am not weeping for thee for now (i.e. for thy present state)

affix *b(i)-* of Subjunctive and Conditional tenses), gives the negative of these tenses.

má-, prefixed to the Imperative (replacing the affix *b(i)-* where present in the positive), negates it.

Personal Endings

§ 207. Each tense distinguishes five persons by characteristic endings. These do not correspond entirely to the personal pronouns (§ 196) in that the endings appropriate to the 2nd and 3rd persons plural are identical in form.

There is a characteristic Imperative ending for the 2nd person singular.

Present Tenses

§ 208. (a) The Present tense is formed from the present stem with the prefixes *a-*, *da-* (Indicative), or *b(i)-* (Subjunctive), negative *nd-*, *nd-* respectively, and the appropriate personal endings. These are essentially as given below. In conjunction with different stem finals these endings undergo regular modification. Thus the *i* of the 1st Sg. and 2nd, 3rd Pl. endings does not appear after a stem final vowel, while the *i* of the 2nd Sg. and 1st Pl. endings is normally realized as *y* in the same context. The other modifications, particularly of the 3rd Sg., are not simply analysable and are best given in detail (v. (b) below).

PRESENT PERSONAL ENDINGS:

	Sul., War.	Bin., Piž., Muk.	Arb., Rdz., Xoš.
Sg. 1	- <i>im</i> ⁽¹⁾	- <i>im</i>	- <i>im</i>
2	- <i>l(i)</i> ⁽²⁾	- <i>l</i>	- <i>l</i>
3	- <i>ē(i)</i>	- <i>ē(i)</i> / <i>-i(i)</i> ⁽³⁾	- <i>l(tin)</i> , - <i>it-</i> ⁽⁴⁾
Pl. 1	- <i>in</i>	- <i>in</i>	- <i>in</i>
2, 3	- <i>in</i> ⁽¹⁾	- <i>in</i>	- <i>in</i>

NOTES:

(1) Before an enclitic the (unstressed) vowel of *-im*, *-in* is often not realized (v. § 41 (c)).

(2) Regarding the bracketed forms see (c) below.

(3) The alternative form *-ā(t)* (cf. Arb., &c., *-ā*) is heard but rarely in Bin., Piž.

(4) The form *-it-* occurs before the vowel of an enclitic.

(b) Thus, when the present stem ends in:

(i) a consonant or semi-vowel, e.g. *b-*, &c., 'be'

	Sul.	War.	Bin., &c.	Arb., &c.
Sg. 1	<i>abim</i>	<i>awim</i>	<i>dabim</i>	<i>dabim</i>
2	<i>abi(t)</i>	<i>awi(t)</i>	<i>dabi</i>	<i>dabi</i>
3	<i>abē(t)</i>	<i>awē(t)</i>	<i>dabē(t)</i>	<i>dabī(tin)</i> , <i>dabit-</i>
Pl. 1	<i>abin</i>	<i>awin</i>	<i>dabin</i>	<i>dabin</i>
2, 3	<i>abin</i>	<i>awin</i>	<i>dabin</i>	<i>dabin</i>

Note the corresponding Present Subjunctive in

Sg. 1	<i>(bi)bim</i>	<i>biwim</i> [bu:m] (v. §§ 73, 75)	
2	<i>(bi)bi(t)</i>	<i>biwi(t)</i> [bu:i(t), by:i(t), by:(t)]	
3	<i>(bi)bē(t)</i>	<i>biwē(t)</i> [bu:e:(t), by:e:(t)]	
Pl. 1	<i>(bi)bin</i>	<i>biwin</i> [bu:in, by:in, by:n]	
2, 3	<i>(bi)bin</i>	<i>biwin</i> [bu:n]	

(ii) *-ē-*, e.g. *-lē-*, &c., 'say'

Sg. 1	<i>alēm</i>	<i>dalēm</i>	<i>darēm</i>
2	<i>alēy(t)</i>	<i>dalēy</i>	<i>darēy</i>
3	<i>alē(t)</i>	<i>dalē(t)</i>	<i>darē(tin)</i> , <i>darēt-</i>
Pl. 1	<i>alēyn</i>	<i>dalēyn</i>	<i>darēyn</i>
2, 3	<i>alēn</i>	<i>dalēn</i>	<i>darēn</i>

(iii) *-û-*, e.g. *nû-* 'sleep'

Sg. 1	<i>anûm</i>	<i>danûm</i>	<i>danûm</i>
2	<i>anûy(t)</i>	<i>danûy</i>	<i>danûy</i>
3	<i>anwē(t)</i> , <i>anō(t)</i>	<i>danwē(t)</i>	<i>danwē(tin)</i> , <i>danwēt-</i>
Pl. 1	<i>anûyn</i>	<i>danûyn</i>	<i>danûyn</i>
2, 3	<i>anûn</i>	<i>danûn</i>	<i>danûn</i>

(iv) *-a-*, e.g. *ka-* 'do'

Sg. 1	<i>akām</i>	<i>dakām</i>	<i>dakām</i>
2	<i>akay(t)</i>	<i>dakay</i>	<i>dakay</i>
3	<i>akā(t)</i>	<i>dakā(t)</i>	<i>dakā(tin)</i> , <i>dakāt-</i>
Pl. 1	<i>akayn</i>	<i>dakayn</i>	<i>dakayn</i>
2, 3	<i>akan</i>	<i>dakan</i>	<i>dakan</i>

(v) -*ō*-, e.g. *xō*- 'eat'

Sg. 1	<i>axōm</i>	<i>daxōm</i>	<i>daxōm</i>
2	<i>axōy(t)</i>	<i>daxōy</i>	<i>daxōy</i>
3	<i>axwā(t)</i>	<i>daxwā(t)</i>	<i>daxwā(tin)</i> , <i>daxwāt-</i>
Pl. 1	<i>axōyn</i>	<i>daxōyn</i>	<i>daxōyn</i>
2, 3	<i>axōn</i>	<i>daxōn</i>	<i>daxōn</i>

(vi) -*i*-, e.g. *giri*- 'weep', Sor., Muk. *ʔi*- 'defecate'

Sg. 1	<i>agirlm</i>	<i>daʔlm</i>	<i>daʔlm</i>
2	} <i>agiri(t)</i>	<i>daʔi</i>	<i>daʔi</i>
3		<i>daʔi(t)</i>	<i>daʔi(tin)</i> , <i>daʔit-</i>
Pl. 1, 2, 3	<i>agirin</i>	<i>daʔin</i>	<i>daʔin</i>

(vii) -*ya*-, e.g. War. *gaya*- 'reach', Muk. **giryā*- 'weep'

Sg. 1	<i>agayām</i>	<i>dagiryām</i> (Sor. <i>dagiryēm</i> , &c.,
2	<i>agdy(t)</i>	<i>dagirʔ</i> regular stem in - <i>ʔ</i> -)
3	<i>agayē(t)</i>	<i>dagiryē(t)</i>
Pl. 1	<i>agdyn</i>	<i>dagirydyn</i>
2, 3	<i>agayān</i>	<i>dagiryān</i>

(c) The euphonic (*t*) (v. § 7 (b)) of the 2nd Sg. (Sul., War.) and 3rd Sg. forms is always realized when the tense form is immediately followed by the vowel of an enclitic,¹ and may be so in pause. It is seldom realized before another consonant, however.

Examples:

- Sul. 28 *amdōzītawā*: thou wilt find me
62 *abayta dar*: thou carriest out

[contrast

- Bin. 344 *bikay-awa*: if thou makest . . .
350 *daʔi-awa*: thou wilt go back
Muk. 9²³ *agar bimday-ē*: if thou givest it to me]
Piž. 399 *hatā S. bimēnīt*: while S. remains (alive)
Muk. 14²⁵ *bēt la tourmī*: comes from Urmiye
Xoš. 460 *bō yazāy biʔit*: he should go to war

In Arb., &c., the 3rd Sg. -*tin* is an optional form, occurring most commonly in pause.

¹ Mainly the enclitic 'preverb' -*awa* (v. § 235 (a)) or the preposition -*a*, -*ʔ* (v. §§ 236 (d), 237 (b)).

Substantive Verb

§ 209. (a) Beside the normal tense forms (§ 208 (b) (i)) the substantive verb has an enclitic present tense:

	Sul., War. ¹	Bin., Piž., Muk.	Arb., Rdz., Xoš.
Sg. 1	-im/-m	-im/-m	-im/-ma
2	-i(t)/-y(t)	-i/-y	-i/-y
3 Sul.	-a(t)/-(y)a(t)	-a(t)/-(y)a(t)	-a/-y)a, -t-
War.	-a(s)/-(y)a(s)		
Pl. 1	-in/-yn	-in/-yn	-in/-yna
2, 3	-in/-n	-in/-n	-in/-na

where the second forms in each case appear following a vowel. In Arb., &c., the second forms of the 1st Sg. and 2nd and 3rd Pl. (-ma, -na) also follow a diphthong. The -(y)- of the 3rd Sg. forms is realized after all vowels except *i*, *u*.

Examples: (v. also § 214):

- Sul. 2 *min pālā-m*: I am a king
 73 *hāzir-im*: I am ready
 — *wā-y la ko*: where art thou?
 107 *lī tī-a*: what is thy business?
 167 *ālānī tyā-ya*: there is gold in it
 181 *ba xwā kar-in twa*: by God, you are asses
 War. 292 *xarlk-I amkušī*: art thou about to kill me?
 Muk. 97¹⁵ *hamū pālāwān ū ba-nāw-in*: we are all champions and famous
 Arb. 435 *mindār-im, sabī-ma*: I am a child, a boy
 442 *gurg-a, dēw-a, cī-ya*: is it wolf, demon, or what?
 436 *la tū-na*: they are from thee
 Rdz. 474 *amin-im, amin nēcīrī tū-ma*: I am (she), I am thy quarry
 489 *pyāw-ma*: I am a man
 475 *kušī kīsrāy-na*: they are the sons of Chosroes

¹ In War. the enclitic verb precedes the defining suffix -d (cf. § 199), e.g.

War. 281 *'adī aw 'arab-im-d*: I belong to that Arab
 (cf. Sul. — *'adī aw 'arabā-m*)

(b) The negative of this form is independent, not enclitic.

	Sul., War	Bin., &c.	Arb., &c.
Sg. 1	<i>nīm</i>	<i>nīm</i>	<i>nīma</i>
2	<i>nī(t) < *nīy(t)</i>	<i>nī < *nīy</i>	<i>nī < *nīy</i>
3 Sul.	<i>nīa(t)</i>	<i>nīa(t)</i>	<i>nīa, nīt-</i>
War.	<i>nīa(s)</i>		
Pl. 1	<i>nīn < *nīyn</i>	<i>nīn < *nīyn</i>	<i>nīna < *nīyna</i>
2, 3	<i>nīn</i>	<i>nīn</i>	<i>nīna</i>

(c) The euphonic (*t*) of the 2nd Sg. (Sul., War.) and 3rd Sg., and the (*s*) of the 3rd Sg. (War.) is always realized when the verb is immediately followed by the vowel of another enclitic (v. § 208 (c) fn.). In general only the (*t*) of the 2nd Sg. (Sul., War.) may be realized in pause or before a consonant (but v. § 214 (b)), e.g.

Sul. 38 *tō ēyt hātutēta lafaṭa*: what art thou that thou hast come to do battle?

59 *agar lēt nīt, ēm*: if thou art not mad I shall come

Imperative

§ 210. (a) The Imperative is formed from the present stem, and normally the prefix *b(t)-* (negative *mā-*), with the following endings:

Sg. 2 -a, Pl. 2 -in, when the stem ends in a consonant,
 -Q -n, " " vowel.

Thus, for example, when the stem ends in:

(i) a consonant or semi-vowel,

Sul. — *bēna*: bring! ((h)ēn-)

5 *bičīn*: go ye! (č-)

77 *bikaṭa*: fall! (kaṭ-)

War. — *biyğirin*: bold ye it! (gir-)

Arb. — *bīna*: bring! ((h)īn-)

(ü) -ē-,

Sul. — *bilēṭ*: say! (-lē-)

47 *bilēn*: say ye!

* Mann, Muk. § 69, has *bēlā* 'say!' but his informant wrote regularly *ل*. Cf., however, the variation in

War. 285 *dām na* } put me down! (nā-)
 294 *dām nē* }

Bin. 318 *magīya*: do not weep! (gīryā-)

(iii) -a-,

- Sul. 97 *binā*: go to sleep! (*nā*-)
 — *bifarmān*: be ye so good! (*farmā*-)

(iv) -a-,

- Sul. — *maka*: do not! (*ka*-)
 42 *ba* < *bida*: give! (*da*-)
 War. 221 *biywan*: take him! (*ba*-)
 Arb. 415 *mayban*: do not take him!

(v) -ō-,

- Sul. — *biřō*: go! (*řō*-)
 — *biyxōn*: eat ye it! (*xō*-)

(vi) -ī-,

- Sul. — *magirī*: do not weep! (*girī*-)

(b) In Sul., War. only, when the Imperative is followed by the vowel of an enclitic, an euphonic -r- is realized after the 2nd Sg. form, e.g.

(i) consonant stem,

- Sul. — *biygōřarawa*: exchange it! (*gōř*-)

but

- Bin. — *biyxōna-wa*: read it! (*xōn*-)

(ii) -ē- stem,

- Sul. — *biylērawa*: repeat it! (*-lē*-)
 War. 297 *bēra lāy xōm*: come to my side (*ē*-)

but

- Bin. — *biylē-wa*: repeat it! (*-lē*-)

(iii) -a- stem,

- Sul. 58 *bindarē*: give it to me! (*da*-)
 12 *řāwim bidarawa*: give back my quarry!
 War. — *biykarō*: open it! (*ka*-)

but

- Bin. — *-im bidaya* < *bida-ē*: give me . . .! (*da*-)
 Arb. — *biyka-wa*: open it! (*ka*-)

(c) The following Imperative forms from irregular stems occur:

Sul. 78 *bičō*: go!

Bin. 373 *bičān*: go ye!

[Sul. — *bičin*: go ye! (č-) is regular]

Sul., Muk. — *wara, warin*: come! come ye!

Rdz. — *mē*: do not come!

[War. — *bē, bēn*: come! come ye! (ē-)]

Sul. — *maya* < **maē*: do not come!, are regular]

Bin., Muk. § 69 *hašō*: go!

Note the varying irregular position of the personal pronoun suffix (v. § 198 (iv. β)) in the following War. Imperative forms:

War. — *bērīn-i*: bring ye it! (v. § 206 (a) fn.)

— *bēr-I-a'*: bring it!

— *bēš-I'*: say it! (ēš-)

but

— *bi-y-ēšarō*: repeat it!

Past Tenses

§ 211. (a) The Past tense is formed from the past stem and the appropriate personal endings. These are essentially:

PAST PERSONAL ENDINGS:

	Sul., War.	Sor., Muk.
Sg. 1	-im	-im
2	-i(i)	-i
3	-Q	-Q
Pl. 1	-in	-in
2, 3	-in	-in

They differ from the present endings only in the 3rd Sg. (cf. § 208 (a)).

(b) Thus, when the past stem ends in:

(i) a consonant, e.g. *hāt*- 'come'

	Sul., War.	Sor., Muk.
Sg. 1	<i>hātim</i>	<i>hātim</i>
2	<i>hātī(i)</i>	<i>hāti</i>
3	<i>hāt</i> (v. § 66)	<i>hāt</i>
Pl. 1	<i>hātin</i>	<i>hātin</i>
2, 3	<i>hātin</i>	<i>hātin</i>

* Cf. order -i-a, § 199, loss of -a, § 175 (b).

(ii) -ā-, e.g. *bā-*, &c., 'be'

	Sul.	War.	
Sg. 1	<i>bām</i>	<i>wim</i>	<i>bām</i>
2	<i>bāy(t)</i>	<i>wī(t)</i>	<i>bāy</i>
3	<i>bā</i>	<i>ā, -w</i>	<i>bā</i>
Pl. 1	<i>bāyn</i>	<i>wīn</i>	<i>bāyn</i>
2, 3	<i>bān</i>	<i>wīn</i>	<i>bān</i>

(iii) -ā-, e.g. *mā-* 'stay'

Sg. 1	<i>mām</i>	<i>mām</i>
2	<i>māy(t)</i>	<i>māy</i>
3	<i>mā</i>	<i>mā</i>
Pl. 1	<i>māyn</i>	<i>māyn</i>
2, 3	<i>mān</i>	<i>mān</i>

(iv) -ī-, e.g. *gā-* 'reach'

Sg. 1	<i>gāim</i>	<i>gāim</i>
2	<i>gāī(t)</i>	} <i>gāī</i>
3	<i>gāī</i>	
Pl. 1, 2, 3	<i>gāīn</i>	<i>gāīn</i>

(c) In Sul., War. the (t) of the 2nd Sg. is always realized when the verb form is followed by the vowel of an enclitic,¹ e.g.

Sul. 15 *gaḏāytawa*: thou returnedst(cf. Sor. — *gaḏāyawa*)

In Sul., Bin. when a 3rd Sg. past form ending in -ā ((b) (iii) above) is followed by the vowel of an enclitic an euphonic -y- is realized between the vowels,² e.g.

Sul. 2, Bin. 304 *gaḏāyawa*: he returned(cf. Muk. 2³⁰ *gaḏāwa*)Bin. 321 *naḏīrāyawa*: (she) could not be found

§ 212. (a) The Imperfect tense is formed from the Past by the addition of the prefix *a-*, *da-* (§ 206), thus, e.g.

Sul., &c., *aḥātim*, *aḥāī(t)*, *aḥāt*, *aḥāīn*, *aḥāīn*Sor., &c., *dahātim*, *dahāī(t)*, *dahāt*, *dahāīn*, *dahāīn*, &c.

¹ Mainly the enclitic 'preverb' -*awa* (v. § 235 (a)), the preposition -*a*, -*ā* (v. §§ 236 (d), 237 (b)) or the conditional suffix -*āya* (v. § 212).

² The form War. 217 *gaḏāyaḥ* seems to be a compromise between Sul. *aḏāyawa* and War. **gaḏāḥ*.

(b) The Past Conditional tense¹ is formed from the Past by the addition of the prefix *b(f)-* and the suffix *-āya*. This latter follows the personal endings in all dialects, but in War. may also precede them in certain instances, thus:

Sg. 1	<i>bihātimāya</i>	or, War., <i>bihātāyam</i>
2	<i>bihātītāya</i> , Sor., &c., <i>bihātīdāya</i>	<i>bihātāyay</i>
3	<i>bihātāya</i> ²	
Pl. 1	<i>bihātīnāya</i>	but not * <i>bihātāyayn</i>
2, 3	<i>bihātīnāya</i>	* <i>bihātāyan</i>

§ 213. A Past Participle, which beside its normal function in the formation of the Perfect tense may serve as an adjective, is formed from the past stem. To the stem are added the following morphemes:

Sul., Bin., Piš., Muk. *-d, *ṭw*; War. -(f)ḡ (v. § 76);³ Arb., Rdz., Xoš. -f, *ṭy*.

The behaviour of Sul., &c., *-d before an enclitic substantive verb is abnormal. In those cases where a distinction is observable the enclitic verb appears in its postconsonantal form, thus [-*u:um*, -*u:ii*], &c., rather than *[-*u:m*, -*u:i*].⁴ A personal pronoun suffix, or the adverbial suffix *-ī* (v. § 240 (c)), however, appears in its postvocalic form following the past participle. A convenient compromise is to interpret such an [-*u:*] as *-uw* (v. § 60) throughout the conjugation. Thus, e.g.

Sul., &c., *hātūw, būw* (v. § 60), *māw, gāw*
 War. *hātīḡ, būḡ* (N.B. *wīḡ*: Sul. *būw*), *māḡ, gāḡ*
 Arb., &c., *hātī, būy, māy, gāy* (< **gāy*)

¹ Mann, Muk. § 73, has 'Optat.: *bāmāya* . . . ; 3. sing. *bāyāya*', but, § 83, 'In der Bedeutung eines Optativus perf. . . . *bihātīnāya* . . . '.

² The 3rd Sg. Past Conditional of the verb *bān* 'be' appears in various irregular forms, viz. Sul., Bin. (*bī*)*būyā*, Muk. *bāyāya*, Piš., Sor. *bāya*, War. *wāya*.

³ Cf. *Sinai* (Barr, op. cit., p. 224) -(f)ḡ.

⁴ Note, in corroboration, the metre of the following lines by *Štr Razā Talabānī*, viz. -u---/-u---/-u---/-u---:

maslahat wāya hād naxmārdūwim bāyār-maw: It is best that I send it back before it eats me!

min azānīm kē la mīstāy bīrdūwī, amma āī nūd: I know who has led thee astray, but to what advantage?

Compound Tenses

§ 214. (a) The Perfect Indicative tense is formed of the Past Participle and the enclitic (Present) form of the substantive verb (§ 209 (a)) as auxiliary. Thus, when the past stem ends in:

(i) a consonant, e.g. *hāt-* 'come'

	Sul., &c.	War.	Arb., &c.
Sg. 1	<i>hātūcim</i>	<i>hātīgim</i>	<i>hātma</i>
2	<i>hātūi(t)</i>	<i>hātīgī(t)</i> (§ 76)	<i>hātī</i> (< * <i>hātī-y</i>) ¹
3	<i>hātūwa,</i> <i>hātūt-</i> (§ 59 (b))	<i>hātīgā(s)</i>	<i>hātīa,</i> <i>hātū-</i>
Pl. 1	<i>hātūwīn</i>	<i>hātīgīn</i>	} <i>hātīna</i> (< * <i>hātī-yna</i>)
2, 3	<i>hātūwīn</i>	<i>hātīgīn</i>	

(ii) -ā-, e.g. *bā-*, &c., 'be'

Sg. 1	<i>bāwim</i>	<i>bāgim/wīgim</i>	<i>bāyma</i>
2	<i>bāwī(t)</i>	* <i>bāgī(t)/wīgī(t)</i>	<i>bāy</i> (< * <i>bāy-ī</i>)
3	<i>bāwa,</i> <i>būt-</i>	<i>bāgā(s)/wīgā(s)</i>	<i>bāya,</i> <i>bāyt-</i>
Pl. 1	<i>bāwīn</i>	* <i>bāgīn/wīgīn</i>	} <i>bāyna</i> (< * <i>bāy-īna</i>)
2, 3	<i>bāwīn</i>	<i>bāgīn/wīgīn</i>	

(iii) -ā-, e.g. *mā-* 'stay'

Sg. 1	<i>māwim</i>	<i>māgim</i>	<i>māyma</i>
2	<i>māwī(t)</i>	* <i>māgī(t)</i>	<i>māy</i> (< * <i>māy-ī</i>)
3	<i>māwa(t)</i>	<i>māgā(s)</i>	<i>māya,</i> <i>māyt-</i>
Pl. 1	<i>māwīn</i>	* <i>māgīn</i>	} <i>māyna</i> (< * <i>māy-īna</i>)
2, 3	<i>māwīn</i>	<i>māgīn</i>	

(iv) -ī-, e.g. *gā-* 'reach'

Sg. 1	<i>gāwim</i>	<i>gāgim</i>	<i>gāma</i>
2	<i>gāwī(t)</i>	<i>gāgī(t)</i>	<i>gāī</i> (< * <i>gāī-y</i>)
3	<i>gāwa(t)</i>	<i>gāgā(s)</i>	<i>gāa,</i> <i>gāit-</i>
Pl. 1	<i>gāwīn</i>	<i>gāgīn</i>	} <i>gāina</i> (< * <i>gāī-yna</i>)
2, 3	<i>gāwīn</i>	<i>gāgīn</i>	

¹ Distinguished from the Past tense form (§ 211 (b)) by the position of the stress. With past stems ending in a vowel no such distinction is possible.

(b) Concerning the (t) and (s) forms of the auxiliary, see § 209 (c). Note that in Piž. the (t) of the 3rd Sg. Perfect form may appear before a consonant, e.g.

Piž. — *čōt bō jatī*: he has gone to plough

(c) In Sul. when the verb form is followed by the vowel of an enclitic (v. § 208 (c) fn.) the 3rd Sg. Perfect is regularly, e.g.

Sul. — *gašāwatawa, hātōtawā*: he has returned, come back

The syllable *-at-* is generally added, redundantly, to the 1st Sg. and 1st, 2nd, 3rd Pl., but not 2nd Sg. forms, in this context, thus:

Sg. 1	<i>gašāwimatawa</i>	<i>hātūwimatawa</i>
2	<i>gašāwitawā</i>	<i>hātūwitawā</i>
3	<i>gašāwatawa</i>	<i>hātōtawā</i>
Pl. 1	<i>gašāwinatawa</i>	<i>hātūwinatawa</i>
2, 3	<i>gašāwinatawa</i>	<i>hātūwinatawa</i>

Examples:

Sul. E *hičyān nadāwimatē*: they have given me nothing
(v. §§ 229 (b) (ii), 237 (b))

E *hičtān bō nagšāwimatawa*: you have not related anything to me

but,

Bin. 325 *gašāwimatawa*: I have returned

359 *hātūwimatawa*: I have come back

Muk. § 78 *hātūinatawa*: we have come back

§ 215. (a) The Perfect Subjunctive and Pluperfect tenses are formed from the past stem with the Present Subjunctive and Past tenses of the auxiliary verb *bān* (§§ 208 (b) (i), 211 (b) (ii)) respectively.¹

In all dialects except Bin., Piž. a stressed *-i-* is added to a stem ending in a consonant before the auxiliary.

¹ In War. these two tenses would thus be identical in form in all but the 3rd Sg., e.g.

Perf. Subj. **hātūwim*, -*wi(i)*, -*wē(i)*, -*win*, -*win*

Pluperf. *hātūwim*, -*wi(i)*, -*ū*, -*win*, -*win*

No examples of War. Perfect Subjunctive were, however, recorded. Mann, Muk. § 80, notes the contracted *Sinai* Pluperfect *hātūm* (v. § 75).

(b) Thus, when the past stem ends in:

(i) a consonant, e.g. *hāt-* 'come'

Sul., &c.

Bin., Piž.

Perfect Subjunctive

Sg. 1	<i>hātībim</i>	<i>hātīm</i>
2	<i>hātībī(t)</i> , Sor. <i>-bī</i>	<i>hātībī</i>
3	<i>hātībē(t)</i> , <i>-bī(tin)</i>	<i>hātībē(t)</i>
Pl. 1	<i>hātībīn</i>	<i>hātībīn</i>
2, 3	<i>hātībīn</i>	<i>hātībīn</i>

Pluperfect

Sg. 1	<i>hātībām</i> , &c.	<i>hātībām</i> , &c.
-------	----------------------	----------------------

(ii) a vowel,¹ e.g. *zā-* 'go'

All dialects

Perfect Subjunctive

Sg. 1	<i>zābim</i>
2	<i>zābī(t)</i> , Sor. <i>-bī</i>
3	<i>zābē(t)</i> , <i>-bī(tin)</i>
Pl. 1	<i>zābīn</i>
2, 3	<i>zābīn</i>

Pluperfect

Sg. 1	<i>zābām</i> , &c.
-------	--------------------

§ 216. (a) In all Sor. and Muk. a Perfect Conditional tense is formed from the past stem and a particular form of the auxiliary verb *bān* with the 'conditional' infix *-ā-* (cf. §§ 287 (b), 291) and past endings (§ 212 (a)).² The modal affix *b(t)-* is commonly prefixed to this form, and must be so when an Agential suffix (v. § 225) is part of the verbal form (v. § 227).

¹ In Bin., Piž., Muk. § 72, the past stem of the verb *bān* is reduced to *bī-* in the Pluperfect tense, thus *bībām*, &c.

² Not, with Mann, Muk. § 72, an alternative present stem *bā-* directly comparable with NP. *bāf-*. Muk. 116¹⁸ *bām* 'would I had been', Rdz. 487 *nabāf* 'hadst thou not been', &c., are reduced forms of the Perfect Conditional **bābām*, &c., due presumably to confusion of the stem *bī-* (cf. previous fn.) with the identical modal prefix.

Thus:

	Sor., Muk.
Sg. 1	(bī)hāt(i)bām
2	(bī)hāt(i)bāy
3	(bī)hāt(i)bā
Pl. 1	(bī)hāt(i)bāyn
2, 3	(bī)hāt(i)bān

(b) The suffix *-āya* (v. § 212 (b)) may be added to this form giving a Perfect Conditional II tense, thus:

Sg. 1 (bī)hāt(i)bāmāya, &c.

In Bin., Piž. the 'conditional' *-ā-* may, in addition, be infixed between stem and auxiliary, giving a Perfect Conditional III tense, thus:

Sg. 1 (bī)hātābāmāya, &c.

For examples, see § 249 (c).

Summary

§ 217. The tense and mood system may be summarized as follows:

Present Indicative (§ 208) Present Subjunctive (§ 208)

a-kaw-im, &c.

bī-kaw-im, &c.

Imperative (§ 210)

bī-kaw-a, &c.

Past (§ 211)

kāwt-im, &c.

Imperfect (§ 212 (a))

a-kāwt-im, &c.

Past Conditional (§ 212 (b))

bī-kāwt-im-āya, &c.

Past Participle (§ 213)

kāwt-ū

Perfect Indicative (§ 214)

kāwtūw-im, &c.

Pluperfect (§ 215)

kāwt(i)bām, &c.

Perfect Subjunctive (§ 215)

kāwt(i)bim, &c.

Perfect Conditional I (§ 216 (a))

(b) *hawt(i)bām*, &c.

Perfect Conditional II (§ 216 (b))

(b) *hawt(i)bām-āya*, &c.

Perfect Conditional III (§ 216 (b))

(b) *hawt-ā-bām-āya*, &c.

Certain Verbs

§ 218. (a) The morpheme *ha-* with the verb *būn* yields the verb *habūn* 'exist'. Of this only 3rd person forms, Sg. in Sul., War., Sg. and Pl. in Sor., Muk., commonly occur, though the remaining persons are attested. In War. there occurs a distinct 3rd Sg. Present form.

In conjunction with the personal pronoun suffixes (with dative sense, v. § 197 (b) (v)) this verb gives the sense of possession. Thus:

	Sul., &c.	War.	Arb.
Present Indicative			
Sg. 1	<i>ham</i>		
2	<i>hay(t)</i>		
3 'there is'	<i>haya</i>	<i>has</i>	<i>haya, hayt-</i>
Pl. 1	<i>hayn</i>		
2, 3 'there are'	<i>han</i>		
'I have'	<i>ha-m-a,</i> <i>-m haya</i>	<i>has-im,</i> <i>-m has</i>	<i>hayt-im,</i> <i>-m haya</i>
'thou hast'	<i>ha-t-a,</i> <i>-t haya</i>	<i>has-i(t),</i> <i>-t has</i>	<i>hayt-it,</i> <i>-t haya</i>
'he has'	<i>hayat-i,¹</i> <i>-i haya</i>	<i>has-i,</i> <i>-i has</i>	<i>hayt-i,</i> <i>-i haya</i>
'we have'	<i>ha-mān-a,</i> <i>-mān haya</i>	<i>has-mān,</i> <i>-mān has</i>	<i>hayt-mān,</i> <i>-mān haya</i>
'you have'	<i>ha-tān-a,</i> <i>-tān haya</i>	<i>has-tān,</i> <i>-tān has</i>	<i>hayt-ū,</i> <i>-ū haya</i>
'they have'	<i>ha-yān-a,</i> <i>-yān haya</i>	<i>has-yān,</i> <i>-yān has</i>	<i>hayt-yān,</i> <i>-yān haya</i>
'I have (Pl.)'	(Sor., Muk. only)	<i>han-im,</i> <i>-m han, &c.</i>	

¹ See § 219.

Present Subjunctive

'if there be'	<i>habē(t)</i>	<i>habī(tin)</i>
'if I have'	<i>ha-m-bē(t),</i> <i>-m habē(t), &c.</i>	<i>ha-m-bī(tin),</i> <i>-m habī(tin), &c.</i>

Past, Imperfect

'there was, used to be'	<i>habū</i>
'I had, used to have'	<i>ha-m-bū, -m habū, &c.</i>

Past Conditional

'if I (had) had'	<i>ha-m-buāya,</i> <i>-m habuāya, &c.</i>	<i>ha-m-bāya,</i> <i>-m habāya, &c.</i>
------------------	--	--

Perfect Indicative

'I have had'	<i>ha-m-būwa,</i> <i>-m habūwa, &c.</i>	<i>ha-m-būya,</i> <i>-m habūya, &c.</i>
--------------	--	--

Examples:

- Sul. P *naḥrazāy galē tēgāy xērxawī* hay: thou art un-
aware of many underground passages
War. — *ṭitēkī tir* has: there is another thing
Piž. — *malān haya, faqēsin han:* we have a mullah and
some students too
Muk. 197¹⁹ *hanim ḥudūdī:* I have some noble horses
Sul. 69 *ṭatikēki pičkolay* habū: she had a little puppy
Bin. 310 *hamānbū:* we were well off (lit. 'we had')
Arb. — *agar ifim habāya nadahātīm:* had I had work to
do I would not have come

(b) In conjunction with a personal pronoun suffix the enclitic forms of the substantive verb (§ 209 (a)) may still give the sense of possession in the absence of the morpheme *ha-*, e.g.

- Sul. — *īnū-m-a:* I am thirsty ('j'ai soif')
— *bīrsī-at-ī:* he is hungry ('il a faim')
16 *ṭī-at-ī:* what is the matter with him ('qu'est-ce qu'il s')?

The morpheme *ha-* does not appear with negative forms, thus:

'(there) is not'	<i>nīa, &c. (v. § 209 (b))</i>
'I have not' Sul., &c.	<i>nī-m-a, Arb. nīt-im,</i> <i>-m nīa -m nīa</i>
'we have not'	<i>nī-mān-a, nīt-mān,</i> <i>-mān nīa, &c. -mān nīa, &c.</i>

¹ See § 219.

§ 219. When the 3rd Sg. personal pronoun suffix *-i* is employed with the enclitic substantive verb 3rd Sg. *-a* ambiguity could arise in certain contexts, e.g.

- Sul., &c. *haya* 'there is' : **ha+y+a* 'he has' (v. § 218 (a))
çi-a 'what is it?' : **çi+y+a* 'qu'est-ce qu'il a?'
birsi-a 'he is hungry' : **birsi+y+a* 'il a faim'
 (*birsi*, (1) hungry, (2) hunger)

The ambiguity is obviated by the pronoun suffix appearing after the enclitic verb (v. § 209 (c)), even when it is also plainly present before it, thus:

- Sul., &c. *hayat-i*: he has
çi(y)at-i: what is the matter with him?
birsi(y)at-i: he is hungry
tînûyat-i: he is thirsty
 Arb. *tênit-i*: he is thirsty

The resulting groups Sul., Muk. *-iatî*, *-yatî* > *-êtî*, War. *-yasî*, Arb. *-itî*, then commonly replace *-ia*, *-ya* in this context, whether the latter actually contains a 3rd Sg. personal pronoun suffix or not, and even when no ambiguity could arise, e.g.

- Sul. 13 *xenucyatî* < **-y-a*: she has studied
 16 *çi dardêkêti* < **-i-a*: what pain he has
 War. 210 *xâlôyasî* < **-y-a*: it is his uncle
 224 *kultîgyasî* < **-y-a*: he has killed him
 Muk. MS. *gestucyatiawa* < **-y-at-awa*: he has moved
 (house)
 Arb. — *awa pîstîl* < **-i-a*: that is his back

and, where *-y-* is merely euphonic,

- Sul. 112 *ba zêr sarêwayatî* < **sar-i-awa-ya*: is under his head
 178 *la barîâyatî* < **bar-i-â-ya*: he has (his coat) on

§ 220. (a) The present tenses of the verb *wistin* 'want' are provided by an impersonal construction. The stem (a)*wê-*, taking the normal modal affixes (§ 206) and present verbal endings (§ 208),

¹ See § 227.

appears with the personal pronoun suffixes with dative sense (§ 197 (b) (v)).¹

The full stem *awē-* occurs after a personal pronoun suffix attached to the modal or negative affix. Otherwise the shorter stem *wē-* appears connected immediately with the affix. Thus:

- Sul. — *a-m-awē(t)*, *-m a-wē(t)*: I want
 — *a-t-awē(t)*, *-t a-wē(t)*: thou wantest
 — *a-y-awē(t)*, *-I a-wē(t)*: he wants, &c.
 — *a-y-awēm*: he wants me
 — *xōl-im a-wēyt*: I love thee (*xōl wistin*)
 P *axānī min tōm land xōl awēt*: thou knowest how
 much I love thee (v. § 196 (c))
 — *bi-t-awē(t)*, *-t bi-wē(t)*: if thou want, &c.
 P *čōnī biwēt*: however he may want (it)
 — *nā-t-awē(t)*, *-t nā-wē(t)*: thou dost not want, &c.
 — *na-t-awē(t)*, *-t na-wē(t)*: if thou do not want, &c.
 Bin., &c. *da-m-awē(t)*, *-m da-wē(t)*: I want, &c.
 394 *dayawētawa*: (he) wants (him) again
 Arb., &c. *da-m-awē(tin)*, *-m da-wē(tin)*: I want, &c.

In the past tenses *wistin* is conjugated as a regular transitive verb (v. § 223 ff.).

(b) In War. the verb *wistin* is largely replaced by a periphrasis with the adjective *garak* 'necessary' and the substantive verb, e.g.

- War. 224 *garak-im-a*: I want, need . . .
 227 *garak-a*: please . . . (it is requested . . .)
 231 *min tō-m naḡarak-a*: I do not want thee

With Sul., &c., *xōl wistin* 'to love' compare

- War. 223 *xōl-ī garak būn*: (he) loved them

§ 221. (a) The following forms of a defective auxiliary verb with the sense 'must, ought to' are attested:

- | | | |
|---------|-----------------------------------|------------------------------|
| Present | Sul. <i>abē</i> , War. <i>awē</i> | Bin., Piž., Muk. <i>dabē</i> |
| Past | Sul. <i>abwāya</i> | Bin., Piž., Muk. <i>dabū</i> |

¹ The stem appears to have adjectival meaning, 'wanted, necessary' or the like. Its verbal status, however, indicated by the 3rd Sg. forms in which the characteristic verbal endings, with optional *-(t)*, Arb., &c., *-(tin)* (§ 208 (b) (ii)), occur and not the enclitic substantive verb (§ 209 (a)), is confirmed by the varying modal affixes. Contrast the adjectival construction in (b) below.

Examples:

- Sul. — *abê kuŕ bē*: it must be a boy
 — *abwāya kuŕ budya*: she should have been a boy
 — *abê xewêkî dibê*: he must have seen a ghost
 10 *abê . . . biygirin*: we must catch it
 41 *abê bēy lagalnānā*: thou must come with us
 War. 196 *awê biçin*: we must go
 Bin. 299 *debê biçim*: I must go
 Piş. 404 *dabû rûtir . . . hâtibây*: thou shouldst have come
 sooner
 Muk. 25²⁶ *dabê ba giray bikay*: thou must do as he says

(b) The particles *bā*, Muk. § 71 *bilā*, *dā* (cf. §§ 295 (b), 310 (b)) have the sense 'let . . .', e.g.

- Sul. 8 *bā mindî tō bibinim*: let me see children of thine
 14 *bā biŕdynama*: let us go back
 26 *bā aw dîdya bē*: let that hero come
 45 *nabā . . . nagarîmawa*: let it not be that (= lest)
 I do not return
 Bin. 322 *aw bā lawê bē*: let him be there
 Rdz. — *da, bā lêra bî*: let it be (= stay) here
 Xoş. 445 *bā biçîna fawê*: let us go hunting
 Muk. 25⁶ *bilā biçim*: let me go
 27⁶ *bilā . . . mami hal girin*: let us take up Mem.

Verbal Constructions

§ 222. In the present tenses of Intransitive and Transitive verbs alike a Subject (A)¹ is always expressed in the personal ending of the verb and possibly by an independent nominal form, e.g.

- Sul. [(A)*min*] *afîm*(=A): I go

With Transitive verbs a Direct Object (B) and/or an Indirect Object (C) is normally expressed (exception, v. § 223 (b)) by a noun or pronoun form. Normally therefore two, and possibly three, parts are expressed in the phrase, e.g.

- Sul. [(A)*pyawaka*] (B)*agaka akuŕê*(=A): [the man] kills the dog

¹ See fn. 3 opposite.

[(A)pyāwaka] a-(B)y-dā(=A) ba (C)tagaka: [the man] gives it to the dog

[(A)pyāwaka] la (C)sagaka add(=A): [the man] strikes at the dog

a-(B)y-kušē(=A): he kills it

a-(C)y-dāt(=A)-ē: he gives (it) to him¹

{ a-(B)m-dāt(=A)-ē: he gives me to (him)¹

{ a-(C)m-dāt(=A)-ē: he gives (it) to me¹

lē-(C)y adā(=A): he strikes at it

In the past tenses of Intransitive verbs likewise a Subject (A) is always manifest in the personal ending and possibly in an independent nominal form, e.g.

Sul. [(A)min] tōštim(=A): I went

The past and compound tenses of Transitive verbs, however, are marked by a particular construction in which three, and with an Indirect 'Object' four, parts may be expressed. This construction requires elaboration.²

§ 223. (a) With the past and compound tenses of Transitive verbs an Agent (1)³ may be present in the form of an independent noun or pronoun (v. § 224). This Agent is in no way equivalent to a Subject, in concord with the verbal form.

A Direct Affectee (2), i.e. a person or thing directly affected by the Agent, without reference to the verbal form,⁴ is generally represented (exceptions, v. (b) below). It is then expressed by a verbal personal ending (v. § 226) and may also be present as an independent nominal form.

An Indirect Affectee (3), i.e. a person or thing affected, but indirectly, by the Agent,⁴ may be represented. If not expressed by a nominal form it may appear in either of two alternative suffix forms (v. § 229 (b)).

¹ -ē, v. § 237 (b). A 3rd Sg. pronominal Direct Object cannot be expressed in this short form.

² With the following §§ 223-30 cf. E.'s somewhat different presentation, with examples, in *BSOAS*, xvii. 490, 499 ff.

³ The figures (1)-(4) are used to indicate the parts of this Agential construction as distinct from the letters (A)-(C) used for the parts of the simple construction described in § 222.

⁴ The terms 'Direct/Indirect Affectee' are employed to avoid confusion with the formal terms 'Direct/Indirect Object', i.e. 'nouns &c. primarily/secondarily affected by the action of the verb', as in § 222.

A fourth part, which is essential to the construction, is the personal pronoun suffix form which *resumes* an Agent (1) already expressed or is, otherwise, the agent itself. It is convenient to term the pronoun suffix in this function the Agential suffix (4).

The term *Agential construction* will, therefore, be used for this characteristic construction of the past and compound tenses of Transitive verbs. Thus:

Sul. [(1)*pyāwaka*] (2)*sagaka*-(4)*y kuft*(=2): [the man] killed the dog

[(1)*pyāwaka*] (2)*nānaka*-(4)*y dā*(=2) *ba* (3)*sagaka*: [the man] gave the bread to the dog

[(1)*pyāwaka*] *ba* (3)*sagaka*-(4)*y dā*(=2): [the man] gave it to the dog

kuft(=2)-(4)*ī*: he killed it

dā(=2)-(4)*y*-(3)*m-ē*: he gave it to me¹

(b) A sub-class of Transitive verbs is formed by those denominative verbs which indicate the making of some sound (v. § 255 (d) end). Although these verbs do not take a Direct Object (indicated therefore (Q)) they follow the Agential construction in the past tenses. The verb then appears in the minimal 3rd Sg. form, e.g.

Sul. — *abōfēnē*(=A): it (cow) is lowing

— *bōfān*(=Q)-(4)*ī*: it lowed

— *a*-(4)*y-bōfān*(=Q): it was lowing

— *aḥilēnin*(=A): they (horses) neigh

— *ḥilān*(=Q)-(4)*yān*: they neighed

Similarly, on the rare occasions when no Direct Affectee (Q) is expressible in the Agential construction the verb appears in the minimal 3rd Sg. form. Cf.

Sul. (2)*tirēk*-(4)*ī dā*(=2) *la* (3)*sagaka*: he shot an arrow at the dog, he hit the dog with an arrow

la (3)*sagaka*-(4)*y dā*(=Q): he struck (at) the dog

lē-(4)*y dā*(=Q+3)²: he struck (at) it

Examples:

War. 219 (1)*muxtār* . . . *pē*-(4)*y zānī*(=Q)-*n*(=3)²: the head-man found out about them

Bin. 356 (1)*hač kasē lē*-(4)*y pirsī*(=Q)-*m*(=3)²: whoever might ask (from) me

¹ -ē, v. § 237 (b).

² Regarding the double verbal ending see § 229 (b) (ii).

§ 224. In the Agential construction if an Agent (1) is expressed by an independent noun or pronoun form this generally appears at the beginning of the phrase, though it may be preceded by an adverb. In narrative style, however, such an agent may be reiterated after the phrase.

In Sor., but not Muk. (v. Muk. § 87), such an Agent frequently appears in the Oblique case (§ 180 (a)), e.g.

Bin. 349 (1)*gamlawdn̄l pēy gut*: the boatman said to him

Piž. — (1)*awē kičē wāy kird*: that girl did thus

Arb. 422 (1)*kuřakay, yisif, gōll*: the boy, Joseph, said . . .

and, reiterated,

Bin. 320 *pēy gut*, (1)*patrūsyāy*: he, Petrusya, said to him . . .

§ 225. The Agential pronoun suffix (4) is suffixed to whichever word of the four appropriate categories listed above (§ 198) appears earliest in the sentence, e.g.

(i) Direct Affectee (2),

Sul. 2 (2)*dast-(4)l birda bāxalī*: he put his hand into his bosom

2 (2)*tēwēk-(4)l dar hēnd*: he took out an apple

War. 204 (2)*awēl-(4)yān bān kird*: they called him too

Its complement,

Sul. 67 *tālī am darda-(4)l kirdim*: thou hast inflicted this pain on me

68 *bō lī lēt-(4)lān kirdim*: why did you make me (out to be) mad?

War. 190 *bān-(4)yān kirdim*: they called me

(ii) Indirect Affectee (3),

Sul. 5 *yakēk la (3)dargā-(4)y dā*: someone knocked at the door

(iii) an absolute preposition (v. § 237),

Sul. — *lē-(4)y dā*: he set off (lit. 'beat it')

(iv. a) a preverb,

Sul. 67 *rd-(4)y kēlān*: he dragged them

(iv. β) a negative or modal affix,

Sul. 36 *kuř na-(4)y-hēlī*: the boy did not allow

— *a-(4)mān-xwōrdawa*: we used to drink

(iv. *y*) the verbal stem,

- Sul. 2 *dā-(4)y-a das pālā*: he gave it into the king's hand
 2 *xist-(4)î-a bāxalî*: he put it into his bosom

When ambiguity arises, or when the presence of the Agential suffix is not immediately obvious, then it may be repeated after the verb, e.g.

- Sul. 3 *latêk-î xō-y xwêrd-(4)î*: a piece of it he ate himself
 69 *lagal xō-y bîrd-(4)î*: he took it with him

Note. In one text (Bin. 314-79) there are a few examples of the Agential construction without an Agential suffix (v. also Muk. § 91), viz.

- Bin. 331 *mâlêkî xôr (1)xwây dāwa*: God has given great wealth
 335 (1)*awêl êand hadadêkî hâskar u hâsâkîr fagâl xist*:
 he took some soldiers with him
 342 *awêl (1)awêl dîbû*: that which he had seen
 370 (1)*patrûsyây gut*: Petrusya said . . .

The Agent (1) is here always in the oblique case (v. § 224). If these are genuine dialect forms they bear a close resemblance to the construction, without Agential suffix, of the Bad., &c., dialects (v. § 296).

§ 226. (a) In the Agential construction a Direct Affectee (2) which is expressed by an independent nominal form appears in the direct case (v. § 180 (a)).

(b) A Direct Affectee when present, whether expressed by a nominal form or not, is always manifested in a verbal ending of the appropriate tense (§ 211 ff.). It is, however, an over-simplification to state that the verb 'agrees' with such a Direct Affectee, as is demonstrated by the frequent intrusion of the Agential suffix between verbal stem and personal ending (v. § 228).

(c) The commonest Direct Affectee being a noun or pronoun form (v. § 196 (c)), the verbal ending is commonly that of the 3rd Sg., i.e. in the past and pluperfect tenses *û*, and in the perfect *-a(t)*, &c.

§ 227. When the Agential suffix is attached to the verb itself a series of paradigms arises, according to the nature of the verbal

ending (v. §§ 226 (b), 229 (b) (ii)). The commonest paradigms are those in which the verbal ending is 3rd Sg., thus:

Sul., War., Bin., Piž., Muk.

Arb., Rdz., Xoš.

Past (cf. § 211)

Sg. 1 Agent	xónim	/xwéndim, &c.	xíndim
2	xoní(t)	/xwéndit	xíndit
3	xoní	/xwéndí	xíndí
Pl. 1	xonmān	/xwéndin, &c.	xíndmān
2	xontān	/xwéndū .	xíndtān
3	xonyān	/xwéndyān	xíndyān

Imperfect (cf. § 212 (a))

Sg. 1	amxén	/damxwénd, &c.	damxínd, &c.
-------	-------	----------------	--------------

Past Conditional (cf. § 212 (b))

Sg. 1	bímxonāya	/bím-xwéndāya, &c.
-------	-----------	--------------------

Perfect (cf. § 214 (a))

	Sul., &c.	War.	Arb., &c.
Sg. 1	xonúwma ¹	xwandiğma	xíndítim
2	xonuwota	xwandiğta	xíndítit
3	xonuwyo(tí) ²	xwandiğyo(tí) ^{2, 3}	xíndítí
Pl. 1	xonutemāna	xwandiğmāna	xínditmān
2	xonuwotāna	xwandiğtāna	xíndittān
3	xonuwuyāna	xwandiğyāna	xíndityān

Cf. negative,

Sg. 1	námxonutwa	nám-xwandiğa, &c.	nám-xíndia, &c.
-------	------------	-------------------	-----------------

Perfect Subjunctive (cf. § 215)

Sg. 1	xonibétim	/xwéndbétim, &c.
2	xonibétí(t)	/xwéndbétit, &c.

Pluperfect (cf. § 215)

Sg. 1	xonibūm	/xwéndbūm	xíndibūm
2	xonibūt	/xwéndbūt, &c.	xíndibūt, &c.

Perfect Conditional (cf. § 216 (a))

Sg. 1		bímxwéndbā	bímxíndibā
2		bitxwéndbā, &c.	bitxíndibā, &c.

¹ Realized [-u:ma], &c., v. §§ 60, 213.² See § 219.³ Realized [-li:ɟ], v. § 76.

It will be noted that the Agential suffix generally precedes the auxiliary *-a* of the Perfect Indicative tense, but follows the equivalent *-t-* in Arb., &c. (v. § 209 (a)).

§ 228. When the verbal ending is other than 3rd Sg. it normally follows the Agential suffix. A general exception to this is the 3rd Sg. Agential suffix *-t* which always follows the verbal ending. Particular exceptions are noted below.

The full range of possible combinations of two parts, viz. Agential suffix and verbal ending expressing either Affectee, may be summarized as in Table I. The material for dialects other than Sul. is insufficient to cover all possibilities (v. Muk. § 90), but known divergences are noted below. In Arb., &c., the range is, in practice, limited to Past tense forms where the Agent is 3rd Sg. or Pl. and the verbal ending other than 2nd Sg. Thus the Arb. forms shown in the Table comprise all those attested.

Notes to the Table

(1) In Sul. the final (*t*) of a group such as *dīmī(t)* 'I saw thee' is always realized, to avoid confusion with the form *dīmī* 'he saw me'.

(2) In Piž., Muk. the group *-im-in* 'I . . . you/them' alternates freely with *-in-im*.

(3) In Sul., when the past stem ends in *-t*, the Agential suffix 2nd Sg. *-i(t)* follows the verbal ending, e.g. *kultimī(t)*, *kultinī(t)*, *kultinī(t)*. The grouping may then be extended to other verbs, e.g. *dītimī(t)*.

(4) In Sul., following a past stem ending in a consonant and the past participle in *-w* (v. § 213), the first vowel of the groups *-itī-*, *-ity-*, *-itī-*, *-iny-* is usually reduced, thus:

- xwārditī* > ['xwɑ:rdti]: he ate thee
(Bin. 311) *nārdinī* > ['nɑ:rdni]: he sent us
nārdutitī > [nɑ:rdutɪ]: he has sent thee

Certain forms then coincide, e.g.

['nɑ:rdni]: he sent us, you, them

demanding, in turn, a consistent spelling as *-itī*, *-ity-*, *-inī*, *-iny-* (v. §§ 41 (c), 208 (a) 1), e.g.

xwārditū, *nārdinī*, *nārdutitī*, &c.

TABLE I

Sul. Direct Addressee

		-in 'me'	-it 'these'	-in 'us'	-in 'you, there'
A-in g 'I'	{Past} {Perfect}	dīnān dīnān	nārdīnān† nārdīnān†		dīnān dīnān
n-if t 'thou'	dīnān dīnān	nārdīnān† nārdīnān		nārdīnān† nārdīnān	nārdīnān† nārdīnān
-s 'he'	dīnān, Arb. dīnān	nārdīnān dīnān	nārdīnān† nārdīnān†	nārdīnān† nārdīnān†	nārdīnān dīnān, Arb. dīnān
-nān 'we'			nārdīnān† nārdīnān†		nārdīnān nārdīnān
-dān 'you'	dīnān dīnān	nārdīnān nārdīnān		nārdīnān nārdīnān	dīnān dīnān
-yān 'they'	dīnān dīnān, Arb. dīnān dīnān	nārdīnān† nārdīnān† nārdīnān† nārdīnān†	nārdīnān† nārdīnān† nārdīnān† nārdīnān†	nārdīnān† nārdīnān† nārdīnān† nārdīnān†	nārdīnān† nārdīnān, Arb. dīnān dīnān nārdīnān† nārdīnān†

† dīn 'see', nārdīn 'and'; thus 'I saw thee, I sent thee, I have seen thee, &c.'

- Sul. — (2)*awān*-(4)*ī lē sand*(=2)*īn*(=3) } he took them from
lē-(4)*y sandin*(=2)*īn*(=3) } us
 — (2)*awān*-(4)*ī dā*(=2)*yn*(=3)-*ē* } he gave them to us
pē-(4)*y dān*(=2)*īn*(=3)
 158 (2)*xaw*-(4)*īm pēwa dīwīt*(=3): I have seen a dream
 about thee

These forms show clearly that the verbal stem is capable of supporting two endings, expressing both affectees. From this fact a number of formal points arise which are treated separately in § 230.

(c) Similarly a personal pronoun (P₂) qualifying the Direct Affectee (2) may, when the Agent is suffixed (4) to that Affectee, in fact be represented, not by a personal pronoun suffix, but by a corresponding verbal personal ending attached to the verbal form, e.g.

- Sul. 127 (2)*bačhakān*-(4)*ī axwārd*(=2)*īm*(=P₂): it used to
 eat my children
 E *lētaka* (2)*dar*-(4)*ī gazf*(=2)*m*(=P₂): the madman
 bit my hand
 War. 204 (2)*fasm*-(4)*yān girt*(=2)*īn*(=P₂): they took photos
 of us
 Bin. 331 (2)*sar*-(4)*īm la qalbē jo dakird*(=2)*i*(=P₂)-*awa*:
 I would have separated thy head from thy body
 Piž. 412 (2)*balah*-(4)*yān dagirt*(=2)*īm*(=P₂): they would
 seize my shank
 Muk. 174³⁰ (2)*fūdnwala*-(4)*y . . . bīrd*(=2)*īm*(=P₂): he took
 my foal

A rare extension of this to the complement (P₃) of the Indirect Affectee is seen in

- Bin. 326 *ba* (3)*qisa*-(4)*y kīrd*(=2)*īn*(=P₃): he did accord-
 ing to their words

(d) The characteristic construction described in (b, c) above often gives the verb the appearance of 'agreeing' with the Indirect Affectee or the complement of the Direct Affectee, but see § 226.

The extension of this construction seen in the present or intransitive examples at Muk. § 95 is extraordinary, if real. Muk. 215¹⁶ *hič farzandū nabūn* is explicable simply as a 3. Pl. verb 'you had no sons' (cf. § 242 (b, c)).

§ 230. (a) When both Direct and Indirect Affectee are pronominal then the verb stem carries two evident personal endings (§ 229 (b) (ii)), e.g.

- Sul. — *lê-(4)y sandin(=2)in(=3)*: he took them from us
 — *pê-(4)y dān(=2)in(=3)*: he gave them to us

The order of suffixation is apparently

(2)Direct Affectee+(3)Indirect Affectee

When, in addition, the Agent is also suffixed to the verb, it (4) and the verbal ending representing the Direct Affectee (2) appear in the order described in § 228, the Indirect Affectee ending (3) normally being last, e.g.

- Sul. — *dā-(4)m-it(=2)in(=3)-ê*: I gave thee to them
 — *xwê dām(=2)-(4)i-n(=3)-ê*: God gave me to you

That the connexion between the Indirect Affectee ending (3) and the verbal stem is tenuous is shown by the fact that it may follow another enclitic, e.g.

- Sul. — *dāw-(4)it-in(=2)-ê-n(=3)*: Thou hast given us to them (*-ê* postposition, v. § 237 (b))

(b) In practice such complex forms are avoided and the examples in (a) above (and even those given by E. in *BSOAS*, xvii. 502, § 49) are to be regarded with caution.

When, however, either Affectee is 3rd Sg. pronominal, and hence represented in the past tense by a verbal ending *-û*, the form is quite common, e.g.

- Sul. — *dāmîtê (dā-(4)m-it(=2)-û(=3)-ê)*: I gave thee to him
 — *dāmîtê (dā-(4)m-û(=2)-it(=3)-ê)*: I gave him to thee
 — *lê-(4)y sandin(=2)-û(=3)*: he took them from her
 E *lê-(4)m war nagirt-û(=2)-in(=3)*: I did not receive it from you/them
 P *dā-û(=2)-(4)y-m(=3)-ê*: he gave it to me
 P *dā-û(=2)-(4)y-n(=3)-ê*: he gave it to them
 Muk. 42⁹ *xulā dā-û(=2)-m(=3)-(4)i-ê*: God gave (him) to me

(c) In most cases, however, the Direct Affectee is represented by a nominal form, to which the Agential suffix is commonly attached, and hence also by a 3rd Sg. verbal ending (v. § 226 (c)), viz. *Q* in the past tense, e.g.

- Sul. 7 (2)*sey*-(4)*i dā-Q*(=2)-*m*(=3): he administered an oath to me
 10 *pē*-(4)*y wut-Q*(=2)-*in*(=3): he said to them . . .
 14 *īd* . . . (2)*ēst*-(4)*i bō kird-Q*(=2)-*in*(=3): by the time that she had made a meal for them
 80 (2)*harsēkyān*-(4)*im bō hāzir kird-Q*(=2)-*ī*(=3): I have brought all three of them for thee
 Muk. 4²⁵ (2)*xō*-(4)*y lē kird-Q*(=2)-*in*(=3)-*a dārōya*: he made himself policeman towards them
 111⁵ -(4)*im pēkhē kird-Q*(=2)-*ī*(=3): I gave (it) to thee
 163¹⁹ -(4)*m dā-Q*(=2)-*n*(=3)-*ē*: I gave (it) to you
 163²⁰ -(4)*ī dā-Q*(=2)-*ym*(=3)-*ē*: (God) gave (it) to us
 176³¹ (2)*tīrēk*-(4)*ī lē dā-Q*(=2)-*m*(=3): he shot me with an arrow
 232⁶ *wā*-(4)*y lē kird-Q*(=2)-*im*(=3): he did thus to me

(d) The corresponding 3rd Sg. ending of the Perfect tense, -*a(t)*, &c., is apparently omitted in these constructions, on the analogy of Past tense forms, e.g.

- Sul. — *dāw*-(4)*it-In*(=2)-*Q*(=3)-*ē*: Thou hast given us to him
 E (2)*kāyazaka*-(4)*yān dīfīw-Q*(=2)-*im*(=P₂): they have torn my letter
 52 *agar* (2)*ajal*-(4)*i hēnāw-Q*(=2)-*im*(=P₂): if Thou hast brought (the hour of) my death
 Hal. — (2)*nāmakhān*-(4)*yān dīfānuw-Q*(=2)-*ī*(=P₂): have they torn thy letters?
 Piž. 409 (2)*šimāh*-(4)*yān* . . . } they have had
 . . . *lagal kirduw-Q*(=2)-*ī*(=3), } intercourse
 . . . *kirduw-a*(=2) *lagal* (3)*īd* } with thee
 Bin. 327 (2)*dū kārakar*-(4)*ī bō īd girtuwīnata aw mindāla*: he appointed two maids for her to that child (*girtuw-in*(=2)-*Q*(=3)-*at*(by extension, as § 214 (c))-*a*)

Passive Conjugation

§ 231. The Passive voice of a transitive verb is expressed by a secondary conjugation. This passive verb is conjugated regularly as an intransitive verb.

(a) In Sul., Sor., and Muk. the addition of the morpheme *-rē-* to the present stem of the transitive verb yields the present stem of the Passive conjugation. Predictably (v. § 205 (a) (ii)) the past stem of the Passive has then the form of the present stem of the active verb plus the morpheme *-rā-*, thus:

Sul. *kultin, kuš-* 'kill' > *kušrē-, kušrā-, kušrān* 'be killed'
nāsin, nūs- 'write' > *nūsē-, nūsā-, nūsān* 'be written'
nārdin, nēr- 'send' > *nērrē-, nērrā-, nērrān* 'be sent'

(b) In War. likewise the present stem of the Passive verb is formed from the present stem of the active verb, regularly, by the addition of the morpheme *-rē-*. Corresponding to this, however, the past stem has generally the morpheme *-yā-*, thus:

War. *nāsin, nūs-* 'write' > *nūsē-, nūsyā-, nūsyān* 'be written'
 or the compromise form *-ryā-*, thus:

War. *kultin, kuš-* 'kill' > *kušrē-, kuš(r)yā-, kuš(r)yān* 'be killed'

(c) In Sor. and Muk. particularly the Passive present stem is often formed by the addition of the morpheme *-rē-* to the past stem of the active verb, e.g.

Bin. 321 *nadītrāyawa*: could not be found (*dītinatwa*)

335 *hangāwtrābū*: had been surrounded (*hangāwtin*)

Muk. § 100, fn. 1. **gutrē-, gutrā-, gutrān* 'be said' (*gutin*) (cf. § 232 (ii), s.v. *wutin*)

Rdz. — *kurāndrāya*¹: has been boiled (*kurāndin*)

— *sōlāndrā*¹: was burnt (*sōlāndin*)

Cf. Sul. *gā(f)n, gē-* 'copulate with' > *gāyrē-, gāyrā-, gāyrān*.

§ 232. The formation of the passive stems of certain verba is irregular:

(i) Reduction of stem final *-a-* to *-i-*,

¹ Cf. § 232 (iv).

- Sul. *kirdin*, *ka-* 'do' > *kirē-*, *kirā-*, *kirān* 'be done'
birdin, *ba-* 'carry' > *birē-*, *birā-*, *birān* 'be carried'
dān, *da-* 'give, hit' > *dirē-*, *dirā-*, *dirān* 'be given, hit'
xistin, *xa-* 'throw' > *xirē-*, *xirā-*, *xirān* 'be thrown'

Cf. War. *kiryān* 'be done', *xiryān* 'be thrown', &c.

(ii) Loss of stem final *-ē-*,

- Sul. *nān*, *nē-* 'put' > *nirē-*, *nirā-*, *nirān* 'be put'
wutin, *-lē-* 'say' > defective present *-lirē-* (more commonly *wutrē-*) 'be said'

(iii) Assimilation of *-r-*,

- Sul. *gōfin*, *gōf-* 'change' > *gōf-rē* > *gōfē-*, *gōfā-* 'be changed'
biḥin, *biḥ-* 'cut' > *biḥ-rē-* > *biḥē-*, *biḥā-* 'be cut'

Cf. War. *biḥyān* 'be cut'.

(iv) Euphonic *-d-*. The groups *-n(i)r-*, *-rr-* arising in the passive stems commonly become *-ndr-*, *-rdr-* respectively in Sor. and Muk., e.g.

- Bin., Rdz. *dā nān*, *nē-* 'put down' > *dāndrē-*, *dāndrā-*,
dāndrān (cf. Sul. *nān* > *nirē-*, ii. above) 'be
put down'

- Muk. § 101 *nārdin*, *nēr-* 'send' > *nēdrē-*, *nēdrā-*, *nēdrān* 'be
sent'

- xānīn*, *xān-* 'know' > *xāndrē-*, *xāndrā-*, *xāndrān*
'be known'

(v) Various,

- Sul. *girtin*, *gir-* 'hold' : *girē-*, *girā-*, *girān* 'be held',
also *girsē-*, *girsā-*, *girsān*; cf. War. *gīr(s)yān*
xwārdin, *xō-* 'eat' : *xurē-*, *xurā-*, *xurān* 'be eaten'
hitin, *hō-* 'wash' : *hōrē-*, *hōrā-*, *hōrān* 'be washed'
Arb. *hāltin*, *hō-* 'wash' : *hārē-*, *hārā-*, *hārān* 'be washed'

Causative Conjugation

§ 233. The Causative of an intransitive verb is expressed by a secondary conjugation. This causative verb is conjugated regularly as a transitive verb.

The addition of the morphemes Sul., War., Bin., Piž., Muk., Arb. *-ēn-*, Rdz., Xoš. *-īn-* to the present stem of the intransitive

verb yields the present stem of the Causative conjugation. If the present stem of the intransitive verb ends in *-ē-* this is displaced by the causative morpheme.

The addition to the Intransitive present stem of the morphemes Sul., War., *-ān-*, Sor., Muk. *-ānd-* yields the past stem of the Causative. Thus:

Sul., War.	<i>dīrān, dīrē</i> 'tear'	>	<i>dīrēn-, dīfān-, dīfānin</i> 'tear'
Bin., Piž., Muk., Arb.			<i>dīrēn-, dīfānd-, dīfāndin</i>
Rdz., Xoš.			<i>dīrēn-, dīfānd-, dīfāndin</i>
Sul., &c.	<i>sūtān, sūtē</i> 'burn'	>	<i>sūtēn-, sūtān-, sūtānin</i> 'burn'
Bin., &c.			<i>sūtēn-, sūtānd-, sūtāndin</i>
Rdz., Xoš.	<i>sōtān, sōt-</i>	>	<i>sōtēn-, sōtānd-, sōtāndin</i>
Sul.	<i>fīrān, fīr-</i> 'fly'	>	<i>fīrēn-, fīfān-, fīfānin</i> , also <i>fīfēn-, fīfān-, fīfānin</i> 'snatch'
	<i>fīzān, fīzē</i> 'flow'	>	<i>fīzēn-, fīzān-, fīzānin</i> 'pour'
Note,	<i>gāi(fī)ṁ, ga-</i> 'arrive'	>	<i>gayēn-, gayān-, gayānin</i> 'send'
	<i>nāstin, nā-</i> 'sleep'	>	<i>nwēn-, nwān-, nwānin</i> 'put to sleep'

Compound Verbs

§ 234. A simple verb may combine with either a preverb (v. § 235) or a nominal form to yield a compound verb. The meaning of compound verbs is a lexical matter. They do not differ in form from simple verbs beyond the fact that the modal prefix *b(i)-* (§ 206 (a)) does not normally appear with them, e.g.

Sul. 25 *kuṯ lēra dā nīlē*: let the boy sit here (*dā nīstin*)

56 *fām gira*: take me up! (*fā girtin*)

80 *qālī māč kā*: in order to kiss his foot (*māč kirdin*)

but, with *b(i)-*,

Sul. 11 *fwa dā binīṁ*: sit ye down!

PARTICLES

Preverbs

§ 235. There are two types of preverbs:

(a) The adverbs *dar, dā, hal* (Arb., &c., *har*), *fā, fā* (Sor., Muk.), *war* and the 'postverb' suffix *-(a)wa* (Var. *-ō*). This latter may appear, but rarely, in the form of a preverb *wa*, e.g.

- War. 191 *wa dān* : *dān-ō*
 Bin. 345 *wa pafēna* : *pafāndin-awa*
 Muk. § 61 *wa bašin* : *bašin-awa*

The suffix has two distinct functions. It may either give the sense of repetition, or reversion, e.g.

- Sul. *wutin* : *wutin-awa* — say : repeat
gašan : *gašan-awa* — wander : turn back

or modify the meaning of the simple verb unpredictably, as do the other preverbs, e.g.

- kirdin* : *kirdin-awa* : *fā kirdin* — do : open : run away
xwārdin : *xwārdin-awa* — eat : drink

(b) The 'absolute' forms of the simple prepositions, *pā*, &c., and their derivatives, *pāwa*, *pādā*, *pāk*, &c. (v. § 237).

Pre- and Postpositions

§ 236. (a) The simple prepositions immediately precede the noun or pronoun they govern. The following are attested:

- ba* (War., Sor., Muk. also *wa*) 'to'¹
la (Sor., Muk. also *da*, *fa*) 'at'
a 'to'
bō (Arb., Rdz., Xoā. also *la bō*, *lō*) 'for'
tā, *hatā* 'till'
bē, more commonly *ba bē* 'without'²
lagal (War. also *laḡal*, *lāl*, Sor., Muk. also *dagal*, *faḡal*, Arb., &c., *lagar*) 'with'³
baraw 'towards'
wak, *wakā* (Sor., Muk. *wakt*) 'like'

¹ English equivalents of the prepositions are given only as approximate labels. See § 239.

² Mann, Muk. § 112 end, is mistaken in considering *bē-dyāl*, &c., as an abstract noun. The *-l* is here the Obl. case ending. Cf.

Sul. — *ba bē tifaḡ fālt*: he went without a gun

War. 254 *wa bē pādā*: without a king

An abstract is to be found, however, in

War. 271 *ba bē-lāwī mād*: it was left eyeless

³ *lagal* also occurs as a relative adverb 'when', 'as soon as', e.g.

Sul. 10 *ama lagal girtmān*: when we have caught this

65 *lagal dīnyā fāmdk bē*: as soon as it was light

(b) In conjunction with the simple prepositions the following enclitic 'postpositions' occur:

- awa* (War. -*ə*, Arb., &c., -*wa*)
- dā* (Sul., War. also -*ā*,¹ Sor., Muk. also -*fā*)
- aw-dawā* (cf. § 252 (b))

The commonest combinations are:

- ba* . . . -*dā* 'through', *la* . . . -*dā* 'in', *lagal* . . . -*dā* 'with'
- ba* . . . -*awa* 'with', *la* . . . -*awa* 'from', *a* . . . -*awa* 'into'
- bō* . . . -*awa* 'towards', *la* . . . -*awdawā* 'after'

and their variant dialect forms.

(c) The final vowel of *ba*, *la*, *dā*² is elided before the 3rd person pronouns, the demonstrative pronouns and adjectives and the adverbs *awē* 'there', *ēra* 'here', e.g.

Sul. — *bama* 'to this', *lawē* 'there', *lēra* 'here'

War. — *layra* 'here'

Sul. P *duktūr farmānī bēra cīa*: what has a doctor to do here?

9 *law dāftād*: in that plain

Piž. 410 *daw kuſa cūkala*: for that little boy

but, exceptionally,

Xođ. 453 *la aw darwēša*: on that dervish

The suffix -*awa* appears as -*wa* following the vowels *ē*, *a*, *ā*, *ō* (v. § 171 (c)), e.g.

Sul. — *la ēstāwa*: from now (on)

— *la denēwa*: from yesterday

The War. form -*ə* may coalesce with preceding *a* or not, e.g.

War. 226 *law dēw qāpiakō*: on that side of the door

227 *a nāw latakao*: into the river

The suffix -*ə* may coalesce with preceding *a*, *ā* or not, e.g.

Sul. 9 *law dāftāā*: in that plain

56 *la bar qāpiy aw māfā*: before the door of that house

¹ Barr (op. cit., p. 231, § 40) sees here two separate suffixes; the postposition -*dā* and an oblique case ending -*d* = *-*ā*. That this is mistaken is shown, within the *Sinai* 'Gulistan' text under discussion, by the appearance of the -*d* suffix after a personal pronoun suffix, viz. 100⁶ *la xdtir-im-d* 'in my mind' (v. § 199).

² Also of the Plural Izafe particle *dā* (§ 183 (c)).

(d) *a* only occurs in conjunction with a verb and is realized as an enclitic, e.g.

- Sul. 12 *čū-a xēwatēkawa*: went into a tent
 27 *agaŋēm-a dwoŋwa*: I shall go back
 61 *lā ismā'il-a dwōy xōy xist*: she put Shah Ismail behind her
 62 *abayt-a dar*: thou carriest out

Only on the rare occasions when the preposition is repeated, but not the verb, does it stand independently, e.g.

- War. 227 *gaŋsta qarāxī lār ā a dam darwāzaka*: reached the edge of the town and (came) before the gate
 246 *hātina pāriyāwla, a dēy lēx*: we came to Pariyawle, to the sheikh's village

§ 237. (a) Corresponding to the simple prepositions *ba (wa)*; *la (da)*; *a* there are the following 'absolute' forms, employed when the form governed is other than an independent noun or pronoun:¹ *pē, wē; lē, tē; ē*,² e.g.

- Sul. 17 *ba min bilē* } tell me!
 pē-m bilē }
 158 *xawim ba tōwa dīwa* } I have seen a dream about
 xawim pēwa dīwīt } thee

The correspondence is not, however, always regular, e.g.

- Sul. 130 *tē-y hal dan*: thrash him!
 -yān law hal dā: they thrashed him
 — *aydam ba filān*: I give it to so-and-so
 aydam-ē: I give it to him

- Muk. 35¹¹ *āwirim bar bū la badanē*: a fire has ignited in my body
 42² *āwirēkim tē bar bū^a*: a fire has ignited in me

bō, &c., and *lagal*, &c., are also employed absolutely.

(b) The absolute forms of the prepositions, with the exception of *ē*, stand independently and in no particular position in relation to the form they govern. Thia may be a pronoun suffix, in its

¹ See §§ 198, 229 (b), 235 (b).

² The recognition of *ē* as the absolute form of *a* is E.'a, v. *BSOAS*, xvii. 496, § 22. Mann, Muk. § 67, could not explain the form.

appropriate position (v. § 198), or a corresponding verbal ending, attached to the verb (v. § 229 (b) (ii)).

ē, like *a* (§ 236 (d)), is always enclitic following a verb, e.g.

Sul. 2 *xwā awlāyaki nērinat addāt-ē*: God will give thee male offspring

(c) The independent absolute prepositions unite with the postpositions *-awa*, *-dā*, &c., yielding:

pēwa (War. *pēō*), *pēdā* (Sul., War. *pyā*)

lēwa (War. *lēō*)

tēwa (War. *tēō*), *tēdā* (Sul., War. *tyā*)

lagaldā (Sul. *lagalā*, War. *lēlā*, &c.)

With a personal pronoun suffix *-m*, *-t*, *-y*, &c., the Sul., War. forms *pyā* (: *pēdā*), *tyā* (: *tēdā*) yield *pyā-m-ā*, *pyā-t-ā*, *pyā-y-ā*, &c., *tyā-m-ā*, &c., i.e. with repetition of the suffix *-ā* (cf. Sor. *pē-y-dā* *tē-y-dā*, &c.), e.g.

Sul. — *awānay ka tyāyān*: those who are inside it

P *bazalm pyātā hātawa*: I have taken pity on thee

Hal. — *sirēlakam hal xwī pyāyā*: I spread the glue on it

Corresponding to the groups 'preposition + cardinal *yak*' the absolute forms *pēk*, *wēk*, *lēk*, *tēk* appear, e.g.

Sul. 20 *ba yakawa*

pēkawa (War. *pēkō*, Arb. *pēkwa*) } together

Sul. — *kā w dānakay la yak jyā*

akātawa

Bin. 313 *kā w dānakay lēk judā dakā-*

tawa

} he separates the chaff
and the grain of it
from one another

(d) The absolute forms of the simple prepositions, *pē*, &c., and their derivatives, *pēwa*, *pēdā*, *pēk*, &c., may function as preverbs (§ 235 (b)).

The simple prepositions are generally 'separable' preverbs, i.e. they may appear either in the absolute form, immediately preceding the verb, or, if an indirect object is expressed, in their simple form immediately preceding the word(a) governed, e.g.

Sul. — *lē-y dā*: he struck (at) it (*la/lē dān*)

§ *la dargā-y dā*: he knocked at the door

They may, bowever, be 'inseparable', i.e. always appear immediately preceding the verb in their absolute form, e.g.

- Sul. — *pē akanī*: he was laughing (*pē kanīn*)
 — *pē-y pē akanī*: he was laughing at him (*ba/pē pē kanīn*)
 — *ba kuřaka pē akanī*: he was laughing at the boy

The derivatives are generally inseparable, e.g.

- Sul. — *Ĥakay tēk dā*: he spoils the work (*tēk dān*)

Muk. MS. *pō tēwa dān*: to insert the weft (*tēwa dān*)

§ 238. The simple prepositions, with or without a postposition, form compound prepositions with nouns, particularly of place, and less commonly with adjectives. The prepositions may be omitted and the noun, &c., appear alone with the function of a preposition. The nominal form may, in certain cases, varying according to dialect, be followed by the *Izafe*, and in any case may be considered as being in genitive relation with the form governed (v. § 198).

Examples. Noun

- Sul. — *la pišt dāraka*: behind the tree
 11 *ba sar sarī kuřā*: over the boy's head
 56 *la bar qāpīy aw mālā*: before the door of that house
 86 *ba taništ haydāwa*: next to Heyas
 War. 195 *la pāš awa*: after that
 204 *la pēš aw*: before him
 219 *pāš čil law*: after forty nights
 Bin. 323 *ba dim baħrēdā*: by the sea
 325 *fa sar malikšāy*: upon Melikshah
 355 *wa dast ma karč*: falls into our hands

Noun + *Izafe*

- Sul. — *la (mā)baynī dū panfaradā*: between two windows
 — *la bardamī xānūaka*: before the house

- War. 195 *la pāš awa*: after that
 204 *la pēš awā*: before him

Adjective

- Muk. 7¹⁰ *nizik mirdinīta*: it is near thy death(-bour)

§ 239. The meaning of prepositions is idiomatic and a matter of lexicon (v. E., *BSOAS*, xvii. 494 ff.). Two particular features may, however, be noted.

(a) *la* (. . . -*dā*) 'at, in (of place)' appears with certain nouns, usually in conjunction with the ending -*ān*, with the connotation of 'manner', e.g.

- Sul. — *la fiqāndā*: in anger
 62 *la xōfānā*: for joy
 74 *la tīnūā*: with thirst
 87 *la tirsānā*: from fear
 Muk. 2²⁵ *la birsān*: of hunger
 6²¹ *la tirsān*: from fear
 10²⁴ *la fārmān*: for shame

That this is the plural morpheme -*ān* (§ 177) is suggested by the following example with Pl. Izafe (§ 183 (c)).

- Piž. 404 *la tiri* da S.: from fear of S.

(See also § 304).

An ending -*ān*, perhaps to be distinguished from the plural morpheme, is seen also in

- Sul. — *la pāfānd*: afterwards
 Bin. 311, Muk. 1⁵ *la pāfān*: afterwards
 Arb. 416, Rdz. 483 *la pāfān*: afterwards (**pāf-dā-ān*)

This may be compared with the adverbial -*ān* seen in

- Sul. — *ba xistānān pīna w pafō*, *ba hāwīnān wurd wurd bīfō*: in winter (it is) patches and rags, in summer go slowly (to show off your finery)
 123 *la fārān dāktir*: better than formerly

It is noteworthy that this adverbial -*ān* may appear in conjunction with a preposition.

(b) Very rarely an absolute preposition (§ 237 (a)) is omitted without otherwise altering the construction. A personal pronoun suffix can then be said to have dative force (v. § 197 (b) (v)), e.g.

- Sul. 10 *hatā mumkīnmān abē* } as far as it may be possible
hatā bōmān mumkīn bībē } for us

By the same token the Indirect Affectee of the Agential construction, appearing in the form of a verbal ending (§ 229 (b) (ii)), may be unsupported by a preposition, e.g.

- Sul. E *yāriyān dāwīm* (= *dāwīm-ē*): they have given me help

Adverbial Suffixes

§ 240. Three adverbial suffixes merit particular mention.

(a) In Sor., Muk. an adverbial ending *-ē* (*-ī*) occurs. It is identical in form with the Obl. case ending *-ē* (*-ī*) (§ 180), e.g.

- Piž. 380 *pār bahārē*: last spring
 384 *aw laway*: that night
 397 *hamā waxtēkī*: at all times
 Piž. 399, Muk. 10¹⁰ *fōžēkī*: one day
 Muk. 4¹⁶ *awē lawē*: that night

and, with a preposition,

- Bin. 320 *hāta xuārē*: came down
 Muk. 10¹² *fōlna šūrē*: went inside

The form *-ē* appears occasionally in Sul., where it cannot be equated with an Oblique case form, except possibly as a fossil form, e.g.

- Sul. 14 *bō mālē*: towards home
 32 *lawē*: at night

With prepositions, however, the normal Sul. formation is with the suffix *-awa*, e.g.

- Sul. 12 *hāta darawa*: came outside
 15 *bō mālawa*: towards home

(b) A suffix *-ī* appears to form a type of distributive adverb with the numeral *yak* and (attested in War. only) with nouns signifying periods of time, e.g.

- War. 205 *yakī sē fasmayān girtīn*: they took three photos of each one of us
 257 *yakī dasē bargī bō dirus kird*: he made a suit of clothes for each one
 Muk. 24¹⁷ *yakī kušēkyān dabē*: each one will have a son
 War. 193 *tōži dū haywān, sē haywān akušīn*: each day we kill two or three animals
 234 *agar tōži . . . gōštī lē biwiftī*: if each day thou cuttest flesh from him
 269 *sālī kafatē*: once each year

(c) *-(f)š* 'also, even'¹ may be suffixed to either a nominal or a verbal form. The form *-š* is normal following a vowel, e.g.

Sul. 13 *amaš*: this too

41 *ēmaš*: we too

In War., however, and as an exceptional form in Sul., *-yš* appears in postvocalic position, e.g.

Sul. 74 *bō xōyš*: for himself

War. 197 *xwāyš*: God also

In order of suffixation *-š* always precedes a personal pronoun suffix. Thus when suffixed to a nominal form it has the position *š* in the order Sul., &c., A B C D (E) *š* G H,

War. A B C *š* G H D (v. § 199).

Examples: Sul., &c.

AJ Muk. 99²¹ *kostānakaš*: the highlands too

BJG Muk. 89²² *šinānīšū*: your women too

CJ Sul. P *la lāyakawa . . . la lāyakišawa . . .*: on the one hand . . . on the other hand also . . .

CJG Sul. — *kufekīšim la karkūka*: one of my sons also is in Kirkuk

DJ Sul. 76 *am dā kišayš*: these two girls also

EJ Muk. 87²³ *xānzādaxānēš . . . dēnim*: I shall bring Kh. too

JG Sul. — *xōš*: he himself

JH Sul. 52 *agar afalīši nahēnāwim*: if on the other hand Thou hast not brought (the hour of) my death

Wārmāwa

JD War. 200 *aw bağxāğayša*: that begzade too

267 *awīša*: that too

With a verbal form it is suffixed to the first of whichever of the following possible components is present (v. § 198 (iv)), preceding any personal pronoun suffix: (α) a preverb, (β) a negative or modal affix, (γ) the verbal stem or participle.

Examples:

(α) Sul. — *līši bārd*: he forgave him also

— *tēkīšim dā*: I have spoilt it too

¹ Cf. *Sinot -lī, -yē*, e.g. *Mokri, Songs 231, xwāyčim* 'I too'.

- (β) Sul. P *ašināsīm*: I know him too
 P *agar našhātimatea*: and if I do not come back
 Muk. 33¹⁷ *dašibaymatea*: even if we take her back
 (γ) Sul. P *agar hātikimatea*: and if I do come back
 P *kawotšatewa biri*: he remembered also
 P *agar mirduteša*: even if he has died (v. § 213)

B. SYNTAX

Emphasis

§ 241. In the Agential construction the Agent generally appears at the beginning of the sentence and syntactically outside it, i.e. it is not essential to the main construction and must be resumed by the Agential suffix within the sentence (v. § 223). There is thus no particular emphasis on an Agent expressed by a nominal form.

A similar construction with verbs in the present tense, however, gives emphasis to the nominal form so isolated, which may be either the direct or indirect object or the complement of the subject. It is then resumed within the sentence by a personal pronoun suffix, e.g.

Sul. — *pašimānān, lāxyān lē bitwāya*: those with regrets, if horns were to grow on them . . .

10 *ama, xēr hayfa biykušlīn*: this, it is a great pity that we should kill it

26 *pālā, cāwī dar ē*: the king, may his eyes come out

War. 188 *min, nāwim nāmīqa*: I, my name is Namiq

In Sor., when the nominal form so removed from the main phrase requires it, it appears in the Obl. case, e.g.

Bin. 353 *xwājā kāwusi, nafūmī habū*: Khwaja Kawus, he had a horoscope

Piž. 385 *tūtīnakay, nēwēkōlī hāt*: the tobacco, its weeds came

398 *šinēklī habū, aw kumāndāray*: he had a wife, that commander

Concord

§ 242. (a) The concord between subject and verb is generally straightforward, i.e. a singular subject takes a singular verb and a subject with the plural morpheme *-ān* takes a plural verb.

(b) A simple noun with generic plural sense (§ 173) may take either a singular or a plural verb, e.g.

Sul. — *dānī am kuṣa sixa/sixin*: this boy's teeth are close together

E *lēra lēr xōra*: there are many lions here

9 *ḏsik . . . alawcān*: gazelles were grazing

Muk. 87² *ḏin dayalīn*: women are treacherous

178¹⁷ *fāwkar būgīrīn*: may hunters catch you

(c) Two or more singular nouns joined by the conjunction *u*, *w* 'and' or the prepositions *lagal* (. . . -*dā*), *ba* . . . -*awa*, &c., 'with' constitute a plural subject taking a plural verb, e.g.

Sul. 2 *min ū tō lartēk akayn*: I and thou, (we) shall make a bond

21 *pālā ba istiqbālēki fawḏnawa . . . ḏūn*: the king, with a fine reception committee, (they) went

63 *kuṣ lagal pīrēḏīn hātīn*: the boy, with the old woman, (they) came

Muk. 24⁹ *dagal warīrī xōy hal stān, fōn*: he, with his viziers, (they) set off and went

138²⁴ *hātūn . . . qarawāl ū māmānē*: maids and nurses have come

In Bin., Piž., Muk. (Muk. § 28) two nouns joined by *u* may take the plural ending -*ān*, e.g.

Bin. 340 *ate bit u salamāna*: those idols (*bit*, *salam*)

369 *gwēy law qisa w bāsānaya*: he hears these sayings (*qisa*, *bās*)

Muk. 66⁴ *bāzin u gwārān bistēnē*: takes bracelets and earrings (*bāzin*, *gwāra*)

112¹⁶ *la tirsī līr u xanfarān*: from fear of swords and daggers (*līr*, *xanfar*)

or the plural *lzafe* -*i da* (§ 183 (c)), e.g.

Bin. 349 *dāk u bābī da tō*: thy mother and father

A noun with the meaning 'one of many' may take a plural verb, e.g.

War. 213 *hatā yakēktān . . . bimēnin*: as long as one of you remain

(d) The Direct Affectee of the Agential construction, if it be plural, is nevertheless represented by a 3rd Sg. verbal ending in Sul., e.g.

- Sul. — *minālakānī nuḍn*: she put the children to bed
 — *sagakānī kult*: he killed the dogs

In Sor., Muk., on the contrary, the verbal ending is commonly plural, even when the noun is not marked by the plural morpheme *-ān*, e.g.

- Piž. 380 *mālin bār kirdin*: we loaded up (our) property
 380 *farāmān lā fā xistin*: we spread carpets in it
 382 *šitilakānim dāstin*: I watered the seedlings
 Muk. 2³² *hamūyān qatlū-‘amm kirdin*: they massacred everybody
 Rdz. 478 *harsēki girtin*: he captured all three

There appears to be a distinction between animate and inanimate in

- Bin. 332 *čand wulāxi čāki bō kiřin*: he bought him some fine horses
čand širi čāki bō kiřī: he bought him some fine swords

Relative and Subordinate Clauses

§ 243. (a) In Sul., War. the inflexible particle *ka* serves to introduce both relative and subordinate clauses. The former may be either descriptive, e.g.

Sul. E *salāḥaḍin, ka dinyāy girt*: Saladin, who conquered the world, . . .

9 *am āsikāna, ka wā alawafēn*: these gazelles, which are grazing thus, . . .

or restrictive, e.g.

Sul. 9 *aw āsikayān ka wā tawqēki āltūnī la milāya*: that gazelle which has a collar of gold round its neck . . .

In Sor. and Muk. *ka* is commonly replaced by other particles.

To introduce a descriptive relative clause *wakū* appears in Bin., Piž.,¹ *har ka* in Arb., *agar* in Muk., e.g.

- Bin. 327 *zîn ... wakū malikay faxratānja*: (his) wife, who is Queen Fakhrutaj, . . .
 Arb. 418 *pālōy mīr, har ka 'azīzī mīrē bā*: the king of Egypt, who was Aziz of Egypt, . . .
 Muk. § 44 *xulā, agar amin ā tōy ba fōšay hēndwa*: God, who created me and you, . . .

To introduce a restrictive clause, and in the other functions of *ka*, viz. introducing a subordinate clause and as an adverb 'when', *agar* appears in Bin.,² Piž., Muk. (Muk. § 44), *har ka, wakī* in Arb., (*wa*)*kū* in Muk., Rdz., Xoš., e.g.

- Bin. 323 *aw mawqihay³ agar ... lēy lā dā būn*: that place at which they had landed
 336 *agar xwēndiawa . . . dazānē agar kuft N. nīa*: when he read it he knew that he was not the son of N.
 348 *tēy gaf mazbūt agar qisakay kirdibū* (for **qisaka(y)*⁴ *agar kirdibū*): she understood perfectly what he had said
 Muk. 2¹³ *bō xātīr awukū* (for **awea kū*) . . . *bizāmin*: so that they should think . . .
 Arb. 424 *wistī bar ka qisay lagar bikā*: he wanted to speak with her
 429 *wakī ganīmī . . . tē dakan*: when you are pouring in wheat
 Xoš. 459 *ci wurōyak nīa . . . kū amin noār bibim*: is there no horse that I may mount?

(b) When a relative clause is restrictive and immediately follows an antecedent which is either defined by the suffix *-akā* (§ 174) or a demonstrative adjective, or is a pronoun, then the relative clause may be introduced by the *Izafe*, e.g.

Sul. — *aw kitēbay dām xistura, halī⁵ gīra*,

¹ In Sul. this is probably restricted to 'story-tellers' style, e.g.

Sul. 47 *kuš, wakū lā imā'sil bē*: the boy, who is Shah Ismail . . .

² *ka* once in Bin., v. p. 83, fn. 3.

³ -y *Izafe*, v. (b) below.

⁴ See § 241.

but *aw kitēba hal gira ka dām xistuma*: pick up that
book which I have thrown down

13 *away id dicitur*: that which thou hast seen

Muk. § 46 *aw mīcānakay hātībā*: the guest who had come

Arb. 414 *aw xawenay aw jāra gēātawa*: that dream which
you related then

The particle *ka*, &c., may appear with the *Izafé*, e.g.

Sul. 9 *awānāy ka wā alawafēn ba fyd*: those which are grazing apart

Piž. 408 *aw kāsēla saray ka . . . hēnābayawa*: that skull
which he had brought back

An extension of this is to be seen in such conjunctive phrases as

Sul. 31 *la sar ama ka kuʔ . . . dāwāy minī kird, . . . la sar
awāy ka aw gāwira*: because the boy asked for
(my hand), . . . because he is an infidel

Use of Tenses

§ 244. (a) The Present Indicative has both habitual and actual present meaning, e.g.

Sul. — *mizgawt bē malā nābē*: there is no mosque without
a mullah (no rose without a thorn)

— *xalqi kāyaxi nipi axonētawa*: people read (evil into)
white (i.e. blank) paper

— *āsini sārḍ akutē*: he is striking cold iron

— *har nēn axōm*: I am just eating

2 *tō ā akay lēra*: what art thou doing here?

(b) The adverb *izd* 'thus' gives a sense of a state or action in progress,¹ e.g.

¹ In War, the forms *weđ* and *(h)đ* give a similar series in the absence of the normal substantive verb, e.g.

War. — *Edwin* will *sed*: I see it (my eye is on it)

199 wā nōā dāmadā: It (is) in our possession

269 hl la xwānd: (they are) on the point of being eaten

271 *bardi há ma sár íand* (there is) a rock on her shoulder

273 *bardé a wa jar sanlo* (there is) a rock on her shoulder

Sul. — *wā-y la ka*: where art thou?

— *wā-in lēra*: here I am

9 *am āshāna ka wā alawafēn*: these gazelles which are grazing

9 *am āshikayān ka wā tawqēki āltūnī la milāya*: that one of them which has a collar of gold round its neck

(c) The Present tense is also used for Future time, e.g.

Sul. 10 *ba das aygirin*: we shall take it by hand

16 *ēl talab akay atdamē*: whatever thou seekest I shall give thee

58 *amkužē*: she will kill me

(d) In narrative it may alternate with the simple Past tense, e.g.

Sul. 1 *pālāyak abē . . . neš akā . . . alē . . . la bar kird . . . rēy kirda lāx*: there is a king . . . he prays . . . he says . . . he put on (clothes) . . . he turned towards the mountains

16 *kuš amōzāyaki . . . abē . . . wuti . . . zū*: the boy has a cousin . . . she said . . . she went . . .

27 *lēy dā, fōl, kuš* — *wā kuš aŕwā*: the boy set off and went — lo, he is going —

Bin. 378 *agar wa zūr kawt tamālā dakā*: when he entered he sees . . .

§ 245. The Present Subjunctive is used:

(a) in subordinate clauses, whether introduced by a conjunction or not, e.g.

Sul. 4 *wē fūdna nāwēki bixayna sar*: it is good that we should give him a name

7 *seŕi dām . . . ka nāwē zāyir nakam*: he made me swear that I would not disclose his name

80 *dā nawē, qālī māl kā*: he bent down to kiss his foot

(b) with injunctive force, e.g.

Sul. — *bākē, got lē bē*: daughter-in-law, pay thou heed

10 *ba girin hiygirin*: let us catch it by hand

11 *ēwa lēra dā binlāin*: let ye sit down here

(c) following the particle *bā* 'let . . .', and *abē*, &c., 'must' (v. § 221, with examples).

(d) following certain verbs, e.g.

- Sul. 4 *nātwānīm* . . . *nāwī* binēm: I cannot name him (*twānīm*)
 27 *amawē* . . . *sarēk* . . . bidam: I want to visit . . . (*twistin*)
 35 *nayānwērā* bēm: they durst not come (*wērān*)
 55 *nāēlim* . . . *bifōy*: I shall not let thee go (*hēstin*)

§ 246. (a) The Past tense is the normal narrative tense describing a single action in the past, e.g.

- Sul. 5 *tāq yakēk la dargāy* dā: someone knocked at the door
 5 *čūn, dargāyān* kirdawa: they went and opened the door
 43 *lawēk lawē* bēm: I was there one night
 43 *bayānī* hātim *bō lāy ēwa*: in the morning I came to you

(b) The Past tense is also used for a recently perfected action, e.g.

- Sul. — *yakēkim* škūn: I have (just) broken one
 — *la pāš away ka minālakānī* nwān: after she had put the children to bed
 22 *šexul'arabim* bēnā *w* hātīn: I have brought the Sheikh of the Arabs and we have come
 38 *halim gira*, *fawtām*: take me up, I have perished
 43 *tō čūyta xānāy ēma*: hast thou been to our house?

A long completed action is expressed by the perfect or pluperfect tenses, e.g.

Perfect

- Sul. P *la bātī insān mirīlkēkyān swār* kirduwa: instead of a man they mounted a ben (in Montgolfier's balloon)
 13 *la mamlakatī xōy tōrāwa*, *hātōta ēra*: she has tired of her own country and come here

Pluperfect

- Sul. — *ka čūma lāy minālakānī* nwānibū: when I went to (see) her she had put the children to bed
 Muk. 25¹⁰ *awfō* . . . *sar-ū-pēy* . . . *nārdibū*: today she (had) sent a stew

(c) Corresponding to the narrative use of the Present Indicative (§ 244 (d)) the Perfect tense may also appear to indicate pluperfect action, e.g.

- War. 201 *amānawē das bikayn wa isrāhat* kirdin *wa matoqīh-ēkmān bō aw dyārī* kirdiḡa: we wanted to set about resting and we had appointed a place for it

§ 247. (a) The Imperfect tense indicates a continuous, prolonged, repeated, or habitual action in the past,¹ e.g.

- Sul. 9 *tamāšāy aw dāstāy akird, lāwēl karē ba āsīk la nāw*
bāxēkā alawafān: he was scanning that plain
 (when) he saw some gazelles grazing in a garden
 15 *duxtūryān abirda sar*: they kept on taking doctors
 to him
 38 *danē ba mintān awut*: yesterday you kept on saying
 to me . . .
 179 *fādyō nabā, gomān la grāmafōn agirt*: there was no
 radio, we used to listen to the gramophone

(b) The Imperfect appears in the apodosis of certain conditions (v. § 249 (a)) and in suppositions, even when the condition is not expressed, e.g.

- Sul. — *kākh amā, dū qisām lagalā akird*: I wish I could see
 him, (were I to do so) I would have a word or
 two with him!

Conditions

§ 248. Present, possible conditions.

(a) In the protasis the Present Subjunctive appears, e.g.

- Sul. 2 *agar tō amām lagal bikay*: if thou dost this with me
 16 *agar bēt ū tō bizānī*: if it should happen and thou
 shouldst discover . . .
 65 *kuf xabar bikaytawā*: if thou wakest the boy
 72 *am sē kizā mārā nakam*: if I do not marry these
 three girls
 Bin. 324 *lērā baw lāwā bīfōy*: if thou goest hence in that
 direction
 361 *nēwēl xōt ba min nalēy*: if thou dost not tell me thy
 name

generally followed, in the apodosis, by the Present Indicative, e.g.

¹ In Arb. the Imperfect appears exceptionally as the narrative past tense, e.g.

Arb. 430 *awān dafōyān, hōdā nimafē dagafānawā*: they set off and went
 half of the way back

431 *awānā lāwān fōn dabōwā*: their eyes regained sight

- Sul. — *min bim la fyātl tō nān nāxōm*: if I were you I would not eat anything
 — *agar biṭl bō lāy nātnāsim*: if thou goest to see him I shall have nothing to do with thee

Occasionally the Present Indicative appears in the protasis, e.g.

- War. 263 *hal asī . . . aṭbanim, hal nāsl . . . askuṣim*: if thou arisest I shall tie thee up, if thou dost not I shall kill thee

(b) If the action of the apodosis must, of necessity, follow that of the protasis in time then the Past tense may appear in the protasis, e.g.

- Sul. — *agar dīt pēy bilē*: if thou seest him tell him
 28 *agar hātī la dwāmā . . . amdōzītawā*: if thou comest after me thou wilt find me
 58 *agar hāt ū mirdī . . . atnēṣim*: if it should happen and thou shouldst die I shall bury thee
 War. — *aḡar hāt pēy bēṣa*: if he comes tell him
 — *aḡar čūy bō silēmāntī*: if thou goest to Sulcimaniye (please do something for me)
ka naylēūy awā hē: if thou dost not go, no matter
 266 *tēy gayānim nāykuṣim*: if I make him understand then I shall not kill him

- Bin. 350 *agar hātīmawā čāka*: if I return all is well

Note. *agar, ka* in the sense of 'as, since' are generally followed by the Indicative, e.g.

- Sul. 2 *agar azānī min pālām*: since thou knowest I am king
 58 *ka mādam wāya ḡāxirim*: since it is so I am ready

§ 249. Past, impossible conditions.

(a) The Past Conditional tense is used in the protasis and the Imperfect tense in the apodosis, e.g.

- Sul. — *agar donē jaw bihātītāya ēra xāmit adi*: if thou hadst come here last night thou wouldst have seen Khan
 — *agar la jēgāy tō būmāya am ṣam bāktir akird*: had I been in thy place I would have done this job better
 — *am ṣat wahā bikirdāya čāktir abū*: it would have been better hadst thou done this job thus

- War. — *ağar tûpîm pê wêya lêm akuştin*: had I had a shot-gun with me I would have killed some of them
 234 *tê agar aqî! bûytâya naakawtita ayraô*: hadst thou had any sense thou wouldst not have got here
 Bin. 331 *agar atû dâk nabûyâya . . . mistêhim . . . dadâ*: hadst thou not been my mother I would have punched (thee)
 377 *agar amin bitirsâmâya . . . nadahâtîm*: had I been afraid I would not have come

(b) The Imperfect tense may occasionally appear in the protasis, e.g.

- War. 219 *agar asp û çakim abû ba lûb*: if I but had a horse and arms with me

(c) In Sor., Muk. the Perfect Conditional tense, in any of its forms, may appear in the protasis, e.g.

- Bin. 337 *agar xût pê bigutâbâmâya*: if thou hadst told me sooner
 PiZ. — *agar pê bigutbâmâya* } if thou hadst told me
 391 *agar ba minî bigutbâ* }
 Muk. § 84 *agar aw waxta nahâtibâm*: if I had not come then
 Arb. — *nahâtibân intixârim dakirdin*: if you had not come I would have waited for you

§ 250. (a) In general the distinction between Subjunctive and Indicative Perfect tenses in conditional sentences is governed by the element of doubt, e.g.

- Sul. — *agar bātuwa xabarim bidarê*: if (you know) he has come tell me
 — *agar hâtibê wara, pêw bilê*: if he should have come, come and tell me
 — *agar dirânbêti cawî dar ahênim*: if he should have torn it I'll have his eyes out
 52 *agar ajali hênawim*: if Thou hast brought my death-bour

In War., however, only the Perfect Indicative is attested (v. § 215 (a) fn.), e.g.

- War. — *ağar dirîwîatî cawî dar têrim*: if he has torn it I'll have his eyes out

— *ağar ağıraka kuzyāğatō naxtē dārt bixara sar*: if the fire has died down put a little wood on it

(b) The Pluperfect may appear in the protasis instead of the Perfect Subjunctive when the action of the apodosis must follow it in time (cf. § 248 (b)), e.g.

Sul. 42 *agar xānū fūxābū xūkitim bō sar bifa*: if the house has been destroyed decapitate thy sister for me

§ 251. The particles *xōzga* (Muk. § 83 *xōzā*), *biryā*, *kākhī* 'would that . . . '.

(a) When these particles introduce a wish still possible of realization they are normally followed by the Imperfect tense, e.g.

Sul. — *xōzga ahāt* } I wish he would come

Muk. § 83 *biryā dabāt* }

Sul. — *kākhī amdī*: I wish I could meet him

A subordinate verb following such a wish appears in the Past Conditional, rather than the Present Subjunctive (cf. § 245 (d)), e.g.

Sul. — *xōzga amtwānī bičūmāya mālawā*: I wish I could go home

(cf. § 221 (a), *abteāya kuʾ bwāya*)

(b) When the wish is impossible of realization the Past Conditional tense is used (in Muk. also the Perfect Conditional), e.g.

Sul. — *xōzga am kābrāyam nadīāya*: I wish I had never seen this fellow

— *kākhī donē biridīāya*: I wish I had seen him yesterday

— *sad biryā bintwānīāya bičīma mālawā*: would a hundred times that it had been possible for me to go home

[cf. — *ħazim akird amat bō hikirdimāya*: I wish you had done this for me (would have liked you to do this)]

P *xōr draxāmān akird . . . bihātūyawa . . . balām nahātītawā*: we very much wanted you to come back, but you did not]

Muk. 1:16²⁵ *biryā amin sēwēk bām . . . kawtībām . . . bihāti-nāyawa, aminyān hal bigirtāyawa*: would that I had been an apple, . . . that I had fallen . . . that they had come back and had picked me up

C. WORD FORMATION

(All references, unless otherwise stated, to *Sul.* only)

Compounds

§ 252. Copulative compounds are of three types.

(a) The commonest consists of two related nouns or adjectives joined by the conjunction *a*, *w* 'and' into a syntactical whole, e.g.

<i>bañ-a-bālā</i>	'stature'
<i>dam-a-ēaw</i>	'face' (mouth and eye)
<i>day-a-bās</i>	'news' (noise and talk)
<i>dirō-w-dalasa</i>	'deception' (lies and deception)
<i>das-a-pil</i>	'hand and fingers'
<i>hāt-a-ēa</i>	'traffic' (coming and going)
<i>hāt-a-nahāt</i>	'luck' (coming and not-coming)
<i>narm-a-lil</i>	'soft and flabby'
<i>tīgā-w-bān</i>	'highroad' (road and plateau)
<i>tañ-a-ēalama</i>	'trouble' (tight and collar-bone [<i>sic</i>])

Less commonly one member is merely a rhyme of the other, e.g.

<i>ēsk-a-prāsk</i>	'body' (bone, skeleton and spark)
<i>ēaw-a-ēaw</i>	'deception' (eye and hunting)
<i>jē-w-jē</i>	'accommodation' (place and way)
<i>tēk-a-pēk</i>	'regular, tidy' (tidy and together)
<i>lil-a-mil</i>	'loose' (flabby and neck)

(b) Two members may, alternatively, be joined by a simple preposition, or an equivalent morpheme having no separate identity. The resulting compound may be a noun, adjective, or adverb, e.g.

-aw- (cf. postposition -aw-dwā, § 236 (b))

<i>dam-aw-nuxūn</i>	'inverted' (face towards inverted)
<i>dast-aw-aẓnō</i>	'depressed' (hand towards knee)
<i>pāl-aw-pāl</i>	'backwards'

-āw-

<i>ḥaṭn-āw-ḥaṭn</i>	'various' (kind to kind)
<i>gōḥ-āw-gōḥ</i>	'from ear to ear' (NP. <i>gōḥ</i> 'ear')
<i>pēl-āw-pēl</i>	'winding' (turn to turn)
<i>ḥay-āw-ḥay</i>	'various' (colour to colour)

ba

<i>das-ba-jē</i>	'immediately' (hand to place)
<i>haprūn-ba-haprūn</i>	'in pieces' (piece to piece)
<i>jē-ba-jē</i>	'in place, in effect' (place to place)

baraw (i.e. *bar-aw*- 'front towards . . .')

<i>sar-baraw-xwāra</i>	'declivity' (head towards downwards)
------------------------	--------------------------------------

(c) Two repeated parts, particularly verbal stems, may form a compound, either noun, adjective or adverb, e.g.

<i>anḥin-anḥin</i>	'chopped fine' (chop chop)
<i>piḥiṭ-piḥiṭ</i>	'separately' (bit bit)
<i>tik-tik</i>	'drip by drip'

An important subsection of this type is formed by morphemes of 'noise', e.g.

<i>firiwa-firiw</i>	'chirping'
<i>qāspa-qāsp</i>	'clucking (of partridge)'
<i>xirta-xirt</i>	'knocking'

The final -a- of the first element is not merely a compound vowel. The first element frequently appears alone with the same meaning as the compound, e.g. *firiwa*, *qāspa*, &c.

§ 253. Determinative compounds may be dependent or descriptive.

(a) Dependent compounds are of two types:

(i) A noun qualified by another noun in some case relationship to it, generally genitive. Such compounds appear with the qualifier

preceding the qualified, or inverted, and in either case with or without a compound vowel -a-, e.g.

<i>ostā-žin</i>	'craftsman's wife'
<i>birā-žin</i>	'brother's wife, sister-in-law'
<i>lēt-apēt</i>	'(mid-morning) mealtime'
<i>dēt-jāma</i>	'hunter's patchwork camouflage shield' (demon-dress)
<i>maraxa-žāf</i>	'rice patch'

and, with the compound vowel,

<i>bām-a-larza</i>	'earthquake'
<i>hawr-a-birūška, -tirilqa</i>	'lightning' (cloud-lightning)
<i>nargis-a-žāf</i>	'field of narcissi'

Inverted,

<i>lāl-āw</i>	'well' (pit of water)
<i>hixa-fēn</i>	'skin bag' (bag for clarified butter)
<i>kilāfa-daxū</i>	'skein of cotton'
<i>kūra-haŋ</i>	'beehive' (hive for bees)

and, with the compound vowel,

<i>lapih-a-gul</i>	'bouquet of flowers'
<i>larm-a-gā</i>	'oxhide'
<i>danik-a-žō</i>	'barleycorn'
<i>gul-a-bāx</i>	'rose' (flower of garden)
<i>gul-a-ganim</i>	'ear of wheat'
<i>kilk-a-bēt</i>	'spade handle' (tail of spade)
<i>kun-a-lūt</i>	'nostril' (hole of nose)

(ii) A verbal stem, present or past, restricted by a preceding object, or complement, e.g.

Present:	<i>bā-walēn</i>	'fan' (wind-waver)
	<i>bag-dirū</i>	'tailor' (clothes-sewer)
	<i>bizin-miž</i>	'"goat-sucker" lizard'
	<i>dār-firōf</i>	'wood-seller'
	<i>mōr-halkan</i>	'seal-engraver'
	<i>pyāw-kuz</i>	'murderer' (man-killer)
	<i>sar-tāl</i>	'barber' (head-shaver)
	<i>xen-fēž</i>	'bloodthirsty' (blood-spiller)
	<i>xōr-zān</i>	'shrewd' (much-knower)

Note. With the defective present stem *-lē-* the modal affix *bi-* is also present in *zōr-bilē* 'talkative' (much-talker).

Past:	<i>dast-kird</i>	'hand-made'
	<i>dast-kawt</i>	'income' (hand-fallen)
	<i>sūraw(a)-kirāw</i>	'baked' (red-made)'

(b) Descriptive compounds consist of a noun qualified either by a noun in apposition or an adjective. When the qualifier is a noun in apposition it may precede the noun qualified, e.g.

<i>čilk-āw</i>	'foul water' (dirt-water)
<i>lā-tag</i>	'jugular (king-) vein'
<i>lā-hay</i>	'queen bee'

and, with the compound vowel *-a-*,

<i>sāl-a-waxt</i>	'a year's time'
-------------------	-----------------

Commonly, however, it follows the qualified noun, e.g.

<i>dār-hanār, -xurmā</i>	'pomegranate, date tree'
<i>galā-mēw, -tātīn</i>	'vine-, tobacco-leaf'

and, with the compound vowel,

<i>bak-a-fāla</i>	'doll' (bride—glass)
<i>dār-a-ban</i>	'terebinth tree'

When the qualifier is an adjective the compound is also normally inverted and of the 'open' type, e.g.

<i>bizin-a-kēw</i>	'mountain goat'
<i>qārčik-a-mārāna</i>	'toadstool' (mushroom—snaky)

&c., *ad infinitum* (v. § 185). A few uninverted compounds do occur, e.g.

<i>farik-a-nōk</i>	'unripe chick-pea'
<i>kawn-a-fāhīša</i>	'old whore' (abuse; otherwise <i>kōn</i> 'old')
<i>mizir-a-sēw</i>	'tart apple'
<i>narm-a-xīn</i>	'saddle-cloth' (soft-saddle)

Cf. Muk. § 31,

<i>garm-a-šin</i>	'bitter (hot) lamentation'
<i>nāsk-a-tīr</i>	'fine arrow'

¹ From *sūr kirdinawa*. The appearance of the 'postverb' *-awa* (§ 235 (a)) suffixed to the word preceding the verb is a characteristic of the *Sinai* and more southern dialects.

§ 254. Secondary Adjectival compounds may be possessive or prepositional.

(a) The Possessive compounds are generally descriptive compounds with adjectival meaning, e.g.

<i>bad-kār</i>	'evil-doer' (bad-work)
<i>dū-fā</i>	'two-faced, hypocritical'
<i>gardin-bilār</i>	'with a throat (translucent as) crystal'
<i>girān-bā</i>	'expensive' (dear-price)
<i>kawa-fōz</i>	'overclouded' (grey-day)

and, with the compound vowel,

<i>kurt-a-bālā</i>	'short' (short-stature)
--------------------	-------------------------

They are more commonly inverted, without compound vowel, e.g.

<i>ēsik-sūk, -qurs</i>	'handsome, ugly' (bone-light, -heavy)
<i>bālā-barx</i>	'tall' (stature-tall)
<i>lāw-jin</i>	'blue-eyed'
<i>dil-tay</i>	'sad' (heart-tight)
<i>dil-taf</i>	'sentimental' (heart-damp)
<i>dāwēn-pis</i>	'licentious' (skirt, hem-dirty)
<i>hanāsa-sārd</i>	'despairing' (breath-cold)
<i>kayf-xōš</i>	'happy' (spirits-pleasant)
<i>sar-garm</i>	'eager' (head-hot)

(b) The prepositions *ba*, *bē* form an infinite number of adjectival compounds, e.g.

<i>ba</i>	<i>ba-go</i>	'obedient' (with ear)
	<i>ba-jē</i>	'fitting' (in place)
	<i>ba-kār</i>	'useful' (with work)
	<i>ba-wanawx</i>	'drowsy' (with sleep)
<i>bē</i>	<i>bē-go</i>	'disobedient' (without ear)
	<i>bē-hōš</i>	'unconscious'
	<i>bē-qazā</i>	'unharmed' (without accident)

Suffixes

§ 255. The following suffixes form nouns:

(a) Abstract

-i forms abstract nouns from adjectives, e.g.

agādāri 'care', *āsāni* 'ease', *ōlkarāi* 'obviousness', *bōli* 'emptiness', *lōli* 'desertedness', *gawraī* 'greatness', *kurti* 'shortness', *xōli* 'pleasure'.

With adjectives of measure, &c., it alternates with

-āī, (-āyātī), e.g.

astūrī, astūrālī 'thickness', *barzī, -ālī* 'height', *-dirēzī, -āī* 'length',
garmī, -ālī 'warmth', *qālī, -ālī* 'depth', *bilindī, bilindāyātī*
'height'.

With other adjectives it frequently alternates with

-yātī > -ēlī, e.g.

āzāī, āzāyātī 'bravery', *bandāī, bandayātī* 'slavery', *kamī,*
kamēlī 'shortcoming', *pānī, -āī, -ēlī* 'breadth'.

-atī, -iatī > -yātī > -ēlī, -āyātī form abstract nouns from nouns,
pronouns, or adjectives, e.g.

āyāyātī 'agha-ship', *birāyātī* 'brotherhood', *dōstāyātī* 'friend-
ship', *dušmināyātī* 'enmity', *ḥākimēlī* 'judge-, governor-
ship', *pyāwātī* 'manhood, service', *īāristānēlī* 'civilization',
xizmāyātī 'kinship';

čōnīālī 'how-ness', *kēyātī* 'who-ness';

birsēlī 'hunger', *čāklātī* 'goodness', *tīnāēlī* 'thirst', *yaktātī,*
yakhēlī 'oneness, unity'.

-ēnī, more rarely, forms abstract nouns, e.g.

bākēnī 'bride-ship', *čāwēnī* 'evil-eye', *kičēnī* 'maidenhood',
kufēnī 'youth, boyhood'.

(b) Diminutive

-č-, -k-, -l-, -l-, in various combinations, form derived nouns, and
occasionally adjectives, which may be classed generally as 'diminu-
tive'. Thus:

-ča *bāxča* 'small garden', *nāwča* 'district'

-čka *fēčka* 'string, file', *xānūčka* 'little house'

-ak *dastak* 'pole, beam', *fānak* 'trousers'

-ik *dastik* 'bunch, handle', *ḡāḡik* 'chick'

-ka *dōlka* 'bucket', *lōlka* 'mountain peak', *mičōdnka* 'necklace'

-aka *pūlaka* 'fish scale, spangle', *tūraka* 'small bag'

-ōk *tūrōk* 'rolling pin'

-ōka *bāfōka* 'pullet', *fīrfīfōka* 'whirligig', *fīnōka* 'jinnce'

-kala *xīḡkala* 'short and stout'

-la *mārūla* 'ant', *pīḡila* 'cat', *quḡila* 'little lamp'

-laka *ḡulaka* 'Jew'

- ila* *amustila* 'finger ring', *gwrēla* 'kidney', *kārila* 'kid'
- āla* *dānāla* 'porridge', *jāsāla* 'baby ass', *mētāla* 'mosquito'
- ūlka* *dāsūlka* 'small sickle', *pāzūlka* 'small pick'
- la* *gōzala* 'small pitcher', *jūfala* 'chick'
- ala* *girdala* 'hillock', *sawzala* 'little fresh one'
- ōla* *kizōla* 'little girl', *pičōla* 'small, tiny'
- ōlka* *dizōlka* 'small saucepan', *girdōlka*, *tapōlka* 'hillock'

(c) Concrete

-*gā*, forms nouns of place, e.g.

hōrdūgā (War. *hōrdūā*) 'army camp', *hōgā* 'store', *fēgā* 'road',
sayrāngā 'heauty-spot', *tāoga* 'waterfall'.

-*ālān*, (Bin., Piž. -*ālēn*), forms nouns with the meaning 'tract, expanse of . . .', e.g.

bardālān 'stony tract, wilderness', *narmālān* 'soft land',
qāmīlālān (Bin. *qāmīlālēn*) 'reed-bed', *sawzālān* 'green, verdant tract', *zīālān* (Piž. *zīālēn*) 'thorny tract', *zīxālān* 'stretch of gravel'.

-(i)*stān* forms nouns with the meaning 'place, country of . . .', e.g.

dāristān 'wood(land)', *janlistān* 'jungle', *kurdistān* 'land of the Kurds', *hastān* 'highlands, uplands', *qabristān* 'graveyard', *lāristān* 'city'.

-*awān*, -*čī*, -*gar* form nouns of trades or skills, e.g.

āšawān 'miller', *bāxawān* 'gardener', *kašlawān* 'boatman',
malawān 'swimmer', *pāšawān* 'watchman', *lūxawān* 'mountaineer',
tōfawān 'fisherman' (net-man);
bōyāxčī 'shoeblick', *čāyčī* 'teashop-keeper', *qāčāxčī* 'smuggler',
fāwčī 'hunter', *tanakačī* 'tinsmith';
āšingar 'blacksmith', *čaqōgar* 'cutler', *misgar* 'coppersmith'.

-*dān* forms nouns with the meaning '. . . -holder', e.g.

čirādān 'lamp-holder', *darxidān* 'needle-holder', *fišakdān* 'handolier',
fiždān 'wallet', *mōmdān* 'candlestick', *mināldān* 'womb', *mizildān* 'bladder'.

-*dār* forms nouns and adjectives with the meaning 'possessor of . . .', e.g.

amindār 'steward', *baydāxdār* 'flagbearer', *baīdār* 'partner',
dukāndār 'shopkeeper', *dildār* 'lover', *dardadār* 'invalid',
miwāndār 'host';

āgādār 'careful', *astēradār* 'starry', *bāldār* 'winged', *dāndār*
 'toothed, cugged', *zyāndār* 'damaged'.

-kar, *-kār*, less commonly *-gār*, *-yār*, form nouns and adjectives with the meaning 'doer, maker of . . .', e.g.

čēst-, *nān-kar* 'cook', *kārakar* 'maidservant', *kāwēžkar* 'ruminant', *swālkār* 'beggar', *tafkar* 'fighter';

ārāzūkār 'desirous', *līkar* 'industrious', *nožkar* 'devout';

harzakār 'lusty youth', *kirēkār* 'hired labourer';

pārēsgār 'abstemious';

fātūr 'ploughman', *kišl(y)ār* 'buyer, customer'.

-bāz forms nouns with the meaning 'addicted to . . .', e.g.

hatībāz 'pederast' (*hatīb* 'orphan'), *qumār-bāz* 'gambler'.

-ēn (Arb., &c., *-ānē*) forms the names of games, e.g.

halūkēn 'tip-cat', *halmātēn*, *mālēn* (Arb. *kallāyānē*) 'marbles',

fišbōlēn 'football', *sartrinfēn* 'chess', *tōpēn* (Arb. *tōpānē*) 'ball game', but *zōrān* (Arb. *zōrānē*) 'wrestling'.

(d) Verbal

-ōk, *-nōk* form nouns or adjectives with the sense 'habitual doer of . . .' from verbal stems, e.g.

gašōk 'wandering, nomad';

girinōk 'whining, cry-baby', *tirsnōk* 'coward'.

*-ar*¹ forms agent nouns from verbal stems, e.g.

kušar 'killer', *nāsar* 'writer'.

-amanī forms nouns of materials from verbal past stems, e.g.

sūtamanī 'fuel', *swārdamanī* 'food'.

-a forms nouns of 'noise'. From the suffix-free morpheme denominative transitive verbs are formed by the addition of the causative morphemes (§ 233).

bōla : *bōlāmin* 'murmur', *bāfa* : *bāfāmin* 'bleat', *fika* : *fikānin*
 'whistle', *hila* : *hilānin* 'neigh'.

¹ A neologism, formed on the analogy of nouns in *-kar* (v. (c) above): *kirdin*, *ka-*, *-dar* (v. § 256): *dān*, *da-*, *-dar*: *biridin*, *ba-*, e.g. *bārbar* 'load-carrier, porter', *fanjbar* 'labourer'.

Such nouns also form copulative compounds (§ 252 (c)), e.g.

giva-giv 'rumble', *qirča-qirč* 'crackle, splutter', *qirça-qirç* 'scream'.

§ 256. The following suffixes form adjectives:

-i forms adjectives of kind, or origin, e.g.

bāzāfi 'common, of the market', *kostāni* 'mountaineer', *lādēi* 'rustic', *miḡi* 'musk-coloured, black', *qāwāi* 'coffee-coloured, brown';

hawlēri 'of Arbil', *hawrāni* 'of Avroman'.

-in, -āwi form adjectives from nouns, chiefly of materials, e.g.

āgiri 'fiery', *āsinin* 'iron', *faḡin* 'colourful';

ārdāwi 'floury', *bafrāwi* 'made of snow', *qufāwi* 'muddy', *xōlāwi* 'dusty', *xonāwi* 'bloody'.

-in forms adjectives of quality from nouns, e.g.

aspēwin 'lousy', *ḡilkin* 'filthy', *gōstin* 'fleshy', *kulkin* 'furry', *kirmin* 'wormy', *likin* 'dribbly', *qifin*, *tākin* 'hairy', *wurgin* 'big-bellied'.

-man/ŋ, (-mand) forms adjectives with the sense 'possessed of . . .', e.g.

'aqlman 'wise', *ārazūman* 'desirous', *dādman* 'just', *dawla-man/ŋ* 'rich', *dardman* 'ill', *hunarmān* 'skilled'.

-dar forms adjectives meaning 'giver of . . .', e.g.

āgādar 'aware', *farmāndar* 'commanding'.

-kār, -bāw modify adjectives of colour, e.g.

ṭalkār 'blackish', *siptkār* 'whitish', *sūrbāw* 'reddish', *ṣinkār*, *-bāw* 'bluish'.

-āna forms adjectives and, more commonly, adverbs, e.g.

mārāna 'snaky', *mānāna* 'monthly', *sālāna* 'annual';

āyāyāna 'agha-like', *āzāyāna* 'bravely', *birāyāna* 'brotherly', *pyātāna* 'manly', *lērāna* 'like a lion'.

§ 257. In Sul., Sor., and Muk. the 'regular' Intransitive verb is characterized by the past stem ending -ā-, infinitive -ān, e.g.

birzān 'be roasted', *kuḡān* 'boil', *sūtān* 'burn', *ṣkān* 'break'.

With a few verbs this may alternate with a past stem in -ī-, e.g.

qawmā/īn 'happen', *ʔimā/īn* 'collapse', *ʔizā/īn* 'rot', *tōqā/īn* 'burst', *xurā/īn* 'itch'.

The corresponding Transitive verb is a Causative formation (§ 233) from the Intransitive, e.g.

biržānin 'roast', *kulānin* 'boil', *sūtānin* 'burn', *lkanin* 'break',
tōqānin 'terrify', *xurānin* 'scratch'.

In War. the 'regular' Intransitive verb form is marked by the past stem ending -yā-, infinitive -yān, e.g.

biržyān, *kulyān*, *sūtyān*, *lkiyān* (< *lkyān, v. § 56 (a), end).

PART III

SŪRČĪ, AKRE, AMADIYE, BARWARI-ŽŌR, GULLĪ, ZAKHO, AND SHEIKHAN DIALECTS

A. MORPHOLOGY

NOUNS

Definition

§ 258. (a) A noun in its simplest form may be either definite or indefinite, singular or plural (v. § 260 (b)), e.g.

Ak. — *kav*: rock, the rock, rocks, the rocks

— *bičāk*: child, the child, children, the children

There is no general means of further defining a noun. The following suffixes, however, appear in particular contexts.

(b) The suffix *-aka* appears in Sur., Ak. only, in narrative, defining known characters (cf. § 174), e.g.

Sur. 508 *mirōwaka gōta šinakē*¹: the man said to the woman

Ak. 534 *mirōwaka čōca*: the man returned

555 *māraka kušt*: the snake was killed

682 *das hāvēta bičakē*¹: he reached for the girl

(c) The suffix *-a* appears in all dialects Sur., Ak.—Zx. following a noun qualified by the proximate demonstrative adjective *av*, &c. (v. § 270 (a)), e.g.

Ak. 547 *av mār*: this snake

591 *av fištā*: this watermelon

Zx. 775 *av pira*: this bridge

It is not realized after a noun ending in *a*, e.g.

Ak. 564 *av ša*: this dog (*ša*)

¹ See § 261 (b).

Note. The same 'proximate' suffix is present in

Ak. 597 *ti l hinda ganimay kam*: what shall I do with this much wheat? (v. § 261 (b))

contrast

— *ti l hinda ganimā kam*: what would I do with that (so) much wheat?

Cf. also Ak. *hutuwa* 'in this way': *watuv* 'in that way'.

§ 259. (a) The suffix *-ak* (i.e. Sur., Ak. [-ak'], Am.-Zx. [-ak]) gives the noun an indefinite sense or one of unity,¹ e.g.

Sur. 508 *tinak ā mirōwak habūn*: there was once a woman and a man

Ak. 531 *mirōwak habō*: once there was a man

534 *kāyarak nivīst*: he wrote a letter

551 *yē hanē fivīak-a*: yonder is a fox

Zx. 790 *mullīlak*: a difficulty

(b) Following a noun ending in *a*, *ā* an euphonic *-y-* appears before the suffix, thus *-yak*, e.g.

Ak. 556 *qurbālayak*: a badger

580 *ēzyāyak*: a serpent

586 *birāyak*: a brother

In Am.-Zx., however, this *-y-* is often imperceptible after *ā* (cf. § 35 (b)), e.g.

Am. 704 *birā'ak*: a brother

709A *bā'ak*: a wind

718 *qazā'ak*: 723 *qazāyak*: a district

In all dialects, Ak.-Zx., the suffix may appear following *a* as *-k* only, e.g.

Ak. 536 *dabānfak*: a pistol

563 *qisak*: a saying

587 *figārak*: a cigarette

Am. 705 *qabilak*: a tribe

719 *fāmih/ak*: a mosque

¹ BX 5 describes a 'Plural Indefinite Article', i.e. suffix, *-in*. Although quoted BX 19 with a Plural oblique ending *-an* (v. § 261 (b)), thus, *dangē haspindān* 'the sound of horses', it is elsewhere only attested with the Secondary Izafe, q.v. §§ 263 (c), 264 (c).

The group *-iak* may be reduced to *-êk* (cf. § 59 (a)), e.g.

Ak. 531 *pîstêkê dārā*: a load of sticks (*pîstî*)

653 *hêvārêkê*: one evening (*hêvārî*)

Bar. 737 *avāhêk*: a building (*avāhî*)

(c) A noun qualified by an indefinite, but not normally an interrogative, adjective may take the suffix *-ak*, e.g.

Ak. 579 *har kasak*: whatever person

Am. 715 *hamî kasak*: each person

A noun qualified by indefinite number may have the suffix *-ak*, commonly in conjunction with the Plural oblique morpheme *-î(n)* (§ 261 (b)) when oblique, e.g.

Ak. 592 *êr pêñj daf'akā¹*: four or five times (*daf' a*)

611 *gāzî êr pêñj biçûkakā kir*: called four or five children

613 *igal sê êr nānakā*: with three or four loaves

Am. 707 *haşt nah yêşakā¹*: eight or nine days

711A *p êand yêşakā*: by some days

Bar. 731 *sê êrak dî*: some three or four others

Zx. 773 *dah daqîqayakā¹*: some ten minutes

Note. In conjunction with the numeral *yak*, &c. (§ 272), and certain indefinite pronouns an 'indefinite' suffix *-ê* (also *-î*) appears, e.g.

Ak. 563 *har yêkê qisak gôt*: each one said something

617 *haçtê dîtbitava*: whoever has seen it

618 *haçtê bînitava*: whoever brings it back

629 *kasê . . . nâkîrîrî*: nobody breaks . . .

Am. 706A *har êkê kîlikak dâê*: gave each one a cat

Gul. 765 *kasê . . . nagûta min*: nobody told me . . .

Zx. 774 *lâsima êkê am bikuştin*: we must kill someone

Cf. also Ak. 585 *êu êkî . . . nanivistin*: no one slept.

Declension

§ 260. (a) In all dialects Sur., Ak.-Zx., Shn. the noun declension presents a system of:

- two numbers, Singular and Plural,
- two grammatical genders, Masculine and Feminine,
- two cases, Direct and Oblique.

¹ Adverbial Oblique, v. § 305 (a).

In addition, in the system of Vocative endings, a distinction of *natural* gender is observed.

(b) The simple noun, i.e. in its Direct case form, gives no indication of its grammatical gender or number (v. § 258).¹ These are manifest only in the Oblique case forms (§ 261 (b)) and in the forms of the Izafe (§ 264).

§ 261. (a) A noun which is the Subject of a verb, or a Predicative noun, appears in the Direct case, i.e. in its uninflected form.

A noun which:

- (i) is the Direct Object of a verb,
- (ii) is the Agent of a sentence in the Passive construction (v. § 296),
- (iii) has 'oblique' (i.e. dative, ablative, locative, &c.) sense, whether governed by a preposition or not,
- (iv) follows another noun with the Izafe (§ 263), or follows the Demonstrative Izafe (§ 266),
- (v) has adverbial sense (v. § 305 (a)),

normally appears in the Oblique case. There is, however, a tendency for the uninflected, Direct case form to replace the Oblique form, particularly in its function as Agent.

If a noun in the Oblique case is followed by an Izafe form then it does not take an Oblique ending.

(b) The Oblique case is marked by the following Primary morphemes:

	Sg. M.	F.	Pl. M. & F.
All dialects Sur., Ak.-	-I	-ê	-d(n)
Zx., Shn., BX			
KK § 75 ff.	-Q ¹	-ê	-d

These are added to the simple noun directly, or after the defining suffix *-aka* (§ 258 (b)) when present. Examples, v. (d) below.

¹ The paradigm given in *BSOAS*, xvi. 330, is wrong, and a misinterpretation of K. A. Bedir-Xan's 'Langue Kurde', in that the Plural morpheme *-d(n)* occurs only in the Oblique case.

² Alternatively in KK, BX the internal vowels *a*, *ê* of Masculine nouns may be modified to *ê* in the Sg. Obl., e.g. KK § 89 *livên* 'shepherd' > *livên*, *dari* 'door' > *dêrî*.

Following *a*, *ā* the M. Sg. Obl. ending *-ī* appears as *-y*, e.g.

- Ak. 531 *a zyāy*: to the mountain
 534 *mālā kābrāy*: the fellow's house
 556 *a qurbāy*: to the badger
 544 *mirōcakay gōtī¹*: the man said (*mirōv*, *-aka*)

The F. Sg. Obl. ending *-ē* coalesces with preceding *a*, e.g.

- Ak. 533 *l filān jādē*: in such-and-such street (*jāda*)
 536 *darikē qiltē*: the door of the town hall (*qiltā*)
 533 *gōta xīnakē*: said to the woman (*xīn*, *-aka*)
 682 *das hāvēta kičakē*: reached for the girl (*kič*, *-aka*)

An *ē* preceding the Pl. Obl. ending *-ā(n)* may be modified to *i*, e.g.

- Ak. 555 *p har dō piā*: with both feet (*pē*)
 Zx. 785 *pīh hāt*: he came on foot

contrast,

- Ak. 565 *rēā¹*: three people (*sē*)

The full form *-ān* of the Pl. Obl. morpheme only occurs when it is followed by the enclitic form of the substantive verb (§ 284 (a)), e.g.

- Ak. 662 *kufē darwēfān-ī*: thou art the son of (one of) some dervishes
 679 *līxē 'arabān-a*: he is the Sheikh of the Arabs
 Am. 720 *na libālī kārē hamfān-a*: is not like everybody's dress
 Zx. 777 *yē l sar vān gir-ō-mirān-in*: they are on these hills and humps

(c) When the noun has the indefinite suffix *-ak* (§ 259)² then the Oblique case morphemes take the following, Secondary, forms (in all dialects Sur.-Bar. identical with the Primary morphemes, v. (b) above)³:

	Sg. M.	F.	Pl. M. & F.
All dialects, Sur.-Bar.	<i>-ī</i>	<i>-ē</i>	<i>-ā(n)</i>
Gul.	<i>-ī</i> (?) <i>-ē</i>	<i>-ē</i>	
Zx.	<i>-ē</i> M. & F.		
KK § 92 ff., BX. 19	<i>-ī</i>	<i>-ē</i>	

¹ Agent oblique, v. § 296 (b).

² In KK §§ 95, 96 also when qualified by a demonstrative adjective *and*, *and*.

³ The distinction of such Primary and Secondary morphemes, though largely disguised here, is common in neighbouring dialects. Cf. the *Izaf* forms, § 264.

Examples:

- Ak. 531 *dikānd mirōvaki*: a man's shop (*mirōv* M.)
 540 *har biskakē*: on each curl (*bisk* F.)
 592 *čār pēnj das'akā*: four or five times (v. § 259 (c))
 Am. 704A *nih nafāraki*: to a carpenter (*nafār* M.)
 Bar. 729 *šinakē bina*: take a wife (*šin* F.)
 Gul. 750 *l bislānakā*: in an orchard (*bislān* M.)
 Gul., Zx. — *nānakē bina*: bring a loaf of bread (*nān* M.)
 Zx. — *kalaxē fayrakē*: the carcass of a bird (*fayr* M.)
 — *šarmē šinakē*: the body of a woman
 771 *š gundakē*: from a village (*gund* M.)

(d) Examples of the Oblique case:

(i) as Direct Object,

- Sur. 507 *āxē dē kōrin*: they will dig up earth (*āx* F.)
 507 *dē kēlin, qufi*: they will take it, mud (*quf* M.)
 Ak. 531 *čf fayray nākiŋ*: won't you buy this bird? (*fayr* M., -a, v. § 270 (a))
 532 *hikāyatē bika*: make a complaint (*hikāyat* F.)
 539 *kāyaxā tmiŋiŋ*: is writing letters (*kāyax* F.)
 542 *ču dangā naka*: make no noises (*dang* M.)
 Am. 703A *koč lē nīn*: we shall cook supper (*šiv* F.)
 720 *dō darsōkā thāvēt*: puts two kerchiefs (*darsōk* F.)
 Bar. 730 *dā kayfē kan*: in order to make merry (*kayf* F.)

(ii) as Agent (v. also § 296 (b)),

- Ak. 544 *mirōvakay gōtī*: the man said (*mirōv*, -aka)
 533 *šinakē gōtē*: the woman said to him (*šin*, -aka)
 Am. 704A *šifārā gōlē*: the merchants said to him (*šifār* M.)

(iii) with 'oblique' sense, when governed by a preposition,

- Ak. 531 *a čydy*: to the mountain (*čyā* M.)
 533 *l filān fādē*: in such-and-such street (*fāda* F.)
 556 *gal qurbafayaki*: with a badger (*qurbala* M.)
 540 *wakō dīxā*: like thieves (*dīx* M.)
 532 *p haŋt dīnārā*: for eight dinars (*dīnār* M.)
 Am. 703 *a āfi*: to the mill (*āf* M.)
 703 *p šē šivangā*: for three guns (*šivang* F.)
 704 *š jūaki*: from a Jew (*jū*, -ak M.)
 Zx. 790 *gal makīlablā*: with the pupils (*makīlablī* M.)

and when not so governed (v. also § 301 (d)),

Ak. 540 *har biskakê*: on each curl (*bisk*, -ak F.)

Am. 705 *dā nā 'ardakî*: camped in a place ('ard, -ak M.)

(iv) following the *Izafê*,

Ak. 532 *xudānê tayrî*: owner of the bird (*tayr* M.)

534 *mālā kābrāy*: the fellow's house (*kābrā* M.)

531 *xudānê dihānê*: owner of the shop (*dihān* F.)

536 *jê garmê*: place of warmth (*garm* F.)

Am. 705 *qabilakā 'arabā*: a tribe of Arabs ('arab M.)

Bar. 730 *hākīmēt bāzērî*: governors of the city (*bāzēr* M.)

Gul. 750 *pîştî sa'ālakê*: after an hour (*sa'āl* F.)

(v) with adverbial sense (v. also § 305 (a)),

Ak. 531 *hamê fêzê*: daily (*fêz* F.)

531 *fêzakê*: one day

553 *hinda fêzā*: for some days

548 *hāvinê*: in summer (*hāvin* F.)

545 *sê lār qûnāyā*: for three or four stages (*qûnāy* F.)

Am. 703 *naqlakê*: once, at one time (*naql* F.)

Vocative

§ 262. (a) In the Vocative nouns denoting animate beings may take the following endings, with a forward shift of stress where possible:

	Sg. M.	F.	Pl. M. & F.
Sur.	-a	-ê	*-îna
Ak.	-ê	-ê	-îna
Am.-Zx.	-ê	-ê	-îmê
KK § 49 ff., BX. 20	--ê	--ê	-(î)nê

Examples: M. Sg.

Sur. 510 *bāba*: fellow!

Ak. 545 *mārê*: snake!

Ak. 561, Bar. 730 *bābê*: father!

Am. — *kuê*: son!

Bar. 742 *kêfirê*: monster!

¹ This ending also appears forming hypocoristic names (cf. § 18: (b)), e.g. *mîrê* 'Mustafa', *tamê* 'Ramazan', *simê* 'Ismail'. Cf. Nikitine's text, BSOS, III. 85.

**tatê w tamê* . . . *lêna nik boyê*: Tetu and Tamu went up to Hayu

F. Sg.

Sur. 510 *zīnē*: woman!

Ak. — *xuikē*: sister!

647 *dāykē*: mother!

(but note, *xuē* 'sister! sis!', perhaps with 'honorific' M. ending, cf. § 181 (a) fn.),

Am. — *kičē*: daughter!

Plural

Ak. — *qāḥbayna*: ye whores! (a girl to her young playmates)

Am. — *kūṭinō, kīṭinō*: boys! girls!

KK § 51 *xōṛtō, qīzō*: lads! lasses!

(b) Alternatively the uninflected noun may appear as a vocative, with a shift of stress to the first syllable where possible, e.g.

Ak. 564 *bīrā*: brother! (*bird*)

691 *dā*: mother!

Preceded by a Vocative particle, such as *yā* 'O', a singular noun is generally uninflected, e.g.

Ak. 573 *yā xalīfa*: O caliph!

but contrast,

Gul. 761 *yā dāyē*: O mother!

762 *yā xālō*: O uncle!

KK § 50 *lē qīzē, lō kōrō*: O girl! O son!

A noun qualified by any determinant takes no vocative ending, e.g.

Ak. 545 *ḥaywānē xudē*: God's creature!

A plural vocative is formed with *galī* as in Muk. (v. § 181 (a)). The noun then appears in the Oblique case, e.g.

Ak. — *galī bičākā*: children!

Am. — *galī kuṛā*: lads!

Izafe (v. § 182)

§ 263. (a) The Izafe appears in a variety of forms according to its functions. These may be classed as Individual and Generic forms. In certain dialects the Individual forms may be subdivided into Primary and Secondary forms.

All Izafe forms are realized enclitically and follow their antecedent in its uninflected form, even when it is grammatically Oblique (v. § 261 (a)).

(b) The functions of the Individual Izafe are:

- (i) to connect a noun with a qualifying word which immediately follows it, be it an attributive adjective (§ 267), or a noun or pronoun in genitive relation to it or in apposition,
- (ii) to introduce relative clauses (v. § 307 (b)).

(c) The Secondary forms appear:

- (i) following a noun qualified by an indefinite suffix *-ak* (KK § 101, BX also *-(i)n*, v. § 259 (a) fn.); in Sur. also apparently following the suffix *-aka* and the adverbial suffix *-if* (§ 305 (b)),
- (ii) when a noun is qualified by two or more adjectives, joining the second and subsequent adjectives to the first (examples, KK § 100, Cukerman, op. cit., p. 136, BX 4). See also fn. 2, p. 206

Otherwise the Primary forms are used.

(d) The Generic Izafe serves to connect certain adjectives and nouns, particularly those forming part of a compound verb (§ 299), with their complements. It occurs also in certain compound prepositions (§ 303).

§ 264. The Izafe has the following forms:

(a) Primary

	Sg. M.	F.	Pl. M. & F.
Sur.	-ê	-â	-ê
All dialects, Ak.-Zx.	-ê	-â	-ê(t) ¹ (Ak. [-e:t'], Am., &c. [-e:t])
KK §§ 98, 99	-ê	-â	-ê(d)
BX 1	-ê	-â	-ê(n) ²

¹ In literary texts from this area the Pl. forms *-ê di*, *-ê ti* occur, i.e. with a separate 'plural' particle (cf. § 183 (c)), e.g. *Ahmadê Xani*, 'Nûbâr' (dated A.H. 1094 = A.D. 1682), line 5.

کو بونه پیری دی

**kô bôna payrawê di di*: who became his followers

Cl. Huart, 'Prêtre canonique musulmane', *Jl. As.* 1895, xciii, dated c. A.D. 1780, metre *ramâl-i maqfûr* [contd. p. 159]

The M. Sg. and Pl. Izafe forms *-ē*, *-ēt* normally coalesce with preceding *a*, *ē*, e.g.

Sur. 511 *kōsē dika*: the other swindler (*kōsa*)

Ak. 537 *albīsē xō*: his own clothes (*albīsa*)

545 *jē garmē*: place of warmth (*jē*)

542 *darafēt 'usmānī*: the stairs of heaven (*darafsa*)

Gul. 750 *pē xwa, pē wō*: his foot (*pē*)

but contrast,

Ak. 690 *ṣayē wō*: his dog (*ṣa*)

Note also

Am. 711A *birē min*: my brother (*birā*)

The F. Sg. Izafe *-ā* coalesces with preceding *a*, *ā*, e.g.

Ak. — *ōdā hanē*: yonder room (*ōda*)

588 *čā xō*: his own tea (*čā*)

Am. 709A *qahwā xō*: his own coffee (*qahwa*)

Note also

Ak. 565 *xwā wō*: his salt (*xwē*)

(b) Examples of the Primary Izafe with:

(i) a qualifying adjective,

Sur. 514 *harē dēna*: the grey ass (*har* M.)

514 *har dā gāē dī*: both the other oxen (*gā* M.)

verse 3.

— — — — —
گر چه دی اینی تو فرضی تیغو

**gar ti jih dā ini tō fargē ti xō*: if thou wilt carry out thy duties
cf. verse 4.

دا به نژم کینه فرضیت واجبہ

**dā bēbāšim kina fargēt adjība*: let me say which are the obligatory duties

In all dialects the form *-ā*, with no trace of the particle, may appear occasionally in the Plural.

**Malās fīrī* ('*Dīnād*', ed. Hartmann, Berlin, 1904) has, beside **-ān*, the form **-ān di*, e.g. p. 217, metre *hasaj-i anrah-i mahfūf-i maqqūr*

— — — — —
چشمین د بیه را د کرن فته و خونان

**čalunēn di siyah fā dīkīrīn fītna u xūndn*: black eyes caused riot and bloodshed

نادم بشمالین بشالین د بهشتی

**nādam bi šamālin, bi šapālin di būhīst*: I shall not give (up your beauties, &c.) for the paradisaic lights and beauties

See Kurdoev, KK § 100, note 2.

- Ak. 533 *bîrâê mâxtirê*: the eldest brother (*bîrâ* M.)
 548 *îdê hanê*: yonder bough (*îd* M.)
 537 *xanfarâ pişik-zêr*: gold-studded dagger (*xanfar* F.)
 Am. 716 *haywânêti kîci*: wild animals (*haywân* M.)

(ii) a noun or pronoun in genitive relation,

- Ak. 539 *kuî min*: my son (*kuî* M.)
 531 *dâykâ xê*: his own mother (*dâyk* F.)
 537 *xanfarêti xê*: your own daggers (*xanfar* F.)
 Am. 703 *karê wê*: their ass (*kar* M.)
 712A *zînâ hârônafîdî*: Harun al-Rashid's wife (*zîn* F.)
 704 *lîfârêti baydâ*: the merchants of Baghdad (*lîfâr* M.)
 Bar. 727 *kuîti xwê*: his own sons
 736 *kuî kîma*: whose son am I?
 Zx. 779 *filêti xê*: my own clothes (*filê* Pl.)

(c) Secondary

	Sg. M.	F.	Pl. M. & F.
Sur.	-î	-ê	
Ak., Am.	-ê	-ê (= Primary, v. (a) above)	
Bar.	-î	-ê	
Gul.	-î	-a/-ê	
Zx.	-î/-ê	-î/-a/-ê	
KK § 100 ff., BX 20	-î	-a	-a

Examples:

- Sur. 525 *mirêwakî faqîrim*: I am a poor man (*mirêw* M.)
 512 *fiwakê xêti*: a nice soup (*fiw* F.)
 517 *mirêwakay xwêrê*: the lower man (*-aka*)
 519 *tanakafî dîfîwê*: the tin of syrup also (*tanaka* M.,
 -(î)î)
 Ak. 531 *îyirakê zêr*: a gold bird (*îyir* M.)
 548 *dîrakê mîzin*: a big tree (*dîr* F.)
 Am. 722 *'ardakê hân*: a cool place (*'ard* M.)
 718 *qazîyakê kavî*: an ancient district (*qazî* F.)
 Bar. 728 *êlîmakî wân*: an orphan from among them (*êlîm* M.)
 Gul. — *xêxê fîhakî xwêti*: Zakbo is a pleasant place (*fîh* M.)
 767 *î kûlîlîkaka mazîndâ*: in a big rissole (*kûlîlîk* F.)
 Zx. — *mirêwakî mazî*: a big man (*mirêw* M.)
 — *mîzaka bîzûk*: a small table (*mîz* F.)

- 774 *jārak() dī* } again, another time (*jār* F.)
 781 *jārakī dī* }
 773 *pirakī bilind*: a high bridge (*pir* F.)
 775 *kičikakī dalāl*: a beautiful girl (*kičik* F.)

(d) Generic (see also § 303)

All dialects Sur.-Zx., KK, BX -*i*, e.g.

- Ak. 558 *dē gūzī ta kam*: I shall call thee (*gūz* *kirin*)
 602 *nēzikī hākimī bō*: was near the judge (*nēzik*)
 603 *taslimī . . . waxirī bika*: give it to the vizier (*taslim*
kirin)

Am. *passim*, *pišī hingī*: after that, afterwards (*pišī* F.)

714 *libalī gurg*: such as wolves (*libal*)

Following a noun, &c., ending in *i* no Izafe is realized, e.g.

- Ak. 558 *dē hēma hārī ta*: I shall come to thy aid (*hārī*)
 567 *tažī xēf*: full of gold (*tažī*)
 608 *mēvānī min kirdō*: had entertained me (*mēvānī* (F.)
kirin)

(e) A noun in partitive relation to another generally appears without the Izafe, e.g.

- Sur. 514 *hindak pāra*: a little money
 Ak. 544 *hindak āx*: a little soil
 Am. 709 *hindak aw zibil*: a little of that dung

Contrast the following forms with the (1 Secondary) Izafe (cf. § 184 (c)).¹

- Ak. 531 *pištēkē dārā*: a load of sticks (*pištī* M.)
 533 *dastakē jilket xīnā*: a suit of women's clothes (*dasta*
M.)

§ 265. The nominal suffixes²

A. -*akā* (§ 258 (b)), C. -*ak* (§ 259), and D. -*d* (§ 258 (c)) are mutually exclusive. This is equally the case with the endings

E. oblique case -*ī*, -*ē*, -*ā* (§ 261),
 and F. Izafe -*ē*, -*ā*, -*ēt*; -*ī*, -*a* (§ 264).

¹ See now Kurdoev, *Numerationnye slova*, p. 34, where a distinction is made between the numerative use of certain words, e.g. *ravdāhak hasp* 'a (one) herd of horses', and the attributive use with the Izafe, e.g. *ravdākā haspā* 'a herd of horses, a horse-herd'.

² Cf. §§ 178, 187. Note that Sul., &c., B -*da* is transferred to the position of Ak., &c., E -*d*, while Ak., &c., F -*ēt* replaces Sul., &c., BF -*dni*.

A representative of the group A C D always precedes E or F in order of suffixation to a noun. Thus the possibilities of combination are:

A	Sur. 508	<i>mirōwaka</i> : the man
AE	Ak. 533	<i>gōta āinakē</i> : said to the woman
AF	Sur. 517	<i>mirōwakay xwārē</i> : the lower man
C	Sur. 508	<i>āinak ā mirōwak</i> : a woman and a man
CE	Ak. 540	<i>har biskakē</i> : on each curl
	Ak. 592	<i>čār pēnʃ dafʹakā</i> : four or five times
CF	Am. 718	<i>qaxāyakā kavn</i> : an ancient district
D	Zx. 775	<i>av pīra</i> : this bridge
DE	Ak. 531	<i>vī fayray nākīf</i> : won't you buy this bird?
E	Sur. 507	<i>āxē dē kōrin</i> : they will dig up earth
F	Ak. 531	<i>dāykā xō</i> : his own mother
	Am. 716	<i>haywōdnēt kēf</i> : wild animals

Demonstrative Izafe

§ 266. (a) The Demonstrative Izafe has the following main functions. It appears:

- (i) before a noun or pronoun, giving the group a possessive sense,
- (ii) before an adjective, to which it gives substantive sense (often, however, untranslatable),
- (iii) before certain verbal forms, materially altering the sense (v. §§ 309, 313).

It may, moreover, alternate with the Individual Izafe (§ 263 (b)), particularly when a qualifying adjective, noun, or phrase is separated from the word qualified by any word other than a *like* qualifier.

(b) The Demonstrative Izafe has the following forms:

	Sg. M.	F.	Pl. M. & F.
Sur.	<i>y/wē</i>	<i>y/wā</i>	<i>y/wē</i>
All dialects, Ak.-Gul.	<i>y/wē</i>	<i>y/wā</i>	<i>y/wēt</i>
Zx.	<i>y/wē</i>	<i>y/wē, y/wā</i>	<i>y/wēt</i>
KK § 126	<i>yē</i>	<i>yā</i>	<i>yēd</i>
BX 4	<i>yē</i>	<i>yā</i>	<i>yēn</i>

With the forms *yē*, &c., the initial *y* is frequently not realized, particularly when following a consonant, and the remaining vowel

is then (except occasionally in Zx., Fem.) formally identical with the Individual Izafe (§ 264 (a)).

Either the form *yē* or the Plural Izafo particle *t* (v. § 264 (a) fn.) may appear alone for the combined form *yēt*.

The forms *wē*, &c., appear in all dialects with the demonstrative adjective *hanē*, &c. (§ 271 (b)), and in Gul., Zx. particularly with the verb *habīn* (cf. § 293).

(c) Examples:

(i) with nouns, &c.,

Ak. — *av kitēba yēt minin*: these books are mine

— *yā bāšimī māxtira*: Hashim's (daughter) is bigger

(ii) with adjectives,

Sur. 517 *maz yē xwārē*: in front of the lower one

530 *gōriā yē dī*: the other one's turn

Ak. 534 *ava yēt xōšīn, yēt naxōš dē l dū hēn*: these are the pleasant things, the unpleasant ones will come later

562 *yē dwē . . . yē sēyē*: the second . . . third one

596 *šinkēt wān t xirāb bin*: their wives are bad ones

622 *gōta yē fala*: said to the Christian fellow

Am. 722 *hačika yē dīa*: as for the other one

705 *mišk t miša bōn*: mice were numerous

713 *yā garm bō*: it was (a) warm (one)

(iii) qualifier separated from qualified,

Ak. — *lēwā min yā xārē*: my lower lip

685 *wakilē xō yē 'ām*: his own general agent

697 *kučē wē awwil* (**wē yē awwil*): her first son

Gul. 751 *birāēt wē yēt dīka*: his other brothers

752 *mi kičā xō yā dāē, yā mazin*: I have given him my eldest daughter

[contrast,

Zx. — *min kičā xō yā mazin yē dāē*: ditto]

Zx. — *birāyak min yē mašfir š ef*: a brother of mine older than this one

ADJECTIVES

§ 267. (a) All adjectives, except when used substantively, are inflexible. Attributive adjectives normally follow the noun they qualify with the Izafe (§ 263 (b)). An attributive adjective separated

from the noun it qualifies is normally preceded by the Demonstrative Izafe (§ 266 (c) (iii)).

(b) In Am., Zx. a noun qualifying another, be it in genitive relation or in apposition to the qualified noun, may appear in the form of a 'transient' attributive adjective with the suffix *-ē*. Reliable examples are, however, rare.

- Am. — *mēlā hingvīnē*: honey bee [contrast
 Ak. — *mēlā hingvīnī*: honey bee (*hingvīn* M.)]
 Am. 719 *dargahē zēbārē*: the Zebar Gate
 Zx. — *ḡarmē niḡhē*: the Great Bear (lit. 'Noah's body')
 776 *dārakē banōkē*: a terebinth tree (*banōk*)
 777 *jōā ḡāzim bagē*: the Hazim Beg channel [contrast
 — *jōā bagī*: the Beg's channel (*bag* M.)]
 787 *līvā silēmānīē*: in Suleimaniye province

Comparison

§ 268. (a) The morpheme Sur., Ak. *-tir*, Am., &c., *-tir* (i.e. all dialects [-t'ir]) added to the simple adjectival form yields the comparative adjective. This behaves exactly as a positive adjective.

The following irregular comparatives occur:

- Ak. — *māx/stir* 'bigger' < *māzin* 'big'
 Zx., &c. *maṡtir* < *māzin*
 Ak. — *čētir* 'better' : *bāf* 'good'

(b) The morpheme *-ē* added to the comparative adjective forms a superlative adjective (v. also § 274 (a)). This also follows the qualified noun with the Izafe, like a positive adjective, e.g.

- Ak. 533 *birāf māxtirē*: the eldest brother
 598 *birāf giḡhatirē*: the younger brother (of two)

Note. In Rwn. *har* yields a type of superlative with a following adjective to which it is joined by the Secondary Izafe (cf. § 190 (c)), e.g.

- Rwn. — *dawlatā hara dēmōkrātī*: the most democratic state
 — *zāf . . . ē harī fulāt*: the most daring child

Certain adjectives

§ 269. (a) Adjectives of the following categories immediately precede the noun they qualify:

- (i) the demonstrative adjectives *av*, *aw* (§ 270),
 (ii) cardinal numbers (§ 273),
 (iii) the following interrogative and indefinite adjectives,

ĕi, Sur. *ĕi* 'what, whatever'

Ak. *ĕu*, Am. *ĕi* (KK *lō*, BX 52 *tu*) 'any'

ĕand 'some, how much'

filān 'such-and-such'

galak 'many'

hamō, *hamī*, Sur. *hama*, *hamō* 'all'

(*av*)*hinda* 'so much'

har 'whatever'

Ak. *kī*, Am., &c., *kī* 'what, which' (Obl. also *kē*, perhaps influenced by the equivalent pronoun, § 278 (a))

but not

dī(ka) 'other'

Ak. *wa(tuv)*, Zx. *waṣā* 'such'

(b) Examples. Interrogative and indefinite adjectives:

Sur. 510 *az hama fōṣē . . . akītim*: every day I buy . . .

512 *ĕi fīw lē nāya*: what supper has been cooked

Ak. 542 *ĕu dangā naka*: make no noises

596 *ĕand daṣā xīnā min lō*: how many times did my wife go?

589 *kuṣē filān kaṣī*: the son of such-and-such person

— *galak mirōv hātin*: many men came

550 *hamō sālē*: every year

597 *l hinda ganīmay*: with so much wheat (v. § 258 (c))

578 *har kasakē xāin bīl*: whatever person be treacherous

607 *aw kī faṣīra*: which poor man is that?

593 *l kī mamlakattī*: in what country

596 *l xamānē kī ḥākīmīdā* } in the time of what ruler

582 *l xamānē kē ḥākīmī* }

583 *l kē maḥalē*: in which quarter?

Am. 719 *ĕi mināra . . . nīnin*: there are no minarets

710 *ĕi tīf nāwā nabōn*: there was nothing inside them

711A *ĕand xalkē baydā*: so many people of Baghdad

706A *hamī mīlk fawīn*: all the mice fled

725 *har kaṣ . . . naṣētīn*: whatever person cannot . . .

711 *ṣ kī dirkē*: from what place?

where the forms in [square brackets] represent the appropriate nominal inflexion.

From this it is possible to deduce the following basic paradigm for the adjective alone:

	'this'	'that'
Dir. Sg. & Pl.	<i>av</i> . . . - <i>a</i>	<i>aw</i>
Obl. Sg. M.	(<i>a</i>) <i>vī</i> . . . - <i>a</i>	(<i>a</i>) <i>vī</i>
Sg. F.	(<i>a</i>) <i>vē</i> . . . - <i>a</i>	(<i>a</i>) <i>vē</i>
Pl. M. & F.	(<i>a</i>) <i>vā(n)</i> . . . - <i>a</i>	(<i>a</i>) <i>vā(n)</i>

The fuller Obl. forms *avī*, &c., appear mainly following a pause.

(b) Examples:

(i) *av*, &c.

- Ak. 547 *av mārā*: this snake (*mār* M.)
 612 *av māšā ōi tkañ*: what are these fishes doing?
 (*māš* M.)
 596 *ī vī fīstīay zyātīr*: other than this watermelon
 (*fīstī* M.)
 531 *vī fīayray nāhīfī*: won't you buy this bird? (*fīayr* M.)
 — *ī vē ōdē*: in this room (*ōda* F.)
 573 *vē hālē*: in this case (*hāl* F.)
 622 *matōfōdā vā pārā*: what is present of these monies
 (*pārā* Pl.)
 622 *vān pārā* . . . *bīdava*: take these monies back
 Am. 703 *av kara*: this ass (*kār* M.)
 706 *dē vī haywōdnī fīrōfī*: wilt thou sell this animal?
 (*haywōdn* M.)
 706A *ē vē dīrkā*: from this place (*dīrk* F.)
 717 *vē fāra*: this time (*fār* F.)
 706 *dē vā mīlkā dar ēxim*: I shall drive out these mice
 (*mīlk* M.)
 Bar. 730 *av bāšēra*: this town (*bāšēr* M.)
 726 *ī vī gundī*: in this village (*gund* M.)
 726 *sarē vē škaffē*: above this cave (*škaff* F.)
 Zx. 775 *av fīra*: this bridge (*fīr* F.)

(ii) *aw*, &c.

- Sur. 510 *aw kōsay gōtē*: that swindler said to her (*kōsa* M.)
 515 *tabī aw karay law mīrōway har bīstīnī*: thou must
 certainly take this ass from this man

- Ak. — *kā aw kitēb*: where are those books?
 571 *aw firikē ma*: that partner of ours (*firik* M./F.)
 539 *hākimē wī jēy*: ruler of that place (*jē* M.)
 544 *awl mirōvī tī kir*: what did that man do? (*mirōv* M.)
 587 *lō bō wē maḥalē*: went to that quarter (*maḥala* F.)
 561 *wān dixā ma'yan kir*: those thieves decided (*dix* M.)
 618 *l wā sī hizār fuplēt ḥarām*: than those thirty
 thousand illicit rupees
 Am. 706 *aw mirōv*: those men
 706 *xalkē wī gundī*: people of that village (*gund* M.)
 706A *wē dirkē*: in that place (*dirk* F.)
 709 *awā tīfārā dīr*: those merchants saw (*tīfār* M.)
 710 *gāzī kira wā mirōvā*: he called to those men

§ 271. (a) All dialects have a further, inflexible, demonstrative adjective, Sur. *hē*, Ak.-Zx. *ha(nē)*, Bar. *hana* (KK § 120 *hān*, BX 45 *hā*, *Xālidī*, s.v. *awēhā*, *hā(nē)*) 'yonder, here'. It either follows the noun or pronoun it qualifies with the Izafe, or may appear independently with the Demonstrative Izafe, e.g.

- Ak. — *l ōdā hanē*: in that room (yonder) (*ōda* F.)
 546 *a lālī binadārā hanē*: to that tree-trunk (*binadār* F.)
 572 *qurbānī faqīrē hanē*: the sacrifice of that beggar
 (*faqīr* M.)
 549 *yā hanē lēlaka*: yonder (thing) is a cow (*lēl* F.)
 551 *yē' hanē fīfaka'*: see! yonder is a fox (*fīfā* M.)

It frequently appears in conjunction with either of the inflecting demonstrative adjectives (§ 270), e.g.

- Ak. 548 *av fāē hanē*: this (here) bough (*fā* M.)
 Bar. 726 *sarē wē lkafā hana*: above that cave yonder (*lkafā* F.)
 Zx. 773 *av pīrā hanē*: this (here) bridge (*pīr* F.)

(b) With this adjective the forms *wē*, *wō*, *wēt* of the Demonstrative Izafe (§ 266 (b)) commonly occur, forming in effect a demonstrative pronoun, e.g.

- Ak., Am. — *wē hanē āya*: what is yonder thing?
 — *wēt hanē āna*: what are those?
 Am. 719 *nīvakā wē hanē fādāna*: in the middle of that (place)
 there are roads
 Gul. — *wēt ha yēt minin*: those are mine

' *yē* [je:] with 'emphatic' lengthening of the vowel and glottal stop.

¹ Sur., Ak., Shn. *p*, *t*, *k* always aspirated, Am.—Zx. *p*, *t*, *k* unaspirated.Sur., Shn. *ō*, *ū* [o:, u:]; Ak.—Zx. *ō*, *ū* [u:, y:].² — signifies 'the same form as that noted to the left'.

§ 273. (a) Cardinal numbers immediately precede the noun they qualify (v. § 269).

A cardinal used substantively, or a noun qualified by a cardinal number, takes the Plural Obl. ending *-ā(n)* (§ 261 (b)) when appropriate, e.g.

Direct

Ak. 545 *ava sē čār šōž-a*: this is three or four days

598 *sē čār dirham habin*: if there be three or four dirhams

Am. 705 *sē mirōv šā wasfyān*: three men were standing

Oblique

Sur. 510 *ax dē dūā dama tū*: I shall give thee two

Ak. 565 *sēā piltiēt xō dā girtin*: three put down their loads
(v. § 296 (b))

545 *sē ēār gūnāyā*: for three or four stages

592 *ēār pēn] daf'akā*: for four or five times (v. § 259 (c))

Am. 704 *šāš šindōqā lē ha*: make six chests!

(b) With certain numbers (generally 'round' numbers—tens, hundreds, &c.) the qualified noun may take the ending -ī, giving the sense of 'about . . .',¹ e.g.

Ak. 583 *amrē wī gāstīa gad ô cil sālī*: his age has reached about 140 years

Ordinal

§ 274. (a) Ordinal numbers are formed from the cardinals by the addition of the morpheme -ē (cf. Rdz. -am-ē § 195 (b), also § 268 (b)), e.g.

Ak., &c., *ēārē* 'fourth', *pēnjē* 'fifth', *nōjē* 'ninetieth'

The final *a* of the numbers 11-19 is absorbed by the ending -ē, thus:

sēzē 'thirteenth', *hašē* 'eighteenth'

Note the following irregular forms:

	Sur.	Ak.	Am., Bar.	Zx., Gul.	Shn.
1st	<i>hawwāl</i>	<i>awwāl(i)</i>	<i>awwāl</i>	<i>awwāl</i>	<i>*awāl</i>
2nd	<i>dawē</i>	<i>dawē</i>	<i>dawē</i>	<i>dawē</i>	<i>dawē</i>
3rd	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>
30th	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>	<i>ayē</i>
50th		<i>pēnjahē</i>	<i>pēnjahē</i>	<i>pēnjā</i> Gul. <i>pēnjāhē</i>	
70th		<i>haftayē</i>		<i>haftā</i> Gul. <i>haftā</i>	<i>haftā</i>

(b) Ordinals follow the noun they qualify with the Izafe. With large numbers, only the last member takes the ordinal ending, e.g.

Zx. 787 *sālā hizār ô nahyad ô pēnfi ô dōē*: in 1952 (lit. 'in the 1950-and-second year')

¹ See Cukerman, op. cit. (i), p. 114, where many Rwn. examples.

PRONOUNS

Personal

§ 275. (a) All dialects present a system of six personal pronouns, each with Direct and Oblique case forms. In all but Sur., however, the pronoun of the 3rd person Sg. and Pl. is formally identical with the *remote* demonstrative pronoun and is described as such, § 277.

Suffix forms occur only in Sur. They are:

Sg. -*im*, -*it*, -*i*; Pl. -*in* [sic], -*ū*, -*yān* (cf. § 197 (a))

The independent forms are:

		Sur. ⁽¹⁾	Ak.	Am., Bar.	Zx., Gul. ⁽²⁾	Shn.
Direct						
Sg.	1	<i>ax</i>	<i>ax</i> ⁽³⁾	<i>ax</i> ⁽¹⁾	<i>ax</i>	<i>ax</i>
	2	<i>atū</i>	(a) <i>tō</i>	<i>tō</i>	<i>tō</i>	<i>tū</i>
	3	<i>aw</i>				
Pl.	1	<i>amd</i> ⁽⁴⁾	<i>am</i>	<i>am</i>	<i>am</i>	<i>am</i>
	2	<i>angō</i>	<i>hu/ing</i>	<i>hing</i>	<i>hūn</i>	<i>hūn</i>
	3	<i>aw(ān)</i>				
Oblique						
Sg.	1	(a) <i>min</i>	(a) <i>min</i>	<i>mī(n)</i>	<i>mī(n)</i>	<i>min</i>
	2	(a) <i>tū</i>	(a) <i>ta</i>	<i>ta</i>	<i>ta</i>	<i>ta</i>
	3	(a) <i>wī</i>				
Pl.	1	(a) <i>ma</i>	(a) <i>ma</i>	<i>mā</i>	<i>ma</i>	<i>ma</i>
	2	(a) <i>ngō</i>	(hu <i>i</i>) <i>ngō</i>	(hi) <i>nga</i> , Bar. <i>hawā</i>	<i>wa</i>	<i>wā</i> [sic]
	3	(a) <i>wān</i>				

NOTES:

(1) See § 272, fn. 1, on the realization of *t* and *ō*, *ū*.

(2) Cf. KK § 118, BX 24, Dir. *ax*, *tu* (KK *tō*), *am*, *hūn* (BX *hōn*), Obl. *min*, *ta*, *ma*, *wa*.

(3) In conjunction with the adverbial affix Ak. -*ī*, and Am., &c., *āī* (§ 305 (b)) the 1st Sg. Direct pronoun appears as Ak. *ayī*, Am., &c., *āīī*, e.g.

Ak. 542 *ayī dē* . . . *kam*: I too shall do . . .

561 *ayī dixim*: I too am a thief

- Ak. 697 *aži dē hēm* [sic] } I too shall come
 Am. 704 *aži dē . . . hēm* }
 Gul. 756 *aži dōm*: I too went
 Zx. 779 *aži dē xō dōwēzim*: I too shall throw myself in

(4) Sur. *ā* being [a:] (v. § 106), and not [ā:], the example Sur. 508 *amā fūsin* 'we are naked' may be **ama a fūsin* (v. fn. 1, p. 206). But Sur. — *amā dē dīna ākrē* 'we are going to Akre' cannot be so explained.

(b) The personal pronoun forms have the same functions as the corresponding nominal case forms (§ 261 (a)).

The fuller Obl. case forms, *amin*, &c., appear principally as agent in the Passive construction (§ 296) and generally after a pause. The shorter forms, *min*, &c., appear in all functions of the oblique case.

(c) Examples:

(i) Direct

- Sur. 529 *atū la bō atirsēy*: why art thou afraid?
 522 *amay kulltin*¹: he has killed us
 518 *angō nābinin*: do you not see?
 Ak. 534 *az aḥmadē pīrikēma*: I am Ahmed (son) of the old woman
 539 *atō kīy*: who art thou?
 545 *min tō . . . Ināy*¹: I brought thee
 561 *am dīzin*: we are thieves
 559 *hung bō nāhēn*: why do you not come?
 560 *hung kīna*: who are you?
 Am. 703 *am dē bāyn*: we shall take . . .
 707 *hing āi harin*: go ye also!
 Bar. 736 *az kuḫē kēma*: whose son am I?
 Zx. 781 *aw hūn āi thin*: what is that you are doing?

(ii) Suffix

- Sur. 506 *hindārdim*¹: I sent (him)
 529 *kapi lē girt ā lēy bīrī*¹: he seized his nose and cut it off
 506 *kārinakin cē kir*¹: we built a straw-store

¹ Agent oblique (in Sur., suffix), v. passive construction, § 296.

(iii) Oblique

- Sur. 509 *nērīē tū*: thy goat
 516 *bifirōla* ma: sell it to us
 519 *la bō-ngō*: for you
 Ak. 533 *mālā min*: my house
 547 *amin . . . hal girt¹*: I picked (it) up
 533 *mālā ta*: thy house
 554 *ata . . . dirō kir¹*: thou liedst
 556 *dē ma xōt*: it will eat us
 630 *ama sūd . . . xār¹*: we swore an oath
 534 *birāē hungō*: your brother
 546 *bāpīrē-ngō*: your ancestor
 Am. 710 *daynē mi bidanava*: repay my loan
 710 *muqātālā min ō hinga*: the bond between me and
 you
 703 *kēr ma nāhēt*: it is no good to us
 704A *mā-nga lōla*: is it any affair of yours?
 Bar. 735 *mī šad dīnār . . . dā¹*: I gave 100 dinars
 727 *mīn ēlārāl dā hawa*: I gave you the signal
 Gul. 768 *nižda hāl sar* ma: a raiding party has come upon us
 749 *wasīd mīn l wa bit*: let this be my testament to you
 Zx. 78r *larma bō wa*: it is a shameful thing for you
 Shn. — *xātīrē wā*: good-bye to you!

Reflexive

§ 276. (a) The reflexive pronoun has one form, Direct and Oblique, Sur. *xō*, Ak., Am., Zx. *xō*, Bar. *xō*, *xwa*, Gul. *xwa* (KK § 122, BX 36 *xwa*). It refers always to the subject of the verb or, in the Passive construction (§ 296), to the agent, e.g.

- Ak. 531 *dā batava bō xō*: used to take it back for himself
 537 *hung xanfarēt xō . . . dā nēn*: put your daggers down
 540 *xō hižānd*: (he) shook himself
 Am. 712 *jū hāla daynē xō*: the Jew came for his debt
 Bar. 726 *qasrā xwa dā nā*: he placed his mansion
 748 *xūlkā xwa bida min*: give me your sister
 Gul. 750 *dasnīvēžā xwa lūlī*: he performed his ablutions

(b) The pronoun *xō*, &c., appears in conjunction with the

¹ Agent oblique, v. passive construction, § 296.

preposition *p*¹ (BX 32 also *bi xwa*, but KK § 122 has *xwa-xwa*) with the intensive sense 'my-, him-, &c., -self', e.g.

Ak. 531 *p xōdā ētačyāy*: he would himself go to the mountains

Am. 725 *hačika xalkē wā gundā p xōya*: as for the people of those villages themselves

Zx. 771 *i nafsē zāxō p xōdā*: in the actual (town of) Zakho itself

Demonstrative

§ 277. (a) All dialects Ak.-Zx. have two demonstrative pronouns, proximate and remote, each having Dir. and Obl. case forms.

The proximate pronoun, Ak., &c., *awa*, combines in the Dir. esse the forms of the demonstrative adjective *aw* (§ 270) and the defining suffix *-a* (§ 258 (c)). The remote pronoun *aw* is formally identical with the corresponding adjective (§ 270) and also serves as 3rd Sg. and Pl. personal pronoun (v. § 275 (a)).

Sur. has the same forms as Arb., &c. (v. § 202 (a)), viz. *awa* 'this', *aw* 'that (absent)', and, with the inflexible demonstrative adjective *hē* (§ 271), *awēhē* 'that yonder'.

The forms attested are:

	Sur.	Ak., &c.	Cf. KK §§ 120, 134	BX 45	
Direct					
Sg.	<i>awa</i>	} <i>awa</i>	<i>aw(ā)</i>	} <i>aw</i>	'this'
Pl.	?		(<i>a</i>) <i>wānā</i>		
Oblique					
Sg. M.	<i>way</i>	(<i>a</i>) <i>wī</i>	(<i>a</i>) <i>wī</i>	<i>wī</i>	
F.	?	<i>wē</i>	(<i>a</i>) <i>wē</i>	<i>wē</i>	
Pl.	?	<i>wā(na)</i>	(<i>a</i>) <i>wānā</i>	<i>wān</i>	
Direct					
Sg.	<i>aw(ēhē)</i>	} <i>aw</i>	<i>aw(ā)</i>	} <i>aw</i>	'that' 'he'
Pl.	?		(<i>a</i>) <i>wānā</i>		
Oblique					
Sg. M.		(<i>a</i>) <i>wī</i>	(<i>a</i>) <i>wī</i>	<i>wī</i>	
F.		<i>wē</i>	(<i>a</i>) <i>wē</i>	<i>wē</i>	
Pl.		(<i>a</i>) <i>wā(n)</i> , Zx. <i>wānā</i>	(<i>a</i>) <i>wānā</i>	<i>wān</i>	

¹ Cf. Arb. *ba xō*, with the same sense. The Ak., &c., form is often indistinguishable from *bō xō* > *bū xō* 'for himself', &c., v. § 148.

The fuller Oblique forms, *avf*, &c., appear principally as agent in the Passive construction (§ 296) and generally after a pause.

(b) Examples:

(i) Direct

Sur. — *awēhē čiya*: what is that?

524 *awa čiya*: what is this?

Ak. 591 *ava yē xirāba*: this one is bad

541 *aw kīa*: who is that?

591 *aw birava*¹: that one was taken back

535 *aw taḥayir mān*: they were amazed

Am. 710 *ava ma čī kīr*¹: what is this we have done?

703 *aw šā bōn*: they got up

710 *aw nīna*: is it not that?

Bar. 726 *aw šī*: he too

(ii) Oblique

Sur. — *xatāē way bā*: it was this one's fault

Ak. 591 *vī bibava*: take this one back

558 *ax . . . vāna nāxōm*: I shall not eat these

565 *awī čī kīr*¹: what did he do?

534 *birāēt wī*: his brothers

549 *lālī wē*: next to her

535 *birāē wā*: their brother

536 *gōta wān*¹: said to them

537 *awān gōtē*¹: they said to him

537 *awā čī kīr*¹: what did they do?

Am. 709 *hing dē . . . awī danav min*: you will give me that back

703 *karē wā*: their donkey

706 *awā gōlē*¹: they said to him . . .

Bar. 743 *awī šīrak gīr*¹: he seized a sword

726 *bō wān*: for them

Gul. 760 *birāē wē hāl*: her brother came

749 *bābē wān mir*: their father died

Zx. 772 *lōlē wānā ataya*: this is their work

Interrogative

§ 278. (a) The following interrogative pronouns, and related adverbs, occur (cf. adjectives, § 269 (a) (iii)):

¹ Passive construction, v. § 296.

çi (*çi* only in pause, and in the fixed adverb *bô çi* 'why?'), Oblique (rare) *çê*; Sur. *çi* 'what?'

çand, Obl. Sur. *çandî/i*, Ak., &c., *çandê* 'how much?'

çituv (Sur. *kā*, Gul. ? *kū*, Am., &c., *çawê*, KK § 367 *çitê*, *çawê*) 'how?'

kî, Obl. *kê* (Am., &c., *kî*, *kê*) 'who?'

kangi (KK § 367 *kangê*) 'when?'

Am. *kûn* (KK § 141 *kûn*, BX 51 *kîzik*) 'which?'

Examples:

- Sur. — *çû xwêrdê*¹: what did you eat?
 520 *kû bû*: how was it?
 Ak. 537 *awê çi kirê*²: what did they do?
 560 *hûng çîna*: what are you?
 561 *atê çi txêntê*: what dost thou know?
 667 *bar çê*: for what (reason)?
 Ak. 531, Am. 706 *p çandê*: for how much?
 Ak. 595 *çituv bô*: how was it?
 539 *atê kîy*: who art thou?
 564 *kî kuşê kêya*: who is son of whom?
 546 *lâlî kê*: to whom?
 — *kangi dê hêt*: when will he come?
 Am. 711 *ma çi kirê*: what have we done?
 706A *çiya*: what is it?
 — *kîna*: who are we/you/they?
 — *awa kê dâ nê*³: who put this down?
 712 *çêwê fê . . . bibat*: how can the Jew take . . . ?
 Bar. 736 *ax kuşê kêma*: whose son am I?
 Gul. 756 *Ku lê hêlîn*: how have they fared?
 Zx. 774 *Kê kuşîn*: whom should we kill?

(b) The form *kê(nê)*, Am., &c., *kê(nê)*⁴ contains the sense of a verb, 'where is, are . . .?', e.g.

¹ As an indefinite pronoun *çi* has an obl. pl. form *çê*,

Ak. 636 *çê ax bêkîma ta*: whatever (things) I may say to you

² Passive construction, v. § 296.

³ The same form has another, seemingly untranslatable, use, e.g.

Ak. 639 *kê bîxêrîn çi haya, çi nîa*: let us go and see what there is and what there is not

Am. 717 *kînê dê tê fî l ma hoy am t bîxêrîn*: (well), whatever thou wilt do to us we are ready

Ak. 613 *kānē aw māsi*: where are those fish?

Bar. 747 *kā qōdīk*: where is the box?

Gul. 764 *kā xālē min*: where is my uncle?

The following forms are formally Oblique and may take a preposition:

Ak. *kērē, kē(n)darē* (< *kē darē* 'what place', cf. § 89 (b)),

Am. *kīrē* (: *kī dirkē*) 'where?'

Ak. *kēva, Zx. kūva* 'whither?'

Examples:

Ak. 645 *dē kēva cī*: whither art thou going?

Am. 711A *š kīrē*: from where, whence?

Zx. 771 *zāxō tkavita kūva*: where does Zakho lie?

VERBS

§ 279. The verb has two simple tenses, namely Present and Past, formed from the present and past stems (§ 280) respectively.

The two simple tenses are modified by various modal affixes and particles (§ 281) to give a system in which distinctions of both tense and mood are made.

The past stem and past Participle (§ 288) combine with tense forms of the substantive verb, the only auxiliary in this function, to form further, compound, tenses.

The full verbal system is summarized at § 292.

Stems

§ 280. The simple tenses are formed from the present and past stems of the verb.

Verbs are normally quoted in the form of the infinitive verbal noun, ending in the morpheme *-(i)n* (v. § 205 (a)). The form of the past stem is that of the infinitive less this morpheme and is thus regularly predictable from the infinitive, e.g.

<i>lōn</i> 'go'	: <i>lō-</i>
<i>hātīn</i> 'come'	: <i>hāt-</i>
<i>kirin</i> 'do'	: <i>kir-</i> , &c.

The present stem is not always predictable from the form of the past stem or infinitive, or vice versa. The following empirical

rules may be stated, but exceptions and irregularities are numerous and vary according to the dialect.

(i) When the past stem ends in *-î*, or, if the verb is transitive and polysyllabic, in *-â*, then the form of the present stem is normally that of the past stem less this vowel, e.g.

Intransitive	<i>larîî-</i> ¹	: <i>larî-</i>	'tremble'
	<i>qawmî-</i>	: <i>qawm-</i>	'happen'
	<i>xivîî-</i>	: <i>xivî-</i>	'return'
(but note,	<i>gîrî-</i>	: <i>gîrî-</i>	'weep')
Transitive	<i>bîî-</i>	: <i>bî-</i>	'cut'
	<i>kîî-</i>	: <i>kî-</i>	'buy'
	<i>nâî-</i>	: <i>nâ-</i>	'know, recognize'
	<i>pîrî-</i>	: <i>pî-</i>	'ask'
	<i>înd-</i>	: <i>î-</i>	'bring'
	<i>kôlâ-</i>	: <i>kôl-</i>	'carve'
	<i>îlâ-</i>	: <i>îl-</i>	'knead'

(ii) When the past stem ends in *-â* and the verb is either intransitive, or transitive and monosyllabic, the present stem normally ends in *-ê*, e.g.

Intransitive	<i>lêryâ-</i>	: <i>lêryê-</i>	'graze'
	<i>dîryâ-</i>	: <i>dîryê-</i>	'tear'
	<i>gafyâ-</i>	: <i>gafyê-</i>	'go about'
	<i>fîşyâ-</i>	: <i>fîşyê-</i>	'pour'
	<i>xâ-</i>	: <i>xê-</i>	'give birth'
(but note,	<i>lamyâ-</i>	: <i>lam-</i>	'bend'
	<i>halyâ-</i>	: <i>hal-</i>	'melt'
	<i>tîrşyâ-</i>	: <i>tîrş-</i>	'be afraid'
	<i>wêrd-</i>	: <i>wêr-</i>	'dare', &c.)
Transitive	<i>nâ-</i>	: <i>nê-</i> , Am. <i>n-</i>	'put'
	<i>îyâ-</i>	: <i>î-</i>	'be able'

(iii) When the past stem ends in *-ô*, *-û* the present stem is normally identical with it, e.g.

Transitive	<i>gurô-</i>	: <i>gurô-</i>	'flay'
	<i>dîrû-</i>	: <i>dîrû-</i>	'sew; reap'
	<i>hurû-</i>	: <i>hurû-</i>	'whet'
	<i>fû-</i>	: <i>fû-</i>	'chew'

¹ All forms are Ak. unless otherwise stated.

(but note,

Intransitive	<i>bô-</i>	: <i>b-</i>	'be'
	<i>čô-</i>	: <i>č-</i>	'go'

(iv) When the past stem ends in *-t*, *-d* preceded by a voiced consonant the form of the present stem is normally that of the past stem less the dental stop, e.g.

Intransitive	<i>ħafimt-</i>	: <i>ħafim-</i>	'be still'
	<i>warimt-</i>	: <i>warim-</i>	'swell'
Transitive	<i>girt-</i>	: <i>gir-</i>	'hold'
	<i>simt-</i>	: <i>sim-</i>	'bore, pierce'
(note,	<i>xund-</i>	: <i>xûn-</i>	'read')

(v) When the past stem ends in *-t* preceded by a voiceless fricative the present stem frequently ends in the corresponding voiced fricative, e.g.

Intransitive	<i>axift-</i>	: <i>axiv-</i>	'speak'
	<i>buhult-</i>	: <i>buhuš-</i>	'dissolve'
	<i>bixift-</i>	: <i>bixiv-</i>	'move, budge'
	<i>guhust-</i>	: <i>guhuz-</i>	'move house'
	<i>kaft-</i>	: <i>kav-</i>	'fall'

Zx. *ħal-* *ħav-*

(but note,	<i>ħarift-</i>	: <i>ħarif-</i>	'be ruined'
	<i>kalilt-</i>	: <i>kalîš-</i>	'split')

Transitive	<i>gast-</i>	: <i>gax-</i>	'bite'
	<i>kurôlt-</i>	: <i>kurôš-</i>	'crunch'
	<i>kušt-</i>	: <i>kuš-</i>	'kill'
	<i>xâst-</i>	: <i>xâs-</i>	'demand'

(but note,	<i>âlîst-</i>	: <i>âlîs-</i>	'lick'
	<i>bast-</i>	: <i>bast-</i>	'freeze')

(vi) When the vowel preceding the final consonant, or consonant group, of the past stem is *-â-* then the corresponding vowel of the present stem is commonly *-ê-*, e.g.

Transitive	<i>birâlt-</i>	: <i>birêš-</i>	'roast'
	<i>bixâft-</i>	: <i>bixêv-</i>	'move'
	<i>bišârt-</i>	: <i>bišêr-</i>	'choose; roast'
	<i>čând-</i>	: <i>čên-</i>	'sow'
	<i>hinârt-</i>	: <i>hinêr-</i>	'send'
	<i>kalâlt-</i>	: <i>kalêš-</i>	'split'

Causative verbs in *-āndin*, however, form the present stem in *-in* (v. § 298). Note also:

<i>stānd-</i>	: <i>stin-</i>	'take'
<i>lkānd-</i>	: <i>lkin-</i> ,	'break'
	Am. <i>lkēn-</i>	

A comprehensive list of verbs, with their present stems, is given in Appendix II. The more common 'irregular' verbs, i.e. those with unpredictable present stems, are marked with an asterisk.

Affixes and Particles

§ 281. (a) Modal affixes

Sur. *a-* (*t-* before vowels), Ak. (? Shn.) *t-* (i.e. [*t'*]), Am.-Zx. *t-*, (KK § 271, BX 149 *di-*),¹ prefixed to:

the simple present give the Present Indicative,
the simple past give the Past Imperfect tense.

b(i)- in all dialects (but v. § 299) prefixed to the simple present gives the Present Subjunctive. *b(i)-* may also be prefixed to the Imperative.

(b) Modal particles

*dā*² in all dialects Sur., Ak.-Zx., Shn., employed with the simple present, forms the Future tense. (In KK § 290-1 *d* (dā), BX 149 *dā* with the Present Subjunctive form the Future.)

dā^{2,1} in all dialects, employed with the simple present, forms the Present Imperfect.

¹ Traditionally the affix is written *d(i)-* in general, *t-* only prevocally. A solitary exception is the text of Huart, op. cit. (p. 158 above), where *t(i)-* occurs throughout, e.g. *تێنی تزان تێژین* **nēnī, nēnī, nēnī*, &c. (cf. fn. 3, p. 197). Concerning the realization of *t-*, see §§ 154, 159. With *ēn* 'go' particularly the affix is frequently inaudible.

² In Gul., Zx. *dā*, *dā* may be reduced to enclitic *d*, *d* respectively after the personal pronouns 1st Sg. *ax*, 1st Pl. *am*, e.g.

Gul. 749 *axē dīm*: I shall go

759 *amē ... kīn*: we shall make ...

— *amē dē/d gahīn*: we would have caught up with him (cf. §§ 311 (c), 315)

Zx. 774 *amē girin*: we shall seize

779 *axē xē dādēdīm*: I shall throw myself

³ *dā* is also a conjunction, employed regularly with the Present Subjunctive, 'in order that', &c. (v. | 310 (b)), and a preverb (§ 300 (a)).

(c) Negative affixes

*nd-*¹ in all dialects, prefixed to the simple present, forms the negative of the Present Indicative and Future tenses (i.e. the particle *dē*, v. (b) above, does not occur in the negative).²

nd- in all dialects, prefixed to all the remaining tense forms³ (replacing *b(i)-* in the Present Subjunctive), gives the negative of these forms.

nd- prefixed to the Imperative (replacing *b(i)-* where present in the positive) negates it.

Personal Endings

§ 282. Each tense distinguishes five persons by characteristic endings. These do not correspond entirely to the personal pronouns (§ 275) in that,

(i) the endings appropriate to the 2nd and 3rd persons plural (in KK, BX, all three persons in the plural) are identical in form, and

(ii) no distinction of gender is made in the endings of the 3rd singular.

There is a characteristic Imperative ending of the 2nd person singular.

Present Tenses

§ 283. (a) The following tenses are formed from the present stem: the Present Indicative and Subjunctive, with the modal affixes *t-*, &c., and *b(i)-* (§ 281 (a)), negative *nd-* and *nā* (§ 281 (c)) respectively,

the Future and Present Imperfect, with the modal particles *dē* and *dā* respectively (§ 281 (b)).

All these tenses have essentially the following

¹ The irregular form *ni-* is employed in this function with the verb *ndn* 'know' (in Sur. also ? with *twndn* 'be able'). The verbs *ndn* 'know', *fydn*, *Shn*, *qdryn* 'be able', *tydn* 'be necessary' and *wfryn* 'dare' take the general negative affix *nd-* in these tenses, not *nā*.

² There are no recorded examples of a negative of the Present Imperfect tense.

PRESENT PERSONAL ENDINGS:

	Sur.	Ak., Am.	Zx., Shn.	Gul.	Cf. KK, BX
Sg. 1	-im	-im	-im	-im	-im
2	-î	-î	-î	-ê	-î
3	-î(t), -î(tin)	-î(tin), ¹ -î ²	-it(in)	-it	-a
Pl. 1	-in	-in	-in	-in	} -in
2, 3	-in	-in	-in	-in	

In conjunction with different stem finals these endings undergo regular modifications, given in detail below (b).

(b) Thus, when the present stem ends in:

(i) a consonant, e.g. *b-* 'be', *ê-* 'go'

	Sur.	Ak., Am.	Zx., Shn.	Gul.	Cf. KK, BX
Sg. 1	<i>abim</i>	<i>tbim</i>	<i>tbim</i>	<i>tbim</i>	<i>dibim</i>
2	<i>abî</i>	<i>tbî</i>	<i>tbî</i>	<i>tbê</i>	<i>dibî</i>
3	<i>abî(t),</i> <i>abî(tin)</i>	<i>tbî(tin),</i> Ak. <i>têit-</i>	<i>tbî(t)</i>	<i>tbî(t)</i>	<i>diba</i>
Pl. 1	<i>abin</i>	<i>tbîn</i>	<i>tbîn</i>	<i>tbîn</i>	} <i>dibîn</i>
2, 3	<i>abin</i>	<i>tbîn</i>	<i>tbîn</i>	<i>tbîn</i>	

Note. The verb *bên* does not normally take the prefix *b(i)-* in the Present Subjunctive, which appears as *bim*, *bî*, *bî(tin)*, &c.

(ii) *-ê-*, e.g. (*h*)*ê-* 'come', Sur. *nê-* 'put'

	Sur.	Ak., Am.	Zx., Shn.	Gul.
Sg. 1	<i>aném, tēm</i>	<i>tēm</i> ¹	<i>tēm</i>	<i>tēm</i>
2	<i>anēy</i>	<i>tēy</i>	<i>tēy</i>	<i>tê</i>
3	<i>anē(t)</i>	<i>tēt(in)</i>	<i>tēt</i>	<i>tēt</i>
Pl. 1	<i>anēyn</i>	<i>tēyn</i>	<i>tēyn</i>	} <i>tēn</i> [sic]
2, 3	<i>anēn</i>	<i>tēn</i>	<i>tēn</i>	

¹ i.e. Ak. [-i:t], Am., Bar. [-i:t].

² The form *-î-* occurs, in Ak. only, in unstressed position before the vowel of an enclitic. When the verb is monosyllabic, and with the verb *bên* 'be' generally, the full ending *-it* is preserved, e.g.

Ak. 531 *dâ êta êyêy* (o. § 142 (b)): he would go to the mountain
but 616 *êta makabê*: (when) he goes to school

³ Note the reduction before an enclitic in:

Ak. 533 *dâ nêma mêl*: I (must) put . . . down at home (*nên, nê-*, Am. *n-*),
but 685 *pâ nêma xêrê*: I (shall) sit down (*nîstin, nê-*, Am. *n-*)

⁴ In Am. an intrusive *-h-*, common in noun forms (e.g. Am. *bêh*: Ak. *bên* 'breath') may occur in verbal forms also, e.g.

Am. 706 *bêhna dawa*: (they) should come out

(cf. Nikitine, *BSOS*, III, 89, **bîhêta êra*: he should come hither)

(iii) -a-, e.g. *ka-* 'do' (but *Zx.*, &c., *k-*, as (i) above)

Sg. 1	<i>akám</i>	<i>tkam</i>	<i>tkim</i>
2	<i>akay</i>	<i>tkay</i>	&c.
3	<i>akat</i>	<i>tkat(in)</i>	
Pl. 1	<i>akayn</i>	<i>tkayn</i>	
2, 3	<i>akan</i>	<i>tkan</i>	

(iv) -ō-, -ō-, -u-, e.g. *xō-*, *xō-*, *xu-* 'eat'

Sg. 1	<i>axóm</i>	<i>txóm</i>	<i>txum</i>	<i>txum</i>
2	<i>axōy</i>	<i>txōy</i>	<i>txot</i>	<i>txwē</i>
3	<i>axōt</i>	<i>txōt</i>	<i>txut</i>	<i>txut</i>
Pl. 1	<i>axōyn</i>	<i>txōyn</i>	<i>txotn</i>	<i>txwin</i>
2, 3	<i>axōn</i>	<i>txōn</i>	<i>txun</i>	<i>txun</i>

(v) -ī-, e.g. *giri-* 'weep', *fi-* 'defecate'

Sg. 1	<i>aflm</i>	<i>tgirlm</i>	<i>tgirlm</i>
2	<i>afl</i>	<i>tgirl</i>	<i>tgirīē</i>
3	<i>afl(t)</i>	<i>tgirīt</i>	<i>tgirīt</i>
Pl. 1, 2, 3	<i>afln</i>	<i>tgirīn</i>	<i>tgirīn</i>

Substantive Verb

§ 284. (a) Beside the normal tense forms (§ 283 (b) (i)) the substantive verb has an enclitic present tense,

	Sur.	Ak. &c.	Gul.	Zx.	Cf. KK, BX
Sg. 1	-im	-im/-ma	=	-im/-ma	-im/-ma
2	-ī	-ī/-y	-ē	-ī/?	-ī/-yī
3	-a, -t-	-a/- (y)a	=	-a/-ya, ? -na	-a/-ya
Pl. 1	-īn	-īn/-yna	=	-īn/? -na	} -īn/-na
2, 3	-in	-in/-na	=	-in/-nin	

where the second forms in each case appear in postvocalic position. The -(y)- of the 3rd Sg. forms is realized after all vowels except *i*, *u*.

Examples:

- Ak. 589 *ax-im*: I am, it is I
 586 *ax mēcānē ta-ma*: I am thy guest
 544 *dinyā hatāw-a*: the weather (lit. 'world') is sunny
 549 *kayfā ta-ya*: it is thy pleasure
 560 *hung kī-na*: who are you?
 561 *am dix-in*: we are thieves
 658 *am sē-yna*: we are three

- Am. 705A *t fā wasfyāy-na*: they are standing
 720 *haṭika xalkē āmēdī-na hamī Kurd-in*: as for the
 people of Amadiye, they are all Kurds
 Bar. 736 *az kuṭē kē-ma*: whose son am I?
 Zx. — *am sē lār . . . § kullā ma-na*: we are three or four
 from our college
 771 *xāx . . . sar mūsildā-na*: Zakho is above Mosul
 783 *sih lā yē lēdā-nin*: there are thirty branches in it

(b) The negative of this form is independent, not enclitic.

	Sur., Ak.	Am.-Zx.	Cf. KK
Sg. 1	<i>nāna</i>	<i>nīnim</i>	<i>nīnim</i>
2	<i>nī</i> < * <i>nīy</i>	<i>nīnī</i>	<i>nīnī</i>
3	<i>nā</i>	<i>nīna</i>	<i>nīna</i>
Pl. 1	<i>nīna</i> < * <i>nīyna</i>	<i>nīnīn</i>	} <i>nīnin</i>
2, 3	<i>nīna</i>	<i>nīnin</i>	

Examples:

- Ak. 535 *dyār nīa*: it is not visible
 596 *ma nīna*: we have none (v. § 293 (a))
 656 *tāqatā madā nī*: thou art not within our power
 Am. 710 *mā . . . aw nīna*: is it not that?
 719 *ē mināra waḫī wē nīnin*: there are no minarets like it
 Gul. 770 *ta lōl . . . nīna*: it is no affair of thine
 Zx. 786 *masalā dixā . . . nīna*: there is no question of theft

Imperative

§ 285. (a) The Imperative is formed from the present stem by the addition, normally, of the prefix *b(i)-* (negative *nā-*) and the following endings:

- Sg. 2 -*a*, Pl. 2 -*in*, when the stem ends in a consonant,
 -*ū* -*n*, " " vowel.

Thus, for example, when the stem ends in:

(i) a consonant,

- Ak. 531 *bīna*: bring! (*īn-*)
 558 *bīnin*: bring ye!
 Am. — *fū na*: sit down! (*n-*)
 706 *fū nīn*: sit ye down!

(ii) -ē-,

- Ak. 558 *fū nē*: sit down! (*nē*-)
 537 *dā nēn*: put ye down! (*nē*-)
 565 *dā ninava*¹: put ye down again!

(iii) -a-,

- Ak. 532, Am. 711A *bika*: make! (*ka*-)
 Ak. 531 *bidava*: give back! (*da*-, -*va*)

(iv) -ō-, -ō-, -u-,

- Ak. — *bixō*: eat! (*xō*-)
 Gul. — *bixwa*, Zx. — *bixō*: eat! (*xu*-)

(v) -i-,

- Ak. — *nagiri*: don't cry! (*giri*-)

(b) The following Imperative forms from irregular stems occur:

- Sur. 505 *harū*: gol
 Ak., Am. *hara*, *harin*: gol go ye!
 [*nača*, *načīn*: do not gol (*č*-) are regular]
 warā, *warin*: come! come ye!
 [*nahē*, Zx. *na-ē*: do not come! ((*h*)*ē*) are regular]
 Gul. *nawa*, *nawin*: do not come!
 Am., Gul. 752 *hilō*: get up!

Past Tenses

§ 286. (a) The Past tense is formed from the past stem and the appropriate personal endings. These are essentially as follows:

PAST PERSONAL ENDINGS:

	Sur., Ak.-Zx.,	Gul.	Cf. KK,
	Shn.		BX
Sg. 1	-im	-im	-im
2	-ī	-ē	-ī
3	-ū	-ū	-ū
Pl. 1	-īn	-īn	} -in
2, 3	-in	-in	

¹ From *nē*-, cf. fn. 3, p. 182.

(b) Thus, when the past stem ends in:

(i) a consonant, e.g. *hâtî/-* 'come'

	Sur.	Ak.	Zx.	Gul.	Cf. KK, BX
Sg. 1		<i>hâtîm</i>		<i>hâtîm</i>	<i>hâtîm</i>
2		<i>hâtî</i>		<i>hâtî</i>	<i>hâtî</i>
3	= Ak.	<i>hât</i>	= Ak.	<i>hât</i>	<i>hât</i>
Pl. 1		<i>hâtîn</i>		<i>hâtîn</i>	} <i>hâtîn</i>
2, 3		<i>hâtîn</i>		<i>hâtîn</i>	

(ii) -a-, -ô-, e.g. Sur. *bâ-*, Ak. *bô-* 'be', Zx. *êb-* 'go'

Sg. 1	<i>bâm</i>	<i>bôm</i>	<i>êbm</i>	<i>êbm</i>
2	<i>bây</i>	<i>bôy</i>	<i>êby</i>	<i>êbê</i>
3	<i>bâ</i>	<i>bô</i>	<i>êb</i>	<i>êb</i>
Pl. 1	<i>bâyn</i>	<i>bôyn</i>	<i>êbyn</i>	<i>êbyn</i>
2, 3	<i>bân</i>	<i>bôn</i>	<i>êbn</i>	<i>êbn</i>

(iii) -â-, e.g. *mâ-* 'stay'

Sg. 1		<i>mâm</i>		<i>mâm</i>
2		<i>mây</i>		<i>mâê</i>
3	= Ak.	<i>mâ</i>	= Ak.	<i>mâ</i>
Pl. 1		<i>mâyn</i>		<i>mâyn</i>
2, 3		<i>mân</i>		<i>mân</i>

(iv) -î-, e.g. *gîrî-* 'weep', Zx., Gul. *bî-* 'be'

Sg. 1		<i>gîbm</i>	<i>bîm</i>	<i>bîm</i>
2		} <i>gîrî</i>	<i>bî</i>	{ <i>bîê</i>
3	= Ak.			{ <i>bî</i>
Pl. 1, 2, 3		<i>gîbn</i>	<i>bîn</i>	<i>bîn</i>

§ 287. (a) The Past Imperfect tense is formed from the Past tense by the addition of the prefix *t-*, &c. (§ 281 (a)), e.g.

Ak., &c., Sg. *têbm*, *têby*, *têb*; Pl. *têbyn*, *têbn*

Zx. Sg. 1 *têbm*, 2, 3 *têbî*; Pl. 1, 2, 3 *têbn*

Ak. *thâtîm*, &c., is frequently reduced to *tâtîm*, &c.

(b) In no Bad. dialect is a Past Conditional tense attested (cf. fn. 1, p. 189).

In KK, BX such a tense is formed from the simple past tense by the addition of the prefix *b(i)-* and the following combinations

of the 'conditional' infix *-ā-* (sometimes repeated as a suffix) and the past personal endings:

Sg. 1	-(ā)m(ā)
2	-āyī
3	-ā
Pl. 1, 2, 3	-(ā)n(ā)

Examples:

KK §§ 285, 299

Celadet BX¹

Sg. 1	<i>bāmā</i>	<i>bikatāmā</i>	<i>bikatām</i>
2	<i>būyāyī</i>	<i>bikatāyī</i>	<i>bikatāyī</i>
3	<i>būyā</i>	<i>bikatā</i>	<i>bikatā</i>
Pl. 1, 2, 3	<i>bānā</i>	<i>bikatānā</i>	<i>bikatān</i>

This tense may further take the modal particles KK *ē* (*wē*), BX *dē* (v. § 281 (b)).

§ 288. (a) The Past Participle is formed from the past stem by the addition of the morpheme *-ī*, *-y*, thus:

Ak., &c., *hāī*, *lōy*, *māy*, *gīī* (< **gīriy*)

Ak., Am. *bōn* 'be' has the irregular participle *bī*, cf. Zx., &c., *bīn* 'be', participle regularly *bī*.

(b) The Past Participle may function simply as an adjective, e.g.

Ak. — *tē gahīstī*: intelligent (*tē gahīstin* 'understand')

Zx. 777 *awā ēē-kirī*: the artificial one (*ēē kirin* 'make')

See also the compound forms, § 318 (a).

Compound Tenses

§ 289. (a) The Perfect Indicative I is formed from the Past Participle and the enclitic (present) forms of the substantive verb (§ 284 (a)) as auxiliary.²

¹ From Hawar (v. § 160), no. 26, p. 15; (Kamuran) BX 143 differs.

² In Gul. the only Perfect I forms attested are formed from the past stem and the auxiliary, viz.

Gul. — *min dīnyā nadiā*: I have not seen the world

753 *ta bō ā . . . kušta*: why hast thou killed . . . ?

765 *kard . . . nagōla min*: nobody has said to me (questionably Perfect)

Perfect II forms (v. (c) below) are, however, regularly formed.

(b) Thus, when the past stem ends in:

(i) a consonant, e.g. *hât/t-* 'come'

	Sur., Ak.-Zx.	Cf. KK, BX
Sg. 1	<i>hâtîma</i>	<i>hâtîma</i>
2	<i>hâtî</i> (< * <i>hâtî-y</i>) ¹	<i>hâtî(y)î</i>
3	<i>hâtîa</i>	<i>hâtî(y)a</i>
Pl. 1	} <i>hâtîna</i> (< * <i>hâtî-yna</i>)	<i>hâtîna</i>
2, 3		

(ii) -*û-*, -*ô-*, e.g. *êû-*, *êô-* 'go'

Sg.	<i>êûyma</i> , <i>êôy</i> , <i>êôya</i>
Pl.	<i>êûyna</i>

(iii) -*â-*, e.g. *mâ-* 'stay'

Sg.	<i>mâyma</i> , <i>mây</i> , <i>mâya</i>
Pl.	<i>mâyna</i>

(iv) -*î-*, e.g. *gîrî-* 'weep', *bî-* 'be'

Sg.	<i>gîrima</i> , <i>gîrî</i> , <i>gîrîa</i>	Zx. <i>bîma</i> , <i>bî</i> , <i>bîa</i>
Pl.	<i>gîrîna</i>	<i>bîna</i>

(c) In certain contexts (v. § 313) a Perfect Indicative II form occurs, in which the auxiliary verb loses the final vowel -*a* where it is present in the Perfect I forms.² Thus (cf. (b) (i) above),

	Ak.-Zx.	
Sg. 1	<i>hâtîm</i>	
2	} <i>hâtî</i>	
3		Sur. also <i>hâtî</i>
Pl. 1, 2, 3	<i>hâtîn</i>	but <i>hâtîna</i>

§ 290. (a) The Perfect Subjunctive and Pluperfect tenses are formed from the past stem and the Present Subjunctive and Past tenses respectively of the auxiliary, Ak. *bôn*, Zx. *bîn* (§§ 283 (b), 286 (b)).³

¹ Distinguished from the Past tense form (§ 286 (b)) by the position of the stress. With past stems ending in a vowel no such distinction is possible.

² The appearance of the 1st Sg. and 1st, 2nd, 3rd Pl. forms with 'post-consonantal' forms of the enclitic verb (§ 284 (a)) is deceptive. The loss of the vowel is probably on the analogy of the 3rd Sg. form with its omission of the enclitic (cf. § 309 (c)).

³ The verb *bôn*, &c., 'be' itself has the irregular reduced stem *bî-* in these tenses; thus Ak. has Perfect Subjunctive *bîbîm*, &c. (not Present Subjunctive, q.v. § 283 (b) (i)), Pluperfect *bîbîm*, &c.

(b) Thus, when the past stem ends in:

(i) a consonant, e.g. *hāt/f-* 'come'

Perfect Subjunctive

Sg. *hātīm, hātī, hātīt*

Pl. *hātīn, hātīn*

Pluperfect

Ak., &c., *hātīm, &c.* Zx. *hātīm, &c.*

(ii) a vowel, e.g. *lō-* 'go'

Perfect Subjunctive

Sg. *lōīm, lōī, lōīt*

Pl. *lōīn, lōīn*

Pluperfect

Ak., &c., *lōīm, &c.* Zx. *lōīm, &c.*

§ 291. A Perfect Conditional tense is formed from the Past stem and a particular form of the auxiliary verb Ak. *bōn*, Zx. *bīn*,¹ with the 'conditional' infix *-ā-*, sometimes repeated, and past endings (§ 286 (a)). In Zx., Gul. the *-ī-* of the 1st Pl., and occasionally of the 2nd Sg., ending is lost. Thus:

	Ak., Am.	Zx.	Gul.
Sg. 1	<i>lō-, &c., -bāmā</i>	<i>-bām</i>	<i>-bāmā</i>
2	<i>-bāyā</i>	<i>-bā(y)</i>	<i>-bāē</i>
3	<i>-bā</i>	<i>-bā</i>	<i>-bā</i>
Pl. 1	<i>-bāynā</i>	} <i>-bān</i>	<i>-bān(ā)</i>
2, 3	<i>-bānā</i>		

For examples, see § 309.

Summary

§ 292. The tense and mood system may be summarized as follows:

¹ The substantive verb has the irregular stem *bī-* in this tense also (cf. previous fn.). The form may then be further reduced, thus Perfect Conditional 3rd Sg. *būdā* > *bā*, giving the appearance of a Past Conditional tense (formed without an auxiliary verb from the past stem), but see § 287 (b).

Present Indicative (§ 283)	Present Subjunctive (§ 283)
<i>t-kāv-im, &c.</i>	<i>bī-kāv-im, &c.</i>
Future (§ 283)	Imperative (§ 285)
<i>dē kāv-im, &c.</i>	<i>bī-kāv-a, &c.</i>
Present Imperfect (§ 283)	
<i>dā kāv-im, &c.</i>	
<hr/>	
Past (§ 286)	
<i>kā(f)t-im, &c.</i>	
Past Imperfect (§ 287 (a))	[Past Conditional (§ 287 (b))
<i>t-kā(f)t-im, &c.</i>	<i>bī-kat-ām(ā), &c.]</i>
<hr/>	
Past Participle (§ 288)	
<i>kā(f)t</i>	
Perfect Indicative I (§ 289)	
<i>kā(f)tī-ma, &c.</i>	
Perfect Indicative II (§ 289 (c))	
<i>kā(f)tī-m, &c.</i>	
<hr/>	
Pluperfect (§ 290)	Perfect Subjunctive (§ 290)
<i>kā(f)t-bōm, &c.</i>	<i>kā(f)t-bīm, &c.</i>
	Perfect Conditional (§ 291)
	<i>kā(f)t-bām(ā), &c.</i>

Certain Verbs

§ 293. (a) The morpheme *ka-* with the verb *bōn, &c.*, yields the defective verb *habōn, &c.*, 'exist'. Commonly only 3rd person forms are met (KK § 275 has all persons, *hama, hayī, haya, hana, &c.*, but without examples). The negative is provided by the simple forms *nīa, &c.* (§ 284 (b)).

In conjunction with the Oblique case forms of nouns and pronouns this verb gives the sense of possession. Thus:

Ak., &c.

Present Indicative I

'there is'
'there are'

haya
hana

Sur. *haya*
hayna

'I have'	<i>min haya, hana</i>	
'we have'	<i>ma haya, hana, &c.</i>	
Present Subjunctive		
'if there be'	<i>habī, habin</i>	
Past, Past Imperfect		
'there was, were, used to be'	<i>habō, habōn</i>	Zx. <i>habī, habīn</i>
Perfect I		
'there has been'	<i>habā, habāna</i>	
Perfect Conditional		
'if there has been'	<i>habā (cf. fn. 1, p. 189)</i>	

Examples:

- Ak. — *ta qalam haya: hast thou a pen?*
 — *min šōl habō: I had work (to do)*
 544 *mirōvak haya: there is a man*
 579 *har kasakē māramak habā: whoever might have (had) a wish*
 582 *hākimēt habin: there have been rulers (v. § 313 (a))*
 619 *ta šāhid hana: hast thou witnesses?*
 Am. 703 *hākimākī sē kuš habōn: a ruler had three sons*
 Bar. 727 *hašt kuš wī habōn: he had seven sons*
 Gul. 749 *sē kuš habīn gal kižak: (he) had three sons and a daughter*

(b) In affirmative sentences only, the Demonstrative Izafe appears with the Present Indicative of this verb in a modified form. The 3rd Sg. form loses the final vowel *-a* and an analogical 3rd Pl. is formed (cf. Perfect Indicative II, § 289 (c)), thus:

'there is'	<i>y/wē, &c., hay</i>	Sur. also <i>hay</i>
'there are'	<i>y/wēt hayn</i>	but <i>hayna</i>

Examples:

- Sur. — *šūr-īn wā hay: we have work (to do) (šūr F.)*
 — *sē kuš-im wē hayna: I have three sons*
 Ak. 580 *awī ēxyāy ma' lām šōlakā hay: that serpent certainly has some business (šōl F.)*
 583 *mirōvakē hay: there is a man (mirōv M.)*
 586 *min birāyakē dika yē hay: I have another brother (birā M.)*

- Am. 709 *bālūt āgirē* hay: Bahlul has a fire (*āgir* M.)
 718 *yēt lē* hayn *sē dargah*: there are three gates in it
 Bar. 740 *šinkah wā* hay: there is (such) a woman (*šink* F.)
 Zx. 771 *filahēt* hayn *ō bisirmān xī yēt* hayn¹: there are
 Christians and there are Moslems also
 772 *dihē l xāxō wēt* hayn¹: there are Dihis (Armenian
 refugees from Dihé) in Zakho

The Demonstrative *Izafé* is omitted, the Present II appearing alone, in the following construction:

- Ak. 638 *čand . . . xēvēt wē* hayn: as many gold ornaments as
 she has
 673 *čand nirtkhēt hungō* hayn *binin*: bring as many bed-
 clothes as you have

§ 294. The verb *vyān* 'be necessary', Sur. *wistin*, is passive throughout.² It normally appears with the Oblique case form of the agential noun or pronoun, thus:

- Sur. *amin awē*: I want
 Ak., &c. *min wēt*: I want
*min nawēt*³: I do not want
min tvyā: I wanted

Examples:

- Ak. — *min tvēt ax bičimawa*: I want to go back
 575 *ta čī tvēt*: what dost thou want?
 595 *birāč min masraf tvēt*: my brother needs (money
 for) expenses
 633 *ta ax navēm*: thou dost not want me
 643 *ama haup navēm*: we do not want horses
 644 *min tō xōš vyāy*: I took a liking to thee
 Am. 712 *awī tvyā . . . bibat*: he wanted to take . . .
 711A *mi č hinga tvētin*: I want from you . . .

¹ These two examples at least suggest that the choice between the forms *yē* and *wē* of the Demonstrative *Izafé* may be determined in part by the nature of the preceding sounds.

² No distinction in meaning between Ak. *vyān* and Sul., &c., *wistin* 'want' (§ 230) is intended, but such forms as Ak. *nawēm* = *hax lē nāham* 'I do not like it', Zx. *wān tūn* 'they want', occurring under the influence of the more common active verbs, indicate in effect the development of a new verb, as yet defective, *vyān* 'like, want'.

³ See fn. 1, p. 181.

§ 295. (a) The forms *tbū'* (formally 3rd Sg. Present) and *tyā* (3rd Sg. Past Imperfect of *tyān*, § 294) appear equally in the present with the meaning 'must, ought'. In the past only *tyā* occurs.

Examples:

- Ak. — *ĕi ax bēzim tyā tō fāst bikay*: thou must do whatever I say
 — *tyā nōka biĕim*: I must go now
 — *ān tbīt xū biĕim ān har naĕim*: either I should go soon or not at all
 — *tyā duhū tōbāmā*: I should have gone yesterday

(b) The particle *bilā* has the sense of 'let . . .', e.g.

- Ak. 662 *bilā*: so be it!
 567 *bilā hal girin*: let them take it up

See also § 310 (c).

Passive Construction

§ 296. (a) The past and compound tenses of Transitive verbs are conjugated in the same manner as Intransitive verbs, but the forms have Passive sense throughout¹, e.g.

- Ak. 546 *bāpīrē ma . . . l baĥaltē hāvēta darē*: our ancestor was thrown out of Paradise (*hāvētin* 'throw')
 567 *sindōqā ĩkāndī*: the Treasury has been broken (into) (*ĭkāndin* 'break')
 572 *aw har sē dīx birina lāñ*: all three of these thieves were taken before him (*birin* 'take')
 632 *ax darmān kirim*: I was treated with medicine
 Am. 703 *sē paṣ kušfin*: three sheep were killed (*kušfin* 'kill')
 705 *ḡād inā*: food was brought (*inān* 'bring')
 Zx. 787 *ax la'in kirim*: I was appointed
 781 *ax ō aw ālī kirim*: he and I were reconciled

¹ Sur. *tbt* . . . *bistini* 'thou must take . . .', apparently for **obī* under the influence of Ak. *tbt*. Cf. the Sur. prepositions, § 301 (a).

² Only in Zx. are there occasional signs of the development of active meaning through assimilation to the Intransitive conjugation, e.g.

Zx. 775 *kiĕin girfin ō kušfin*: they seized the girl and killed her

Frequently the Agent, though not expressed, is obvious from the context, e.g.

- Ak. 531 *fôzâkê lê lydy, tayrahê zêl girt*: one day he went to the mountains (and by him) a gold bird was caught
 532 *aw . . . harsêk bîrdêr yêk bôn, gôta xudânê tayrî*: they were all three brothers (and by them) it was said to the owner of the bird
 533 *galta bîrâz mâtîvê, milê xê l milê wî dâ*: 'she' reached the eldest brother (and by 'her') her shoulder was struck against his shoulder
 Am. 706 *aw fâ bô, kêfikak inâ darva*: he got up (and by him) a cat was brought out
 Zx. 774 *aw huslâzê kô av pîrâ hanê âvâ kirî . . .*: the mason who (by him) this bridge has been built . . .

(b) When an Agent is expressed it is in the Oblique case, e.g.

- Sur. — *kâyax-û nîvîsî*
 angö kâyax nîvîsî } have you written the letter?
 509 *zinakê gâ bîrd*: the woman took the ox
 509 *wakî gâ-y bîrd*: when she took the ox
 Ak. 533 *zinakê gôtê¹*: the woman said to him
 536 *ahmadî zânî*: Ahmed knew
 538 *min afyâzê hungö bîr*: I have taken your things
 539 *hâkimî . . . gôtê¹*: the governor said . . .
 539 *min tê 'afö kirî*: I have forgiven thee
 542 *ahmadî hâkim t sindôqê nâ*: Ahmed put the governor into the chest
 Am. 705 *bâlîlî kêfikak kir t barîkâ xôdâ*: Bahlul put a cat into his pocket
 709 *awâ gôtê¹, bilâ*: they said to him, 'So be it'

The Oblique case endings may, however, be omitted (§ 261 (a)), e.g.

- Sur. 508 *mirôwaka gôta zinakê*: the man said to the woman
 Ak. 534 *kâbrâ das hâvêta zinakê*: the fellow reached for the woman
 535 *kas jâbâ wâ nadâ*: nobody answered them
 537 *ahmad gôtê¹ . . .*: Ahmed said to him . . .
 Am. 707 *bâlîlî sê fanûrvân girtin*: Bahlul took three bakers

¹ -ê, cf. § 302 (b).

² Cf. fn. 1, p. 212.

Passive Periphrasis

§ 297. (a) There is no secondary passive conjugation.¹ The past tenses of all Transitive verbs have passive meaning (§ 296).

(b) To express a passive without reference to an agent recourse may be had to a periphrasis with the verb *hātin* 'come' and the preposition -a (§ 301 (c)) governing the infinitive of the Transitive verb, e.g.

- Ak. — *watuv dē hēta kuſtin*: that way he will be killed
 — *sēvēt xirāb tēna istī'māl kirin bō 'alaſē haywānā*: the
 bad apples are used for animal fodder
 569 *čand dixiē . . . hātina kirin*: as many thefts as have
 been committed
 569 *sindōq . . . yā hātla lkāndin*: the Treasury has been
 broken (into) (cf. § 296 (a))
 Zx. 773 *wē hāſi (?) for hāſta dōd kirin*: has been built

Causative Conjugation

§ 298. The Causative of an Intransitive verb is expressed by a secondary conjugation. The Causative verb is conjugated regularly as a transitive verb.

The addition of the morpheme -*in*- to the present stem of the Intransitive verb yields the present stem of the Causative verb. If the present stem of the Intransitive verb ends in -(y)ē- (v. § 322 (a)) this is displaced by the causative morpheme.

The causative past stem is formed by the substitution of the morpheme -*ānd*- for the -*in*- of the present stem, thus:

- Ak. *kalīn, kal-* 'boil' > *kalīn-, halānd-, kalāndin* 'boil'
diſyān, diſyē- 'tear' > *diſīn-, diſānd-, diſāndin* 'tear'
giriſ, giri- 'weep' > *giriſn², giriyānd-, giriyāndin* 'make weep'

Compound Verbs

§ 299. A simple verb may combine with either a preverb (§ 300) or a nominal form to yield a compound verb. These do not differ

¹ The solitary -*re-* passive (cf. § 231) *kire-* 'be done' appears in Ak., e.g.

Ak. — *watuvſ talafuſ thiſēt*: it is pronounced so also

569 *ma ču pē nākirēt*: nothing can be done by us

² *giriſn-* < **giriſ-in-*.

in form from simple verbs beyond the fact that the modal affix *b(i)-* (§ 281 (a)) does not normally appear with them, e.g.

Ak. 584 *fyā . . . lē war girīt*: he could take . . . from him (*war girīt*)

584 *fū nē*: sit down! (*fū nistīn*)

Am. 704 *laš gindōqā lē ka*: make six chests! (*lē kirin*)

but, with *b(i)-*,

Gul. 758 *xudān bihē*: that thou mayest nourish him ((*p*) *xudān kirin*)

The meaning of compound verbs is a matter of lexicon.

PARTICLES

Preverbs

§ 300. There are two types of preverb:

(a) The adverbs *dā*, *dar*, *hal* (Sur. *har*, Zx., Gul. *hāl*), *fā*, *fū*, *va* (Sur. *wa*), *war* and the suffix *-(a)va* (Sur. *-(a)wa*, Zx., Gul., *-va*). These preverbs, including *va*, generally modify the meaning of the simple verb unpredictably, e.g.

Ak. *kirin* : *va kirin* : *fā kirin* — do : open : lift
xdrin : *va xdrin* — eat : drink

The main function of the suffix *-(a)va*, &c., is to give the sense of repetition or reversion. It then appears alone, e.g.

Ak. 531 *dā batava bō xō*: he used to take it back for himself
 531 *bidava*: give it back!

538 *hatā xivivīnava sah tkānē . . .*: by the time they returned they saw (that . . .)

581 *yē tēk hāllava*: it has come together again

Am. 703 *karē xō dīfava l bin qēlīkāk*: they saw their donkey again under a nut-shell

Gul. 769, Zx. 775 *xivivīnva*: they returned

Zx. 786 *dē binitīnva*: he will see it again

In Ak. it may also appear reduplicating the preverb *va*, e.g.

Ak. 533 *va garvāva*: he returned

534 *darik bō va kirava*: opened the door for him

562 *dē va binava*: (doors) will open

605 *waxtē . . . va xundava gāz kir*: when he read it he called

In Ak., Am., when a verb with this suffix immediately precedes either a complementary adverb or an indirect object, the suffix appears as *-(a)v* (v. § 172 (a)), e.g.

- Ak. 581 *hātav xārē*: he came down again
 581 *ēzyā ēōv šōv*: the serpent went back inside
 582 *ava mārī dānav min*: the snake gave me these
 665 *hātīnav mazalkā kuḥakaydā*: they came back into the boy's room
 666 *ēōnav bar dikan*: they went back to the shop
 Am. 708 *dā bēhnav baydā*: in order to return to Baghdad
 709 *dē . . . awī danav min*: you will give that back to me
 710 *ēōv mālā xō*: went back to his house

(b) The 'absolute' forms of the simple prepositions, *pē*, &c., and their derivatives, *pēva*, *pēk*, &c. (§ 302 (c)).

Pre- and Postpositions

§ 301. (a) The simple prepositions immediately precede the nominal form they qualify, which is normally in the Oblique case. The following are attested:

- l*¹ (Sur. *la* (cf. § 236), KK, BX *lī*) 'at, from'²
*p*¹ (Sur. *pa*, KK, BX *bī*) 'to'
*t*¹ (Sur. *ta*, KK, BX *dī*) 'at'
v 'to'
š Am.-Zx. only (KK, BX *šī*) 'from'
a 'to'
bō (Sur. *la bō*, KK, BX *bōnā*) 'for' (v. also §§ 148, 276 (b))
hātā (Am., &c., *hālā*) 'till'
bē 'without'
gal, *tgāl*, *lgāl* (Sur. *tagar*, BX *digāl*) 'with'
wakō, *hakō* (Am., &c., *wakī*) 'like'

(b) Both alone and in conjunction with the simple prepositions the following enclitic 'postpositions' occur:

-*dā* (BX *dā*), -*řā* (BX *ra*), -*va* (Sur. -*awa*, KK -*vā*, BX *va*)

¹ Concerning the realization of these minimal forms, see §§ 154, 159.

² English equivalents of the prepositions are given only as approximate labels.

³ i.e. Ak. [p', t'], Am., &c. [p, t]. The traditional spelling is *bī*, *dī*, with KK, BX. Huart's text (op. cit., p. 158 above), however, agrees with these our dialects, having *ⲡ* *p(i), *ⲧ*(i) throughout (cf. fn. 1, p. 180).

Thus, in combination,

p . . . -*va* 'with', *t* . . . -*dā* 'in', *t* . . . -*fa* 'into', &c.

Note Ak. *l bar-va-fā* 'from in front', with two postpositions.

(c) *a* only occurs in conjunction with a verb and is realized as an enclitic, e.g.

Ak. 544 *hāt-a garmānē*: came to the low country

549 *lōn-a lālī lēlē*: they went to the cow

Am. 713 *lōyn-a lēdy*: we went to the mountain(s)

Following a verbal form ending in *a*, *d*, *o* the preposition *a* is not realized, e.g.

Ak. 545 *ōō barakā kābrdy*: it went in front of the fellow

(cf. 547 *xivīn-a barakā min*: it went back in front of me)

581 *ōō xōr o hāt-a darē*: went inside and came out

Am. 704 *ōō mik nafārt*: went to a carpenter

(cf. 709 *aw lōn-a nik*: they went to (him))

a may also be followed by *t* . . . -*dā* with the sense 'into', e.g.

Ak. 544 *kira t fandikēdā*: he put it into the bag

695 *xō hāvēta t bīrēdā*: she threw herself into the well

Am. 704 *kirina t pindōqādā*: he put them into the boxes

Zx. 773 *toxāfē kō tēta t xāxōdā*: when it comes into Zakho

779 *xō bāvēma t āvēdā*: (if) I throw myself into the water

but is not, apparently, realized after a final *t* in this context, e.g.

Zx. 779 *tō tēy xō bāvēlā t āvēdā*: can you throw yourself into the water?

781 *min xō āvēll t āvēdā*: I have thrown myself into the water

(d) An Oblique nominal form, ungoverned by a preposition, may nevertheless have dative, ahlative, locative, &c., sense, e.g.

Ak. 540 *har bishakē xangilak pēva kir*: attached a bell to each curl

550 *ax gōlik bōm mālā xudānē xō*: I was a calf in my master's house

565 *hindak davē xō nā*: he put some into his mouth

Am. 705 *dā nā 'ardakī*: they camped at a place

718 *amēt . . . tāxivīn āmēdiē*: we are talking in Amadiye

Zx. 784 *lōbin makahē*: they had been to Mecca

§ 302. (a) Corresponding to the simple prepositions *l*, *p*, *t*, *v*, *š*; *a* there are the following 'absolute' forms: *lē*, *pē*, *tē*, *vē*, *šē*¹; *ē*.

The correspondence is not always regular, e.g.

Am., Zx. — *dā p miṛā gahī*: thou wouldst have met me
dā vēṛā gahīn: we would have met him

bō and *tgāl*, &c., are also employed absolutely.

(b) The absolute forms of the prepositions, with the exception of *ē*, stand independently. They do not govern another form, but give the sense of a 3rd person pronoun governed by the preposition, e.g.

Ak. 541 *gardanā xō pē āxā kam*: that I may take leave of them (lit. 'free my neck from them')

568 *sē mirōvēt lē*: there are three men in it

584 *kābrā tgāl ēō*: the fellow went with him

Am. 703 *gōtē šē fā bō*: the meat rose out of it

714 *am . . . šē tiršāyn*: we were afraid of them

ē, like *a* (§ 301 (c)), is always enclitic following a verb, e.g.

Ak. 536 *sah̄ that-ē*: he looks at them

547 *hindak āx min bō kir-ē*: I put some earth into it (-*ē*) for it (*bō*)

Am. 712 *daynē wī fā dā-ē*: gave the Jew's loan back to him

(c) With the postpositions *-dā*, *-fā*, *-va* the absolute forms *pēdā*, *pēva*, *tēdā*, *tēfā*, &c., are formed.

The absolute forms *lēk*, *pēk*, *tēk*, *vēk*, ? *šēk* appear with the meaning of ' . . . one another' and the appropriate preposition (cf. § 237 (c)), e.g.

Ak. 553 *lēk fā nābirin*: they do not pass by one another

559 *am . . . pēk hātīn*: we have come together

549 *vēkfā*: together (with one another)

(d) The absolute forms of the simple prepositions, *pē*, &c., and their derivatives, *pēva*, *pēk*, &c., may function as preverbs (v. § 300 (b)).

The simple prepositions are generally 'separable' (v. § 237 (d)), e.g.

Ak. 584 *l dargāy dā*: he knocked at the door (*l/lē dān*)

¹ Although *š* hardly occurs as a preposition in Ak., *šē* appears as a preverb, e.g. *šē kirin* 'pluck (fruit)'.

The derivatives are generally 'inseparable', e.g.

Ak. 540 *har bishakê xangilak pêva kir*: attached a bell to each curl (*pêva kirin*)

In Gul., Zx. certain inseparable preverbs and adverbs have united with the verbal stem and are preceded by the modal prefixes, &c., e.g.

Gul. — *ax fivê nālênim*: I shall not cook supper

— *bilêna*: cook (it)! (*lênân*: Ak. *lê nân*)

Gul., Zx. *daynân*: to put down (: Ak. *dā nân*)

Zx. 774 *nālêbtê hêlêd*: it will not be built thus (*lêbtin*: Ak. *lê bôn*)

§ 303. The simple prepositions form compound prepositions with nouns, adjectives, and certain adverbs. The prepositions may be omitted and the noun, &c., appear alone with prepositional force. The noun, &c., may be followed by the Generic form of the Izafe (§ 263 (d)).

Examples: Noun

Sur. 505 *harê maz mat*: go to (lit. 'before') the sheep

517 *la bô maz jê xwêrê cê*: he went in front of the lower one

Ak. — *l bin siwênday*: under the eaves

548 *dê hêt-a bin sêbarâ min*: will come under my shade

570 *dê . . . nik ta fê birim*: I shall pass by near thee

571 *harêkê inân-a bar falbê*: all three were brought before the gallows

572 *sar taxtê xê fê nist*: sat on his throne

626 *pêş darwêhê kafi*: he went ahead of the dervish

690 *hêcêl-a pişt xê*: put her behind himself

Noun + Izafe

Ak. 688 *birin-a barî babbê xê*: he took them before his father
passim, pêşê hingê

Am. *passim, piştê hingê* } after that, afterwards

Adjective

Ak. 647 *nêziki dah pênzda fêzêd*: for approximately (near to) ten or fifteen days

Am. 714 *şibafî gurg*: like (= such as) wolves

Zx. 785 *hêlê nêzik farê*: till near the gardens

Adverb

Ak. — *darva-y māl*: outside the houseZx. 773 *ž darvay xāxó*: outside Zakho

§ 304. Various pre- and postpositions appear with formally plural nouns with the connotation of 'manner', e.g.

Ak. — *mir tirsēt xóđā*: he died of fright (lit. 'in his own fears')— *mir tirsāđā*: he died of frightGul. — *dilē min tēhī ž birsā*: my stomach aches with hungerZx. — *davē min hīk bī ž tēhnā*: my mouth is dry from thirst784 *ž tēhnā kalbīn hamī*: they had all collapsed from thirst

Adverbs

§ 305. (a) A nominal form, Sg. or Pl., formally Oblique, may have adverbial sense (v. § 301 (d)), e.g.

Ak. 531 *hamó fōžē*: every day, daily553 *hinda fōžā*: for some days545 *sē žār qūndāyā hāt*: he came for three or four stages548 *hāvīnē, waxtē garmē*: in summer, in the time of heat573 *vē halē*: at this time, then631 *žōma bilāđā mī'āmilē*: I went to (many) countries tradingAm. 703 *naqlakē*: once (upon a time)705 *qōnāyakē žōn*: they went for one stageGul. 749 *načīn nēčīrē*: do not go hunting!

(b) The suffix -(i)l/š 'also, even' occurs in Ak. and Sur. only, e.g.

Sur. 506 *tiwānlšim girt*: I took a shepherd alsoAk. 555 *ta davš lē dirūbó*: hadst thou sewn the mouth of it too?561 *awš dīza*: he too is a thief569 *wānlš gōtē*: they too said to him . . .

The form -š appears following a vowel, e.g.

Sur. 506 *hīnglšīn har āwēt*: then too we winnowed it514 *hindak pārāy māšawa'*: he had a little money left tooAk. 545 *avaš*: this also550 *nókaš*: now also657 *wē fōžēš*: that day alsoAk. 700 *malāyš* 'the mullah too', is exceptional.

' Cf. § 240 (c), end.

In other dialects the independent forms Am. *ʔi*, Gul., Zx. *ʔi/i* occur with the same meaning, e.g.

- Am. 703A *hākimi ʔi karak habō*: the governor had an ass too
 Gul. 752 *aw ʔi kir i xānva*: put him in the house too
 Zx. 782 *gundt ʔi dē ʔin*: the villagers also will go
 790 *mi ʔi zahmali . . . dīt*: I had trouble too

With the 1st person pronoun *az* the following contractions occur, Ak. *ayl*, Am., Zx. *aʔi* (v. § 275 (a), Note 3).

Preceding *ʔi* the adjective *dī* 'other' appears as *dī*, e.g.

- Am. 706A *galahēt di ʔi*: many others also
 719 *dargahē di ʔi*: the other gate too
 Zx. 785 *hinda trumṣēlēt di ʔi*: some other cars also

Contrast *dī* used substantively in

- Bar. 732 *ʔad dī ʔi*: a hundred others also

(c) The suffix *-ānī* with nouns has the sense 'in the manner of . . .', e.g.

- Sur. 529 *xōlxōrānī cōē*: he went to it gently
 Ak. — *'arabānī swōr bō*: he rode (the donkey) side-saddle
 (lit. 'Arab-wise')
 543 *ʔānī ʔawī*: he barked like a dog (*ʔa*)
 543 *karānī aīʔi*: he brayed like an ass

B. SYNTAX

Concord

§ 306. (a) Since nouns in the Direct case are formally identical in the Sg. and Pl. (§§ 258, 260 (b)) only the verbal personal ending indicates the number, thus:

- Ak. — *mirōv ʔō/ʔōn*: the man/men went
 611 *aw biʔāk ʔōn*: those children went
 Am. 706 *mīšk dar Kaffin*: the mice came out

The concord between personal pronoun and verb is straightforward. The following few examples are obvious anacolutha:

- Ak. 560 *hung . . . bibēʔa* (for **bibēʔin*): say (ye)l
 562 *az dē ʔēm xō lē xilās kayn*: *I can free us from it

(b) A noun marked by a plural Izafe form (§ 264 (a)) normally takes a plural verb, e.g.

- Ak. 565 *sā piltēt xō dā girtin*: three put down their loads
 566 *harsēkā piltēt xō xālī kirinava*: all three emptied
 their loads again

but, 566 *ma piltēt xō yēt dirust kirī*: we have made up our loads

(c) Two or more nouns joined by the conjunction *o* 'and', or the preposition *tgāl*, &c., 'with', constitute a plural subject and take a plural verb, e.g.

- Ak. 546 *čū hēva w hēva nīna*: there is no shilly-shallying
 556 *fivīak tgāl qurbalayakī bōna kirik*: a fox and (lit.
 'with') a badger became companions

Am. 709 *bāyak o bārān hāfin*: a wind and rain came

Gul. 751 *šr o mašālēt xwa girē dān*: he girt on his sword and
 shield

Zx. 781 *ax o aw ālī kirīn*: he and I were reconciled

Relative and Subordinate Clauses

§ 307. (a) In all dialects Ak.-Zx. the inflexible particle *kō* serves to introduce subordinate clauses, e.g.

- Ak. 538 *salī thanē kō tūtē wān yē birī*: they see that their
 things have been taken

548 *dē fā bit kō dē čit*: he will get up to go

587 *dit kō sa'idē fā nūtā*: he saw that Said was sitting

Am. 708A *fā bōn kō bārēt xō bār kirīn*: they got up (so that)
 they loaded up their loads

Zx. 787 *mī natzānī . . . kō tadrisāt . . . p kurdia*: I did not
 know that the teaching was in Kurdish

(b) A relative clause is normally joined to its antecedent by the appropriate form of the Izafe (§ 263), e.g.

Ak. 578 *har kasakē xān bit*: whatever person be treacherous

579 *har kasakē māramak habā*: whatever person might
 have (had) a desire . . .

606 *aw pārēt . . . ta dāna mīn*: those monies which thou
 gavest me

Am. 710 *tūtē mīn dāyav hīnga*: the thing which I gave you

Zx. 774 *aw kasē awwālī bēt*: that person who first comes

¹ See § 293 (a).

With the omission of the enclitic substantive verb form described at § 309 (c) the distinction between a relative clause and an adjectival phrase is formally removed, e.g.

Ak. 543 *aw hākimē t sindōqēdā jānī fawf*: that governor (who is) in the chest barked like a dog

Am. 707A *aw tišlēt binē bahwēdā*: those things (which are) at the bottom of the sea

When the relative clause is separated from its antecedent it is introduced by the appropriate form of the Demonstrative Izafe (§ 266), e.g.

Ak. 575 *axē¹ hāšima wē darrōkā xēfā*, *yā şubay xū filān hast indy*: I have come for that kerchief (full) of gold which so-and-so brought early this morning

Gul. 757 *aw axim yē birāē ta az kušm*: I am he whom thy brother has killed

(c) Alternatively a relative clause may be introduced by the particle *kō*, with or without the Izafe,² e.g.

Ak. — *sar āwā kō tēt l dirēzālā galē*: over the river which goes along the valley (*āv F.*)

535 *kāyazak dīt kō yā nivisē¹ . . .*: (they) saw a letter (in) which was written . . . (*kāyaz F.*)

593 *aw masalā kō az bō hātīm¹*: that question about which I have come (*masala F.*)

Zx. 774 *aw huslāē kō av firā hanē āwā kirē*: the mason who built this (here) bridge (*huslā M.*)

Use of Tenses

§ 308. (a) The Present Indicative has aorist sense, e.g.

Ak. 561 *atō cī tzānī*: what dost thou know?

562 (*ahar şa bifawit*) *ax tē tghim aw cī tbēzīt*: (if a dog barks) I understand what it says

Am. 719 *tbēna dargahakī dargahē zēbārē*: they call one gate the Zebar Gate

The sense of continuity, of a state or action in progress, is given by a construction described in detail at § 309.

¹ See § 313.

² The particle *kō* may even intrude in the normal Izafe construction (§ 263 (b)), e.g.

Ak. 622 *awē kō xudōnē pāra*: he, the owner of the money

(b) Future time is expressed by the simple present tense and the particle *dē* (§ 281 (b)). This normally comes at the beginning of the sentence or clause, either preceding or following a subject expressed, e.g.

Ak. 539 *az dē kiā xō damē*: I shall give him my daughter
 541 *dē ta kama sindōqēdā*: I shall put thee into the chest
 545 *dē tō p min va day*: wilt thou strike me?

Am. 704 *aži dē gal hinga hēm*: I too shall come with you
 706 *tō dē vī haywānī firōšī*: wilt thou sell this animal?
 717 *dē tō ēi l ma kay*: whatever thou wilt do to us

Gul. 756 *am dē mālā xwa bīn*: we shall take our home . . .

§ 309. (a) The Demonstrative Izafe (frequently reduced to an enclitic vowel, indistinguishable from the Individual Izafe, v. § 266 (b))¹ appears with the Present Indicative tense (§ 283) giving the sense of a state or action in progress, i.e. of a Present Continuous tense, e.g.

Sur — *az wē tē gam*: I understand
 — *xawēn wā tē*: we are sleepy (lit. 'our sleep is coming')
 (*xaw F.*)

Ak. — *maryamā txōt, azē nāxōm*: Miriam is eating, I sm not
 — *dastē minē tēšit*: my hand is aching (*dast M.*)
 — *xawā minā tēt*: I am sleepy

539 *hākīmē mūsilē yē kūyazā tniwisit*: the governor of Mosul is (constantly) writing letters (*hākīm M.*)

557 *amē lēšikēt xō nanāsinava²*: (now) we do not recognize our own cubs

633 *azā tbinim*: I (female) can see

Am. 707 *land fōšā azē nānī dama hinga*: how many days is it that I have (continuously) given you bread?

718 *amēt . . . tāxivīn*: we are talking

Gul. — *azē nānī txum*: I am eating

Zx. — *xawā minē tēt*: I am sleepy

777 *lōlē xō yē tkin*: they are doing their work

777 *amē tbinin*: we can see

781 *ava . . . wē p min kanitin*: he is laughing at me

Shn. — *xawā mi wā tēt*: I am sleepy

¹ In the following example the Demonstrative Izafe appears to be replaced by the Secondary Izafe,

Bar. 743 *ava kōfirakī tētin*: here is a monster coming (cf. (c) fn. below)

² See fn. 1, p. 181.

(b) The same construction occurs with the enclitic present tense form of the Substantive verb (§ 284 (a)) when the predicate is a simple nominal form,^{1,2} e.g.

Ak. 533 *azê mûdîr-im*: I am (temporarily) a traveller
contrast,

Ak. 561 *ayl dix-im*: I too am a thief
619 *az bisilmân-im*: I am a Moslem

With adjectives the same temporal sense may be given, e.g.

Ak. 548 *mâr yê haq-a*: the snake is in the right
568 *Land malyên t kê-m-in*: how many millions are short?
616 *dihân yâ gapât-kirî-a*: the shop is shut
Am. 717 *am t hêrîr-In*: we are ready

The Demonstrative Iaze may, however, merely give the adjective 'substantive' force (v. § 266 (a) (ii)), e.g.

¹ The following examples have unexplained forms, possibly Secondary Iaze out of normal context:

Sur. 508 *amê fûnê tî a bîrî-yên*: we are naked and hungry (v. § 275 (a), Note 4)

520 *batê ari dîr-im*: as long as I am well (alive)

— *ari mîfûr-im*: I am obliged (to go now)

Shn. — *awî mîvîrî-a*: he is asleep

but — *aw yî mîvîrî-a*: she is asleep, regularly

² Cukerman, op. cit. (i), p. 139, using texts of varying provenance, describes a similar construction with the Secondary Iaze in place of the Demonstrative. He does not, however, differentiate between the temporal construction, the simple 'substantivized' adjective and the 'phrase introduced by a preposition' ((c) below), though all three types appear in his examples, e.g.

Temporal

ari xarîb-im: I am a stranger

sênêk mîtyêy-a: (the mare) Sosîk is tired

Substantivized

wardêkê zafê şeqî bû: Wardak was a very clever woman

qara badaw bû: the palace was beautiful

Prepositional

mîrê na l mal: the Mir is not at home

¹ When the adjective is a past participle (§ 288 (b)) this construction may contrast with a verbal one in which no substantive verb is expressed (v. § 313), e.g.

Ak. 587 *dît hê se'îdê fû-nîstî-a l sar taxtî*: he saw that Saîd was seated on a chair

contrast,

543 *dît hêkîmê akre yê fû-nîstî l sar taxtî xê*: he saw the governor of Akre (was) sitting on his throne

- Ak. — *hakō mārī yē nār-a*: he is as crooked as a snake
 548 *av īdē hanē yē bāš-a bō hinjār*: this (here) branch is
 a good one for a plough-arm
 589 *fidīnā wī yā faš-a*: his beard is a black one
 Am. 718 *āmēdiē . . . yā hisār-kirī-a*: Amadiye is walled round

(c) When the predicate of an affirmative sentence or clause is a phrase introduced by a preposition, or comprises an absolute preposition alone (§ 302), it is joined to its subject by the Demonstrative *Izafē*,¹ whether the sense be aoristic or continuous. The enclitic present form of the Substantive verb is then omitted, generally in the 3rd person Sg. and Pl. and optionally in the other persons, e.g.

- Ak. — *minē gu lē*: I hear (lit. 'for me the ear (is) to it)
 533 *mālā minā l filān fādē*: my house (is) in such-and-such street
 538 *kāyazakā l wē darē*: (there is) a letter there
 544 *mārah yē t nāv bafrēdā*: (there is) a snake in the snow
 568 *sē mirōvēt lē*: (there are) three men in it
 572 *awēt wē āxištīnēdā*: they (are) engaged in this talk
 616 *jantak yā l barē dikānakē*: (there is) a bag (lying) in front of a shop
 Am. 718 *galak bināyatēt kavnēt lē*: (there are) many old buildings in it
 718 *āmēdiē yā l sarē girakī*: Amadiye (is) on a hill
 Gul. 768 *kufilīk . . . yā t sēnīkā wēdā*: (there is) a rissole in his tray
 Zx. — *azē l vē ḡdē(-ma)*: I (am) in this room
 — *amē(t) l vē ḡdē(-yna)*: we (are) in this room
 777 *filahēt lē-na*: there are Christians in it

When the sentence contains a main verb the *Izafē* in this construction may also be considered as joining a relative clause (without a verb) to its antecedent (cf. §§ 307 (b), 313 (b)), e.g.

- Ak. 543 *aw hākīmē t gindōqēdā gānī fawī*: that governor (who was) in the chest barked like a dog

¹ In the following example the Demonstrative *Izafē* appears to be replaced by the Secondary *Izafē* (cf. fn. 1, p. 205).

Bar. 734 *ava firakī dastē daldīlakidā*: (here is) a sword in the hands of a broker.

The construction is not affected when the relative clause has a different subject to that of the main sentence, e.g.

Zx. — *bāštrē kičikā minā lē galak dīra*: the town, in which my daughter (is), is very far away

In a phrase introduced by *waxtē*, &c., 'when' the Demonstrative *Izafē* is omitted (cf. § 313 (b)), e.g.

Ak. 616 *waxtē irāq t dastē anglēzidā*: when Iraq (was) in the hands of the British

§ 310. The Present Subjunctive is employed:

(a) in subordinate clauses, whether introduced by a conjunction or not, e.g.

Ak. 556 *hlayakē bika dā . . . xilds bibin*: make some ruse that we may be saved

557 *dē lafi kayn hatā gurg bibēžita ma . . .*: we shall fight so that the wolf says to us . . .

561 *min nākana hirkē xō, gal hungō bēm*: won't you make me your companion, that I may come with you?

Am. 703A *fā bōn dā čina āfi*: they got up to go to the mill

708 *kārē xō kir dā bēhnaw baydā*: they made their preparations in order to return to Baghdad

(b) with the conjunction *dā*, with injunctive force, e.g.

Ak. — *dā bizānit namāya*: he should know that there is none left

533 *dā bičim, jarihē xō dā nima māl*: let me go and put my water-pot down at home

544 *dā namiritin sarmādā*: it ought not to (be left to) die of cold

626 *dā bičina māl*: let us go home

(c) following *toyā*, &c., 'must, ought' and *bild* 'let . . .' (v. § 295 (b)), with examples).

(d) following certain verbs, e.g.

Ak. 684 *ax našēm bēm*: I cannot come (*šyān*)

574 *min tvēt . . . paydā bitava*: I want it to be found (*vyān*)

600 *ax has kam bizānim*: I would like to know (*has kirin*)

684 *malā nawērā dar kavīn*: the mullah durst not go out (*wērān*)

§ 311. (a) The Present and Past Imperfect tenses (§§ 283 (a), 287 (a)) are practically coextensive, the Present being the more common, in giving the sense of a repeated or habitual action or state in the past, e.g.

Ak. 543 *hakō mādī tbo . . . dā gurēl kat*: whenever he became tired he would roll it

550 *hamō sālē dā šir l min xōn*: every year they would drink milk from me

595 *šind wī har šwīn tdānē, aḥmad har dā girīt*: his wife kept abusing him (and) Ahmed wept all the time

Am. 707A *harō sipēda yā xū dā fā bīt*: he would get up every day at early dawn

Bar. 730 *aw dā bičūkēt xalki kužitin*: he used to beat people's children

Zx. 774 *hindī . . . āwā tkir . . . dā šir šōrak dī kavīn*: however much he used to build it up the bridge would always fall down again

(b) The Present Imperfect also gives the sense of an action, &c., about to take place, e.g.

Ak. 545 *naxō dā miri*: otherwise thou wast about to die

547 *av mārā t nāv bafrēdā bō, dā mirīt l sarmā*: this snake was in the snow, dying of cold

682 *dā fā bītin, . . . šōlā xirāb . . . biḥatin*: he was going to get up and do something evil

Zx. 780 *azā qušim . . . aw šī dā mi qušit*: I was about to hit him, he too was going to hit me

(c) The Present Imperfect appears in the apodosis of certain conditions (v. § 315) and in Suppositions, even when the condition is not expressed, e.g.

Ak. — *xōš min dūtā, dā šōlā xō lē va kam*: I wish I could see him, (were I to do so) I would take my revenge

§ 312. (a) The Past tense is the normal narrative tense, describing a state or action in the past, e.g.

Ak. 547 *amin . . . hal girt, dā nā fandikēdā . . . davē fandikē min dirū ō fandik min hāvēta pištā xō*: I picked it up, put it in the bag, sewed the mouth of the bag and put it over my shoulder

Am. 704 *bālil çd, kēlik girfin, kirina t şindôqādā*: Bahlul went, caught some cats and put them into the chests

(b) The Past tense is also employed for recently perfected actions, e.g.

Ak. 536 *la'bēt xō min hamō bîr kirinawa*: I have (just) forgotten all my tricks again

559 *am . . . pêk hâtîn*: we have come together

A long completed action, &c., is expressed by the Perfect or Pluperfect tense, e.g.

Ak. 567 *ta zānta êi qawmîa*: hast thou learnt what has happened?

582 *wa dyāra aw l min 'adālattir bia*: evidently he was more just than I

595 *atō bia mēcānē ahmadî*: wast thou Ahmed's guest?

579 *awî êi kirbō, . . . awî xangilak . . . dirist kirbō, xinjîrak vē êxistbō*: what did he do (lit. 'had he done')? He made a bell and fixed a chain to it

§ 313 (a) The Perfect Indicative I (§ 289 (a)) is employed only in the negative and interrogative and in some subordinate clauses. In affirmative statements (including relative clauses) the Demonstrative Izafe, or a reduced form of it (v. § 266 (b)), generally appears with the Perfect II form (§ 289 (c)), e.g.

Sur. 512 *hindak nân û kashim ē . . . hînāy*: I have brought some bread and comestibles

512 *--im gōit . . . wē hînāy*: I have brought meat

520 *hind xēfî wē fitîna*: it has voided so much gold

Ak. — *aw mēxa kē êl kirîa? min êl nakirîa, nafārî yā êl kirî*: who has made this table? Not I, the carpenter has made it (*mēx* F.)

535 *kōyaxak dît kō yā nivîsî . . .*: they saw a letter (in) which was written . . . (*kōyax* F.)

- 543 *dit hākimē ākrē yē fū ništī l sar taxtē xō*: he saw the governor of Akre was sitting on his throne
- 550 *arā pīr blm*: I (a cow) have grown old (*lāl* F.)
- 550 *galak lāl ō gā yē l min xēda bīn*: many cows and oxen have sprung from me
- 550 *min galak xēr yā l vē lālē diti*: I have seen much good from this cow (*xēr* F.)
- 553 *min tō yē l pīstā xō kirī*: I have put thee (a snake) on my back (*mār* M.)
- 557 *ma lēlik vēkṣā yēt kirin*: we have whelped together
- Am. 710A *minē dāynav hinga lōlik*: I have given you dung fuel-cakes
- 717 *wāḡib ma yā ḡal kirī, balē hamī ma na ḡal kiria*: we have done (lit. 'solved') our homework, but we have not done all of it (*wāḡib* F.)
- Bar. 732 *axē dayndār bīm*: I have become indebted
- Gul. — *min fivā lēnāy*: I have prepared supper (*fiv* F.)
- Zx. 773 *ḡiraka . . . wē hātī āvā kirin*: (there) is a bridge (which) has been built . . . (*ḡir* F.)
- 776 *aw dārā banōkē . . . wē māy*: that terebinth tree still remains (lit. 'has remained') (*dār* F.)
- 777 *jō . . . yē . . . laq kirī*: the canal has been split off (from the river) (*jō* F.)

(b) The Demonstrative Izafe is omitted from this construction in a relative clause introduced by either an Individual or a Demonstrative Izafe form (cf. §§ 307 (b), 309 (c)), even when this 'relative' Izafe has no connexion with the verb, e.g.

- Ak. 575 . . . *darōk . . . yā filān kasī ināy*: the kerchief which so-and-so brought
- 593 *aw masalā kō ax bō hātīm*: that question about which I have come

[contrast,

- Ak. 588 *axē hātīm bō masalak*: I have come about a question]
- Am. 710 *tīlē min dāyav hinga . . . bīdanav min*: give me back the thing which I have given to you
- Zx. 774 *aw huslāē kō av ḡirā hanē āvā kirī*: the mason who has built this (here) bridge

Likewise in clauses introduced by *waxtê*, &c., 'when' and similar temporal adverbs the Perfect II form appears without the Demonstrative *Izafê* (cf. § 309 (c)), e.g.

- Am. 703A *waxtê çöyna dî*: when they went to the mill
 Bar. 731 *waxtê sê çêrak kuştî*: when he had beaten three or four
 Gul. — *waxtê ax çöym sêkê*: when I went to the market
 Zx. 776 *piştî kô pîr dîvê kirî*: after the bridge was built

Occasionally the Demonstrative *Izafê* is omitted in other contexts,¹ e.g.

- Ak. 580 *sarê xê (yê) hêvêta kalêbê xîrîrê*: it has put its head in the book of the chain
 583 *'anrê wî gaştê 140 salî*: his age has reached some 140 years

Conditions

§ 314. Present and future, possible conditions.

(a) In the protasis the Present Subjunctive, or where appropriate the Future tense, appears, e.g.

Subjunctive

- Ak. — *agar xudê nadat, nêdat*: if God does not give (a thing) He does not (and there is an end)
 546 *duşmîn bigata duşmînî*: if one enemy meet the other
 562 *akar şa bîfawît*: if a dog should bark
 562 *akar ma bigirin*: if they should catch us
 Am. 712 *ax bîsilman bîm*: if I am a Moslem
 Gul. — *hakar xallî bêt*: if Khalîl should come
 Zx. — *hakar min pêra habîn*: if I were to have (any) money

Future

- Ak. 569 *akar dê ma şalbî kay*: even if thou wilt hang us
 573 *dê tôba kan*: if you will repent

¹ The Ak. form *gênî* 'he said', in contrast to *gêrê* 'he said to him', might be explained as such a Perfect II, without the Demonstrative *Izafê*, from *gêrê*. The Past Imperfect in Ak. 609 *mîn tîgî* 'I used to say', however, suggests a secondary past stem **gêrî*. The same example, having a 1st Sg. agent (Ak. 618 *mîn gêtî* 'I said' also), rules out any immediate connexion with the Sor. construction *gêrê* 'he said' (cf. § 225 (iv) (γ)).

(b) If the action of the apodosis must, of necessity, follow that of the protasis in time then the Past tense may appear in the protasis, e.g.

Ak. — *agar jilkēt bāš min ditiŋ dē bō ta kiŋim*: if I see any good clothes I shall buy them for thee

553 *akar dušmin gašta dušmini lēk rā nābirin*: if one enemy meet the other they do not pass one another by

Gul. — *hakar xalil hāt bēša wī*: if Khalil comes tell him

§ 315. Past, impossible conditions.

The Perfect Conditional tense is used in the protasis and the Present or Past Imperfect in the apodosis, e.g.

Ak. — *agar az xūtir čōbāmā . . . dā bīnim*: if I had gone earlier I would have seen (him)

— *hakar min tiŋing vē bā¹ . . . dā kužim*: if I had had a gun with me I would have killed it

— *hakar ta nakuštā ta fiłdr natkir*: hadst thou not killed him thou wouldst not have fled

Am. — *haka tō diranglir hātbūyā . . . dā p miŋā gahl*: if thou hadst come later thou wouldst have met me

Zx. — *hakar am nahātbān ael am natdiŋin*: if we had not come he would not have seen us

§ 316. The particle Ak., Am. *xōš*, Gul. *xwaxš*, Zx. *xuŋš* 'would that . . .' is always followed by the Perfect Conditional tense, regardless of the possibility or otherwise of the realization of the wish, e.g.

Ak. — *xōš aw subay hātbā*: would he were coming to-morrow

— *xōš nōka hātbā*: would that he would come now

— *xōš min tō dītbāyava*: would that I could see thee again

— *xōš min tō dītbāyā*: would that I had seen thee

Am. — *xōš am hātbāynā*: would that we had come

Gul. — *xwaxš tō čōbāš*: would that thou wouldst go

Zx. — *xuŋš hūn čōbān*: would that you had gone

¹ See fn. 1, p. 189.

C. WORD FORMATION

(All references, unless otherwise stated, to *Ak.* only)

Compounds

§ 317. Two types of Copulative compound occur.

(a) Compounds of two nouns or adjectives joined by the conjunction *ê*, &c., 'and' are not common, but do occur, e.g.

<i>kâr-ê-bâr</i>	'affairs' (work and ? load)
<i>sar-ê-êw</i>	'face' (head and eyes)
<i>jayr-ê-jawâl</i>	'birds' (birds and ?)
<i>êk-u-dô</i>	'one another' (one and two)

(b) Morphemes indicating the making of some noise occur reduplicated with the compound vowel *-a-* (cf. § 252 (c)), e.g.

<i>bilq-a-bilq</i>	'bubbling'
<i>hul-a-hul</i>	'rustling'
<i>kus-a-kus</i>	'whispering'
<i>xif-a-xif</i>	'snoring'

Nouns or morphemes occur reduplicated and with the 'diminutive' suffix *-êk* (§ 320), e.g.

<i>wîwîfêk</i>	'whirligig' (<i>wîr</i> 'whirr')
<i>xâl xâlêk</i>	'lady-bird' (<i>xâl</i> 'spot')
<i>xâxâzêk</i>	'mumper, cadger' (<i>xâz</i> 'beg')

§ 318. Determinative compounds may be dependent or descriptive. However formed, such compounds frequently take a 'diminutive' suffix *-êk*, *-êk*, &c. (§ 320).

(a) Dependent compounds are of two types:

(i) A noun qualified by another noun in some case relation to it, mainly genitive. Such compounds may appear with the qualifier preceding the qualified, but more commonly are inverted, and with the compound vowel *-a-*, e.g.

<i>gil-kan</i>	'clay-pit'
<i>ma-ê-tir</i>	'ghost' (us-better, cf. NP <i>ax-mâ-behtarân</i>)
<i>fêz-âwâ</i>	'sun-set' (<i>âwâ bôn</i> 'set')

Inverted,

<i>birâ-zâwê</i>	'best man' (brother of bridegroom)
<i>gul-buhâr</i>	'marigold' (flower of spring)

<i>kuř-xāl</i>	'cousin' (son of maternal uncle)
<i>kūra-gēč</i>	'lime-burning-pit' (pit for lime)
<i>šin-bāb</i>	'stepmother' (wife of father)

and, with the compound vowel,

<i>āv-a-māst</i>	'curds and water mixed' (water of curds)
<i>bar-a-āš</i>	'millstone' (stone of mill)
<i>šālk-a-pūnk</i>	'mint sweetmeat' (lump of mint)
<i>šān-a-sar</i>	'headache' (ache of head)

(ii) A verbal stem, or past participle, restricted by a preceding object, e.g.

Stem:

<i>didān-kēš</i>	'dentist' (tooth-puller)
<i>das-gir</i>	'fiand(c)' (hand-holder)
<i>mēr-kuš</i>	'murderer' (man-killer)
<i>māsi-gir(ik)</i>	'kingfisher' (fish-catcher)
<i>sar-lō</i>	'bath-attendant' (head-washer)

[cf. *sar-lōk* 'bath-house']

Participle:

<i>das-bardāy</i>	'spendthrift' (hand-opened)
<i>kār-kirī</i>	'adorned' (adornment-made)
<i>šil-dāy</i>	'bulging' (bulge-given)
<i>xūn-girtī</i>	'bloody' (blood-seized)

(b) Descriptive compounds consist chiefly of a noun qualified by an adjective or, rarely, a noun in apposition. The latter follows the noun qualified in

bā-kurōva 'sleet' (wind—fine snow)

A qualifying adjective may precede the noun it qualifies, e.g.

<i>mē-kaw</i>	'she-partridge'
<i>faš-māl</i>	'black tent'
<i>xiř-bāb</i>	'stepfather' (barren-father)

or follow it. e.g.

<i>dahla-řaš-ik</i>	'blackberry bush' (thorn—black)
<i>kunamērū-sūār</i>	'long-legged ant' (ant—mounted)
<i>māsi-xiř-ik</i>	'tadpole' (fish—spherical)
<i>pax-kūvi</i>	'moufflon' (sheep—mountain, wild)
<i>tū-miri</i>	'inedible mulberry' (mulberry—dead)

and, with a compound vowel,

Am. <i>kîrm-a-şêr-ik</i>	'caterpillar' (worm—red)
<i>kêx-a-fal</i>	'cockchafer' (beetle—black)

There is a small group of descriptive compounds formed with the negative prefix *na-*, e.g.

<i>na-hîl</i>	'un-conscious'
<i>na-xêl</i>	'un-well'

§ 319. Secondary Adjectival compounds may be possessive or prepositional.

(a) The Possessive compounds are generally descriptive compounds with possessive meaning, e.g.

<i>du-fû</i>	'two-faced'
<i>girân-bâ</i>	'one who sells dearly'
<i>xîla-qûn-k</i>	'dragonfly' (straw—tail)

and, inverted,

<i>bên-şang</i>	'impatient, depressed' (breath—tight)
<i>êrîk-dirêş</i>	'boring, garrulous' (story—long)
<i>dû-maqar-ik</i>	'earwig; swallow' (tail—scissors)
Zx. <i>hasî-şirîk</i>	'handsome' (bone—light)
<i>xûn-şîrîn</i>	'handsome' (blood—sweet)
<i>nêvêlêv-şîn</i>	'glum' (forehead—blue)
<i>sar-fûl</i>	'bald' (head—bare)
Am. <i>sar-falî</i>	'dragonfly' (head—spindle)
<i>pirê-xar</i>	'blond(e)' (hair—yellow)

(b) The preposition *p* forms an infinite number of adjectival compounds, e.g.

<i>p-lak</i>	'armed'	<i>p-jânâl</i>	'easy'
<i>p-hîv</i>	'hopeful'	<i>p-hyârî</i>	'attentive(ly)'
<i>p-hawar</i>	'happy'	<i>p-tîlî</i>	'pregnant'
<i>p-lax</i>	'in a hurry'	<i>p-xabar</i>	'faithful'

Other examples of prepositional compounds are:

<i>bê-xêl</i>	'tasteless' (without salt)
<i>bar-dast</i>	'available' (before hand)
<i>bar-pîrs</i>	'responsible' (before questioning)
<i>pêl-lêv</i>	'famous' (before eye)
Am. <i>t-xaw</i>	'asleep' (in sleep)

Suffixes

§ 320. The following suffixes form nouns:

(a) Abstract

-I, forms abstract nouns from adjectives, e.g.

'ēfizi 'anger', *girāni* 'famine', *kōrai* 'blindness', *lāyiqi* 'suitability', *siviki* 'ease', *ṣārī* 'coldness', *ṣyārī* 'attention', *tūṣai* 'peevishness', *xūndāri* 'feud'.

-āi, -āti, -yāti, likewise form abstract nouns of measure or quality, e.g.

dirēzāi 'length', *pānāi*, *pānāti* 'breadth';
duṣmināti 'enmity', *kičikāti* 'smallness', *kavnāti* 'age',
māzināti 'bigness', Bar. *māzināti* 'rulership';
sōryāti 'redness', *sivikyāti* 'flippancy'.

-ini, -āni, form abstract nouns of state, e.g.

dōstini, *dōstāni* 'friendship', *havālini* 'comradeship';
lāvāni 'youthfulness'.

(b) Diminutive

The following suffixes form derived nouns of various meanings, some of which may be classed as 'diminutive'. Often the meaning of the simplex is completely unaltered and the suffix is optional.

-(i)k, Am., &c., generally -(i)k,

Am. *āxūriḱ* 'sandfly', *bālṣiḱ* (-iḱ) 'pillow', *bariḱ* 'pebble, fruit stone', *bēriḱ* 'shovel', *baṣiḱ* (-iḱ) 'rug', Am. *barxiḱ* 'lambkin', *dōriḱ* (-iḱ) 'round loaf', *guhāriḱ* (-iḱ) 'ear-ring', *hirmi*, Am. *hirmiḱ* 'pear', *ṣōlān*, Am. *ṣōlānḱ* 'hammock', *liḥṣiḱ* (-iḱ) 'quilt'.

-ōk, Am., &c., -ōk,

bināṣṭōk 'violet', Am. *banōk* 'terebinth tree', *banṣṭōk* 'chewing gum', *bāzinōk* 'armlet', *bizmārōk* 'corn, callus', *dudavōk* 'pickaxe', *kaṅgir(ōk)* 'edible thistle', Zx. *liṣāvōk* 'bridle', *qalaṣṭōk* 'nose-stud' (*qalaṣi* 'clove'), *ṣayrōk* 'butterfly', *ṣimānōk* 'uvula'.

-hiḱ, -lka, (rare)

ṣipiliḱ 'egg-white'; *pētālka* 'mosquito', **piṣiliḱ* or **piṣilka* 'kitten' in *piṣilkā mirā* 'thistledown'.

-*ôlik*, (rare)

baqmârôlik 'type of lizard', *dâpîrôlik* 'spider'.

(c) Concrete

-(a)-*vân*, -*î*, form nouns of trades or skills, e.g.

âlavân 'miller', *barsavân* 'lambherd', *kâravân* 'kidherd',
fazavân 'gardener'; *nêlîrvân* 'hunter', Am. *fanûrvân*
'baker';

êdî 'teashop-keeper', *laymaî* 'sapper'.

-*kar*, -*kâr*, form nouns and adjectives meaning 'doer, maker of . . .',
e.g. *latkar* 'aggressive, fighter';

hârikâr 'helper, assistant'.

-*ân*, -*âna*, -*ânê*, form names of games, e.g.

hêlân 'polo'; *çamkâna* 'hockey';

dâmânê 'draughts', *gêlânê* 'football', *katikânê* 'five-stones',
lukmânê 'boxing', *muhr-ê-xatânê* 'heads or tails', *mâtânê*
'marbles', *sartîrînjân(ê)* 'chess', *xê-lêk-dânânê* 'wrestling'.

§ 321. The following suffixes form adjectives:

-*î*, forms adjectives from nouns, e.g.

bîrî 'underneath', *gundî* 'village, rural', *pîrêrî* 'pink, onion-
coloured', *qahqahî*, Shn. *qahqahî* 'brown, coffee-coloured',
qirêrî 'dirty, filthy'.

-*êk*, Zx. -*ê*, rare, forms adjectives of quality from nouns, e.g.

tîrêk 'cowardly';

Zx. *gîlîzê* 'dribbling, slobbery', *kîlmîê* 'snotty'.

-*dâr*, forms adjectives meaning 'possessed of . . .', e.g.

birîndâr 'wounded', *dayndâr* 'indebted', *kêvândâr* 'injured',
xândâr 'at feud'.

§ 322. (a) The 'regular' Intransitive verb is characterized by the
past stem Ak., &c., -*yâ*-, Gul., Zx. -*hâ*-, infinitive -*yân*-, -*hân*-,
present stem -(y)-*ê*-, -*hê*- respectively, e.g.

Ak. *bîryân*, *bîryê*-, Zx. *birhân*, *birhê*- 'cease'

Ak. *gafyân*, *gaf(y)ê*-, Gul. *gafhân*, *gafhê*- 'wander'

Ak. *fîzyân*, *fîzyê*-, Zx. *fîzhân*, *fîzhê*- 'pour'

The corresponding Transitive verb is a Causative formation from the same stem (v. § 298).

(b) The same morphemes, Intransitive *-yā-*, *-yē-* (Gul., Zx. *-hā-*, *-hē-*), Transitive *-ānd-*, *-in-*, also form verbs from 'loan-morphemes' of Arabic origin, e.g.

Ak. *'alamāndin*, *'alamīn-* 'teach' (Ar. *'alima*)

ḥabāndin, *ḥabīn-* 'love' (Ar. *ḥabba*)

ḥalyān, Zx. *ḥalhān* 'melt' (Ar. *ḥalla*), *ḥalāndin* 'melt'

qatyān, Gul. *qathān* 'finish, come to an end' (Ar. *qaṭa'a*),

qatāndin 'finish, bring to an end'

In Zx. the morpheme *-āndin* may also form infinitive verbal nouns from Transitive present stems although the past stem is not in *-ānd-*, e.g.

Zx. *daynā-*, *dayn-* 'put down' : *daynāndin* F. 'putting down'
nivīsi-, *nivīsi-* 'write' : *nivīsiāndin* F. 'writing'

PART IV

DIALECT GROUPING

§ 323. Of the historical sound-changes which distinguish dialects *within* the Kurdish family two may be considered of major significance. As will be seen, both are reflected in the morphology of the dialects.

(a) OIr. inter- and postvocalic *m*, *p* yield *o* in all the dialects described in Part III except Sur. (viz. Ak., Am., Bar., Gul., Zx., Shn., Bot., Rwn.), *w* in all the dialects of Part II and Sur. (viz. Sul., War., Bin., Piž., Muk., Arb., Rdz., Xoš., Sur.), e.g.

	Ak., &c.	Sul., &c.	
Av. <i>gāman-</i>	> <i>gāo</i>	: <i>han]gāo</i>	'pace'
<i>hāmina-</i>	> <i>hāoīn</i>	: <i>hāwīn</i>	'summer'
<i>nāman-</i>	> <i>nāo</i>	: <i>nāo</i>	'name'
Av. <i>āp-</i>	> <i>āo</i>	: <i>āo</i>	'water'
<i>xlap-</i>	> <i>lao</i>	: <i>lao</i>	'night'
* <i>śiu.pāna-</i>	> <i>śiōān</i>	: <i>śiōān</i>	'shepherd'

This development of *m* affects the proximate demonstrative adjective. In Ak., &c., the forms *ao*, &c. (§ 277) < OIr. *ima-* are distinct from the remote demonstrative *aw*, &c. < OIr. *awa-*. In Sur., Muk., and the Sor. dialects the two demonstratives fall regularly together in the forms *aw*, &c. Only in Sul., War. is the *m* irregularly preserved, and with it the distinction between proximate and remote demonstratives *am:aw* (§ 192) (cf. Barr, op. cit., p. 183, Ann.).

The development of *p* is reflected in the common preverb Ak., &c., *va*, -(a)*va* (§ 300 (a)), Sul., &c., -(a)*wa* (§ 235), cf. NP *bāx*, *vā* (Mann, Muk. § 59) < **apāčā* or **apāk-* respectively (Henning, ZII. 9. 231).

(b) The regular outcome of OIr. suffix *-aka* in Kd., reflected even in loanwords of the NIr. period, appears to be War. *-iğ* (*Sinağ*, &c., *-iğ*), Sul., Bin., Piž., Muk., *-aw*, *-a*, Arb., Rdz., Xoš., Sur., Ak., &c., *-ī*, e.g.

	War., &c.	Sul., &c.	Arb., Ak., &c.	
<i>Sinat</i>	<i>daxig</i> :	<i>daxu</i> :	<i>daxi</i>	'thread'
	<i>hafig</i> :		<i>haŋi</i>	'mud'
	<i>māxig</i> :	<i>māxu</i> :	<i>māxi</i>	'gall-apple'
	<i>fōxig</i> :	<i>fōxu</i> :	<i>fōxi</i>	'fasting'
	<i>tinig</i> :	<i>tinu</i> :	<i>tēni</i>	'thirsty'
<i>War.</i>	<i>xāniḡ</i> :	<i>xānu</i> :	<i>xāni</i>	'house'
	<i>xīniḡ</i> :	<i>xīnu</i> :	<i>xīni</i>	'alive'

This development is most regularly seen, however, in the past participle of all verbs (§§ 213, 288) < OIr. *-ta-ka-, e.g. Wār. *hātiḡ*: Sul. *hātuw*: Arb., Ak. *hāti* 'having come'.

§ 324. Other sound-changes are best epitomized by a comparison of the phonemic systems of the various dialects. Of those studied:

(i) War. is alone in possessing the allophone *g*, i.e. continuant realization of *g* (§ 64 ff.). War. is also the only dialect to show the regular reduction of intervocalic *b* to *w* (§ 62), of *-iwi-* to *-ū-* (§ 75), and of *st* to *s* (§ 74 (b)).

(ii) War. and Sul. are marked off from all other dialects by the phoneme *ŋ* (§ 24), the diphthongs of class (iii) (§§ 50, 53), and by the reduction of *nd* to *n* or *ŋ* (§§ 57 (a), 74 (a)) with its bearing on the causative conjugation, *-āndin* > *-ānin* (§ 233).

(iii) War., Sul., Bin., Piž., ? Muk. alone have *o* (§§ 47, 72), and *l* (§ 14).

(iv) Arb., Rdz., Xoā., Sur. regularly replace *l* by *r* (§ 98). Other dialects have *l* for Sul., &c., *l*, *l*. The same dialects, Arb., &c., regularly have *ɕ*, *ʃ* for common *ɕ*, *ʃ* (§ 82).

(v) Sur., although it has the same phonemic system as Arb., is marked by a number of phonetic divergences (§ 102 ff.).

(vi) The dialects of Ak., Am., Bar., Gul., Zx., &c., are differentiated from those of Sul., &c., by the 'emphatic' phonemes *ɕ*, *ʃ*, *ʒ*.

(vii) The dialects of Am., Bar., Gul., Zx., Rwn. present two groups of consonant phonemes, aspirate and unaspirate *k*, *t*, *p*: *k*, *t*, *p*. (§ 157), in opposition to Sul.-Ak. (and possibly Shn., BX, &c.) which have only one, aspirate, series *k*, *t*, *p*.

(viii) Ak., Am., Bar., Gul., Zx., with Hak. and Bot., form a

unique group with the modified realization of *ê*, *û* as [u:, y:] (§§ 147, 160 (a)).

A further, but less definite, distinguishing feature between certain dialects, here represented by Sul. and Ak. respectively, is the incidence of consonant groups. The difference between Sul., with some eighty possible initial groups, and Ak., with little more than a dozen, is most striking. On the other hand, the 'algebraic' realization of secondary consonant groups in Ak., Am., &c. (§§ 154, 159), is not found in Sul., &c.

§ 325. The main line of distinction between what may conveniently be called N(orthern) and C(entral) dialects can be seen to run between the dialects of Ak., Shn., &c., on the one hand and Arb., Rdz., Muk., &c., on the other, with Sur. necessarily taking an intermediate position. On either side of this line there appear, apart from the phonetic items mentioned above (§§ 323 (a), 324 (vi)), a number of contrasting morphological features.

(i) A major distinction lies in the system of personal pronouns—with suffix forms in the case of the C. dialects, including Sur. (§ 196), without suffix forms in the N. dialects (§ 275).

(ii) The suffix pronouns have a variety of functions (§ 197 (b)) of which the most characteristic is that of Agent in the Agential construction of the same C. dialects (§ 223). This construction, with its obligatory Agent, contrasts with the simpler Passive construction of the N. dialects (§ 296). The contrast is heightened by the faculty of the C. dialect verb for taking two verbal endings (§ 230). In Bin., Piž. alone of the C. dialects is there any reflection of the N. construction (§ 225, *Note*).

(iii) Apart from the Passive construction of the past tenses of all transitive verbs the N. dialects have no Passive conjugation. A present Passive can only be expressed by a periphrasis (§ 297). In contrast, all the C. dialects have a fully developed secondary Passive conjugation (§ 231).

(iv) While an indefinite nominal suffix appears in all Kd. dialects in the form *-êk* or *-ak* (§§ 176, 259) a corresponding definite suffix *-aka* is found only in the C. dialects, including Sur., and to a lesser extent in Ak. (§§ 174, 258 (b)). Cognate with this there appears a general demonstrative suffix *-a* in all C. dialects (§ 175), which is restricted to proximate demonstrative use in the N.

dialects Sur., Ak.-Zx. Both *-aka* and *-a* commonly appear in conjunction with the open compound construction (§ 185), which is not found in the N. dialects.

§ 326. In the main the systems of nominal inflexion for number, gender, and case, and including the Izafe, are contrasted on either side of the same line. A number of Northern features do, however, appear in modified form below the line. Thus:

(i) All N. dialects have a distinction of grammatical gender in the Singular, manifest in the case endings (§ 261) and the Izafe (§ 264). This distinction is preserved in the C. dialects of Muk., Arb., Rdz., Xoš., but only in the case endings (§ 180). With the gender distinction preserved in the Bin., Piž. (Muk.), Izafe (§ 183), and 3rd singular personal pronoun oblique (§ 196), as well as in the nominal case endings, these dialects go together with the N. dialects more closely.

(ii) Corresponding to the Singular Oblique case endings the N. dialects have an exclusively Oblique Plural ending *-ā(n)* (§ 261 (a)). This same ending forms a general plural in all C. dialects (§ 177), whether the dialect has a case system or not.

(iii) The specifically Plural Izafe forms *-ēt*, &c., of the N. dialects (§ 264) are found also in Bin., Piž., Muk. *-ī da* (§ 183 (c)).

§ 327. The verbal systems of the various dialects offer the following contrasts:

(i) While all dialects from Bin., Piž. northwards have a modal prefix *da-* (§ 206 (a)), or *t-* < *dī-* (§ 281 (a)), Sul. and War. have *a-*. This must be taken as a separate entity (with Barr, op. cit., p. 221, Anm.), and not as a form of *da-*, since initial *d* is not lost completely in any dialect (cf. § 8). Moreover, the two prefixes appear together in Rdz., Sur. where *d* is quite stable, but *a-* may here be a later borrowing.

(ii) The formation of a Future tense with an independent modal particle *dē*, &c., is restricted to the N. dialects, including Sur., Rwn., Bot. (§ 281 (b)). The temporal and other use of various forms of Izafe with the verb (§§ 309, 313) is likewise a feature of the N. dialects from Sur. to Rwn., with no counterpart in the C. dialects.

§ 328. From the following diagram it will be seen that there are two major lines of division between the dialects treated here:

(a) that between Arb. (Sur.) and Ak., dividing North from Centre, and

(b) that between Sul. and Bin., &c., dividing the more archaic Central dialects (Sor. and Muk.) from those of Sul. and War., with their leaning towards the Southern group.

324 (vii)	NIL				Unaspirated stops
